

About the State

Resume of the News of the Week from All Parts of Oregon

In the same automobile he used in his escape from the officers Saturday night, James Cox was brought to Baker, Ore., from Weiser, Idaho, where he was captured. Sheriff R. P. Anderson brought the man back, and Cox has begun serving the 37 days of his last sentence for bootlegging while waiting a grand jury hearing on a subsequent charge of having liquor in his possession.

His wife was also held on a charge of selling liquor. The Elks hotel, of which Mrs. Cox was proprietress, was attached and vacated by the sheriff this week. The attachment was executed in view of a suit for \$2000, filed today by Donald Geddes against Mr. and Mrs. Cox. Geddes says Mrs. Cox represented to him that she was not married and that she would marry him for \$2000. He alleges he gave her the money, but that she took it away without fulfilling her part of the contract. She was, he avers, married to Cox at the time. Cox's automobile was also attached.

Four Klamath Falls boys had a narrow escape from a tragedy near Klamath Hot Springs, Cal.: John Arnold, 18 years of age, of Klamath Falls, rode a motorcycle to Ashland. While there he traded his machine for an automobile. With three others, he started home. On a grade the boys lost control of their car and the machine turned over, pinning Arnold and a boy named Leach under it.

Dr. R. R. Hamilton, of Klamath Falls, was called, the boys taken to Hot Springs and their injuries treated. Arnold was badly cut and bruised about the head and face, and Leach sustained injuries on his head.

The first automobile of the season reached Crater Lake headquarters at Camp Arant, five miles below the rim, Friday, from the Klamath side. It was reported by Superintendent Momyer that the road from Medford is not open that far. Snow shovels are at work on the road from headquarters to the rim, and it is believed that this portion of the road will be open to travel in about a week. In that event the park season will begin a few days earlier this year than last, despite the unusually heavy snows last winter.

R. H. Mason, former resident of Portland, was injured probably fatally Sunday while helping fix a pump at his home near Woodburn. A large piece of iron fell from above, striking his head. Hopes are held for his recovery, although he is in a semi-conscious condition.

The first federal farm loan in Lane county was completed Monday, when Joseph E. Field and Kate Vandyn Field, of Coburg, received money from the government. It is expected other Lane county loans will be completed in the near future.

One of the worst forest fires to occur in the Bend section this year was put under control Monday by a crew of men working under John Ryan, of the Tules. Before the work was done about 40 acres of timber was destroyed.

C. H. Pinkham, of New York City, and Mrs. James Fullerton, of Eugene, brother and sister, met in Eugene Monday for the first time in 48 years. Mr. Pinkham and his wife are making a tour of the Pacific coast.

The Public Service commission Monday issued a notice to the Portland Railway, Light & Power company that it will hold a hearing and investigation on its own motion in the near future as to crossing conditions of that company's lines at Hogan. At that crossing occurred the accident on June 27 which resulted in the death of three persons.

The commission also will hold a hearing as to the "underpass" crossing below the Southern Pacific tracks between Goshen and Eugene. A report was received that traffic is constantly in danger of collisions at that point.

The first hard road section to be started in the Coos county good roads system is being constructed at Bandon, and the expectation is the money available will provide for the first four miles out of Bandon towards Curry county.

The material is rock from the government quarry at Tupper Rock, a basaltic material, which has been used on the government jetty work for a number of years. The present work is being financed from a special tax fund, and will relieve the good roads fund, which amounts to only \$46,000. The bond issue work is being prosecuted by B. J. Borkquist and Hagquist, who are making a number of heavy cuts and straightening the highway.

Straightened Him Up
Solomon Bequette, Flat River, Mo., writes: "Two years ago I was down on my back till I could hardly go. Foley Kidney Pills straightened me right up. I recommend them to all who have kidney trouble." Rheumatic pains, aching joints, sore and swollen muscles indicate that the kidneys are not properly filtering impurities from the blood. Foley Kidney Pills get right at the trouble and give prompt relief. Painful, irregular and sleep-disturbing bladder troubles also yield quickly to their tonic healing action.—Jones Drug Co.

The Courier, \$1.00 per year.

