

WHAT OTHERS DO

Cow Testing in Canada Shows Herds All Make Good Averages

Increasing local interest in the work of the Clackamas county cow testing association has made a number of people wonder what such associations are doing in other sections, and what results are being obtained. Partly to answer these inquiries, and for general information, the Courier prints the following official report of work done by such associations in Canada.

For the purpose of encouraging and assisting farmers to keep records of the quantity of milk produced by each cow, so that the profitable ones may be distinguished from the unprofitable, dairy-record centers have been established in Canada under the jurisdiction of the Dairy and Cold-Storage Commissioner.

According to the report just issued by the Canadian Minister of Agriculture for the year ended March 31, 1915, 35 of these dairy-record centers were in operation in 1914.

The results are, according to the report, that "the average production of milk in Canada has been increased by 1,000 pounds per cow since this work was started. With over two and a half million cows in Canada, the value of the total annual production is thus increased by at least \$25,000,000, and the work is only just begun."

One of these dairy-record centers has been operating in the Cornwall district, and the report of the recorder concerning the results in 1914 has just been made to the Cornwall Cheese Board. The recorder states that the work has been most successful, and that increasing interest is being taken by the dairy farmers in the betterment of their herds and in the improvement of their milk supply.

In this district results were as follows:

- The average production of the 2-year-olds was 4,430 pounds milk and 170.3 pounds fat.
- The average production of the 3-year-olds was 4,718 pounds milk and 181.5 pounds fat.
- The average production of the 4-year-olds was 5,058 pounds milk and 195 pounds fat.
- All cows 5 years and over are in one class, known as "full age," and their average production was 5,639 pounds milk and 212.1 pounds fat.
- The average production of all cows of all ages was 5,336.8 pounds milk and 202 pounds fat.

RATE ADVANCE EXPLAINED

Southern Pacific Obeys Interstate Commerce Commission, It Says

Considerable attention has been attracted to a new revised commodity rate section of Southern Pacific company's California-Oregon Freight Tariff No. 729.B, effective October 15, on account of numerous advances being shown in the rates between interior points in California and interior points in Oregon.

As it is pretty generally known that most of the freight traffic between California and the North is handled by the boats, an increase in the rail rates under the circumstances seem to be an unusual proceeding in view of the great effort carriers in general are making to compete with water lines.

Upon inquiry at the General Offices of the Southern Pacific it is explained that the changes in rates were made necessary to comply with orders 4650-51 and 4783, issued by the Interstate Commerce Commission under the Fourth section of the Act to regulate commerce, commonly known as the "Long and Short Haul Clause," under which the Southern Pacific is denied the right to continue carrying between inland points, for instance Stockton or Sacramento, on the one hand, and Portland or Oregon City on the other hand, the same rates as they carry between San Francisco and Portland.

Shippers will recognize that the principle is practically the same as was laid down by the Commission under their decision in 1912, relating to the class rates between California and Oregon, which caused a general increase in interior rates at that time. The condition, generally, is exactly similar to that surrounding rates of the rail carriers on transcontinental traffic moving through the Panama Canal, and other changes will follow between Northwestern points.

STUDENTS FLOCK IN

Attendance at Agricultural College Establishes New Record

Registration at the Oregon Agricultural College at the end of the first week had reached 1255, which is a record attendance for any corresponding date in the history of the school. The total increase is very nearly 12 per cent over that of last year while the gain in attendance of the College degree courses is 16 per cent. The heaviest increase is in pharmacy, 36 per cent. The increase is 32 per cent in mining, 30 per cent in commerce, 18 per cent in agriculture, 13 per cent in engineering and industrial arts.

Student officers for the year 1915-16 at the Oregon Agricultural College are as follows: President of the Student Assembly, G. R. Hoerner, Seattle; first vice-president, M. F. Hatha, Corvallis; second vice-president, C. A. Fertig, Hood River; third vice-president, J. D. McKay, Portland; secretary, Geraldine Newins, Patchogue, N. Y.; editor of the Barometer, Oregon City; auditor of Athletics, L. F. L. Ballard, Meredith, N. H.; manager of the Barometer, D. E. Brown, Layton, Utah; senior member Board of Control, Dave Wilson, Linnton; President of Oration, Debate, V. J. Garvin, Denver, Colo.; secretary, Eric England, Portland; treasurer, R. J. Case, Portland; manager student entertainment, A. J. Funk, Corvallis.

500 CHILDREN TO WAIT ON YOU

Much That You Wear and Eat Passes Through Their Hands.

EXHIBIT VISITOR IS AMAZED.

