

THE FASHIONS

Before very long, thin summer frocks and the light suits will have to be put away for the heavier fall garments to take their places. It often happens that the first chill winds catch us unprepared, and certainly there is nothing more upsetting than to realize that we had not given a thought to the coming of fall and were, consequently, not ready for the change in the weather.

The autumn styles are already well established, so no one need be afraid to make her selection in suits and gowns early, for there is no danger that they will not be in good style later. The suit models that have come over from Paris are as attractive as they can be. The coats are mostly three-quarter length and some of them are shorter. They reach to the hips, the finger tips or the knees. The skirts are quite full; just as full as they were last fall, but not so flaring. The lines are straighter, as a rule, and the skirts just a trifle longer than they have been worn in the past seasons. Strictly tailored suits, of course do not have very wide or very long skirts.

Among the coat styles there are

some Russian effects seen, which most women will be happy to learn. One of the favored models is fitted above the waist and quite full below it, and there are many variations of this idea.

A suit that gives promise of being very well liked on account of its generally becoming lines is illustrated here. It has deep pockets which are cut in one with the fronts of the coat, and a narrow belt going around the sides and back, but not the front. The skirt that completes this suit has pockets corresponding in cut to those on the coat.

In the other suit shown here, there is a suggestion of the Empire style, the return of which we have been hearing so much about lately. It comes in a modified form, having a panel in the front and back, and is certainly most attractive.

A wonderfully smart suit from Paris was made of navy blue gabardine, with a very long, full coat. The

skirt also was very full. It extended up above the normal waistline, where it was attached to a blouse of brown and black checked silk with small checks. The coat was lined with this silk, and when thrown open the effect of the whole costume was very striking.

SUIT FABRICS AND COLORS

There are charming suit materials for fall, which will perhaps make it difficult to decide on what to get. Besides the old stand-by, serge, there is its staunch companion, gabardine; then there are wool poplin, wool velours, broadcloth, cheviot, mixtures, and many fancy twills and suitings. For dressy wear, velvet, velveteen and satin will be very much in the foreground. The checked wool velours are very stylish in two tones, as, for instance, black and brown, tan and brown, and gray and brown. They are most practical, too, for they wear very well. The fashionable self tones are navy blue, dark brown, green, taupe, gray, burgundy and black.

FUR FOR TRIMMING

Did any woman fear that the fur on her suit last winter would not be

EDISON FOR WILSON

Electrical Wizard Points to Presidential Achievements

Thomas A. Edison, the electricity wizard, republican and supporter of Theodore Roosevelt for the presidential nomination, Sunday announced that he would work and vote for Woodrow Wilson. He said:

"Not since 1860 has any campaign made such a direct call on simon-pure Americanism. The times are too serious to talk or think in terms of republicanism or democracy. Real Americans must drop parties and get down to big fundamental principles."

"More than any other president in my memory, Woodrow Wilson has been faced by a succession of tremendous problems, any one of which decided the wrong way would have had disastrous consequences. Wilson's decisions so far have not got us into any serious trouble, nor are they likely to."

"It has been said that Wilson at first was against preparedness. Perhaps he was, but when convinced that intelligent public opinion was overwhelmingly in favor of it, he changed. That is the proper thing for our president to do. A president defiant of public opinion would be a dangerous man in our government."

"His attitude on the tariff shows an equal openness of mind. A tariff commission will take the whole problem out of politics. It is my hope that experts will be named and that the body will be continuing and vested almost with the dignity of the supreme court."

The KITCHEN CUPBOARD

PRIZE WINNING SALADS.

CHICKEN SALAD.—Boil one chicken until tender and chop the meat fine. To this add six hard boiled eggs cut fine, one cupful each of chopped celery and cabbage and one-half dozen sweet pickles cut fine. Make a boiled dressing as follows and pour over this: Two whole eggs well beaten, one-half teaspoonful of mustard, one cupful of vinegar, one-half cupful of sugar and butter size of a walnut. Boil until thick and add one teaspoonful of salt.

A True Spring Salad.—Chop three tomatoes, two cucumbers and four or five new onions into pieces resembling cubes. Serve on crisp lettuce leaves and dress with olive oil dressing. The dressing is made as follows: Yolks of two eggs into which is dropped slowly one cupful of best olive oil. Beat rapidly. Add the juice of one large lemon, salt and pepper (black and red) to taste and a dash of paprika.

