

The City's Popular Waist Department Offers New Popular Priced Waists Tomorrow

THE popular price blouses we have been selling have caught the popular fancy—and we dare say many women are somewhat better off today—who have bought these waists freely—for the saving is really substantial. It is not alone the price that has made the waists so popular—it's their thorough desirability and pleasing styles plus their very low price.

New Wirthmor \$1.00 Waists

How good
a Waist
will
One Dollar
buy?

The Wirthmor
is the
Answer—here
and
everywhere

Why are Wirthmor Waists so popular? Because of their refined pretty styles; the care and nicety with which they are made; and because they are perfect fitting.

A. I. HUGHES RECITES GUERNSEY CLUB HISTORY

The following telegram received this morning by John R. Humphrys, cashier of the Bank of Commerce, tells its own story. Langwater stock is considered one of the best strains in America:

"Have purchased 15 Langwater demonstrator heifers, heavy in calf, to Yeoman's King of the May, of mixture forms. Expect to ship Monday."

E. L. WESTOVER.

Nov. 7, 1917.

To the Courier:

The first pair of Guernseys in Clackamas county were purchased by F. S. Hutchins in 1910, a bred heifer and a bull. Mr. Hutchins waited until his fourth calf before he got a heifer, up to the present she has brought him eight calves, and from this one cow and her offspring he now has a number of females, the foundation of a nice herd. The bull calves have nearly all been sold in this county to dairymen, two have been sold outside of the county.

In 1912 A. I. and J. Hughes purchased their first pair of Guernseys, and later made other purchases until they purchased 10 head, consisting of 3 bulls and 7 cows and heifers. From this purchase a number of calves have been sold.

In 1913 John T. Whalley purchased a pure bred bull and later in the year purchased of the Frank Reed Sanders of Arizona, the cow Sonnie of Wauwaset 2d, a very straight lined type cow, later he had four heifers imported from the Island of Guernsey, from this start his entire herd is now pure bred.

In 1915 J. A. and J. T. Bichey (father and son), purchased a pure bred bull and then three heifer calves two months old, later they purchased a cow and two heifers. They now have a nice herd of pure bred and a number of good grades.

Others in the club that the writer does not know the exact time of their rating, are Octav Voget, who purchased a heifer and made a 448 pound fat record with her as a two year old, official test. Later he purchased two more, a cow and a heifer.

William Young has several head of Guernsey females, also F. H. Boeckman has a pure bred bull and cow. This cow, Imp. Bessie of the Isle, has just dropped him a heifer calf that was two days old when the writer saw it. A few days later Mr. Boeckman said that the cow had milked 38 pounds in a day, in less than a week after calving.

In 1914, 1915 and 1916, every Guernsey cow and heifer in the count was put on official test, and run until all had completed the 365 days test. All qualified for advanced registry cows, besides the cows belonging to members of the club, and as it now stands are leaders for the state in the following classes: Class A, Class C, Class E, Class F, and Class G. Beginning at the age of two years as Class G and changing class every 6 months until Class A is reached for all cows 5 years or over.

The leading records for the club in classes named were Class A, 664.79 pounds; Class C, 607.03 pounds; Class E, 424 pounds; Class F, 377.92 pounds; and Class G, 448 pounds, every record was made by breeders that were amateur feeders and

had never had any official testing done before, and not under skillful feeding that is sometimes done.

During 1916 some of the breeders talked of having a picnic and organizing a Guernsey club for the county. However, they did not do anything and let the matter drop for another year.

In the summer of 1917, in conversation with Mr. Humphrys of the Bank of Commerce, the Tillamook sale of Guernseys was mentioned and how the Tillamook bank had stood behind the club in their buy. Mr. Humphrys said their bank would only be too glad to do anything of that kind to help out the breeders of the county. The matter was dropped at that and nothing more said or done for some time until one day Prof. E. L. Westover, dairy husbandman from Corvallis, came through visiting herds. He told us what other places and banks were doing to build up the dairy business, then this conversation with Mr. Humphrys was mentioned. He then called at the Bank of Commerce and talked the matter over with them. From that a picnic was talked up and invitations were sent out for a general meeting of everyone interested in Guernseys, particular, and dairying, to attend a picnic August 18, 1917, at A. I. and J. Hughes' Red Wing farm.

