

Advance Showing OF FALL Suits and Coats

**"THE
Palmer
GARMENT"**

You will find an early visit to our store a most enjoyable event. It will give you the opportunity of being among the first to see and examine our beautiful Exhibit of Women's and Misses Apparel for Fall and Winter wear.

The new fashions are now ready for your inspection. You will enthuse when you see what we have arranged for you. The selections were made from the leading Fashion Centers. The smart and exquisite styles in Coats, Suits, Dresses, Waists, Skirts, Etc., will delight you and the moderate prices will appeal to you.

We would deem it a pleasure to have you call. You will receive every attention and we assure you that you will find the display most interesting.

ADAMS DEPARTMENT STORE

OREGON CITY'S BUSY STORE

THE FASHIONS

New York, August 26, 1915.

When we think of bazars, we naturally conjure up pictures of fancy work in the name of charity, even the wholesome odor of crullers and the picturesque white-iced cake. Mrs. Thompson on the corner made a specialty of—but bazars have outgrown this home atmosphere and to-day have become bazars of fashion. No longer do you attend to buy Christmas gifts and goodies, but more properly to learn what to wear and when to wear it, or, perchance, to show your own new dress.

Fashion Fetes in the Name of Charity
Newport is the setting for some of these bazars. Here on the spacious lawns of country homes, mannequins display the very latest modes from Paris vying in smartness with the women who come to see them. There are tableaux and grand promenades and best of all you can sip tea and view them with a conscience free from guilt, for your entrance fee goes to sweet charity.

A Costume of Satin-striped Faille Showing the New Gauntlet Cuff and Pleated Skirt

The latter part of last week the bazaar of the season was held at the home of one of the leaders of the Newport set. In artistic tableaux, backed by Grecian summer houses, all the summer modes were reviewed and predictions made for the coming season.

Striped Faille a Favored Fabric

Every dress showed at least two materials; heavy faille silk was a favored fabric. One tall blonde mannequin wore a dress of striped satin and grosgrain silk which was particularly new and attractive. Its simplicity baffles description, its charm being in the clever use of the stripes. The skirt had a pleated lower section, kilted one might say, for it was straight and laid in deep folds from the hip to the bottom. This was cut with the stripes crosswise, while the yoke, waist, and cuffs had the stripes straight up and down. There was a sheer vest and Quaker collar of crisp white Swiss, and sleeves of black Georgette crepe, making a striking contrast with the cuffs of the silk.

Skirts Short and Shorter Still

There seemed to be no limit to the shortness of the skirt. The costume just mentioned was worn with white kid shoes and the skirt was so short that at least an inch of the stocking showed between the top of the shoe and the bottom of the skirt. Indeed, many of the mannequins looked like school girls, but shoes are fancy and skirts are obviously short to show them. Women want their money's worth. As I watched the mannequins, I could not help thinking of the little boy who went without his coat in December to show his new suspenders.

Braid Introduced as Hat Trimming

There were many new things introduced. Perhaps the most interesting notion was Hercules braid as hat trimming. There is no question of the popularity as dress trimming, but for hats, the idea was certainly unique. It was used in three flat bands on the velvet brim of a sailor, while the crown was white satin trimmed with beads. This was sent by a New York modiste.

The Parasol Reverses Its Handle

It was decidedly a showing of every thing milady needs for a complete wardrobe. The accessories were as startling as they were smart. One of the girls carried a parasol with a swan's head handle on the top, while what naturally would be the handle tapered off into the cap of the walking stick. Though a bit top heavy, the effect, when opened, was attractive.

Enter the Frock with Floating Panels

Styles were not confined alone to the mannequins. Society took a keen interest in the cause and there were many notables present. It seemed as if every one had put on their best bib and tucker for the occasion. One woman who is summing in Maine came down to be present at the fete. Her gown was one of the new combinations of blue serge and Scotch plaid taffeta. When she stood still the skirt appeared to be of the serge, but when she moved it broke up into floating panels displaying a medium width underskirt of the plaid. This matched a shoulder and sleeve section, while the serge was used in a bib effect on the waist and for the deep cuffs.