Dublin Salad.—Mash one and one-half cupful of leftover potatoes and mix in two tablespoonfuls melted butter, two tablespoonfuls finely chopped parsley, one teaspoonful onion juice, one-half tablespoonful vinegar. Chill thoroughly. When ready to serve shape roughly into small balls. Place on lettuce leaves and serve with mayonnaise.

Date Salad.—Clean and stone one pound of dates, all fiber removed; three oranges, peeled and cut into thin slices; one cupful of chopped apples, one cupful of celery, chopped fine. Mix apples, celery and one-half of the dates with salad dressing. Place middle slice of orange on lettuce leaves and cover with the apple mixture. Then top with dressing, well mixed with whipped cream.

Watercress and Cream Cheese Salad.—Fresh watercress, crisp and cold, mixed with a little minced onion and finely shredded smoked haddock. Dress with French dressing and garnish with a cream cheese ball and a slice of beet.

Anna Thompson

RESIDENTS PERMANENT

Hawley's Speeches Returned Unclaimed from Oregon City

Representative Hawley, who sent out to his constituents 50,000 copies of his speeches on rural credits, has had approximately 1400 returned to Washington unclaimed. He considers this a testimonial to the permanency of Oregon residents, as he used the regulation lists for mailing lists.

The greatest number of unclaimed copies came back from Oregon City, Astoria, Eugene and Medford.

Oregon City, with its paper mills, Astoria with its canneries and lumber mills, Eugene with its mills and railroad construction camps, each readily suggests the reason for a larger number of transients than at other places.

The explanation for Medford is not so easily given.

Nearly two and a half million feet B. M. of Douglas fir is made up into furniture in Oregon every year. Other woods used for this purpose and grown in the state are maples, ash, cottonwood, alder, oak, western red cedar and myrtle.

fashionable this year? If so, let her fear be turned into joy, for fur is to be used even more lavishly than it was last winter. The bands of fur on skirts are wider, the fur collars on coats just as high, and the cuffs on the sleeves just as deep. Rabbit and skunk are the furs most commonly used, and there are also Hudson seal, beaver, fox, lynx, mink and ermine, all of which were used last winter.

And not only on suits and cloaks is there to be an abundance of fur trimming, but also on evening gowns. Even the very sheerest fabrics, such as net, Georgette crepe and chiffon, are to be decorated with fur. A very stunning evening dress of net had the skirt edged with a deep band of fur. The dress itself was elaborately beaded. Beaded fabrics, metallic embroidery and sequins are extensively used on evening gowns. The wonderful effects and beauty of these under the lights can readily be imagined.

Preserving the People's Heritage

By Rep. Scott Ferris of Okla.

There is no need to argue the question of conservation to the American people; they are educated to its importance and alive to its necessity. It is attempted in this short article only to show how thoroughly the present democratic administration has guarded the heritage of the whole people from exploitation and usurpation by the few and passed or inaugurated legislation which will preserve and make useful to the whole nation our public domain.

The nation, in spite of the tremendous waste under republican administration, is still rich in natural resources and has vast property interests to be protected. Seven hundred million acres of unentered, unappropriated land still remain in public ownership. Some of it is mountain land, some semi-arid, some almost total waste land. The Wilson policy is that this vast domain shall be used for the advancement and good of the whole people, not the enrichment of the few. It shall be made habitable and turned into American homes.

The Homestead law, which has passed the house is now on the senate calendar and will soon become a law, enlarges the homestead unit from 160 to 640 acres, so that an American farmer will find it possible to go upon this land and establish an American home. Thus will the waste places be made glad and homes take the place of wildernesses.

There is thirty-five million potential horse-power of hydro-electric energy in the United States, six million developed and in use, twenty-nine million running idly to the sea. Of this last the Interior department administers upon about twenty-two million, and about seven million is under the jurisdiction of the War department. But all of it under the determined policy of President Wilson is being conserved and developed for the use of present and coming generations of Americans. The lax laws, the lack of proper laws, the faulty administration, the exploitation and waste of our public domain, all have been remedied and stopped.

