About the State

Resume of the News of the Week from All Parts of Oregon

The completion of Coos county's new \$3800 bridge over the North Fork of the Siuslaw river between Florence and Acme, is expected to be completed by the end of this month, according to H. W. Libby, county surveyor, who visited the bridge recently.

The monthly salesday was held at Albany Saturday afternoon, with a good crowd present, and much interest, as usual, in the sales. These sales have been running nearly two years and have proved quite a drawing card, and there are always an extra number of people in the city on salesday.

First payments under a \$3000 appropriation for dependent Portland families of Oregon national guardsmen on the border were made Monday upon the authorization of the county commissioners. An expenditure of \$150 per month for the families of seven members of battery A was allowed.

The first through freight train from Eugene arrived at Marshfield late last week. It consisted of 12 cars. It brought chair cars for the Pythian excursion to Portland Monday. The train crossed the Umpqua draw bridge. The freight runs three times each week. Not much business is expected until rates are settled.

Polk county proved a poor field for the recruiting officers. Notwithstanding the fact that this county has nearly 5,000 population, less than 60 men, physically fit, left Dallas with the National Guard. Since then perhaps a half dozen others have enlisted, making the probable total of Polk county's representation in the volunteer army now on the border not to exceed 65.

That John Anderson, the leading clothier, has faith in the future of Forest Grove was shown in substantial form when a couple of days ago he let the contract for a new store and office building that will cost approximately \$10,000. The building will be located on the corner of Pacific avenue and Main street, and will be two stories and a basement, 50x92 feet.

Harry Breneman, of McMinnville, has sold the larger part of his dairy herd and some of the fixtures of his milk business to E. Mochetaz, proprietor of the Yamhill dairy, and will devote his attention to farming, having leased about 800 acres of the Key estate near Perrydale, and will take possession August 1. Mr. Breneman has made a record for sanitary service in the milk business of which he can be proud.

Some citizens of Wasco county who have been opposed to the proposed \$260,000 good roads bonds, on the ground that the issue would necessitate a special election at a cost of several thousand dollars, will now be in favor of bonding, for those who are directing the movement, have ascertained matter can be legally decided at the regular November election, without added expense to the taxpayers.

Frightened at an elephant aimlessly wandering down the street, the team belonging to L. L. Harrell and being used on the street sweeper, ran away, tore down a telephone pole and wrecked L. S. Hill's car, the team and sweeper escaping injury. The elephant belonged to the circus that was in the city and had wandered away from its trainer. The pachyderm was not in the least disturbed by the commotion it created.—(Cottage Grove Sentinel.)

WEATHER SCIENCE

It Is Good as Far as It Goes, but It Doesn't Go Far Enough.

SECRETS HIDDEN IN THE SUN.

Changes in Intensity and Quality of Solar Rays Cause Effects That Bother Meteorologists—Why Forecasts of Experts Often Go Astray.

The most imperfect science is meteorology. The margin of error in its calculations is sometimes enormous—sufficient to completely reverse a prediction.

The weather bureau is a useful institution, based upon an incomplete system of correlated facts of observation, which are scientific as far as they go. But there are elements concerned in the production of weather about which the methods of meteorology give no information.

There are birds, insects and four footed animals which have an incomparably greater foreknowledge of weather changes than the entire scientific corps of the agricultural department possesses.

When the predictors of the weather bureau give warning of an approaching storm they act on very much the same principle as that on which a railroad time table is based. A train having been announced by telegraph as started on a given line will arrive in regular succession at certain points along that line, and a station agent at any given point can, if no accident intervenes, forecast the moment of the train's arrival at his station.

Storm centers, or cyclones, moving across the country are in some ways comparable to trains following a true schedule. But unfortunately they do not run on rails, they are not driven by an invariable force, they are subject to interruptions and obstacles of many kinds, and instead of always keeping the track and following the course they frequently wander vaguely about or take an unexpected turn or else fade away like exhausted whiffs in water.

In fact, the weather bureau predictors are in the same quandary in which train dispatchers would find themselves if railroad tracks were shifting lines, continually drifting this way and that, getting crossed and entangled or stalling into suddenly formed quagmires and thus disappearing for good.

