Forest Ranger Has Seen Long Service

SANDY, July 11.—C. L. Henson, whose resignation took effect at Zig Zag June 30, took charge of the Little Sandy ranger station in 1910. He has seen forest protection develop in this section from a single patrolman with a pack on his back climbing over high peaks to reach lookouts and fire finders, to Ford cars and even airplane service.

There were only 7 miles of phone lines when Henson went to the Little Sandy. Now there are 79 miles of lines in this district, all of which were built under his supervision.

There are at present 171½ miles of trails. All the old trails have been reconstructed and many new ones built, which includes the loop trail around Ball Run reserve. Henson first entered the service in 1908 in Hood River ranger district No. 1, and moved his wife and six months old daughter up to the mountains on horseback where they lived in tents for two years. At Lava Lake Mrs. Henson was alone all one summer with no settlement in thirty miles.

The only accident occurring under Henson's regime was during the big fire on Roaring river in 1919 when Roy Mitchell, a Sandy overseer hero was killed by a falling tree.

Henson will probably move to Sandy this fall.

THE WIDE-AWAKE FARMER

is no more content with slipshod methods in handling his personal, household and farm finances than with unscientific, hazardous methods in the management of the farm itself.

The maintenance of a Checking Account provides for a simple, accurate system of bookkeeping which has many times proved its worth.

It is a modern necessity and convenience that no alert, progressive farmer can afford to overlook.
