

CANBY AND SOUTHERN CLACKAMAS

LEE FINDS FORMULA TO KILL CUT-WORMS

M. J. Lee's garden is attracting much attention, and he has cabbage plants that many of the growers in this section are envying. Mr. Lee has a formula for the cut worms that have been attacking the cabbage plants in various parts of the county. Mr. Lee found his cabbage plants were affected and were rapidly being destroyed. Not caring to be cheated out of his cabbage or slaw, which he is very fond of, he has been making a study of cabbage plants infested with worms, and has tried every means available, until he has hit on one that has done the work to the satisfaction of Mr. Lee, who now prides himself on having the finest plants in Canby.

The formula Mr. Lee gives is as follows: Concentrated lye, using one tablespoonful to gallon of water, dissolving the lye in hot water, but be careful when placing on the plants to have the substance cold, and care should be taken not to have any get on the foliage. The liquid should be poured carefully around the roots, and before applying to the roots of the plant, remove some of the dirt from the root, and pour around the plant, moving slightly the plant while applying. Mr. Lee has demonstrated with the lye application and his plants have taken on a wonderful growth and are free from the cut worms, while others are now being given the same treatment, in a separate garden. Three applications should be made on the roots of the plants, and used once in every ten days.

In the garden of Mr. Lee is growing a seedling cherry tree, that is probably a cross between the Royal Anne and the Kentish, but the appearance is of the Royal Anne and the flavor that of the Kentish. The tree is laden with fruit, and although but seven years of age will more than bear enough cherries for the Lee family. The tree is fifteen feet high with spreading limbs that are most attractive with hundreds of cherries clinging to the branches. Mr. Lee says he believes this tree is doing so well he has irrigated the ground at the roots.

A Red June tree, three years old, bearing its first fruit last year, is also laden with ripening apples. This was purchased by Mr. Lee three years ago from the Oreno Nursery Company.

The soil of Canby can grow fruit of any kind of vegetables, and a number of demonstrations have been made by newcomers as to the richness of the soil, which have always proved most satisfactory.

CANBY CAN PRODUCE POTATOES.

Dr. J. Fuller dug from the garden of the Cottage hotel Wednesday potatoes that measured five inches in length. These are of the Burbank variety and are the kind that are being served at the Cottage hotel. The sandy soil of Canby can produce good potatoes, for it has been proven. A curio in the potato line has been unearthed by Dr. Fuller and is in the form of a Teddy bear, with the eyes where they should be and this has been placed in the Cottage hotel where it has attracted the attention of the boarders.

PAUL BANY RETURNS.

Paul Bany, who has been over-seas, and one of the well known Clackamas county boys, has returned to his home in this city.

Paul is happy to get back into old Clackamas county after undergoing many experiences while in service. He was born and reared here, and says Canby looks good to him, even if he has visited Paris. He was married a short time before going to France to Miss Rose Dozier, of this city.

COUNCIL HOLDS MEETING.

A regular meeting of the city council was held at the city hall, Monday evening. All bills were ordered paid, and very little business transacted.

A special meeting was called for July 14, at which time streets will be the subject for discussion.

SERGT. GILLMORE TAKES A BRIDE

Sergeant William A. Gillmore, son of Mr. and Mrs. H. C. Gillmore, prominent residents of this city, who returned from France recently, has become a benedict. His marriage to Miss Mable Updyke, of Hoquiam, Wash., was solemnized at Shelton, Wash., the latter part of June.

The bride is an accomplished young woman and was a student of the Hoquiam high school.

Mr. and Mrs. Gillmore are to make their home at Hoquiam, where they are occupying a cottage, and where Mr. Gillmore was employed before entering the army, having resumed his position he has held for five years.

Sergeant Gillmore was born and reared in Canby, and everyone has a good word for the young man. He made good in the army from the time he entered the service at Hoquiam until he received his discharge. His last promotion was received by an English officer to an American officer while Gillmore was stationed overseas, and he was in line for another promotion when the armistice was signed. At the time of the signing of the armistice the young man had charge of six squads of men engaged in construction of aeroplanes. Gillmore entered the 155th aero squadron as a ground man, but when peace was declared had charge of rigging aeroplanes of his squad. He has been near the front on many occasions, and has had experiences he will not soon forget.

