

RIDE PILLION ON MOTORCYCLE

Fair Riders Said to Be Deserving Saddle Horses for the Fastest-Gaited Machine.

Have you seen the "pillion girl"? Not the demure, coy and shrinking maiden of years gone by, who rode "side-saddle" behind her swain on horseback, but the rollicking, daredevil knickerbocker girl of today, perched precariously astride the extra seat on a motorcycle, bowling along the road at a 40-mile-an-hour clip.

Despite the wide dissimilarity in the style of riding, the name has persisted in England and the "pillion girls" have become so numerous in that country that recently the department on taxation and regulation of road vehicles sat in solemn conclave to decide whether the "pillion girl" is a source of danger to the general public, the New York Sun states.

It is not clear whether "general public" includes the pillion girl herself, or whether the term comprises merely the motorists of the opposite sex whose eyes are unaccountably distracted from the road by the sight of a pretty girl on the rear seat of a motorcycle, flaunting graceful, silk-clad legs, her hair flying in the wind.

In any event, the committee reports there is no appreciable amount of evidence to indicate that the practice is a source of danger to the general public. They are of the opinion that no case has been made out sufficiently strong to justify the prohibition of the practice.

On this side of the Atlantic the "pillion girl" is apparently safe from prohibition. In fact, each year sees an increasing number of women operating their own motorcycles.

LOSE INTEREST IN SERENADE

Masculine Spaniards Said to Have Turned From Romance to the More Prosaic Football Game.

Sad, indeed, to lovers of the picturesque is the news which comes from Seville, Spain. The serenade, from time immemorial the quintessence of romance, is passing away and will soon be known no more. Worst of all, it is being destroyed by nothing else than modern and unromantic football. This game is at present in full vogue in Spain. Everywhere young men are passionately addicted to it, in Seville as elsewhere, so that the young Sevillians have no longer time as formerly to cultivate the song, the guitar and the mandolin. Football engrosses them.

Soon one will not find a single lover capable of playing a serenade under the balcony of his Dulcinea. If Rosina opens her window Almagro will not be there to declare to her his passion.

But lately, on Saturdays, the young Sevillians assembled and wandered through the streets of the town singing to the stars. Today they go to bed early so as to be the next morning in good form for their favorite game.

Services to Prevent Robberies.

Science, which has rendered so many services, has now attacked a new problem. Inventors are pitilessly hunting the burglars of Paris. Many are now in search of means of defending the stores and banks against criminal attacks.

One of these most curious inventions consists of a pedal situated in the interior of the store. The burglar, if he watches the hands of the man, cannot at the same time see where he puts his feet. Then the pedal starts an electrical clockwork and at the same time an illuminated plate calling for the police appears on the outside of the store. Among the other inventions there is an overcoat with a special pocket for carrying a revolver. The weapon is so placed that when the attacked person facing the burglar raises his arms, the revolver is brought into position for firing and the act of raising his hands pulls a string which discharges it.

Liner Delayed to Save Life.

The value that we set on human life today has been dramatically illustrated by an incident on the Atlantic ocean.

An explosion in the engine-room of a freight ship caused terrible injuries to the second engineer, a young man named O'Neal. There was no doctor on board, so the captain sent out wireless calls for assistance.

Seven ships replied. In six cases doctors told the captain what treatment would be likely to give the best results.

But one passenger liner did more than this; it put 150 miles out of its course and sent a lifeboat with the ship's doctor, in it, who attended to the patient and then had him transferred to his ship. When the liner reached England he was comfortable and on the way to recovery.

That's It.

Mr. Wampoodle was trying to explain.

"You know what I mean. It's the play where the white witches' cauldron."

"Witches Cauldron."

"Yeah."

"Oh, yes, I know."

"Yeah."

"You mean the home brew scene from Macbeth?"—Louisville Courier-Journal.

Hubby and Wifey.

"I've learned one thing from this fishing trip."

"What is that, dear?"

"You will wait more patiently for a cheap fish than you will for your wife."—Louisville Courier-Journal.

Boiling Points of Metals.

For a long time the boiling points of metals were not very accurately ascertained. Not so long ago Greenwood undertook a new investigation of the subject and he gives the following results for certain well-known metals:

Aluminum, 1,800 degrees centigrade; copper, 2,310 degrees centigrade; iron, 2,450 degrees centigrade; and tin, 2,270 degrees centigrade.

HAVE SLANG ALL THEIR OWN

Phrases Introduced by College Students Keep Modern Lexicographers on the Jump.