A timberless nation is weak at a vital point. The one hundred and sixty-five million acres of forest reserves, which must furnish this and succeeding generations of Americans an adequate timber supply, have been rigorously protected and conserved by the Wilson administration. No longer are there timber thieves, frauds and depredations.

No chain is stronger than its weakest link; any nation is crippled which does not possess and control an adequate fuel supply. The fifty-three million acres of coal land containing four hundred and fifty billion tons of coal, still in public ownership, is an estate belonging to the American people of inestimable value. So well has the Wilson administration conserved this great asset that the most fault-finding opponent finds no ground for criticism of it.

The recent great development in the use of oil as a motive power in ships, automobiles, air ships and various other engines has made it imperative that the five million acres of oil land still in public possession be most carefully conserved. The Wilson administration, with true and patriotic foresight, has established naval reserves in the far west, so that now and in the far future our navy, our industries and our homes are assured of an adequate oil supply. No longer are valuable oil lands passed to patent at a dollar and a quarter an acre.

How different is this from the Taft administration? The Ballinger scandals in the west, the Guggenheim scandals in Alaska, the water site, coal land and oil land grabs on all sides are fresh in the minds of the people. But no whisper or scandal or even carelessness or inefficiency is heard of the Wilson administration.

What has been said of the other public lands is true of the two million seven hundred and eighty thousand acres of phosphate lands, which contain roughly twenty billion tons of phosphate easily worth ninety billion dollars and available to American farmers for fertilization purposes. Here, too, the Wilson administration has exercised the same vigilance and care and there is the same absence of criticism.

Alaska, that wonderful store-house of riches, was by preceding administrations first maltreated, then neglected. There were the Guggenheim frauds and scandals. Coal, timber and oil lands, harbor and wharfage sites were frittered away with no concern for the rights of the hundred million Americans who owned them. Then when public opinion was succeeded by a period of stagnation, and Alaska was locked up, its resources unused, its growth stopped. It fairly began to wither and die.

But with the Wilson administration came a change and an awakening, a new and better era for Alaska. Fraud and scandal and rumors of fraud have ceased. Alaska has come into her own, and all Americans can rejoice in and enjoy her princely worth.

The national parks spell health and happiness to the American people. We have in national parks and monuments nearly five million acres. Under the national parks service law, passed by the Wilson administration, these parks are being enlarged and beautified, and made accessible by good roads.

The CONSERVATION policy and record of achievement of President Wilson commends itself with invincible force to all believers in conservation. It has been wise, consistent, strong and energetic, and great in accomplishment.

Seth Bailey, member of Company L, O. N. G., who returned from border duty on Tuesday, and who was one of the principal "war correspondents" with the Oregon troops, was a visitor in Oregon City on Wednesday.

LANE OFFICIALS VISIT

County Court Would Consider County-Laid Hard Surface

Regarding the visit of Lane county officials, including County Judge H. L. Brown and County Commissioner M. H. Harlow to Oregon City this week, where they came to inspect the county-laid paving which has aroused county governments throughout the state to the thought of the great saving that can be effected by ousting the corporation pavers and doing away with their immense profits, the Eugene Guard says:

"In Clackamas county a non-patented pavement is being used and is costing from \$1.25 a yard down to about 45 cents a square yard. The latter price is for the Milwaukee-Sellwood road, where the bituminous pavement was laid on top of a worn-out macadam."

"Roads under this specification in British Columbia have been in use for several years without repairs and are in good shape. Pavement of this type laid 22 years ago at Visalia, Cal., is still in good repair."

"The county court has made no decision in regard to this type of hard surface road, but will investigate it thoroughly, and if it is found to be what is claimed for it, arrangements will probably be made to use it in Lane county. With pavement of this class, a program of annual construction would be adopted, and the hard surface extend gradually to all parts of the county. At 40 cents a yard, the price of the hard surface roadway is practically the same as that of water-bound macadam, and is far more permanent."

GAME POSTPONED

Printers and Barristers May Play Ball Next Sunday

Old J. Pluvius, the champion jinx, stepped into the business of life just in time on Sunday morning to prevent the utter rout of the lawyers of Oregon City, who were scheduled to play baseball against the printers and newspapermen of the city at Gladstone park.