ENLISTMENT FOR FOREST REGIMENT IS UNDER WAY

District Forester George H. Cecil of Portland, Oregon, announces that the actual enlisting of woodsmen and mill workers for the 10th Reserve Engineers (Forest) began Monday, July 9. Enlistment will be for the period of the war. Men wishing to join the regiment should apply to the district forester, Beck Building, Portland, or to one of the following, who are assisting in the enlisting work:

Forest Supervisors Seltz, Eugene, Ore.; Erickson, Medford, Ore.; Hastings, Bend, Ore.; Evans, Baker, Ore.; Smith, Seattle, Wash.; Fromme, Olympia, Wash.; Park, Bellingham, Wash.; Sylvester, Leavenworth, Wash.

Men recommended by one of these listing officers go to any U. S. Army recruiting officer, where they are accepted as recruits if they pass the physical examination, which is the same as that required for other military service. Recruits must be white, between the ages of 18 and 40 years, and must be citizens of the United States or have declared their intention to become such. Men subject to conscription will discharge their obligation by enlisting in this regiment. All applicants should understand that this is a military organization; that they must undergo the customary drill and discipline of United States soldiers, and that they may be called upon to do work within the danger zone.

Picked woodsmen will compose the regiment—men who will be given a chance to take the part in the war for which their life and training have fitted them. Although listing has been going on for two weeks, the district forester states that there is still room for experienced loggers and millmen. Places are open for skilled axmen, sawyers, the hewers, skidders, teamsters and blacksmiths. Millwrights, sawyers and engineers are needed to man portable sawmills which will form part of the equipment; helpers are required for the various activities connected with woods operations and the maintenance of large camps.

After enlisting, the men will be fed at government expense, and will be furnished uniforms and regular military equipment, and in addition will be paid according to a fixed scale, the lower scale to apply while training in this country, the higher scale after they reach France. The rate of monthly pay has been fixed as follows:

Grade	U. S. Service	Foreign Service
6 First Sergeants.....	\$51	\$60
18 Sergeants, first class	51	60
1 Sergeant, bugler.....	48	56
50 Sergeants.....	44	51.20
6 Stable Sergeants.....	44	51.20
6 Supply Sergeants.....	44	51.20
6 Mess Sergeants.....	44	51.20
2 Color Sergeants.....	44	51.20
19 Cooks.....	38	44
108 Corporals.....	36	40.80
6 Saddlers.....	36	40.20
37 Wagoners.....	36	40.20
186 Privates, first class	33	36.30
558 privates, 2nd class.	30	33
12 Buglers.....	30	33

James A. Woodruff, Lieutenant-Colonel of Engineers, has been designated by the War Department to organize and command the regiment; and Beverly C. Dunn, Captain of Engineers, has been designated as Adjutant on the regimental staff. W. B. Greeley, Assistant Forester in the U. S. Forest Service, has been selected by the Chief Forester to serve as Major on the regimental staff and aid in the organization and equipment of the regiment. The Majors in command of battalions will be C. S. Chapman and R. E. Benedict.

Major C. S. Chapman is manager of the Timber Protective Association of western Oregon, and Lieutenant J. G. Kelley is a Portland lumberman well known in the Northwest.

The duty of this regiment will be to get out timber needed by the armies—railroad ties, trench timbers, mine props, bridge timbers, lumber and cordwood. The work will be performed behind the battle line in France.

The regiment will be made up of six companies of 164 men each, aside from battalion and regimental staffs, drivers, and commissioned officers. It will be sent over seas as soon as organized, trained and equipped. It will first be assembled at two training camps, the regimental headquarters and one battalion at the American University, Washington, D. C., and one battalion at Fort Leavenworth, Kansas.

REDMEN ELECT DELEGATES
Officers for Ensuing Year Chosen at Tuesday's Meeting

Wachemo Tribe, No. 13, Redmen, of Oregon City, elected officers and chose delegates to the head lodge meeting in Knappa hall Tuesday night. The officers elected were Victor Barney, sachem; Ed Lavier, senior sagamore; Chas. Kelly, junior sagamore; Neil Terrill, prophet; Joe Munch, keeper of records; L. A. Noble, collector of wampum; Chris Hartman, keeper of wampum.

The delegates chosen to represent the lodge at the annual meeting of the head lodge in Portland are Chas. Kelly, John Bradley, Harry Williamson and Jack Frost.

