Most Awkward.
 An old, steady going farmer was accustomed to ride to the market town upon a rather bad tempered horse. One day his man Bob brought the animal, which was especially vicious that morning, to the door, the horse trying to bite and kick and giving a good deal of trouble.

The farmer mounted the horse with some difficulty and began to walk it out of the yard when Bob, who still entertained ill feeling against the animal, picked up a stone and flung it at him with all his force; but, alas, his aim was erratic, and the missile struck his master on the head.

Half dazed for a moment, the farmer turned slowly in his saddle, and, not suspecting the real cause of the blow, he measured with his eye the horse's hind hoofs and his own head and, settling himself in the saddle again, started off with the remark, "Well, he alius was an okard beggar."—London Mail.

Karlruhe's First Family.

Sleepy Karlruhe is amusingly depicted by Sir Horace Rumbold, who passed a dull part of his diplomatic career there. He found Karlruhe society entirely composed of half a dozen families of long descent and small means, who had intermarried for generations. Whoever was not a Gemmingen was a Hardenberg or a Duereckheim or an Amerongen. Talleyrand had a tale of his first visit to the Karlruhe theater. "Who is that lady in the third box on the first tier?" "That is a Gemmingen," said the young native who accompanied him. "And that general in the stalls?" "Also a Gemmingen." At last Talleyrand exclaimed, "Why, you all seem to be Gemmingens!" "Yes," said the youth in German-French, "but all are not good Gemmingens. I am a good Gemmingen—Gemmingen-Gemmingen-Guttenberg!"—London Standard.

Ben Franklin's Chair.

In his old age Benjamin Franklin's health failed him to a considerable extent. He suffered from gout and the stone, which, with complications, eventually carried him off. But he was always exceedingly cheerful, even when suffering, and, as one of his friends has recorded, "full of anecdotes and learning." Even at this time in his life he added to the already extensive list of his inventions, contriving among other things a most curious chair which, when desired, could be converted into a step ladder for the purpose of reaching the higher shelves in a library. As far as known, only one of these chairs was ever actually constructed for his own particular use, and this is owned at present by the Philosophical society of Philadelphia.

Rain.

There are so many things worse than rain that we refuse to fret about it. If we had the toothache every other day for two months straight we might growl. If an amateur cornetist lived next door and practiced regularly we should complain. If bills were sent in once a week instead of once a month; if bories never went home; if all friendship were mercenary and false in adversity; if sickness visited us oftener and stayed longer than health; if malicious people were many and the kind few we might justifiably be miserable and remain so.

But so long as so many worse things that could be don't arrive it can rain every day if it wants to. Most of our joy is weather proof.—Detroit Free Press.

Copernicus.

Nicholas Copernicus was the founder of modern astronomy. He was born in Poland in 1473. His father was a Pole, and his mother was a German. He went to the university at Cracow, where he studied medicine, theology, mathematics and astronomy. Later he devoted his whole attention to astronomy and developed the "Copernican" system, which is the one now universally accepted. It regards the sun as the center of the solar system and the planets, of which the earth is one, as revolving around it, while around the majority of these primary, one or more secondary orbs, known as moons, revolve. The first stars are regarded as suns, each with its own planetary system.

The Vatican.

The Vatican was not originally intended as a place of residence. Comparatively a small part of it is now residential; the remainder serves the purposes of science, art and the administration of the Catholic church. Of the 1,000 rooms in the great palace 200 serve as residences for the pope, secretary of state and the other high officials of the church.

Caught With the Goods.

"How do you happen to be in prison, my poor friend?" "Because I was a man of property," said "I don't understand." "Yes, see, mum, it wuz other people's property."—Birmingham Age-Herald.

Gray Buzzards.

The gray buzzard, now almost extinct, is said to be the heaviest bird that flies, the young male when food is plentiful weighing nearly forty pounds.

All the Same to Him.

Wife—John, there's a burglar going through your pockets. John—All right. You two fight it out between yourselves.—Exchange.