Silks and Serges the Fabrics of Fall
Many similar effects were to be seen. Serge seems to be even more popular than in past seasons. This is, no doubt, due to the fact that it is so hard for the French mills to weave their novelties. However, the serges

are smart and the women seemed

The Dress with Floating Panels Feat-

uring a Smart Combination of

Plaid Taffeta and Serge

content to use these in combination with the taffetas and failles. There were some smart effects with striped taffetas and the plain dark blue grosgrain combined with serge made rich dresses. Scotch plaids were much in evidence, but the tones were so dark and rich they could scarcely be said to contrast with the blue.

Russian Boots Again in Evidence

Several of the women were booted according to the Russian fashion. The woman who wore the floating panel dress described above, had the long boots in black patent leather. They were made the same as riding boots, wide enough at the ankle for the foot to slip through. There were other Russian boots in fawn leather trimmed with tan; one of the mannequins wore a pair of white kid boots trimmed with black patent leather.

Society Vies With the Mannequins

Indeed, society seemed to be booted and gowned as smart, if not smarter, than the mannequins themselves. The whole atmosphere breathed of fashion. There is something really fascinating about these women, slipping tea and watching women wear the gowns that they themselves may wear later on.

TO TALK GRANTS

Governor Outlines Plan of Conference on O. & C. Problem

To endeavor to reach some settlement in regard to the Oregon & California railroad grant lands, Governor Withycombe has outlined the scheme under which a conference will be held in Salem in September, commencing September 16.

Invitations to take part in the proceedings have been issued to Members of Congress and of the Legislature, and heads of Federal departments.

The County Court of every county embracing Oregon-California lands has been invited to appoint five representatives, one of whom shall represent the court, one at least shall be chosen as a representative of an accredited tax-payers' organization, and one at least of a community or commercial organization.

The County Court of every county having no O.-C. grant lands has been asked to appoint one representative.

The State Federation of Labor, the State Grange and the Farmers' Union have each been invited to appoint ten delegates to be selected from counties embracing O.-C. lands.

The Oregon Development League, the State Banking Association and the State Press Association have each been asked to appoint three delegates to be chosen from counties embracing O.-C. lands. Any other statewide accredited organization having direct interest in the questions involved may be eligible for representation, at the discretion of the Committee on Procedure.

The Southern Pacific Railroad Company has been asked to be represented to state its case as it sees fit and to offer such suggestion a seem desirable.

All details for the conference, such as preparing preliminary program, will be in the hands of a Committee on Procedure, consisting of nine members, who shall be chosen by the Governor from (1st) the Legislature; (2nd) the Portland Chamber of Commerce; (3rd) the State Grange; (4th) the State Federation of Labor; (5th) the Oregon Conservation Commission; and four representatives selected from the counties containing O.-C. Lands.

Say, Mr. Farmer, winter is coming on and you will be interested in local questions, eh? Take the Courier—a local live-wire.

YET MORE ABOUT IT

Eugene Paper Doesn't Think Much of George's Idea

Oregon's prohibition law has been severely criticised by George C. Brownell, of Oregon City, because, he says, it will not prohibit and that enforcement will almost be impossible. The people voted the state dry but the legislature, according to Mr. Brownell, legislated it wet by permitting shipments of liquor in any quantity.

In order to testify as an expert Mr. Brownell cited the fact that he was county attorney in Kansas for six years after the prohibition law went into effect. Wide open saloons were running when he took the office and they were still running when he left it.

This is not such a severe indictment of the Kansas law as it is of the prosecuting attorney who failed to enforce that law. Prohibition, like any other statute, must be enforced to be effective and when prosecuting attorneys and police officers fail to do their duty, failure of any measure is certain. It is probably true that there are defects in the present prohibitory law, but these can not be remedied until there have been tests to locate the defects. But Mr. Brownell and others like him, need not get excited over the enforcement of the law after January 1, 1916.