FINNEGAN HAS NEW BERRY
Local Strawberry Grower Crosses "Sample" with "New Oregon"

Taking the Sample variety of strawberry and pollinating it with the New Oregon, A. H. Finnegan, strawberry grower of this city, has produced a new variety of the luscious fruit which he calls "The Jewish Maiden." The new variety is a fiery red and has a delicious flavor. The vines produced a few berries last year but this is the first season they have given a crop. Mr. Finnegan has 250 vines but says none of them will be sold "at any price" this year. He has been in the berry business here for 13 years.

DAIRYING AND SOIL CULTURE

SILOS FOR DAIRYMEN.

Most Economical Method of Storing Green Feed For Cattle.

Experiment stations and the best dairy and stock farms in this country have proved beyond doubt that a silo is almost indispensable to a successful dairy and live stock business, says the Pennsylvania State college. If such is the case, does not its need then become doubly urgent under present conditions?

The silo affords an economical way of storing green roughage. With the corn plant there is always a great waste in harvesting, hushing and storing the dry material. The silo eliminates this waste.

An average acre will produce 2,516 pounds of digestible dry matter in timothy hay, while in corn (ear and stalk) it will produce 5,025 pounds, or practically twice as much digestible dry matter. The feeding value of these roughages for dairy cattle is widely different in favor of corn, especially when the silo is used. Silage also has an additional value through its retention of the natural plant juices, which furnish succulence.

On farms where little alfalfa or clover is grown it is possible to increase the protein content of the silo by intercropping soy beans with the corn or growing these two crops separately.

If one cannot command sufficient labor to store the green corn in the silo at the proper stage of maturity the crop may be harvested in the usual way and left to cure in the shock. Later (several months) if need be when labor does become available the corn can be successfully stored in the silo.

Experiments and practice have shown quite conclusively that dry shock corn may be successfully preserved in the silo if water is added at the time of storage in amounts by weight of one to two times as great as the dry stover stored.

Now is the time to plan for building a silo for this year's corn crop. Wood stave, wood hoop, monolithic concrete and wood hood plastered silos may of ten be constructed at low cost.

GROW FEED FOR COWS.

Roughages Must Largely Take the Place of Concentrates This Year.

Grow an abundance of feed for the cow this season, advises A. S. Neale, specialist in dairy husbandry, division of extension, Kansas State Agricultural college.

Already the price of concentrates is "out of sight." Prices will continue high unless these concentrates are replaced by the cheaper roughages. Every farmer should plan to grow plenty of alfalfa or clover and silage. If alfalfa or clover cannot be grown in your section substitute another leguminous crop, such as cowpeas.

During the next twelve months the production of dairy products will be due largely to the feeding of roughages instead of concentrates, as has formerly been the case.

Dairy cows of quality receiving nothing but roughages can produce 200 to 250 pounds of butter fat annually, provided the roughage is fed in abundance and is composed of a combination of silage and a leguminous hay. Of course poor cows will not do so well on this ration.

Knee Rest For Milking.
Becoming tired of holding the milk pail between my knees while milking, I made a contrivance of strap iron to overcome this, writes a correspondent of Popular Mechanics. It is arranged so that the milk pail will just fit inside.

The curved straps supporting the weight of the pail on the knees. The holder may be made of wood, with the possible exception of the curved arms, which should be made of pieces of iron one-eighth of an inch thick and about two inches wide. The circular frame can be made of pieces of various parts by bolts set in holes in the bands.

Growing Silage Corn.
Although planting corn four inches apart in the row for silage has given the greater yields, the Ohio agricultural experiment station recommends spacing the plants ten inches apart because of greater convenience in handling the crop. As a five year average the four inch spacing has yielded about two tons of green corn per acre more than the thinner planting, but the stalks are often so slender that they fall easily in storms and are difficult to harvest when so crowded.

Oregon Society of Engineers
The last meeting of the Oregon Society of Engineers for the summer of 1917 was held on Thursday evening, June 28th. No meeting will be held during the months of July and August.

The society is about to conduct an engineering prize story contest; a cash prize to be offered.

A very active and interesting winter season is anticipated.

The Courier and the Daily Journal \$4.75.

BEZDEK TO COME BACK TO OREGON AS COACH

Hugo Bezdek, coach of the champion University of Oregon football eleven, will be back in the fall to handle the team, notwithstanding his recent appointment as manager of the Pittsburgh baseball team in the National league. Announcement to this effect has been made by President Campbell.