A merely fallen enemy may rise again.

THE FASHIONS

New York, September 16, 1915.

Vacation's over. The Pattys and Julias and Sallies are coming from everywhere—mountain, shore and far away homes, with pretty frocks and bright, alert brains ready to absorb all the learning possible between now and next summer. The time has come for Latin, Greek, geometry and incidentally fudge parties, candy pulls and midnight lunches, not included in the regular curriculum, therefore far more fascinating and, of course, basket-ball and the various other gymnasium stunts to help out the physical and mental machinery.

The Morning Walk

Our streets are gay with them in the early morning; these bright faced happy schoolgirls. They stride by in smart, straight-heeled shoes, Norfolk

© McCall

suits of tweed or serge, set off by chic velvet tams, hats of velour or a softly colored felt. As the days are still bright and warm, one often sees a trim serge frock with bretelles, worn with a blouse of contrasting crepe de Chine, or one of the brightly striped or dotted voiles. Our exclusive schools frown upon an elaborate wardrobe no matter how prosperous papa may be; many of them give a list of clothing required, with one thing uppermost—simplicity. This does not necessarily mean that the clothing must be ugly. The smart little suits and dresses of serge, tweed, or the attractive checks and novelty fabrics with contrasting collars and cuffs, are smart and becoming to a degree. One particularly smart little dress, worn the other morning, was of dark blue gabardine, that practical sister

© McCall

of serge, which wears so well and sheds dust and dirt so effectively. It had bretelles and a wide stitched belt of the material of the skirt and was worn with an underblouse of herringbone striped crepe de Chine, cuffed with the material of the skirt, and collared with sheer, crisp organdy. The wearer, who was a smart New York day-school girl, carried her bundle of books nonchalantly over one shoulder, and wore her velvet tam on the back of her bright hair so carelessly that more than I turned for a second look.

The Second Suit

On matinee days and Sundays the suit is a trifle more dressy, or French serge, gabardine, broadcloth, or one of the new satin-finished materials, and is trimmed with a line or two of braid or a band of fur. An attractive hat of velvet or satin and velvet with the soft, drooping brim, now modish, and just a suggestion of trimming, is most becoming to young girls. The soft, graceful tilt to the brim this season is particularly pretty and

youthful. An attractive little Miss from the southland, whose eyes are as dark as the oft quoted Spanish maidens, wore a suit of midnight blue velours de laine with high military collar of black silk braid, inset, between the rows of braid, with scarlet and gold; the scarlet and gold was repeated in the carved buttons which closed the coat, Russian fashion, on the left shoulder, in the braided girdle, and again heading the hem of the short, full skirt. With this suit, which was worn one afternoon at a concert, she wore a very simple blouse of baby-flesh pink Georgette crepe. The costume was simplicity itself, but chic, well thought out simplicity.

Top Coats, Sweaters and Gym Clothes

A warm top coat of one of the soft light-weight coatings brought out this fall will not come amiss in any schoolgirl's wardrobe; it is the handiest thing in the world to slip on over the suit for a cross-country walk or a motor trip. Our shops are showing some charmingly colored sweaters, too, for the out-of-door girl, in stripes, checks, and plain materials; for the girl who likes something "different" attractive materials come by the yard, to be made up, sweater coat fashion, with any colored collar and cuffs she may desire. No school outfit is complete without a suit of bloomers of serge or light-weight flannel for basket-ball, bar vaulting, and all the other gymnastics demanded of the healthy, athletic schoolgirl of today.

To wear with these sweaters and top coats there are round hats in woolen mixtures, with a short quill or stick-up by way of trimming, which defy snow, rain and all kinds of weather most satisfactorily.