Meteorology as a science of weather prediction fails just because it possesses too few facts. With the aid of the telegraph the weather bureau can follow the trail of a storm center across the United States, but it cannot tell just how a new storm is born nor just when or where it will begin its course.

The one only great fact on which it bases its whole system of prediction is the general tendency of cyclonic disturbances in this country to travel eastward with a northerly trend, while storms originating around the gulf of Mexico and the Caribbean sea usually come up the coast.

But the official weather prognosticators are as much in the dark as the ordinary citizen concerning what is going to happen in the atmosphere next week, and they really know nothing about any storm until after it has begun its career, and then all that they know is the course that it will take—in case it doesn't happen to change its mind.

A slight variation in the intensity, or quality, of the radiation received from the sun might account for sudden changes or abnormal weather, and recent investigations show that such variations occur, but what is needed is more accurate knowledge about them and their effects. Heat and light are only two of an infinite number of forms of vibration sent to us from the sun. Everybody knows that when the weather records show that two days are precisely alike in temperature, in humidity, etc., human nerves prove that they are vastly unlike in some unnamed peculiarity which affects the springs of life.

The spider busily and confidently spinning her webs in preparation for a spell of fine weather which some unerring mechanism of foreknowledge within her enables her to detect is a surer guide than a barometer. She responds to vibrations as yet only guessed at by science, and so perhaps do the supersensitive nerves of many human creatures.—Garrett P. Serviss in New York Journal.

Glass Cups. The first glass cups were made at Alexandria. Some were colored like Bohemian glass and decorated with glass paste, imitating precious stones and cameos. Some were opaque, others clear as crystal and still others formed of opaque layers welded together like the famous Portland vase, in which the white upper layer had been cut away like a cameo, leaving a blue ground around the figures.

Watered. "If you are looking for bargains," said the broker, "I can suit you. I can offer you some stocks at 10 cents a share."

"But why are they so cheap?" demanded the lady shopper.

"You see, they have been slightly damaged by water."

A Sable Philosopher. "Don't go ter growlin' 'kaze de rollin' world don't turn ter look at you. Ef it did it might be disapp'inted an' you'd hear it sayin', 'Ter think dat I got ter give de likes er dat' a free ride 'round de sky!'"—Atlanta Constitution.

He that lives upon hope will die fast.—Franklin.

Milwaukie Mill Starts. The Menefee shingle mill at Milwaukie has resumed operation, the gladdest whistle of the mill having been sounded this week for the first time in several months. Thirty-eight men responded, the most of the men being Milwaukie residents. George Johnson, superintendent, said the men probably will have steady work now. Wages run from \$2.50 to \$7.50 a day, which means a weekly payroll of \$1000. The mill is running on a ten-hour schedule from 7 a. m. to 6 p. m.

DIVORCES ARE FEWER

Long Distance Record Established in Judge's Court This Week

This week the divorce mill has been comparatively idle for want of the oil that puts the gears of conjugal felicity into the harmonious order that is desired by those who find life together incompatible.

The record distance which a couple has traveled for a divorce was set in the court this week when Rose Wilkinson asked the court to sever the matrimonial knot that was tied at Hampton, England, on September 10, 1895. Other complaints have come from the far east and from all other sections of the United States, but recently few have come from such a great distance as England. The Wilkinson's have lived in the states for some years and have two minor children, a boy, 17, and a girl, 19. Mrs. Wilkinson charged her husband, Charles Edward Wilkinson, with cruelty and non-support. She is forced to work in a Portland store, she says, and during her life with him had to do much of his work.

C. W. Dungan, married to Vera O. Dungan at Turner, Ore., on October 21, 1908, would bring the bark that has sailed the sea of matrimony for nearly 8 years, into port and would gain the custody of three boys, aged 3, 5 and 7 years. He alleges desertion in his complaint.

Vancouver, Wash., furnishes much material for the Campbell divorce mill, which has paused briefly this week because of the absence from the city of the judge, who is on his vacation trip. Margaret M. Mearns seeks separation from George A. Mearns, to whom she was married on January 28, 1914. According to her complaint Mrs. Mearns objects to having to earn her own living, and in addition bears the cruel treatment her husband has inflicted upon her. Once, says the complaint filed on Tuesday, the gentleman of leisure in the Mearns family decamped with \$41, the available household finance, and the wedding ring that he gave his wife at Vancouver.