"Why should I be interested in the working child?" asked a self-complacent lady who called at the child labor exhibit in San Francisco the other day.

"Because it touches you at so many points," replied the National Child Labor Committee's exhibit director, Lewis W. Hine. "To begin with, the flowers on your hat were undoubtedly made in a New York tenement, no matter what you paid for them. I have found four-year-old children working on such flowers."

"The 'real' imported Irish point lace you have on your collar was probably made by Italians on the east side of

Photo by National Child Labor Committee. A SEVEN-YEAR-OLD OYSTER SHUCKER WHO CAN NEITHER READ NOR WRITE.

New York. Your gloves and the buttons on your dress probably passed through the hands of children. The scalloped edge around your underwear was made by children in New England village homes, and your stockings represent the labor of children from eight years of age up.

"The cotton that goes into the cloth you use may have been picked by children of five or six and was handled by innumerable children in the course of manufacture. A spool of cotton thread represents the work of from five to twenty-five children."

"As you pass on to the market to buy your food a small boy waits on you. He represents not only your local child labor problem, but indirectly the problem of the little girl who picked your cranberries and your strawberries. Even the baskets that the berries come in represent the work of children. The oysters that you have sent home from the shop were very likely dredged by boys from eight to ten up to young manhood. Some were shucked by little ones of seven or eight. The sardines you eat may have been imported or they may have come from the coast of Maine, where children do much of the cutting and canning. Canned peas represent child labor in sorting, picking and canning."

"The coal you burn at home and the glassware you use probably passed through the hands of children. The drugs delivered to you are often brought by a boy who may have come to your house direct from the red light district. The little newsboy, the 'shines' boy, the boy who sets up pins in the bowling alley and the young usher at the movie all need your protection."

The lady gasped and begged Mr. Hine to stop. "Well," he said, "if I went into it EXHAUSTIVELY I think I could find that about 500 children had contributed to your comfort in one way or another."

A CHILD'S CREED

I BELIEVE IN BEING HAPPY
I BELIEVE IN BEING BUSY
I BELIEVE IN BEING A BOY
BYE-N-BYE - I'LL BE A MAN

GIVE US A CHANCE!
WE ARE CITIZENS TO-MORROW

For John Stark

The following is from the current issue of Farm and Fireside: "A young man who had studied in an agricultural college and had worked on a farm during the summer was asked by a professor on his return to college for his experiences. "The young man replied: "When I seek work on a farm again I want to claim the privilege of going to an employment agency and looking for a job as an ordinary hobo. I want to start even, and not with a prejudice against me because I am a student."

AMPLE AID OFFERED

Boys and Girls Who Raise Pigs Can Get Plenty of Expert Advice

Oregon boys and girls engaged in pig raising are to be given the assistance of a specialist in pork production, who will devote his entire time to the industrial club pig project. An arrangement has been entered into by the Agricultural College Extension division and the United States Department of Agriculture for co-operation in carrying on this branch of the work. The new appointee will be a member of the college extension staff and work under the direction of R. D. Hetzel, Extension Director, in connection with the State Department of Education.

In making the announcement of the new policy Professor Hetzel said that J. L. Allen, a master of agriculture from the State Agricultural College, will be recommended to the Board of Regents and the Department of Agriculture for this position. He has had extended experience in livestock production at Cove, Oregon, and has received both the bachelor and master degrees from the Animal Husbandry department of the College. Under his direction it is expected that great progress will be made in this important club work. Last year 282 members were enrolled for pig raising and this number will doubtless be doubled several times within the coming year. Farmers, stock growers and business men approve the pork production project and the state bankers association offers to lend financial assistance in purchasing blooded stock for club members.

UNCLE SAM TO HELP

Post Office Department Will "Demonstrate" Parcel Post at Show

The Postoffice Department has authorized the Portland office to install an educational parcel post exhibit at the Manufacturers' & Land Products Show which will be held at the Armory October 25th to November 13th. A similar exhibit was made last year which attracted a great deal of attention, there being something over ten thousand questions asked by interested visitors, showing that the public is desirous of learning of the many advantages of the parcel post.

This branch of the postal service is practically in its infancy, but there is no doubt that in the near future parcel post will be the means of furnishing a market for the products of the farmers, as well as supplying the farmer with facilities for the purchase of goods from a distance and having them delivered by rural free delivery direct to his home. In this connection, it may be stated that the Portland Post Office is now compiling a list of producers and the commodities they have to sell, which will be printed and distributed to the Portland consumers without cost to the producer.