About 200 persons attended, inspected the herd, enjoyed the dinner brought by the ladies and served on the long tables for all. Later in the day they listened to talks on Guernsey merits and Guernseys as a sound business proposition, and watched the boys' and girls' judging contest on four cows. Prof. Westover passed on this class and made the awards to the children. At the close of the meeting they organized "The Clackamas County Guernsey Cattle Club with the following members: Octav Voget, H. L. Carl, J. A. and J. T. Bichey, H. F. Boeckman, E. F. Boeckman, F. S. Hutchins, Dr. A. L. Beattie, D. Scheff, R. Kroner, A. I. and J. Hughes, W. A. Carlson, John T. Whalley, and Omer Blanchett. Since then we have the following new members, S. C. Young, F. H. Stangel, C. F. Wagner, Lewis Funk and Sam Elmer.

At the close of the meeting a meeting was called for September 3, 1917, at Oregon City and held at the Commercial club rooms, to find out how many wanted to purchase Guernseys and to make financial arrangements with the bank for this purchase if the club decided to get this car load of Guernsey cows and heifers, also to find out if enough would sign for stock to justify going east for a car load.

In another issue I will give results of the meeting and will add to this prices received for Guernseys from 1907 to 1916 at public sales throughout the United States.

The following table gives the highest priced sales of Guernseys by years and leaves the reader to make his own conclusion as to whether the increasing number of Guernseys lowers the price or raises it.

On May 16, 1917, H. McK. Twombly sold at Florham Farms, Madison, N. J.: 74 head for \$24,720, an average of \$334.05 per head, which, at that time was the highest average for the breed. This average has increased from time to time as follows: On September 21, 1909, Alfred G. Lewis, White Spring Farms, Geneva, N. Y., sold 92 head for \$25,100, an average of \$381.50; on May 11, 1911, Frederick Phillips, The Manor Farm, Villa Nova, Pa., sold 78 head for \$37,275, an average of \$477.88 per head; on October 10, 1913, F. G. Benham & Son, Canandaigua, N. Y., sold 52 head for \$25,215, an average of \$484.90;

on September 15, 1915, Joseph L. Hope, Florham Farms, Madison, N. J., sold 81 head for \$43,235, an average of \$533.76. Again, on May 11, 1916, Mr. Hope sold 85 head for \$48,820, an average of \$574.35. On October 10, 1916, F. L. Lopham Ames, Langwater Farms, North Easton, Mass., sold 75 head for \$80,650, an average of \$1,075.

Extracts from E. L. Westover Letter

Milwaukee, Wis., Nov. 2, 1917. "Mrs. A. I. Hughes: We have purchased eight bred heifers from one breeder at Whitewater, Wis., that are certainly wonders, and had it not been that we were taking the whole bunch and they would all go into one locality, we could never have secured them.

"They are all large growthy animals, great strength of constitution, and especially good udders. They are all daughters of one bull. This one breeder has 35 of his daughters on test that are going at the rate of from 450 to 700 pounds fat as two and three year olds. This bull's dam has a record of 645 pounds of fat as a two year old. These eight heifers are heavy in calf to a bull whose dam and granddam have a yearly record of 887.5 pounds of fat each. This bull, while yet young, is getting some mighty fine calves. They are all straight individuals, showing lots of quality and are especially uniform in conformation.

"While at the National Dairy show we learned that this bull has a sister that stands a very good chance of breaking the world's record for butterfat production, if she keeps up her present rate of production. She is expected to produce over 1200 pounds of butter fat, anyhow. We secured these eight heifers at a very reasonable price. We are selecting the very best animals we can get. We are only selecting animals which we feel assured will pay a big dividend on the money invested in them, in their production at the pail." Mr. Westover stated that they looked at a good many animals and some were not what they wanted. Also that he and Mr. Whalley were in the best of health but would both be glad when they got started home for Oregon.

We wish to add to this that these cattle are not for buyers on the outside, but are for Clackamas county. They will be distributed by lot to those who have already signed for them or do sign for them before they arrive. It was the sense of the last meeting of the club that the cattle would only be taken by those signing for them before their arrival. The breeders now having several head of pure bred are willing to give their rights to others that have no pure bred females now, as the more that become interested in the breed, the stronger will be the organization.

