

Farmers—

- ☐ We pay particular attention to farmers' accounts, and will be pleased to have you handle your transactions through this bank.
- ☐ We have Safety Deposit boxes for rent in our vault at \$1.00 per year and up, where you can keep your deeds, insurance policies, etc., in a secure place and you carry the key.
- ☐ We have funds to make desirable farm loans and will give prompt attention to applications for loans upon well improved farms in this vicinity.

LEROY D. WALKER, President. THOS. F. RYAN, Vice President. JOHN R. HUMPHREYS, Cashier.

COMMITTEE REPORTS

Aldermanic Group Investigates Matter of Jitney Service

Following the plea for the establishment of a regular jitney service between Portland and Oregon City, by way of Oswego, the city council appointed a committee to investigate the proposition and at a special meeting on last Thursday night the report of the committee was presented. The report, prepared by Councilmen Templeton, Metzner and Roake, was adopted. It read as follows:

"We recommend that the applicant have drawn and presented to the council a franchise, together with a deposit of the first quarterly license fee of \$50, as provided by the city ordinance. Such franchise shall contain all the requirements made by the Oregon City council, and the franchise can then be taken up and considered by the council or by the committee, and passed in regular order.

"We further recommend that the council do not, in any particular, recede from its former action as regards the requirements and the regulations under which a franchise should be granted.

"The Oregon City ordinance has been passed upon by both the circuit and supreme courts of this state, and is regarded as a model jitney law, which fully protects the city and the traveling public in the conduct and management of the jitney service; and our ordinance and regulations are being adopted by many other cities, not only of this state, but of several other states, that have considered and are now considering the question.

"We do not recommend that a franchise be denied to any person of good character, who will furnish a service which will be a benefit to the public, but it is quite necessary that the requirements that have been made be observed. There is no reason in our opinion, why jitney buses should not be managed by chauffeurs who are qualified to act; that a bond of \$5000 should be required; that a regular schedule should be observed; that jitney buses should have an inside light after nightfall, and that no intoxicating liquors should be allowed."

CHERRYVILLE

(Too Late for Regular Page)

The rain seemed rather extra in quantity but it helped the grain, grass and potatoes wonderfully.

Old timers say the big rain of last week was the hardest they ever saw in this vicinity. Gullies were washed in the land and rocks and stones were moved some distance.

Politics—like misery—makes one acquainted with strange bedfellows. If the old standpatters were such a shabby lot as Teddy said they were how does it happen that he is associated with them now?

The Boy Scouts broke camp the first of the week and, although it rained pretty much all the time they were here, they seemed to enjoy themselves. Last Saturday night they gave a free exhibition at Dr. Boyd's summer home. This was quite a treat and consisted of fancy dances by Master Bennetville, who is a marvel of lightness and grace; songs, recitations and instrumental music.

Now that the loop around Mt. Hood is an assured fact and connected on this side from the Columbia highway, Cherryville is on the map, as the old Barlow road runs right by our doors.

Harry Kell, from Cosmopolis, who took up a railroad claim about two miles east of here, found that he had not built his cabin on the land and became discouraged and left. In the meantime George Odell moved into an empty cabin that was on the land and is now holding down the claim.

The Paige automobile people have succeeded in getting a machine up to Crater Rock within less than a mile of the top of Mt. Hood. They stripped it pretty well and ran it on frozen snow crust. This is the first time anything of the kind was ever attempted and will make a big "ad" for these people.

MAN MAY DIE

Kicked by Mule, M. H. Smith is Near Death's Door

M. H. Smith of Sellwood is not expected to live as a result of the injuries he sustained when a mare he was lifting kicked him in the neck while he was with the animal in a pasture near Oswego yesterday afternoon.

Sheriff Wilson and District Attorney Hedges responded, among others, to the calls of the injured man. The horse which kicked Smith had been suffering during the day and the owner with a veterinarian came to the pasture to relieve it. The horse could not rise from the ground and it was while attempting to lift it that Smith was severely injured.

The Courier is \$1 a year if paid in advance.

BLAME IS PLACED

Oregon Congressman Lauded by Eastern Writer

Senator Chamberlain places the blame for the state of unpreparedness in which the country finds itself upon the American people. They have been extremely lax, the senator finds, in getting ready for the present emergency. Too few of them have learned to fire a rifle, ride a horse, make a forced march or get to the Mexican border in anything like a hurry when ordered there by the president.