DRUGGIST OVERSHIRINER SHOCK

C. E. Sheldon, the druggist, has fully recovered from the experience he underwent while being initiated into the mysteries of the Shriners in Portland several weeks ago. Several of his friends of this city, among these being W. H. Blair and Arthur Graham, who are members of the order, accompanied him to Portland, where they assisted in putting one over on the candidate. From Sheldon's appearance when he returned to Canby, they were successful in giving the poor fellow his "medicine." Mr. Sheldon took it like a duck to water, and after the "exercises" were over the druggist felt as though he did not care to exercise until the next initiation services he could assist in the initiatory services and get even with someone.

When Sheldon appeared at the lodge rooms, he recognized a number of his old time friends, and made up his mind right there that there would be something doing when the selection of candidates was made to go through the antics, but he was "game."

FARMERS BUY TRACTORS.

Among the farmers of Clackamas county who have purchased Fordson tractors during the past month are Vic Duncan, of Molalla, who is baling for the farmers of Molalla. He is doing a rushing business, for the crop of hay is excellent this year.

William Shaver is another farmer of Molalla, having purchased one of the tractors. Shaver is planning on accomplishing much with the new piece of machinery, which he has already become familiar with the mechanical use of the same.

DAILY AUTO STAGE

Effective July 1st, 1919.

DAILY AND SUNDAY

Leave CANBY	Leave OREGON CITY
7:45 a. m.	9 p. m.
9:45 a. m.	11:00 a. m.
*12:45 p. m.	*2:00 p. m.
4:15 p. m.	5:00 p. m.
6:15 p. m.	7:00 p. m.

Saturday and Sunday

7:45 p. m. 8:25 p. m.

*This trip omitted on Sunday.

Fare 25 cents to all points between Canby and Oregon City.

During Chautauqua stage will go through to park on 6:15 P. M. from Canby and lay over at grounds till after evening program, returning will leave Oregon City about 11 p. m. after arrival of Portland car. Late trips 40 cents from either Gladstone or Oregon City.

You can't cover blackheads, pimples, red spots on the face with powder; they're bound to be seen—don't worry or spoil your temper, take Hollister's Rocky Mountain Tea each week—twice daily through the blood, the only sure way. 35c. Huntley Drug Co.—Adv.

HAMPTON RESIDENCE SAVED FROM FLAMES

A fire alarm was sounded at 5:30 o'clock Tuesday evening when the woodshed and storehouse of the Hampton home was afire. The cause of the fire is presumed to be from an oil stove that Mrs. Hampton had been using in cooking vegetables. Mrs. Hampton had the impression that the fire had been extinguished some time before the blaze started, and was horrified to find the building in flames. There were stored a large quantity of dried vegetables, fruit jars, a cream separator, and many articles. There was no insurance and there was a total loss, but the Hampton family are grateful for having their home saved, through the heroic efforts of their neighbors, residents of Canby and this fire department, who responded immediately when the fire alarm was sounded. At first an effort was made to extinguish the flames by means of a water bucket brigade, but this was found impossible and when the fire department arrived a good force of water was turned on. No one shirked. Professional men with the assistance of others. Had the wind been blowing in an opposite direction the beautiful home would have been doomed.

With the thermometer registering 92 degrees the fire fighters found much difficulty in fighting owing to the terrible heat.

CANBY LOCALS.

Mrs. G. H. Cattle, formerly Miss Ora Lee, went to Portland on business Wednesday afternoon. Mrs. Cattle's little daughter is still very ill, suffering from stomach trouble, and as soon as she improves Mrs. Cattle and family will rejoin Mr. Cattle in California.

Mr. and Mrs. Dan Robinson have sold their place in Canby, and are to make their temporary abode at the home of the late Mr. and Mrs. Herman A. Lee, well known pioneer residents of Oregon.

W. H. Little, of Salem, was among those to transact business here the first of the week, making his headquarters at the Cottage hotel.

W. R. Jewell, of Portland, was a Canby visitor Tuesday.

John Campbell was among the visitors in Canby the first of the week. Among those to attend the funeral services of the late H. S. C. Phelps from this city which were held in Oregon City, were Mr. and Mrs. Alvin Phelps, the former a son of Mr. Phelps; Mr. and Mrs. L. Wheeler, Miss Lillian Wheeler, Mr. and Mrs. Warren Freese.

Mr. and Mrs. Sam Egli, of Needy, who has been visiting Mrs. Egli's parents, Mr. and Mrs. John Lowry, of this city, have returned home. Miss Rena Hutchinson left Tuesday evening for a month's visit with relatives and friends at Dunsmuir and Red Bluff.