The following members signed for cattle: Octav Voget, H. L. Carl, S. C. Young, W. A. Carlson, D. Scheff, F. H. Boeckman, F. H. Stangel, Charles F. Wagner, Sam Elmer, Dr. A. L. Beattie, John T. Whalley, F. S. Hutchins, A. I. and J. Hughes. Thirteen members in all will add these 35 head of females to their herds.

A. I. HUGHES, Secretary.

MILLS RESUME AT HALF CAPACITIES

(Continued from Page 1)

management would "come through" before many days. President Hartwig, of the State Labor Federation, was a speaker.

Senator Walter A. Dimick spoke in favor of the action of the labor-

ers and said that he would be one to sign an appeal to Governor Withycombe looking to the arbitration of all labor troubles in the state if this strike was not settled promptly.

Dr. W. T. Milliken, pastor of the First Baptist church, called attention to the constitutional right of laborers to organize. He pointed out the necessity of a full day of rest each week and praised the strikers for the orderly manner in which they were conducting their campaign. Dr. Milliken believed that all the churches and church members in the city were behind the strikers in their demands, simply because they were only asking for justice and fair play. The Moose band played during the meeting.

In a public statement Friday the strike committee, representing both mills, asked:

"Why did they (the mill management) refuse to arbitrate? What were they afraid of? Was our request so just, so reasonable, so modest that it would be impossible for them to compose of an arbitration board composed of fair-minded citizens? Were they afraid to run the gauntlet of public opinion by having their method of treating their employees held up for public gaze? Who was the most patriotic, we agreed to arbitrate and abide by the decision of the arbitration board, or our employers, who absolutely and positively refused to do so?

"Our employers are offering strike breakers all they paid us and board and lodging in addition. Why is it they can offer strike breakers so much and deny us an increase of 25 cents a day?"

While the strikers are challenging their employers to a public debate of the questions involved, offering to pay all expenses incidental thereto, scores of strikers are going out of the city each day to accept employment at shipyards and other places.

Each evening as the strike breakers come from their work at the Crown-Willamette mills on the west side of the river they are met by a large group of strikers at the Oregon City end of the suspension bridge. Those few who thought to avoid the reception by crossing the river in rowboats have found a crowd waiting for them on the river bank. In only a few cases has the action of the strikers caused bad blood, although it has been reported that valuable eggs were used one evening in greeting the strike breakers.

COUNCIL'S PLANS AUGUR HOSTILITIES

(Continued from Page 1)

in the case of the Portland Railway, Light & Power Co., on the table until the next regular meeting. Councilman Templeton said that he had a "scheme" in connection with this bill which made postponement advisable, although he did not indicate the nature of his "scheme."

City Engineer Miller was instructed to establish a grade on Tenth street where it runs into the bluff from Center street. Dr. Hugh Mount is said to have built a home very close to, if not actually partly upon the street, and to have erected garages on the street. The grade will be established and if the structures will in no manner jeopardize the city's interest they will be permitted to remain. The application of J. P. Loomis to operate a motor bus line between Woodburn and Oregon City was referred to the street committee. The city engineer was instructed to plat more lots in Mountain View cemetery, and after a brief discussion of the coming budget meeting the council adjourned.

The budget which Councilman Templeton proposes to present in opposition to the regular city budget provides more money for some very necessary work that is not covered in the regular budget. It will make no total saving for the city, Mr. Templeton says, but will take care of things that are absolutely necessary, such as the painting of the elevator, the care of the public comfort stations, providing legal talent to revise the city charter and money to print a revised edition and to pay costs of court actions that may come up during the year. His budget also provides for more lights for the city and would reduce the night police force to one man.

The proposed budget is based on a municipal valuation of \$2,364,995, and an increase in valuation to \$2,906,371 is accounted for. The city's revenue for the year from this valuation would be \$60,183.57, upon which Councilman Templeton bases the figures of his revised budget. The city's annual budget meeting is to be held tomorrow evening.

GRUESOME TASK IN ALASKAN WILDS

(Continued from Page 1)

ed me to go with him. I refused, telling him I could not miss the boat. Then he confessed to me we would never make it. "No chance now and I positively know it," he said. "The minute Taylor knows you are on the bar, the Umatilla will leave, but there is no good in throwing cold water on the passengers. Let 'em hope."