It ought to be said for Senator Chamberlain that, wherever the blame lies, he has done his part to correct the conditions he points out. As chairman of the senate committee on military affairs he framed a bill that came nearer to embodying the essentials of preparedness than any measure proposed—much nearer than the measure that finally became law. But in making his present indictment against the American military system the senator has shown that he is very much under the influence of the exclusive and considerably self-centered body to which he belongs.

The faults he points out undoubtedly exist, but the country will be under the impression that the correction of them has belonged to congress. The American people probably are lax about a good many things—they do not, for instance, scrutinize with too much care the qualifications of the representatives they send to congress—but to hold them responsible for the nonperformance of duties delegated to the national lawmakers is to indulge in a humor that we have not been taught to look for in a United States senator.

Congress is one of the most delightful clubs in Washington. The rooms are pleasant and airy, the service good and the chairs very comfortable indeed. But the membership, like that of all good clubs, is limited. As a whole, the American people do not belong—few can even get into the gallery. The only way the American people can vote, even indirectly, on any proposal before the club, is to wait two to six years and vote for or against one of its members. Senator Chamberlain speaks very much as though he were under the impression that the American people all had cards of admission and the right of club suffrage. It is true that the congressional record conveys by its bulk the impression that all of us are talking at length, but that impression is not correct. Only the members talk, the rest of us merely listen or go to sleep.

If the national guard is slow in getting to the border, if it gets there untrained and unequipped, if the men are physically unfit and faint on march or at drill, as Senator Chamberlain charges, the blame lies at the door of congress and nowhere else. For years military experts have been telling congress that these precise conditions would develop under the system it has adhered to, and our whole military history has borne their statements out. But congress has done nothing about it. Even in the face of the present crisis, when the necessity of preparedness could no longer be ignored, it refused to provide a trained reserve force under direct federal control and voted to continue the militia policy that on every past occasion has revealed the weaknesses which Senator Chamberlain now deplores and the blame for which he places on the public.—Kansas City Star.

MORPHY, THE CHESS WIZARD

Marvelous Skill of the Greatest Master of Modern Times.

Paul Charles Morphy, the famous American chess player, is classed as "perhaps the most remarkable chess player of modern times." He was born in New Orleans in 1837 and was notably precocious as a child. He showed this precocity particularly in games of chess, and before he was thirteen had defeated many well known amateurs. For several years he studied law at the College of South Carolina and played chess only occasionally. But in 1857, at the first American chess congress, held in New York, he easily defeated the best players that could be brought against him. In 1858 Morphy went to England and there defeated Lowenthal, Boden and Bird and performed the most astonishing feats in simultaneous games without the board. When he was in Paris, the same year, he won five out of eight games with Harwitz and gave many exhibitions of blindfold playing. It was these last that were responsible for the early breakdown of his health.

After his return to the United States in 1859 he defeated the visiting German expert, Anderssen, in seven out of eleven games. He was admitted to the bar and began to practice law in New Orleans. But the strain of his blindfold contests had been too great for his mind, and he was forced to give up chess altogether and then to abandon all mental occupation. He lived in retirement until his death in 1881. His activity thus covered a comparatively short space of time.

Morphy's skill is described as inexhaustible. He never was a close student of chess. He played his games easily and quickly, with no preparation and little hesitation. Yet his combinations were "remarkable for finesse, depth, elegance and soundness." He also possessed a phenomenal memory. —New York Times.

Dr. Meissner Returns

Dr. C. H. Meissner returned on Saturday from a trip to the Mexican border adjoining California. The doctor visited the camp of the third battalion, Third infantry, soon after it had been established and reports the men to have been preparing to enjoy themselves to the fullest extent before the call, which is anticipated, puts them on the line of duty.

The National Forests of Oregon and Washington contain thousands of desirable summer home sites that may be leased at reasonable terms for a period of years.

GLOBES IN NATURE

Why Raindrops and the Planets and Suns Are Round.

THE FORCES OF ATTRACTION.

As a Crowd Gathers in a Circle Around an Object of Interest, So Molecular and Gravitational Impulses in Matter Act Toward a Center.

Falling rain forms into spherical drops for the same reason that the earth has become a globe—namely, because that is the shape in which the internal forces of attraction attain a balance. In the case of a very large and massive body like the earth it is the attraction of gravitation that controls the form, but in that of a small body like a raindrop it is the molecular attraction of the infinitesimal particles. The intensity of molecular attraction, which is the force that holds the components of bodies together, is far greater than that of the attraction of gravitation, but it is exercised over a comparatively insignificant distance. In each case, however, the resultant of all the attractions between the individual particles is a force directed toward the center of mass.