Glen Coleman, who recently returned from overseas service, and who has been visiting his father at Newport, has returned to Canby, and had a most delightful time while at the beach.

Dr. and Mrs. J. Fuller, accompanied by Miss Lolita and Miss Lorena Hornig, enjoyed an outing at the Oaks July 4th. They made the trip in the Fuller automobile.

C. E. Sheldon, the druggist, went to Oregon City on business Wednesday.

Mrs. Earl and daughter, who have been conducting a restaurant on Main Street, have closed the establishment.

Mrs. Grant White, of this city, and Mrs. Saylor, formerly of this city but now of Molalla, are at Chautauqua Park, where they are conducting a cafeteria. They are being assisted by a number of women from Canby and are doing a rushing business. These women, with the assistance of others conducted a cafeteria last year, and "made good" at the business.

Mrs. W. H. Blair and mother, Mrs. Anna Knight, who have been very ill suffering from tonsillitis, are improving. Mrs. Blair has been able to leave her room, but her mother is still confined to her bed. Mrs. Evans and daughter, Miss Violette, of Portland, are here assisting in caring for them.

Dr. and Mrs. J. Fuller and Mrs. W. R. Dann motored to Oregon City Tuesday.

Mr. and Mrs. Hendrickson went to Oregon City the latter part of the week, and spent the Fourth at the Oaks.

E. J. Shull has completed a screen porch at the home of Mr. and Mrs. M. J. Lee. This has been painted white and is a most convenient addition to the Lee home.

Mrs. Clark was in Oregon City Tuesday and Wednesday, where she visited at the home of Rev. and Mrs. W. T. Milliken. She also attended the Chautauqua.

Mr. and Mrs. Henry Smith, of Macksburg, was among the Canby visitors Wednesday.

MORTGAGE FORECLOSURE

H. C. Stevens has instituted suit for the foreclosure of a mortgage on property in Minthorne against George W. Atwood for \$3000. The mortgage was originally held by Grace E. Loder.

STRIKE FOR \$40 A WEEK
CHICAGO, July 3.—One hundred and fifty members of the film exchange shipping clerks and helpers' union went on a strike today for a minimum wage of \$40 a week.

There is nothing worse than bad, foul smelling breath; get rid of it for your friend's sake anyway. Hollister's Rocky Mountain Tea will clean and purify your stomach and bowels; your breath will be sweet, your disposition improved, your friends increased. 35c. Tea or tablets. Huntley Drug Co.—Adv.

Hidden Things

The subject of a lecture by Joel W. Eastman, held the first capacity audience of the big auditorium at Gladstone Park Wednesday afternoon. The day was sultry and most of the audience were women, but despite the heaviness of the lecture, Eastman held his crowd. "The things you start to do in childhood," said the speaker, "change materially in later life. The main thing is to construct along monetary lines. Many shady things are done under the name of business. Civilization is nothing more than training the serious things of life. The natural instinct of people is to build up, to construct something, but civilization is not on the right track and is on its way to destruction."

At the symposium hour Wednesday afternoon the speakers were Dr. Aurelia Reinhardt, president of Mills College, and Mrs. Helen Ekin Starrett, who talked on "Eminent Women I Have Known." Mrs. Mary Adele Case Vann rendered vocal numbers.

The army uniform made its usual ten-strike Wednesday when the Overseas quartet appeared on the platform. These boys can sing, and they were cheered to the echo and encored repeatedly. They appeared again Wednesday night in advance of Sergeant Arthur Gibbons, who gave an entertaining recital of his experiences in Germany as a guest of the Kaiser.

With a record attendance among the campers, the morning classes are well attended and the Children's Chautauqua from 9 to 11 o'clock under the direction of Miss Julia Hunter, is a drawing card for the young ones. Miss Marie Anthony's home demonstrations are very popular.

The first really great feature of the Gladstone Park Chautauqua comes Friday with Castellucci's concert band, morning and evening.

Wednesday's ball game was a closely fought battle between West Linn and Oswego, each side scoring alternately until the ninth canto when the board had nine all chalked on it. The strain was too much for Oswego, and in the tenth inning the boys from the iron foundry town took an aerie ride and before they returned the paper-makers crossed the home plate five times, winning the game 16 to 11.

Farm Bureau Notes of Interest

Edited by R. G. Scott, County Agent.

DAIRY CATTLE TO FRANCE.