The intent of the display at the Manufacturers' & Land Products Show will be to illustrate the method of preparing for shipment, and a demonstration of a line of containers and packers which are now manufactured expressly for the use of making parcel post shipments. A government clerk will be detailed to make explanations and give all information concerning rates and regulations governing the parcel post.

FOREST FIRES COSTLY

Government Spends Much to Preserve Big Stands of Timber

Fire fighting in Oregon, Washington and Alaska, since July 1, has cost the government \$50,000. Most of the fires were prevented from doing any material damage to merchantable timber. The majority of them were confined to old burns.

The Forest Service has in Oregon and Washington a total of 4062 miles of telephone and 4028 miles of trail. These are primarily for use in fire suppression.

The Forest Service has, in Oregon and Washington, over 100 high lookout points constantly manned during the fire season. The best known of these lookouts is Mt. Hood.

An officer of the Forest Service has designed a portable telephone for rangers, which weighs only two and a half pounds. Connection may be made anywhere along the line with this instrument. Over one hundred of them will be used in Oregon and Washington next year.

EXPERT TO REMAIN

Agricultural College Man Seeks Fine Opening in California

Although offered the position of associate professor of Pomology at the University of California at a salary of \$3,000 per year, E. J. Kraus, research expert in horticulture at the Oregon Agricultural College, has declined the position and decided to remain in Oregon. The salary offered by California is \$600 above that of his position here as professor of research.

The reasons that prompted Professor Kraus to remain at O. A. C. are flattering both to the College and to the State. He considers the problems of research in Oregon thoroughly established and in some instances well along toward solution, and that these problems are important to science and their solution valuable to industry in the state. He thinks problems mean more to him than an advancement in salary.

This was the second offer of a \$3000 position that has been declined by Professor Kraus this year, the first having come from the University of Missouri.

LATEST WOLF STORY

Like the First One, It Wasn't a Wolf That Was Seen At All

A call for hounds and hunters was received in Estacada last week from John Howland, whose place lies along the Clackamas above the North Fork,

A CHARTER FOR CHILDHOOD.

Ohio Codifies Child Welfare Laws, but No Other State Does.

If any one asks what the laws affecting children are in New York state no person in any position can without considerable research answer the question, according to a statement made by Homer Folke at the Eleventh Annual Conference on Child Labor. The only state in the Union where it could be readily answered is Ohio, since Ohio is the only state that has codified its child welfare laws.

A committee appointed last May at the National Conference of Charities and Corrections, with C. C. Carstens of Boston at its head and Edward N. Closser of the National Child Labor Committee as one of its most active members, is now at work drafting a children's charter that would show how all laws relating to children should be co-ordinated and that could be adopted as a whole or in part according to the needs of the individual state.

The benefits of the children's charter will not be confined to a clearing up of the principles on which the various organizations and committees which are interested in the needs and rights of childhood should base their work. In fact, the friends of the charter are inclined to believe that its greatest value may lie in the simple fact that it will encourage co-operation. The drafting of the charter, which will be in itself a co-operative effort, will teach workers in the various fields to think of their work as a part of a larger whole. The relation, for instance, between the school attendance officer, the factory inspector, the juvenile court worker and the administrator of mothers' pensions will become a practical help to each of them. For the child such co-operation all along the line should mean that the care that is now available for the child who happens to come under the eye of the official or social worker who is fitted to meet his case will be extended to a larger proportion of those who need it.

BOYS ON THE NIGHT SHIFT.

Pennsylvania Now Prohibits It, but Maryland and West Virginia Do Not.

After Jan. 1, 1916, no more young boys will be working on the night shift in the glass factories of the largest glass manufacturing state in the country—Pennsylvania.

This means that West Virginia and Maryland are now the only glass manufacturing states of any importance which permit children under sixteen to work at night. An attempt was made in West Virginia last winter to prohibit night work to children under sixteen, but the bill did not pass. The National Child Labor Committee, which took an active part in the campaign for the West Virginia law, believes that the outcome will be quite

Photo by National Child Labor Committee.

5 P. M. READY TO GO ON THE NIGHT SHIFT.

different the next time, because the glass manufacturers there will no longer fear the competition of Pennsylvania.

"We may not even have to wait until the legislatures meet in 1917 to bring these states into line," said Owen R. Loveloy, general secretary of the National Child Labor Committee. "If the federal child labor bill which will be introduced into congress early in the next session becomes a law it will automatically establish a sixteen year limit for night work in the glass factories of Maryland and West Virginia. The children now exposed to the serious physical harm likely to come from going out into the air from the overheated glass factory and the cramped positions in which they work combined with the degrading and coarsening influences which prevail on the night force in the factory, will be protected by Uncle Sam."