It would be worse than folly to attempt to amend a law that is not clearly understood either by the people or the courts. No law was ever made perfect from the very beginning. It must be tested to locate the weak spots. The enforcement of Oregon's dry law will test the metal of prosecuting attorneys, and if some of them fail it will not altogether be the fault of the law or the prosecutor. Part of the responsibility will fall on the people and if the people place men who are not in sympathy with the movement in responsible positions then the people and not the law should be blamed.

That Oregon will have some trouble goes without saying for the liquor interests will not give up until they are not only beaten but absolutely helpless and the octopus dies very hard and very slowly.—(Eugene Register.)

FORESTS FOUND USEFUL

National Reserve Land Put to Many Services in Year

According to figures just compiled by the Forest Service, the Forest Supervisors issued during the fiscal year ending June 30, 1915, permits for 589 different special uses on the National Forests of Oregon, Washington and Alaska.

In the National Forest Manual, special uses are defined as "all uses of National Forest lands and resources permitted by the Secretary of Agriculture, except those specifically provided for in regulations covering water power, timber sales, timber settlement, the free use of timber and grazing." These special uses are many and varied. A glance at the list shows such uses as boat-landings, residences, log chutes, railroads, dams, telephone, wagon roads, dairies, camp sites, flumes, ditches, stores, schools, churches, hotels, corrals, cabins, and the like.

In the forests of Washington are a few uses somewhat unusual in nature—a water trolley on the Chelan Forest, an apiary on the Olympic, a fish hatchery on the Colville, an aerial tram on the Wenatchee Forest. In Oregon the special uses are still different—a slaughter house on the Cascade, signboards on the Deschutes, a brick-kiln on the Minam, smelter and stamp mill on the Siskiyou and a cyanide plant on the Umpqua. Of the number of permits issued in Washington and Oregon for the year, 265 were free and 170 charge permits.

Albert Roake, C. H. Dye and two sons, Trafton and Everett, arrived in Oregon City Wednesday evening, having completed an auto trip to Crater Lake and southern Oregon.

HIS FRIEND THE RAT.

The Mine Disaster Story That Went With a Stuffed Rodent.

Any man who will keep a stuffed rat in his room wherever he goes must have a story to tell about the rat. This man has.

"This story," he said, "concerns an experience that made my hair curl. I am an engineer. I was once retained to report upon the working of a mine in southern Arizona. The mine was called the Barbara. On an adjoining claim was another mine called the Hyperion. A dispute arose. The Hyperion people claimed that the lower levels of the Barbara had been bored into their ground and half a dozen fortunes in ore taken out of their mine.

"The first thing to do was to make a survey of the Barbara. The Barbara people, of course, objected. Finally, an order for the survey was secured from the court, and I was sent, with a man named Jim Banks, to make the survey.

"There are tricks in all trades, and the Barbara representative knew a few in his. When we reached the mine he said that the tunnel we wished to explore was in a dangerous condition. There had been a cave-in, the timbers were rotted, and so on.

"We classed him as a liar, though he turned out to be right. We worked our way into the tunnel until we ran against a jam of fallen timbers. The timbers, however, were sound and had plainly been arranged to stop our progress. Banks went back for an ax, while I worked at the roof with a pick to dislodge the center pieces.

"I succeeded and had climbed halfway over into the other side of the tunnel when there came a terrific crash of loose ore from the roof. It fell on both sides of the timbers, pinning me in a hole which would have been a grave but for a few sticks which held the mass of ore above.

"The place was barely large enough to move in, and I knew it was certain death in a few hours unless Banks could dig me out.

"The foul air was getting into my brain, and I think I was actually insane with the fearful dread of being buried alive.