Decrees were granted on Saturday by Judge Campbell to Margaret S. Paul, divorcing her from E. V. D. Paul, default, granting \$40 alimony to Mrs. Paul and court costs; to Max Glutach from Bertha Glutach, with the custody of 3 children to the plaintiff; Gertrude O. Phelps from P. J. Phelps, custody of two children to plaintiff, \$20 monthly for support of child to be paid to Mrs. Lola G. Baldwin of the Portland police department; George Sigler from Rosa Sigler, the former granted custody of an adopted child; Charles Wolf from Sarah Wolf and Genevieve Dunning from Calist S. Dunning, the former taking custody of a child and receiving \$25 monthly for its support.

EAST CLACKAMAS

(Too late for Regular Page)

The tent meetings at the school yard still continue.

J. Enghouse and J. Welch were shopping in town Monday.

J. W. Bennett is nailing shingles on the Kelnhofer henry, which is the largest in the community if not in the county. The dimensions are 40x100 and it will house 1000 birds.

G. T. Daywalt and wife spent the week-end in Portland visiting relatives.

Earl Boyer spent a few days at home last week, returning to his position on the boat Monday.

M. L. Adams on school house avenue has traded his two acres for some property in Gladstone and will move there shortly.

The Kelnhofer brothers have traded for more of the Wade ranch. The Wades will move above Oregon City as soon as they can get possession.

Mrs. A. Cumins was a visitor with Mrs. A. Finzer Monday.

Ralph Boyer peddled to Portland Monday on business.

This is the kind of weather the ranchers like to see, as it is great hay weather.

Mrs. A. Finzer gave a party to her two daughters in honor of their birthday last Monday and there were prettily presents. The following were present: Miss Lucile Bennett, Edna Boyer, Meta Rasmussen, Wilma, Millen and Paul Kneeland, Dee Woodward, Malters Johnson, Helen and Alice Holcom, Gladys Peterson and Donald Finzer of Portland.

Miss Emma Haberlach is visiting relatives at Tillamook and, we presume, is observing the ocean scenery at the same time.

At one time this summer there seemed to be some excitement as to who would get the passenger trade, the P. & O. C. Ry. or the jitney; so the P. & O. C. has put on a jitney now from Portland to Stone to catch the travel.

Panic at Oswego

A panic-stricken passenger aboard the "Swan" caused some confusion among the several hundred Christian Endeavorers on a moonlight excursion last Friday night by shouting a warning when the boat struck a log as it approached the landing at Oswego and a hole was punched in her side well above the water line. The boat is commonly used for moonlight dances on the river. As it struck the log the passenger warned everyone to the rear, declaring the vessel about to sink. The damage was repaired before the boat started on the return trip to Portland, arriving safely at midnight.

A Good Time Coming

Everybody come to see the three-act play given for the benefit of the Sweet Brier baseball team. It will be given in George Tiedeman's new barn, Mountain Road District, August 12th at 8 p. m. All girls bringing baskets will be admitted free. Others 15 cents. Children under 10 years, free. Social time later. All come!

PRINCE ALBERT
TOBACCO IS PREPARED FOR SMOKERS UNDER THE PROCESS DISCOVERED IN MAKING EXPERIMENTS TO PRODUCE THE MOST DELICIOUS AND WHOLE SOME TOBACCO FOR CIGARETTE AND PIPE SMOKERS.
PROCESS PATENTED JULY 30th 1907
R. J. REYNOLDS TOBACCO COMPANY WINSTON SALEM, N. C. U. S. A.
DOES NOT BITE THE TONGUE

P. A. puts new joy into the sport of smoking!

YOU may live to be 110 and never feel old enough to vote, but it's certain-sure you'll not know the joy and contentment of a friendly old jimmy pipe or a hand rolled cigarette unless you get on talking-terms with Prince Albert tobacco!

P. A. comes to you with a real reason for all the goodness and satisfaction it offers. It is made by a patented process that removes bite and parch! You can smoke it long and hard without a come-back! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

Prince Albert affords the keenest pipe and cigarette enjoyment! And that flavor and fragrance and coolness is as good as that sounds. P. A. just answers the universal demand for tobacco without bite, parch or kick-back!