Demand for the One-Piece Frock

It stands to reason that if the suit skirt is worn in the classroom, it will soon become shiny and shabby while the coat remains perfectly good; here is where the one-piece dress of serge or gabardine is most practical aside from its convenience and becomingness. There is nothing more suitable or comfortable than one of these simple frocks in some dark shade, with with one of the new sashes or belts in a contrasting fabric, and collar and cuffs, or perhaps a guimpe or chemisette of organdy, voile or crepe de Chine. The washable guimpe, which may be removed and laundered, appeals to many because of the possibilities it offers of freshening up the dress with a variety of guimpes.

A Word or Two on Evening Wear

One of the daintiest, most becoming frocks seen for many a season, was developed in maize colored crepe Georgette with a double skirt, a simple V-neck bodice, short sleeves and a wide sash of taffeta with hand colored ends, repeating in the large conventional rosette design the color of the frock combined with soft pink, and just a touch here and there of African brown by way of contrast. This frock was designed for a pretty New York girl to wear at an evening party. It was perfectly suited to the occasion and was suited also to the young girl who has not yet made her debut. The girl who wears the top coat with one-piece frocks, for afternoons and more dressy occasions, will find a simple frock of dark blue taffeta smart and convenient.

SAFETY FIRST, SURE

Clarence Fields Lives up to Motto of Transportation Firm

Clarence Fields, who is traffic manager of the interurban line operating in these parts, believes in "Safety First" as a slogan for all railroad Mr. Fields often tells the conductors and motormen the need of observing "Safety First" rules, and Monday of this week he gave them an example of "Safety First" practice.

Mr. Fields was riding on the front freight locomotive of a span of two of the big hauling machines that were dragging ten cars full of excursionists to Gladstone Park. As the train neared Glen Echo station, his eagle eye saw a flock of turkeys on the track ahead of the train—tame turkeys they were, too.

"Stop till I chase those turkeys off the track," said Mr. Fields to the motorman. "The rule of this company is 'Safety First,' you know, and that applies to turkeys just as much as it does to people."

With a screaming of brakes two freight locomotives and ten cars came to a jolting stop, and Mr. Fields ran down the track chasing turkeys off the right-of-way. One of the birds didn't want to go, and ran under the whole length of the train, while ten cars filled with excursionists looked on and commented. Finally "Safety First" was justified, and Mr. Fields gave the motorman the "highball," and ten cars filled with excursionists resumed their way.

Note: The point of this story is this—Mr. Fields lives at Glen Echo, right beside the tracks, and they were HIS turkeys that were in danger of being run over.

SENATOR IS EXPECTED

Chamberlain to speak at Molalla when Grange Meets

Arrangements have been made to have Senator Chamberlain here on the 18th at the Grange picnic. He will make the address at one thirty. C. S. Spence, the Master of the State Grange, will make the opening address in the forenoon.

There will be a basket dinner at noon. There will be refreshment stands on the grounds to provide for those who do not bring their dinner.

The Molalla Band will furnish music for the occasion. The committee having the arrangements in hand expect to have between two and three thousand people present at the gathering. It will probably be the biggest thing of the kind pulled off here this season.

At this time the harvest will be

HOW ABOUT IT?

Automobile as Antidote for Suicide Suggested by Paper

Every once in awhile a country editor springs an editorial on the automobile that from its language or its peculiar angle of view has a richness of humor. Then it begins to travel the length and breadth of the land—for instance the Alton, (Iowa) Times—

"The buggy business in this town has been sold, because the automobile has put the whole buggy manufacturing on the blink. Yesterday Nick Siebold sold his feed store and bought an automobile. The motor craze seems to have struck Alton amidships and about two more torpedoes of that kind will about sink the old town.

"Business is rotten and complaint is general—but people are buying automobiles like mad. They're buying them like they used to buy champagne. The rule now is 'if you are in debt head over heels, and your business is so dull that there isn't any—go out and buy an automobile.' Instead of buying a bottle of carbolic acid and drinking it, go out and buy a car, ride around and be happy. To h— with suicidal thoughts!

"The automobile craze is upon us, and this paper isn't complaining, even if people get so d—d busy riding around that they can't read it, or pay their subscriptions! Life is just one blasted thing after another, and perhaps automobilism is better than some other forms of insanity."—(Oregon Messenger.)