"If you could see the boys, as I have seen them, working in a temperature which frequently rises to more than 100 degrees, their shoes cut with the broken glass which covers the floor, holding the mold for the red hot glass or walking endlessly back and forth carrying bottles to the annealing oven, you would realize that the only thing that mattered was to get them out the quickest and surest way—by means of a federal law."

to help trail a wounded black wolf which he had shot.

Bill Underwood's car, resembling a dog catcher's outfit, started for the scene loaded with the Jones' hounds and their master. The sportsman returned later, reporting the dogs as having taken the trail and captured the wolf within a short time after obtaining the first scent.

Black wolves are more or less rare and besides bringing a \$25 bounty are worth as much more for their hides. To date no item of the bounty has been noticed in the county clerk's

CLACKAMAS PLANS DISPLAY

County Will Exhibit Its Resources at Portland's Land Show

Clackamas County's exhibit at the coming Manufacturers' & Land Products Show in Portland will be centrally located in the great exhibit building and the soil products will be viewed by more than 100,000 people during the eighteen days the exhibition will be open. This is the estimate now made on attendance. It is possible a greater number of visitors will view the exhibits.

This year the land show in the state's metropolis will open on Monday, October 25 and close at midnight November 13. The show will not remain open Sundays, and exhibitors will have an opportunity to renew perishable exhibits twice during its progress.

The counties and communities of the state will make the greatest showing in their history, at this year's exposition, since the Lewis & Clarke Fair of 1905. Space in the industrial section is now more than 80 percent filled and practically everything is taken in the land products division.

The best county exhibit will be awarded a gold medal and \$200 in cash and the second best exhibit will receive a silver medal and \$100 in cash. The best displays from each county will be awarded prizes ranging from \$50.00 to \$100.00.

Efforts will be directed towards creating new markets for Oregon products and consumer and producer will be brought together at the exposition.

SENATOR AIDS WOMEN

Mr. Chamberlain Says His Sympathies Are With Suffrage Seekers

Senator George E. Chamberlain received a delegate from the Oregon branch of the Congressional Union for Woman Suffrage in Portland last week, and after listening to pleas of a number of the leaders in regard to the passage of the so-called Anthony amendment, assured the women that they might count on his sympathy, saying in part:

"I am very glad to meet all of you. I have been a supporter of woman's suffrage since 1880 and possibly longer; probably before some of your speakers were born, and I have not changed my views on the subject since." Mr. Chamberlain further gave the suffragists a little fatherly advice about not holding all members of a party responsible for the party's action in Congress on the suffrage issue.

The party then withdrew. A picture was then taken to be sent East to show the struggling women there, what active interest their enfranchised sisters are taking in the freedom of women everywhere.

Did you ever give the Courier a trial on your stationery? You will find that they have the most up-to-date faces of type and are right there with the punch in getting up a suitable design that will please you—and please others.

RED SEALS AGAIN

Popular Campaign Against White Plague to be Waged in Holidays

Two hundred million Red Cross Christmas Seals are now being printed and distributed by the American Red Cross and The National Association for the Study and Prevention of Tuberculosis, according to a statement issued by the latter organization today. The proceeds from the sale of these seals will go for the fight against tuberculosis in the communities where the seals are sold.

The organization of the Red Cross Seal sale this year will take in every state and territory of the United States, including Hawaii, Porto Rico, and the Canal Zone. By December 1st, over 50,000 workers, men, women and children, will be engaged in the campaign.

The sale in 1914 broke all previous records, totalling over 55,000,000 seals an increase of 22 per cent over 1913. After deducting all expenses, this left nearly \$500,000 for tuberculosis work in this country. The money has been and is being expended by over 2,000 different agencies who benefitted from the sale in amounts ranging from \$100 or less to over \$25,000. The American Red Cross announces that it will continue its previous successful policy of charging only 10 per cent of the gross proceeds to state anti-tuberculosis associations, thereby encouraging local work.

Auction!
FINAL CLEAN-UP TO SATISFY THE CREDITORS
I will sell at PUBLIC AUCTION the entire stock of FURNITURE of D. TOLPOLAR, consisting of Furniture, Stoves, Ranges, Dishes, Lamps, Carpets, Etc!
—Commencing—
Monday, Sept. 27, 10 a. m.
Coming Monday, September 27, at 10 A. M. There will be two sales each week on Monday and Friday at 10 A. M. This is your opportunity to profit by the loss of another's loss. Goods will be positively sold to the highest bidder.
You cannot afford to miss this sale—Monday, September 27 at 10 A. M.