A commission has arrived in the U. S. from France to negotiate for the purchase of several thousand head of dairy cattle. It is expected that 3000 will be shipped the first month. Two per cent of these are to be bulls. These cows are not necessarily purebred, but the bulls will be. This makes the beginning of good business for American dairymen in shipping cows to Europe. However, we are not to have a monopoly of the business as orders have been given to Canada and other countries and the amount of return business will depend on the satisfaction given.

This is a good argument for improving the dairy herds throughout the country. The Jersey breeders have found that there is already a demand from Eastern breeders for registered stock of the best breeding. There is also a demand for carloads of good grade heifers of any of the breeds. The Guernsey breeders are swamped with orders which they cannot fill, at very good prices. The only kind of cattle which are not in demand is the scrub. It does not take long to turn scrub stock into good grades. The first cross of a common cow with a high class registered bull will make an animal that often you cannot tell from one that is registered, and with each succeeding cross, you get nearer to the high standard of good registered stock.

It is impossible for every farmer to be a breeder of registered stock. There are not enough females to go around, and the cost of a herd, if they are to be bought, would be far beyond the ordinary farmer's reach. For all practical purposes good grade cows will produce as much as the registered ones. But good grade cows are just about as scarce as registered ones. It is much cheaper to raise them than to buy them. But don't fool yourself into thinking you can raise good grades from poor bulls. And when we speak of a good dairy bull, we mean one that is not only strong and vigorous, but also one that comes from a line of heavy producing dams. With a bull of this kind mated to ordinary cows we may expect an increase of 100 pounds of butterfat per year for every cow. This would mean about \$50 more profit, and in many instances it would mean the difference between profit and loss.

How to Get a Good Bull

The first cost of a good bull is what keeps farmers buying as good an animal as they know they ought to have. Some people do not really seem to know that a bull might be a very poor one even though he is registered. It is necessary to examine into the records back of the bull, how much butterfat did his dam make in a year, and how much did his grandams make? If Mr. Bull has no records on his dams side, it is better to leave him alone. And now for the cost. Are there fifty cows of one breed in your neighborhood? The owners of these cows should get together, form a bull association, put up ten dollars per cow, and have a really first class bull which means money-making heifers.

The cost is less than you can get an ordinary bull for. In addition, other bull associations are almost certain to be formed in the County, so that an

exchange of bulls may be made at the

end of two years, and instead of having to sell your good bull at beef prices, and buy another, you get four or six years service with one investment. There is no excuse for keeping scrub bulls. If you are interested along this line, talk to the County Agent, and also talk it up among your neighbors.

Cooperation will accomplish what one man alone cannot accomplish.

Keeping Records on Cows

The business of dairying requires that only those cows should be kept which are paying a good return on the investment of feed and labor, to say nothing of the cost of growing that cow. Some farmers may be in business for their health or for pleasure, and they may have such an affection for their cows that they would not part with them whether they ever paid back the cost of their keep or not. But most farmers want a profit on their cows. They take the lump sum received from the creamery, and consider it as so much clear gain. But nowadays when feed is high whether you raise it or buy it, every man should know how much each cow is making for him. This can be done by keeping a record of the weight of each cow's milk taken night and morning, by having samples of the milk tested every month for butterfat. The County Agent has milk record sheets all prepared for these daily weights free for the asking. Most of the creameries are glad to make tests of samples of milk sent in by their patrons. If you want any help in getting started or in figuring up your butterfat, write to the County Agent.

CROPS ALL OVER STATE PROMISE GOOD YIELDS DESPITE LATE SEASONS

Summary of weather and crop conditions in Oregon for the week ending July 8 as compiled by Edward L. Wells, of the local weather bureau are:

The week was one of variable temperature; temperatures above 90 degrees were recorded in some of the interior valleys, while frost was reported from elevated eastern localities, on the 7th, doing no damage. A few light showers occurred along the coast, in the Willamette valley, and in the northeastern counties. Dry, northerly winds were a feature in other parts of the state. Water for irrigation is scarce in some sections.

Cereals

Harvest of rye, barley, and winter wheat is in progress in many places. A considerable acreage of rye that was intended for threshing has been cut for hay on account of frost damage. Winter wheat is promising in the Willamette valley, and in the principal wheat counties there is much good wheat despite long drought. Spring wheat is very poor in some sections, but in others will make a good crop. Corn has made good growth in Southern Oregon, but needs rain; irrigated corn in Malheur county is excellent; elsewhere warmer weather is needed.