Rain prevented the meeting of the teams, to the joy of the lawyers. It is held possible that the game will be played next Sunday morning at Gladstone if the barristers can again muster sufficient courage to pit their abilities against the printers.

The interest which has been aroused through the printers-barristers game of several weeks ago has created a desire on the part of tradesmen and professional men in the city for a league under which regular games could be scheduled.

LAD KILLS DEER

Molalla Youngster Pots Buck Deer in Pasture Near Home

The first deer that has been seen close to Molalla in several years escaped the vigilant watch of the many nimrods of that vicinity last week and was brought down under the aim of Alfred Pendleton, 11-year old son of Mr. and Mrs. Lewis Pendleton, who live some five miles east of Molalla.

The boy was returning across-pasture to his home after a visit at a neighbor's house in company with his grandmother. The two caught sight of a fine buck grazing in the pasture. Alfred was carrying a small-gauge shotgun and his ammunition amounted to only three shells. With these he peppered the deer, but only wounded it. He dropped the gun and hurried home for more ammunition and succeeded in killing the animal.

He Was Worried and Hopeless

"For ten or twelve years I was bothered with bad kidney trouble," writes T. F. Hutchinson, Little Rock, Ark. "I tried many remedies and doctors, but grew worse all the time. I was worried and had almost given up all hopes. I tried Foley Kidney Pills and they helped me a lot. I have since used five boxes and am now a well man." Foley Kidney Pills drive out aches and pains due to kidney trouble; also speed disturbing bladder disorders.—Jones Drug Co.

Do you swat the fly and then maintain a pile of garbage in the back yard?

Doughnuts

That will remain moist.

Every housewife who bakes her own bread knows that if a little potato is added to the sponge, the bread will not dry out as quickly. In this recipe potato is utilized to make doughnuts that will remain moist and fresh for several days.

K C will be found to have distinct advantages over any other Baking Powder for doughnuts. K C is a double acting baking powder with which a large batch of doughnuts may be mixed and fried a few at a time. The last will be as light and nice as the first.

K C Potato Doughnuts

By Mrs. Nevada Briggs, of Baking School fame.

3 cups flour; 2 eggs; 1 cup sugar; 1 level teaspoonful K C Baking Powder; 1/2 teaspoonful salt; 1/2 teaspoonful mace; 1 cup cold mashed potato; 2 cup milk, or more if needed.

Sift three times, the flour, salt, spice and baking powder. Beat eggs with rotary beater, then still using rotary beater, gradually add sugar, then work in the mashed potato with a spoon and alternately add milk and flour mixture. Make a soft dough, roll into a sheet, cut into rounds, pinch a hole in the center with the finger and fry in deep fat.

Fat for frying should not be hot enough to brown the doughnut until it has risen. When the doughnut is dropped into the fat it sinks to the bottom. As soon as it comes up it should be turned and turned a number of times while cooking. This recipe is excellent as they do not take the fat in frying and will stay moist for days.

SILO IS BUILT

Naegeli Household Furnishes Fine Meal to Large Group

Although the lecture of W. A. Barr of the Oregon Agricultural college and the speech of Grant B. Dimick of Oregon City and the silo building demonstration on the Chris Naegeli farm were highly interesting to the large number of farmers attending, all of them are agreed that the big feature of the Saturday program was the wonderful dinner prepared and served by Mr. and Mrs. Naegeli. According to all reports the meal was one of that kind we so often read about, but seldom, more the pity, enjoy. The menu was so complete that it tilted most of the good farmers over Sunday without the exercise of the culinary talents of their own households.

Prof. Barr directed the partial erection of a modern silo and spoke of the value of such structure to the guests. The silo was not completed and will be finished by Mr. Naegeli and his workmen. Grant B. Dimick of Oregon City was also a speaker.

Chris Naegeli has one of the most modern farms in the county and testimony in support of this claim the recent score received from the state dairy and food commissioner is important.

Selecting a Husband.

I would warn maidens of marriageable age to exercise due caution in the selection of husbands. Choose a real man, not the kind that slaps himself on the wrist and wants to be called Jack instead of John and insists on addressing you as Margaret instead of Maggie or Christina instead of Tiny. Get a man whose masculine actions entitle him to wear trousers.—Zim in Cartoons Magazine.