But by the principle of inertia time is always required for any force or combination of forces to set matter in motion. The larger the volume of matter concerned the longer will be the time needed for the internal forces to group all the particles symmetrically around their common center of mass.

It is upon this principle that the old fashioned shot towers are operated. Molten lead is dropped from a great elevation after passing through a sieve to facilitate its separation into small masses, and during their downward flight these masses are rounded into little spheres by the mutual attraction of their molecules, which group themselves around a common center.

With very large bodies not broken up into small portions the gravitational force plays the principal part in shaping them, because gravitation is effective at great distances and throughout vast masses, while cohesion, or molecular attraction, is extremely limited with regard to the space over which it acts.

Each molecule attracts a little group of other molecules close around it, and these in turn attract their immediate neighbors. Within the space occupied by a raindrop the molecular attraction is the master force and quickly shapes the mass into a sphere.

And just as a spoonful of water thrown from a high tower will descend in the form of one or more round drops owing to the resultant pull of all its molecules toward a common center so the entire ocean if it were flung out into open space would become a gigantic ball of water rounded into that shape by the gravitational attraction acting throughout its whole mass.

It is by no accident that all the planets are spherical. They have taken that shape as inevitably as a loose stone rolls down a steep hill. Their forms are not perfect spheres, because they have been subjected to outside disturbing forces, such as the centrifugal effects of their rotation on their axes and the deformations produced by the attraction of other planets and of the sun. Even the heads of comets are spheroidal, although they are believed to consist of swarms of small bodies like meteors.

This tendency of masses, whose component parts or particles are free to move among one another, to assume a globular outline, is curiously illustrated even by crowds or swarms of sentient beings. Thus a swarm of bees when it gathers close becomes spherical or spheroidal, since that form is best suited to inclose the greatest number of individuals.

A human crowd certainly would take a spherical form if its members were able to choose their positions as freely in up and down as in horizontal space. Being confined to one level, they arrange themselves in a circle, which is the section of a sphere.—Garrett P. Serviss in New York Journal.

Political Chances.
"I see when a man runs for office he has to put himself in the hands of his friends."

"Yes, my dear."
"If a woman ran would she have to put herself in the hands of her woman friends?"
"I suppose so."
"Well, I do not imagine many women will run. Think of taking such chances!"—Louisville Courier-Journal.

Not a Bad Error.
She (with newspaper)—Here's a funny mistake in the report of that affair last night. It says that Mrs. Swellman appeared in a handsome "ampere" gown, instead of "empire." He—Well, "ampere" isn't very far off; her gown was a bit shocking.—Boston Transcript.

A Pleasure.
"I put through a big financial deal last week," remarked Mr. Dustin Sax.
"I thought you said you were going on a pleasure trip."
"Could there be any pleasure greater than putting through a big financial deal?"—Washington Star.

Obliging.
"Walter, the steak is so tough I can't cut it with this knife."
"Very good, sir—I'll bring you another knife, sir."—Columbia Jester.

To encourage talent is to create it.—Lessing.

Sale Is Approved.
The action of the water board of Oregon City in disposing of \$40,000 worth of West Linn water bonds in the possession of this city was approved on Wednesday evening by the city council of West Linn. Important business was transacted at the meeting and the report of the city treasurer showed a very favorable financial condition.

Scarlet fever kills over 10,000 Americans each year.

RECRUITING IS SLOW

Captain Williams Needs 700 Men at Clackamas

After a week of rain, clear weather the last two days has stimulated recruiting for the Oregon National guard at Camp Withycombe, Clackamas station, where Captain Kenneth P. Williams, U. S. A., is making an effort to gather together enough men to send to the Mexican border to bring the Third Infantry up to the maximum war strength.

Captain Williams stated yesterday that not more than 150 men have been sworn in since the troops departed and that the state organizations lack 700 men of being at maximum strength for war service. According to the captain's statement no new units will be sent to the front until those already there have their full quota of men and as men are enlisted at Camp Withycombe they will be sent to the border camp in small groups as soon as outfitted.