Fruits and Berries

Picking of cherries is progressing rapidly, approaching completion in some sections. A large crop of loganberries is being gathered in the Willamette valley and coast counties. Early apples, peaches and apricots are ripening in Douglas, Jackson, Umatilla and Halheur counties.

Meadows and Ranges

Cutting of the first crop of alfalfa has been completed, except in the more elevated central counties, where it will be begun soon; the crop was considerably reduced by frost in May and June in elevated districts, the second crop of alfalfa will soon be ready to cut in Southern Oregon. Wild hay is generally below normal. The lower ranges are drying rapidly and in some localities feed is scarce; high ranges are good. Pasture in the western counties is excellent.

Live Stock

Stock is doing well in most sections, but in a few places is beginning to show the effect of short feed. Miscellaneous

Early potatoes are being marketed in increasing quantities. Over considerable areas in Central Oregon the potato crop will be light, owing to frost and drought; elsewhere the outlook is fair to good. Gardens generally need rain. Hops are looking well.

LUDDIG HARTKE GETS IN CLUTCHES OF LAW FOR FAST DRIVING

Ludwig Hartke, Jr., was fined \$50 for reckless driving by City Recorder Loder Thursday. Hartke drove at a breakneck speed past an interurban car near Twelfth street, and nearly ran into Peter Davidson, a respected citizen of Jennings Lodge, who had just left the car, with his arms full of bundles. The municipal magistrate collected \$25, but let the other \$25 hang up, pending more careful driving on the part of Hartke, who operates a milk delivery automobile.

Ludwig Hartke, Jr., was fined \$50 for reckless driving by City Recorder Loder Thursday. Hartke drove at a breakneck speed past an interurban car near Twelfth street, and nearly ran into Peter Davidson, a respected citizen of Jennings Lodge, who had just left the car, with his arms full of bundles. The municipal magistrate collected \$25, but let the other \$25 hang up, pending more careful driving on the part of Hartke, who operates a milk delivery automobile.

HIGH PRICED BULL

BELVEDERE, N. J., July 5.—King Pontiac, a famous blood-ed Holstein bull, was sold today by Mrs. Helen Massena of the Pequest stock farm here to E. B. Hager, of Algonquin, Ill., for \$300,000.

British Dirigible Will Start Return Trip

MINEOLA, L. I., July 9.—After remaining aloft 150 feet through the night, the British dirigible R-34 was hauled back to earth at daybreak today and mechanics gave her a final looking over in preparation for the start back to the British Isles tomorrow morning.

Major Scott, the airship commander, said he hoped for an abatement before night of the unfavorable winds that caused the R-34 to postpone her departure this morning, but that he was quite certain he would get away before 6 o'clock tomorrow morning, regardless of the weather.

The dirigible has now been lying in the open four days exposed to danger of being badly damaged or destroyed. He said:

"This is the first time any of our big airships have remained unharmed for that length of time. The R-34 cost \$2,500,000 and we must not take unnecessary risks by staying here longer than is absolutely necessary."

GIRL'S BODY RECOVERED

The body of Esther Chapman, 9-year-old Portland girl, who was drowned in Oswego Lake at Lake Grove July 4th, was found at 11 o'clock Monday morning, about 100 feet south of the pier. Hugh Brady, the Portland grapple, was successful in his search. The finding of the body dispels the theory that the child was kidnapped.

Not Good to Winter Feelings Are Hurt Breach of Promise

Four hundred and seventy five dollars is asked for wounded feelings by Martha E. Winter, who filed suit against James Good. She charges breach of promise, and says she went to St. Johns on Christmas day of 1918 to become housekeeper for Good, upon his promise to marry her May 1, but when that date came he fell down on the job.

PORKERS GOING UP

CHICAGO, July 7.—After breaking the high price record of three times last week the hog market today continues its upward course. New top quotations were established at \$22.40 a hundredweight.

Pearl Oil in bulk costs less

Pearl Oil that you buy in bulk at your dealer's is the same high-quality kerosene as the Pearl Oil sold in five-gallon cans. There is a saving by buying in bulk. Order by name—Pearl Oil. For year 'round kitchen comfort use a good oil cookstove and Pearl Oil. Bakes, broils, roasts, toasts—economically. Lights at the touch of a match. No waiting for fires to come up, no unnecessary work, no waste. Concentrates a steady heat on the cooking—leaving the kitchen cool and comfortable.

We recommend New Perfection and Puritan Oil Cookstoves