When Sir E. Bulwer Lytton penned his inspiring line on "the bright lexicon of youth," that lexicon was an open book to ages. But lately the junior lexicon has become more complicated, if not brighter. It is a puzzle even to college presidents. "Snuggle puppy," President Marion Leroy Burton of the University of Michigan remarked the other day, "is a phase of college life of which I am ignorant."

No one can blame a college president for being stumped by "snuggle puppy." Only the youngest and most alert lexicographers can hope to cope with the campus vocabulary, and they only if they take their duties very seriously. "Necking," writes one of the youngest and most serious of the junior lexicographers, "is a Harvard-Yale-Princeton term, about six years old, which has displaced 'petting'—aged about twelve years—as a description of what our grandfathers used to call 'spooning.'"

A rule will be helpful to elders groping among these complexities is to remember that, while there are many terms in the campus lexicon, there is only one topic. For "snuggle puppy" and its successors, look up "spooning."

HER ENUNCIATION IN DANGER

Woman Was Beginning to Feel the Strain of Prolonged Conversation With "Foreigners"

The Woman was visiting the family on the event of the engagement of the youngest daughter. The family was Bostonian by birth and tradition, but the two eldest girls had married several years before and had left their native city. One of them married a Southerner and the other a Westerner.

Each had acquired the accent of her particular locality and the children of the Southern couple had a perfect Southern drawl, while the other sister's children had the broad Western accent.

The effect was startling and the Woman could scarcely follow the conversation. It almost seemed that these sisters were from strange countries, each speaking her own tongue. The mother of the three girls was most confused. When she addressed her Southern daughter she unconsciously affected the Southern drawl and when she talked to her Western son-in-law she nearly perfected the Western accent.

In the hall later, as they were leaving, the mother clutched the Woman's arm.

"My dear," she breathed, "I'm ruining my enunciation trying to talk to these foreigners."—Chicago Journal.

The Forty Immortals.

A name often given to the 40 members of the French academy is the Immortals. These members are elected for life to the academy which meets twice weekly in Paris and which constitutes the highest authority on everything appertaining to the niceties of the French language, to grammar, rhetoric, poetry and the publication of the French classics. The academy was founded by Cardinal Richelieu in 1635, and is the most important and best known of the five academies composing the French Institute, the other four being L'Academie des Inscriptions et Belles-Lettres, L'Academie des Sciences, L'Academie des Beaux-Arts, and L'Academie des Sciences Morales et Politiques. Membership in the academy is the highest distinction within the power of the nation to bestow upon a literary man.—Kansas City Star.

Relics of Long-Past Age.

A large copper kettle and other relics of a past age, believed by students of archeology to have been buried 1,000 years, were unearthed recently by Dr. H. C. Myers, professor of chemistry at Whitworth college, Spokane, Wash., a few miles north of the city, where some road excavating was being done.

"With the copper kettle," said Doctor Myers, "was the skull of an Indian, wrapped in a piece of buffalo skin. The copper was so old it had changed to copper carbonate. This chemical compound had been absorbed by the skull, and it had served as a preservative. A buckskin shirt also was found in the kettle. A few beads and some wampum also were secured from the excavation."

The Ostrich in Africa.

Some time ago the French authorities in western Africa undertook to organize the breeding of ostriches in the territory under their control. Ostriches are found wild in many parts of western Africa. Along the River Niger they avoid the neighborhood of man, but on some of the islands in that and other rivers the natives have established rude ostrich farms. One official, who was appointed to study the subject, says that the methods of the ostrich farmers of the Cape cannot be fully carried out in French territory. It is necessary to leave the ostriches in a partially nomadic state. They migrate more or less with the seasons. When it becomes too dry in the south they go northward.

The New Qualification.

"I presume there is no need of my asking whether you are conversant with the duties of your position?" "Indeed, no, sir, I am, trust me. Before I have been here a week you will have evidence enough to get a divorce in any state in the Union."—Judge.

Mr. and Mrs. Long, who have been spending a week at Seaside have returned to their home at Canemah.

Price Bros. Department Store is offering 20 per cent reductions on the replacement of clothing and household articles lost in the Laundry fire.

OASIS IN ARIZONA DESERT

What Has Been Done to Make Ajo, for Centuries an Arid Spot, Blossom Like the Rose.

West of the Santa Cruz and south of the Gila in Arizona the territory is generally an irreclaimable desert. Its mountains, however, abound in rich ore of gold, silver and copper. At the celebrated mine, the New Cornelia Copper company has created in the midst of this arid district a garden spot with attractive and artistic houses of mission architecture, and broad avenues lined with palms.