YEA, BROTHER; EVEN SO

C. C. Chapman Tells the Truth in His "Oregon Voter"

The county clerk who gets a 50c or \$1 commission from the stationery house, and the county commissioner who gets 10 percent from the road machinery house, are getting scarcer and scarcer.

A few are left, with their dirty mits out for a tip, and there are a few business firms still willing to risk giving these ham-sandwich handouts.

One firm in the printing line is notorious all over the Pacific Northwest for these out-of-date methods. Its business has been falling off of late, as the majority of public officials are of a higher type than the contemptible little grafters who don't know any better than to try to make pin money by sneak-thief methods.—Oregon Voter.)

Easy.

Friend—Say, Clarence, how does yo' manage to shave a gemmerman what's got de St. Virus' dance? Barber—Hob-dan's easy! I jest holds de razzah on his face an' lets him little his whiskers off to suit himself.—Puck.

U. S. BACKS JUDGE

County Official's Liking for Bituminous Macadam Well Found

The Yearbook of the Department of Agriculture gives County Judge Anderson unexpected backing in his recent declaration in favor of bituminous macadam roads. The yearbook mentions this class of road first in classifying what have been found to be the most serviceable and economical forms of highway construction in the United States. On this subject the year book says:

"The realization has become quite general that, in order to render maximum service, State highway departments should be given some measure of control over the construction and maintenance of local roads. For this class of roads an amount exceeding \$100,000,000 is expended annually, with comparatively little result to show in the form of improved road mileage for this great outlay. The State of Iowa has met this situation by placing all the road work in the State under the direction of the State highway department.

"Traffic is increasing so rapidly as to cause excessive wear upon the roads, especially in the vicinity of congested centers of population. This results in a heavy annual maintenance cost, averaging in the large eastern States not less than \$750 per mile per annum. Many experiments have been made in the effort to devise types of road which can be maintained at relatively low cost. Thus far, aside from cheaper forms of construction, the States are depending upon the various forms of bituminous macadam, concrete, and vitrified road."

FEDERAL ROAD ADVICE

Government Inquiry Shows Common Faults of County Boards

In an effort to better the less important roads of the nation, the United States has recently conducted an investigation into highway matters, and has discovered that many minor county roads are defective owing to a lack of a continuous system of maintenance. Commenting on this, a recent Government report says:

"Where a county builds a good road and soon lets it become rutty, washed out, or uneven, who or what is principally to blame? As a result of a study of conditions in a number of counties, road specialists of the department are inclined to place the responsibility upon the following defects in road management, some or all of which are found in all counties where good roads are not properly repaired and maintained:

"1. County boards, although having full administrative authority, appear not to attach to their official action in road matters the importance or legal effect which it should have.

"2. County boards do not generally have sufficient accounting control of road funds to know what is available for any particular project, where funds have been or where existing balances are to be expended.

"3. Lack of any systematic practice in handling road funds among most counties makes it very difficult to carry out over even a single year any persistent maintenance policy, be-

cause funds officially obligated for maintenance purposes are not protected against sporadic and irregular drafts for miscellaneous purposes. The greatest likelihood consequently exists everywhere that there will be no balance in the maintenance fund in the last half or third of the year, although only a part of the fund allotted may have been spent.

"4. Local labor available for maintenance work is made dissatisfied by the constant, unintelligent, and unfavorable criticism of those using the road.

"Maintenance continuing over a period of years—the ultimate indispensable condition of effective maintenance—is jeopardized by the lack of accounting control that will prevent spending next year's current income in this year.

"6. The lack of skilled supervision in construction and the effect of this in increasing the cost or in making effective maintenance impossibly expensive is everywhere seen.

"7. The county authorities are commonly opposed to following suggestions for maintenance that involve tying up road funds in any way, such as purchasing materials in advance to store along the road for making repairs or maintaining the road surface."

"Printing with a punch"—at the Courier.