"I had given up all hope and was almost swooning when I heard a strange, scraping sound above me. I yelled, but received no answer. With new energy I threw my body against the walls and tried to pick out the ore from between the lodged timbers. Still came the queer scraping noise, which seemed to come nearer and sounded not unlike the steady grinding of a saw. It seemed to last for hours, though it could hardly have been a minute after when a bit of earth dropped to my feet from the upper end of the wall, and along with it came a big gray mine rat.

"That rat saved my life, for he left a clear hole for his trail, and through it came a breath of fresh air that gave life to me. The fellow had bored his way through from the shaft side of the cave. I stayed there two hours after that, until Banks found the cave, got help and dug me out without breaking the alrhole.

"I caught the gray rat too. I kept him fed up like a king until he died, and I wouldn't take a lot of money for his skin now."—New York Times.

The Curse.

An Irish authority thus defines as an expert the effects of a well delivered curse: "The belief among the ancient Irish was that a curse once pronounced must fall in some direction, if it has been deserved by him on whom it is pronounced it will fall on him sooner or later, but if it has not then it will return upon the person who pronounced it. They compare it to a wedge with which a woodman cleaves timber. If it has room to go it will go and cleave the wood, but if it has not it will fly out and strike the woodman himself who is driving it between the eyes."—London Globe.

Enough Knowledge.

"Did you ever stop to think," said the shopkeeper recently as he measured out half a peck of potatoes, "that these potatoes contain sugar, water and starch?"

"No, I didn't," replied the boy, "but I heard father say that you put peas and beans in your coffee, and add a pint of water in every quart of milk you sell."

The subject of natural philosophy was dropped.—Chicago Herald.

ASTOUNDING MEMORIES.

Horace Vernet is the best example of visual memory. He could paint a striking portrait of a man, life size, after having once looked at his model. Mozart had a great musical memory. Having heard twice the "Miserere" in the Sistine chapel, he wrote down the full score of it. There are soloists who during twenty-four hours can play the composition of other masters without ever skipping a note.

Pike's Error.

Lieutenant Pike, whose name adorns a lofty peak, was once sent to build a fort near the Mexican (Texas) border. He slipped up on his geography so badly as to place the structure well within foreign territory. It has been believed by many that his orders made ample allowance for such an error.

Entertaining.

Willis—Did they have a good time at your reception last night? Gillis—Yes, the guests enjoyed it hugely. All my wife's arrangements went wrong.—Boston Journal.

The word "tomorrow" was invented for treacherous people and for children.—Turgenev.

HINTS FOR SCHOOLS

Superintendent Calavan Sends out Suggestions to Directors

Most of the county schools will resume operations this year on September 27, and owing to the fact that hopping has started early, indications are that attendance will beat all previous opening records. County School Superintendent Calavan, in preparation for the resumption of school activity, has sent out a series

of suggestions to all district boards of directors.

Mr. Calavan suggests that all school buildings be fumigated, and if in need of repairs or repainting, that the work be done at once, so there shall be no interference with the opening. All outbuildings should be put in first class shape, he adds, and grounds cleared of weeds. Attention is also called to the need of purifying water supplies, and to seeing that winter heating apparatus is in working order.

In concluding his suggestions, Mr. Calavan says:

The law requires that no teacher shall begin a term of school until his or her certificate and contract have been registered with the county superintendent. Kindly see that your teacher meets these requirements before permitting her to begin her school.

The 1915 school law provides that if you increase your tax levy more than 6 per cent over that of 1913 or 1914, it will be necessary to post your notices 30 days. In as much as the valuation of the railroads and other public service properties are not placed on the assessment roll until after December 1, it will be difficult to determine exactly the amount of money which a certain special tax levy will bring. In order to be sure that your levy will be legal, I would suggest that you post your notices 30 days. Your levy must reach this office by December 1."

Ridiculous Presumption.

"What had you been eating?" "Corn beef and cabbage, doctor. I think I have a touch of ptomaine poisoning."

"Nonsense! Ptomaine poisoning goes with imported caviar and canned lobster. What you have is a case of stomach ache."—Louisville Courier-Journal.