Before leaving for the East to confer with the owners of the Pittsburgh club at their suggestion, Coach Bezdek had an interview with President Campbell in which they discussed the situation, and it was decided that the summer task of coaching the Pirates need not interfere with his man's size winter job of directing the Oregon eleven.

It is the policy of the University, as announced by President Campbell, and the athletic authorities some time ago, to encourage athletics during the war time in line with the suggestion of the Council of National Defense, which was in turn advised along this line by representatives of the allied governments recently in this country. All the Pacific coast universities, as well as those in other parts of the country, will put teams in the field as usual this fall.

Oregon has perhaps been harder hit than any of the universities in the west by the war, since every member of the champion team of 1916 is now in the service of the government and it will be necessary to build up an entirely new eleven. However, this will give increased opportunity to many players who would have had little chance to make the team against the class of men who composed the 1916 eleven.

Track athletics and baseball also will be continued by the University of Oregon.

SOLDIERS WANT BOOKS

Patriotic Young Women Will Help Collect Fiction

The soldiers of the 3rd Oregon, stationed at Camp Withycombe, need books, according to a request sent to this city by Captain William R. Logus, of Company F, who says the men may be transferred within a very short time to another part of the country. Captain Logus' letter received the response that it merited by public spirited and patriotic women of Oregon City and a committee, in charge of Miss Alice Holman, has made an appeal for the reading matter. The young women were given permission to use a counter in the entrance of Bannan & Company's department store to collect the books and they have set today as the time for contributors to bring in their donations.

The men also need dish towels and these may be donated at the counter in Bannan's store on the same date. The young ladies in charge of the counter will not turn down any useful articles that may be used by the boys, but books and dish towels are most desired.

ATTACKS DOG LICENSE

Constable Made Defendant in Suit Brought by Metzner

Attacking the new dog license on constitutional grounds, Fred Metzner has started action here to restrain Constable D. E. Frost from destroying his dog or collecting the license. The complaint claims the new law puts a double tax on the dog as it is included as personal property and taxed as such by another statute.

New Firm Opens Here
Stanley S. Thompson company, one of Portland's leading real estate corporations, have opened a branch office in Oregon City in the Masonic building. V. J. Phillips is in charge of the new office. The Stanley S. Thompson company will specialize in Klamath Falls property at present.

They are also contemplating opening up an addition to Oregon City in the near future.

Wants Name Restored
Claiming her husband abused her and called her vile names, Sarah Bell Pratt asks a divorce from Cadiz Pratt, whom she married in Valentine, Neb., July 13, 1895. She asks the restoration of her maiden name, Sarah Bell Truax, and the custody of four minor children.

MRS. KIESO SICK SEVEN MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Aurora, Ill.—"For seven long months I suffered from a female trouble, with severe pains in my back and sides until I became so weak I could hardly walk from chair to chair, and got so nervous I would jump at the slightest noise. I was entirely unfit to do my housework, I was giving up hope of ever being well, when my sister asked me to try Lydia E. Pinkham's Vegetable Compound. I took six bottles and today I am a healthy woman able to do my own housework. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound, and find out for themselves how good it is."—Mrs. CARL A. KIESO, 596 North Ave., Aurora, Ill.

The great number of unsolicited testimonials on file at the Pinkham laboratory, many of which are from time to time published by permission of the publisher, is a proof of the value of Lydia E. Pinkham's Vegetable Compound, in the treatment of female ills.

Every ailing woman in the United States is cordially invited to write to the Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass., for special advice. It is free, will bring you health, and may save your life.

The Courier and the Daily Journal \$4.75.

KLAMATH FALLS THE METROPOLIS OF AN INLAND EMPIRE

"Annexion to the United States of her greatest undeveloped area will commence July 3rd, in the dedication of the STRAHORN LINES at the gateway to the Centaal Oregon Inland Empire--Klamath Falls, Oregon."

The above announcement made by the Klamath Falls Chamber of Commerce should dispel any shadow of a doubt as to the future of Klamath Falls.

We believe that Klamath Falls is about to enjoy the most remarkable growth ever experienced by any western city.

The largest body of white pine on earth is tributary to Klamath Falls.