DR. MOUNT SPEAKS

Series of Meetings Has Been Addressed by Many Prominent Men

A feature of the union church meeting at Clarks on Sunday evening was the splendid address delivered by Dr. H. S. Mount of Oregon City. Dr. Mount is one of several prominent men who have been called to address the regular assemblies at the Clarks hall, and the meetings are very popular because of the plan that has been adopted in their management.

Next Sunday evening Judge Grant B. Dimick of the county seat will speak on the subject of "The Future Destiny of Our People." The meetings are not confined to religious worship and the speakers are usually asked to select a subject that is in the public attention. In this way not only are the talks made doubly interesting, but they are valuable as educational discussions.

BARN DESTROYED

Owner Painfully Burned in Blaze at West Linn

While the owner was at work in the field the large barn of William Robinson at West Linn was destroyed by fire of unknown origin on Wednesday morning. Hay and grain, together with farm equipment, was destroyed in the blaze. The loss of approximately \$1000 was partly covered by insurance.

Mrs. Robinson was at home when the fire started and she summoned neighbors nearby. The men working on the Robinson farm came to aid the fire fighters and in his efforts to save his property Mr. Robinson was painfully burned about the arms and shoulders. It is presumed that spontaneous combustion is responsible for the fire.

MINISTERS MEET

Session Draws Clergy from Large East Side Territory

The ministers of the Methodist churches in the east side district controlled by the Salem district are in session at the Methodist church in this city for today and tomorrow, with much important church business to be transacted and discussed.

A very interesting program of speeches and lectures have been outlined. Dr. T. B. Ford, district superintendent, and formerly pastor of the local church, opened the meeting this morning with an interesting address the ministers on "The Restoration of the Old-Fashioned Revival," at the meeting today.

LARGE MORTGAGE FILED

Bond Issued by Paper Company Covered in Book of 160 Pages

It took a book of 161 pages to contain the record of the mortgage filed with the county recorder here on Saturday securing a \$6,000,000 six per cent. bond issue for the Crown-Willamette Paper company.

Trustees are the Continental and Commercial Savings & Trust company and F. H. Jones of Chicago. The mortgage securities cover property of the paper company in Oregon, Washington, California and Nevada. The mortgage secures an issue of six per cent. serial bonds.

Surprise Party

An enjoyable party was given last week in honor of the birthday of Miss Myrtle Murali by her parents, Mr. and Mrs. Murali, at their home here. Thirty-eight friends of the young lady were present to bid her the wishes of the occasion and to enjoy the delicious refreshments that had been prepared.

FOR SALE—Modern Bungalow, 2 lot corner assortment of fruit trees, north Portland, or will trade for place around Oregon City. If interested address Box 60, Rt. 1, Clackamas, Ore.

Experiments with jack pine have shown that it is well suited for making kraft paper. On some of the national forests this tree is used to plant land which is too poor to grow other timber.

The use of osage orange for making dyes promises to be extensive. The Forest Products laboratory is making a census which shows that the supply of the wood is more than ample to meet present needs.

Better wages make better health. Better health makes better citizens. Better citizens make a better nation.

Hookworm enters through the skin. Cholera is spread in the same manner as typhoid fever.

Waists, the like of which have never been seen before—and the like of which will not be seen again, on sale tomorrow at just

\$1.00

All "Wirthmors" and all worth more

THE styles illustrated are new; they just arrived today—they were designed very recently for us—and the several hundred other merchants (just one in each city) who have arranged for their sale. As Wirthmor Styles are never duplicated, they will not be made again—and so when this allotment is gone, no more of the same styles can be procured.

It is always a progressive store that sells Wirthmor Waists; because, Wirthmor Waists are made and sold under a progressive co-operative plan, that has made possible their matchless values.

IN THIS CITY WIRTHMOR WAISTS ARE SOLD HERE EXCLUSIVELY.

hopes today that he will avoid an operation. Mr. and Mrs. J. C. Cook left for their loganberry farm near Salem, by automobile, Thursday morning.

CLASSMATES MARRY

Wedding of Local Girl Takes Place in Seattle

Miss Maude Moran and Millard Gillette were married at Seattle last evening upon their arrival from Oregon City, where they have been schoolmates and close friends for several years. Both of the young people were raised in Oregon City and have a wide circle of friends here. They departed for Seattle Wednesday morning and the marriage ceremony was performed at a gathering of friends and relatives that evening.

Mr. Gillette is a first aid in the Ford automobile plant at Seattle.

The Courier—\$1.00 per year.