This has been accomplished by providing a million gallons of water a day, which is pumped from a 700-foot well eight miles from town. The history of mining in the district is full of the romance of the West, the copper deposits there having been first worked by the Spaniards and Mexicans 200 years before the Gadsden purchase. According to A. W. Allen, writing in Engineering and Mining Journal-Press, it was only after long experimentation that a process adaptable to the treatment of complex ores was evolved. The operating company provides a school and hospital for benefit of its employees and also runs a profit-sharing store. The camp is connected with the railroads of the country by a branch of the El Paso and Southwestern railroad. The mining claims and the mill sites cover an area of 2,854 acres. The property affords a striking and unusual example of what American industrial management can accomplish under adverse climatic and geographical conditions.

KNEW OF HEART'S FUNCTIONS

Papyrus Proves That Ancient Egyptian Physicians Were Fully Conversant With Important Organ.

Egyptian physicians in the days of the Hebrew patriarchs knew the heart is the center of a system, throughout which its pulsations are felt. They performed operations, made diagnoses, catalogued cases and verdicts, and pursued investigations in a scientific spirit, according to a study of the Edward Smith papyrus made by Prof. J. H. Breasted of the University of Chicago.

Professor Breasted declared the ancient document lay in a coffin for "some three and a half millenniums." Pointing out that it was discovered by an American, Edwin Smith, the Chicago orientalist asserted it contained "incomparably the most important body of medical knowledge which has survived to us from the ancient Orient anywhere."

The passage about the heart reads in part: "There is in it (the heart) a canal leading to every member of the body. Concerning these, if the physician places the fingers on the back of the head, on the hands, on the pulse, on the legs, he discovers the heart, for the heart leads to every member and it beats in the canals of every member."

Wild Horses of Sable Island.

Ever since the dismal failure to colonize Sable Island in the Gulf of the St. Lawrence, when Canada was New France, there have been a few domestic animals on that bleak spot, relics of that ill-fated attempt. Some horses were among them, probably survivors of shipwrecks, for Sable Island is a dangerous place and bears the name of the Graveyard of the Gulf, from the number of gallant ships which found their end thereabouts. The horses multiplied and developed into a rough hairy little breed of ponies.

More than one hundred of these wild native ponies perished during the last winter, the government steamer, Lady Laurier, reported the other day when she arrived from a trip to the Atlantic graveyard. The covering of the island grass by drifting snow during a stormy winter was declared responsible for the deaths. It is likely that another such winter will put an end to this unique little horse colony.

Detroit Has a Kite Day.

Kite day has become an annual event in Detroit. So popular has it become that competitors in the events of the seventh annual kite day in May were divided into two sections. Those who live east of Woodward avenue floundered their kites in Pingree park and those who live west competed in Woodward park. The East side contest was particularly thrilling because it was participated in by Chinese, Korean and Filipino boys. Oriental peoples are the most expert makers and fliers of kites in the world, according to the Survey. This fascinating sport with them originally had an important ritual significance.

Metal Turned Into Gas.

Two professors at Chicago university claim to have succeeded in turning a metal, tungsten, into gas, helium. Between 50,000 and 60,000 degrees of heat were needed for the experiment. This is the highest temperature ever known. The temperature of molten steel is 2,000 degrees. That of the sun is 9,000 degrees, while some of the hottest stars are 30,000 degrees. One hundred thousand volts of electricity were discharged at a high speed through a fine tungsten wire. The wire exploded with a deafening report and a flash two hundred times brighter than sunlight and decomposed into gas.

He Was Through.

"I miss your neighbor across the way at the piano this evening. He plays with such finish." "Yes, he's finished; the installment man took his piano this morning."—Judge.

WOULD SAVE THE SONGBIRDS

Associated Audubon Societies Have Planned a General Campaign Throughout the South

A general campaign for the better protection of songbirds is to be conducted throughout the South by the Associated Audubon Societies, a national organization. T. Gilbert Pearson, president of the organization, who has been studying southern bird life, deprecates evidence he has found which indicates that bird mortality in the South has about wiped out valuable species in many localities. In South Carolina he found conditions in this respect very distressing, while a survey in Texas revealed a similar situation. But his indictment covers the entire South, and hence the campaign in contemplation is to include all the southern states. Mr. Gilbert directed the attention of farmers to the fact that the fight against the boll weevil is being greatly handicapped by the slaughter of birds. In this connection he said further:

"While they feed on insects and do not specialize on boll weevils, a single songbird will destroy great quantities of weevils. The value of these birds in checking the multiplication of insects is thoroughly understood all through the North, where the laws protecting birds are observed. In most sections of the North a farmer would prosecute anyone killing songbirds on his lands. But in many parts of the South the farmers, his sons and the hired men kill birds constantly, eating the robin and some of the other larger varieties and shooting many of the smaller varieties for sport."—New Orleans Picayune.