He argued that we would have to wait at least a week in St. Michael, and he said it would be the longest week I ever put in.

"Come down to the station with me and stay three or four days. I will take you down in a sail boat in plenty of time. We have plenty to eat and there is fine duck hunting," he pleaded.

Sixty miles in a little sail boat on the open sea in the night time didn't look good to me and I flatly refused, and then he begged me to go down with him for the night.

We would shoot a few ducks in the morning and he would bring me back in plenty of time. And I consented.

We got in the row boat and set off. For about three quarters of an hour I sat with my rain coat over my head to keep off the swarms of mosquitos. He rowed and talked, while I thought bitter thoughts of the Alaska-Yukon Steamship Company.

We arrived at the station and he told me to go in and go to bed. He had something to see to and would be in shortly.

I opened the door, and in the dim light I saw two miners lying on the floor with a big wolf dog between them. They had come in after the soldier had left the station. Beyond them was a bunk. I took off my shoes and crawled in.

The blankets smelled like a glue factory. I wondered if they had ever been washed, and wondering, I fell asleep.

Early in the morning I was awakened by the miners getting up. They rolled their blankets and went on. Then the operator, in another room, awoke and I could hear him getting breakfast, and while he was at it I heard someone come in and the two men talking.

He came in to awaken me, but I was up and putting on my shoes. I looked at the pillow cover, it was simply black with dirt. He said there was no excuse for such a condition, but he explained "when one lives in such a place he gets so he doesn't care a damn."

The breakfast was good, fish, duck and pie. Pie for breakfast. The soldier had baked it, and it was good.

And now comes the place to hold your nose.

The meal finished, he told me an Indian had come in with the information that there were three dead Eskimos on the shore a little way above. He said they had eaten the diseased meat from a dead whale and had been poisoned and the natives would not go near them. He wanted the white man to bury them. So he said the duck shooting program would have to be changed to a funeral, and asked if I would go along, as it would be on our way to the boat.

I would. We put in a pick and two shovels and rowed up the bank.

We found the place and the dead—a man and two squaws. The man lay between two logs, with poles laid across to keep the animals off. One squaw was partially concealed in an empty gasoline tank and the other was some little distance away with a canoe turned over her.

The bodies had evidently laid there three or four days. Thousands of flies and mosquitos were swarming over them, and the scent was strong enough to drive a dog off from a carriage. Ugh!

It was a "condition, not a theory" that confronted us, and it had to be met. We met it.

With a pick the soldier loosened the moss for a wide grave to hold the three, and we both took a shovel and dug in. At about two and a half feet we struck the solid frost, and concluded that was deep enough for Eskimos. If they didn't like it they should not have died there.

We rolled the man and woman into the grave without touching them, and then the swarm of flies and mosquitos swarmed off the dead bodies onto us. We had nets over our heads and I had gloves on. They could not get to us, but it was horrible to hear them buzz around and try to.

The squaw under the canoe had to be carried—there was no other way—and we were conscripted as bearers. We rolled the kayak off and scattered the flies, then I grabbed her mucklocks and he took her shoulders, and I believe I broke the world's record for long distance breath holding.

There was a little ridge in the middle of the grave and the two corpses had rolled to each side, so we dropped Minnehaha between the man and woman and the crowd of some. The soldier held his nose and observed that we might be painting man and wife, but as there was no marriage certificate in evidence and as we had not access to the family history, we let her wedge in between. We covered their faces with some leaves and were about to proceed with the last sad rites, when the soldier, in full seriousness, observed that perhaps I would like to say something.

I told him I hadn't my music with me, and that to judge from the smell of things their spirits had long since arrived at the happy hunting ground, therefore I would move that we close in short form. Carried. We shoveled the dirt over the trio, rolled the logs over the grave and beat it for the boat.

Where the dead whale was we did not find out. We did not see any, but we took the Indian's word for that. Certainly there were no marks of violence on any of the dead.

I could not help but think how different would have been the procedure in the states. There the sheriff would have been notified; the coroner would then have been sent for; an inquest would have been held and the county would have provided coffins and buried them. But in Alaska, where men are hardened to the unyielding, such trimmings are all cut out.