Fifteen Cent Lunches.

A cashier in a Newspaper row lunch room told me that the average Bostonian spends but 15 cents for his lunch. The fifteen cent key on the cash register is worn smooth and the number "15" entirely rubbed off. Other keys on the machine show little sign of wear.—Boston Post.

Delicacy.

A woman went into a country bakery one hot, sultry summer day. "I'll have some of that nice currant cake," said she to the baker. "That ain't no currant cake, lady," said he, waving his arm gently to and fro over the delicacy.—New York Post.

A Poor Retriever.

Wigg—I hear you've sold your bird dog. He was a good retriever, wasn't he? Wagg—I thought so, but he didn't bring much when I sold him.—Phila delphia Record.

Drove Them Out.

Miss Howler—Did my voice fill the drawing room? Mr. Rood—No, it filled the refreshment room and the conservatory.—Boston Transcript

Could Not Do Her Cooking

Mrs. F. E. Hartmeister, Tea, Mo., "I was affected with kidney trouble for two years. I was so bad this summer I could hardly do my cooking. I got Foley Kidney Pills and they helped me. I feel like a new person." Too many women neglect symptoms of kidney derangement. When the kidneys are not properly doing their work poisons left in the system cause weak back, dizziness, puffiness under eyes, swollen ankles, joints, and rheumatism.—Jones Drug Co.

A "SAFETY FIRST" CIRCUS

Coming to Portland on September 21 and 22

The Sells-Floto circus, affording residents of this and adjoining towns an opportunity of seeing what has been admitted to be the greatest amusement aggregation ever organized. There is no show in this country that has won for itself a reputation for merit and care of its patrons as has the Sells-Floto circus. It might well be called the "Safety

To The Merchant—

They are waiting, thousands of house-wives throughout the suburbs and the countryside—waiting for the telephone calls that will tell them whose goods are best and prices are lowest.

What of yours? Are your orders coming from the same old restricted line of customers, or are you branching out into the country and neighboring towns, building up your business by Bell Telephone.

NOW IS THE TIME!

Consult the list of toll rates to cities hereabouts; it's in the front of your Bell Directory.

THE PACIFIC TELEPHONE AND TELEGRAPH COMPANY

THE "GREATER OREGON"

With new buildings, better equipment, and many additions to its faculty, the University of Oregon will begin its forty-first year, Tuesday, September 12, 1916.

Special training in Commerce, Journalism, Architecture, Law, Medicine, Teaching, Library Work, Music, Physical Training and Fine Arts. Large and strong departments of Liberal Education.

Library of more than 62,000 volumes, fifteen buildings fully equipped, two splendid gymnasiums.

First" circus for every provision possible for the safety of its audiences has been taken. Even the lemonade of the Sells-Floto circus is served on safety first principles. There is no chance of the transmission of disease, for the reason that the lemonade is sold in individual glasses. But that is only the beginning.

Thru the invention of William Curtis, superintendent of the Sells-Floto circus, no matter how the wind may blow, no matter what storms there may be there is no danger in the circus. The seats with cables of steel instead of being placed by the old "toe-pin" system. They can even be erected on a paved street and hold safely twice as many persons as the room provides for.

SOCIALISTS AT PICNIC

Many Members and Families Hear Dr. Lucas at Magone Park

The address of Dr. A. I. Lucas of Portland upon the subject of "The New Socialism," was the feature of

the picnic of county Socialists at Magone park on Saturday. The picnic is an annual affair and was attended by 100 members of the party and their families.

Officers of the party organization in this county, including W. W. Meyers, county chairman, spoke during the day. A fine basket luncheon was spread upon the long tables of the park and hot coffee was provided.

EPWORTH PICNIC HELD

At Estacada park on Monday a large picnic party of Epworth League workers from Clackamas and Multnomah counties assembled to enjoy the fourth annual picnic of the organization.

A baseball game and a track meet were features of the day's program. In the evening league members rendered a musical program in the park pavilion. Each chapter of the society presented a charade. Miss Pansy Full of the Sellwood chapter was chairman of the program committee for the picnic.