QUESTION FOR LAW SHARKS

Nice Point Concerning Ownership of Pearl Which Cook Discovered in Clam She Was Eating.

A nice question of ethics and of law is raised by the case of the cook at Atlantic City who choked on a pearl found in a clam she was eating and whose mistress then claimed the precious obstruction for her own.

In the diamond mines of the Rand at Kimberley the native workman who swallows a diamond does not, ipso facto, make it his own. He digs in the blue clay on the understanding that every jewel discovered belongs to the De Beers Mining company, Ltd. But the cook was in a different situation. She was given her food as a part of her compensation. The pearl is an excrement part of the clam; it is the picturesque result of a diseased condition.

If possession is nine-tenths of the law, then the cook is entitled to the pearl on the principle of "findings are keepings." In any case, the lady of the house would be entitled to boast, as many a mistress has asserted, "I have a pearl in my cook!"—Philadelphia Public Ledger.

Contestancy.

Elleen was annoyed; she felt the family honor had been badly stained. It was Dora's fault, so she spoke to her about it.

"It's no use denying it, Dora. Although it was too dirty for me to see who it was, I distinctly saw some man kiss you in the garden."

Dora was modern, and didn't appreciate her sister's argument.

"I don't see why," she said. "I've often seen George kiss you."

"Oh, that's different. I'm engaged to George. I allow nobody but him to kiss me."

"Exactly," said Dora. "I allow nobody but George to kiss me!"

SHERIFF'S SALE

In the Circuit Court of the State of Oregon, for the County of Clackamas THOMAS SLAUGHTER, plaintiff,

vs. HENRIETTA STANFORD, J. S. STANFORD and D. W. MILES, Defendants.

State of Oregon, County of Clackamas, ss.

By virtue of a judgment order, decree and an execution, duly issued out of and under the seal of the above entitled cause, to me duly directed and dated the 26th day of July, 1922, upon a judgment rendered and entered in said court on the 17th day of July, 1922, in favor of Thomas Slaughter, Plaintiff, and against Henrietta Stanford, J. S. Stanford, Defendants, for the sum of \$1500, with interest thereon at the rate of seven per cent per annum from the 19th day of November, 1922, and the further sum of \$75.00, as attorney's fee, and the further sum of \$20.50 costs and disbursement and the costs of and upon this writ, commanding me to make sale of the following described real property, situated in the county of Clackamas, state of Oregon, to-wit:

Commencing at the Southeast corner of section 12, T. 6 S. R. 1 E of the Willamette meridian, in Clackamas County Oregon—thence west, 240 rods to the Southwest corner of George T. Slaughter's homestead, thence north 34 rods, thence east 160 rods, thence north 46 rods, thence east 80 rods to the east line of said section 12, thence South 80 rods to the place of beginning and containing 74 acres more or less.

Now, therefore, by virtue of said execution, judgment order and decree, and in compliance with the commands of said writ, I will, on Saturday, the 26th day of August 1922; at the hour of 10 o'clock a. m. at the front door of the County Court House in the City of Oregon City, in said County and State, sell at public auction, subject to redemption, to the highest bidder, for U. S. gold coin cash in hand, all the right title and interest which the within named defendants or either of them, had on the date of the mortgage herein or since had in or to the above described real property or any part thereof, to satisfy said execution, judgment order, decree, interest, costs and all accruing costs.

W. J. WILSON, Sheriff of Clackamas County, Ore. By E. C. Hackett, deputy. Dated, Oregon City, Oregon, July 27th 1922. 7-21-5t

A REAL KISS BY MAIL

The young generation is certainly full of unique tricks. The latest is sending a kiss by mail to your sweetheart. The feminine young person rubs a colored substance on her lips and then presses her lips to a postcard, or a card that goes into an envelope. The ideal substance is said to be a mixture of honey gum arabic and cochineal. The cut shows Miss Clara Ward, a noted beauty, kissing a card and (below) a picture of the kiss.