Introduction to Prince Albert isn't any harder than to walk into the nearest place that sells tobacco and ask for "a supply of P. A." You pay out a little change, to be sure, but it's the cheer-fullest investment you ever made!

PYTHIANS ELECT

Local Lodge and Club Will Distribute Rose Bouquets

With one of the largest gatherings in Pythian history, the grand lodge of the Knights of Pythias of Oregon, in the castle hall of Ivanhoe Lodge, at Portland on Tuesday, chose Harry G. Wortman, of Medford, grand chancellor. Mr. Wortman had been grand vice-chancellor during the past year and his election was expected.

The new grand chancellor's election was made unanimous on motion of Gus C. Moser, of Portland.

The real contest of the election came in the choice of a grand vice-chancellor, Leslie E. Crouch, of Portland, being chosen. Mr. Crouch was opposed by F. J. Johnson, of Astoria. W. C. Chase, of Coquille, was also nominated, but he declined, owing to the fact that the Coos bay district is planning to make an effort to get the 1917 convention of the grand lodge.

The Oregon City Pythians have taken a keen interest in the convention and have attended in large numbers. On Tuesday a large delegation participated in the big parade, which was held in the streets of the metropolis.

The local lodge and Commercial club are gathering rose bouquets to be presented to Knights and their ladies "with the compliments of Oregon City."

A Woman's Helpful Advice

Mrs. G. H. Eveland, Duncan Mills, Ill., writes: "I was stricken with lumbago, unable to turn myself in bed. A neighbor brought me Foley Kidney Pills. Said she had been similarly afflicted and they cured her. I tried them and was completely cured by three bottles." Mrs. Eveland heartily recommends Foley Kidney Pills for kidney trouble. When the kidneys are not functioning properly, impurities left in the blood cause rheumatism, lame back, aches and pains.—Jones Drug Co.

New Principal Arrives

A. H. Thompson, who was elected principal of the Milwaukie grammar school, will move there next month preparatory to beginning his work in September. A sister and two nieces will accompany him to enter the Milwaukie high school. Professor Thompson has taught in Aurora, Woodburn and Silverton. He is a graduate of the Monmouth Normal school.

The board of education is negotiating for the services of Mrs. Goetz, as music teacher. She formerly taught music in the Milwaukie school. Principal Robert Goetz, of the Milwaukie high school, will act as athletic coach for the opening term in addition to his duties as principal. He has had experience as coach elsewhere.

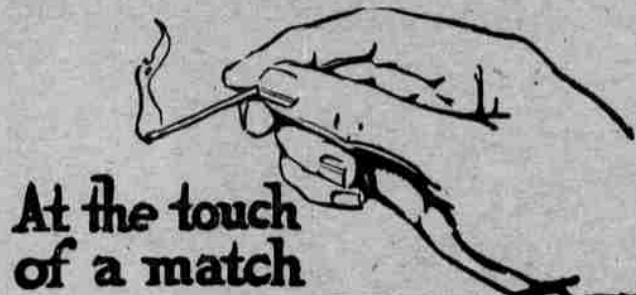

Swedish Folk Gather

The annual picnic of Court Scandinavia, Foresters of America, was held on Sunday at Canemah Park, Oregon City.

One of the interesting events was the final tug-of-war contest between the lodges Linea, Scandia and Vasa. Three contests have heretofore been won by each team and the victors receive the silver trophy for one year.

A unique feature was a series of Swedish National dances by a troupe of trained dancers, several of whom have appeared at Skansen, Stockholm, at the National Free-Air museum. There were many races and contests for children and grown people of both sexes.

The American farmer produced in three years of recent democratic administration a yearly income \$1,000,

At the touch of a match

All the conveniences of gas—better cooking and a cleaner cooler kitchen

Bakes, broils, roasts, toasts. More efficient than your wood or coal stove, and costs less to operate. Your cooking is better, too, because you have heat-control like a gas stove.

NEW PERFECTION OIL COOK-STOVE

The New Perfection gives a clean, odorless, scotless flame because of the long blue chimney. Cuts out the drudgery of wood or coal. Keeps your kitchen cool. In 1, 2, 3 and 4-burner sizes, ovens separate. Also cabinet models with Fireless Cooking Ovens. Ask your dealer today. Standard Oil Co. (California)