900,000 acres fertile land tributary to Klamath Falls.

400,000 acres of irrigable land tributary to Klamath Falls.

Sufficient water power to turn every wheel on coast tributary to Klamath Falls.

New lumber mills assured in Klamath Falls.

One of the largest pay rolls in the state at Klamath Falls.

Bank deposits increasing in leaps and bounds at Klamath Falls.

Oregonians should profit by taking advantage of this unusual opportunity immediately. Thousands and thousands of dollars will undoubtedly be made in Klamath Falls Real Estate. There is every indication of a phenomenal increase in the population in the near future. Now is the time to buy—we are selling excellent lots right in the best part of the city of Klamath Falls and will accept for a few days only as small a cash payment as ten dollars down and the balance can run for three years payable five dollars per month up—and no interest on the unpaid balance and no taxes for three years.

Phone, white or call on us for full information.

STANLEY —S.— THOMPSON CO.

GIRLS WHO COLLECT BOOKS SAY IT PAYS TO ADVERTISE

The young ladies in charge of Miss Alice Holman, who are helping collect the books requested for the 3rd Oregon by Captain William R. Logus, are praising the newspapers that carried their appeal for books this week. Tuesday the table provided by Bannan & Company in the entrance to their store in the Masonic building was being filled with good fiction, although the girls had announced today as the date for bringing in the books. The girls declare that "it pays to advertise" and expressed their thanks for the generous space the newspapers gave to the cause.

Mr. Bannan had a neat sign painted and hung in a prominent place in front of the store Tuesday and the bare counter was placed in position with no one in charge, so that the young women did not know who left many of the books that were contributed and they wish also to express their thanks to the contributors.

Dish towels are needed for the regiment and these may be left at the counter and will be sent to the boys with the books.

HEROIC KLAMATH FALLS

Splendid Example of Public Spirit Shown With Railroad

There is a splendid example of public spirit in the work of Klamath Falls in connection with the Strahorn railroad.

That little city invested \$500,000 in the road. It is a prodigious support of the enterprise. The people provided the funds for building 20 miles of the line, besides much other money and property for terminals, rights-of-way and other requirement for encouraging the construction of the road.

The effort put forth by a comparatively small number of people there to accomplish such a wonderful result has been heroic in the highest degree. It is a remarkable display of purpose, enterprise and self help.

A most pleasing feature is that this tremendous effort by the people of Klamath Falls has been made to tie themselves up more closely to Portland. Their rail connections have been such as to naturally bind them to California. A carload of potatoes or other local products to be delivered in Portland had to make a long excursion southward through Northern California to West, thence northward to this city. It was a round about process that made business with Portland difficult and discouraging.

The Strahorn railroad offered deliverance and the Klamath Falls people acted. They enlisted for a great railroad drive. Their effectiveness and the spirit are revealed in the figures of their contributions, and they are figures to reflect the highest credit on a far larger community.

The beginning of construction on the Strahorn line is to be celebrated at Klamath Falls July 3 and 4. There is to be an excursion from Portland, and Portlanders ought to go and study the spirit of Klamath Falls. It will be a chance for Portland to catch

SUNDAY AT Chautauqua

—JULY 15—

PROGRAM

10:30—Sunday School in charge of State President - - Mrs. J. V. Guthrie

1:30—Special Music - - - - - Tryolean Alpine Singers

2:00—Sermon, "What's Under Your Hat" - - - James Whitcomb Brougner

4:00—Special Concert under direction of Hartridge G. Whipp, Featuring Gaul's "Holy City" by Chautauqua Chorus of 100 voices, assisted by leading soloists of Portland

7:30—Tyrolean Concert - - - - - Graus "Alpine Singers"

8:15—Lecture Sermon, "Playing the Game" - - - - - Wood Briggs

Hold Your Sunday Picnic at Gladstone Park

ADMISSION 25c

the spirit of push that applied here, would write progress and prosperity above the portals of Portland.—Oregon Journal.

Scandinavian Service in Oregon City
There will be Scandinavian service in the Methodist church in Oregon City next Sunday, July 15, at 3

p. m. Rev. John Ovall will preach. Good songs and music. All are most cordially invited to attend.

Can! Summer investment of time and money, small; winter returns in food and health, large.
The Courier, \$1.00 per year.