I didn't go back to the station. I went on board the ship, to my stateroom, where I washed my hands and face. Then I washed them again, then some more. For dinner I ate a stick of pepsin gum on the deck—somehow and somewhere I had lost a perfectly good appetite, and after thinking it over I concluded I had left it on shore.

When the tide had reached to nearly full head, the barge was released from the bar, and we slowly pushed the group over, and were out in the open sea. I did not

FRANK BUSCH

Clackamas County's Leading Furniture and Hardware Store

know how much truth there might be in what the operator had told me that we would not catch the steamer, so I did not spring it. And I did not want to believe it, anyway.

The young fellow who declared he was a Jonah, came on deck. He had just awakened. I told him we had been tied up for hours on the bar.

"I knew it," he exclaimed. "I couldn't get away from the hoodoo with wings. We will miss the boat and then something will happen to tie us up in St. Michael. The jinks will stick until I once get off Alaska soil. It has been with me for years, and it sure hates to be pried loose."

The passengers were too nervous to enjoy lunch. I felt like telling them my story, when I concluded it would work for the benefit of the steamship company. They were all anxious to get on deck and catch first sight of the Umatilla. After a time a lady with opera glasses called out, "There she is, off that point," and everybody was happy. Then an officer with a glass, sized up the boat and dashed our hopes. "That isn't the Umatilla, it's a freighter."

We rounded the point and came into the harbor. The Umatilla had gone. A tug soon came along and verified this. She had left several hours before, when the wireless came that we were stuck on the bar.

And then to a certain extent did I realize the feelings of the people in the river towns when the last boat goes down the river and leaves them shut in for the eight or nine months of dreary darkness.

And I also ceased to wonder at the enormous quantities of liquor that is consumed each year in Alaska.

ACID THROWN AT DOG

Willard Hawley's Valuable Great Dane Object of Fiend's Attack

An attempt was made Friday to injure and make necessary the killing of a valuable Great Dane dog owned by Mr. and Mrs. W. P. Hawley Jr., when some one threw powerful acid at the animal. Frightened, the dog jumped just in time to miss the contents of the acid container with his head, but the fluid did some damage to its back. The dog is one of a pair from famous eastern dogs said to be worth nearly \$1000. Mr. Hawley does not blame strike sympathizers, since he and his company have taken no action that would cause the enmity of strikers or their sympathizers. Mr. Hawley is resident manager of the Hawley Pulp & Paper company.

MAN TROUBLED FOR TWO YEARS

Men and women should not suffer from backache, rheumatism, pains, stiff joints and swollen, sore muscles, when relief can be easily had. James McCrery, Berrien Center, Mich., says he was troubled with kidney and bladder trouble for two years; would have to get up several times during the night and had pains across his kidneys. He used several kinds of medicine without relief, but Foley Kidney Pills cured him. Many such letters, come every day from all parts of the country.—Jones Drug Co.

CORRESPONDENCE

(Continued from Page 6)

delivery and collecting. Some of us get weary waiting for the state to furnish really cheap lime, which would be about \$3.50 per ton for ground stone, but maybe the time is not ripe yet for really cheap things.

The auto accident near W. E. Cromer's place, when a machine rolled over with five occupants, was serious enough, but there was a chance for much more serious results. There is a very slight angle in the road to cause such a roll, but you cannot tell just what combination of circumstances there was. The published names were not right altogether as the principal victim's name was Miss Graham and she is a teacher at Estacada.

O. D. Robbins has been making some new fence and when the old rubbish is cleared away there will be noticeable improvement in the appearance. With numerous reinforcements and divers repairs, the old fence had lasted about 25 years.

Floyd Kirchman is driving Harry Babler's truck, hauling road material at Liberal and E. C. Gerber's truck is also on the job.

Do we really believe, as we have been taught in America, that the voice of the people is the voice of God and that governments derive their just powers from the consent of the governed? If so, let us cast our thoughts toward Belgium, France, Russia and Italy and then take a firmer grip of our plow handles, determined to make great sacrificial efforts to live up to the ideals of our forefathers.

MT. PLEASANT ENTERTAINS

John Mason and Miss Erickson Add Interest to a Fine Program

The Mount Pleasant Parent-Teacher association gave a social at the school house on Saturday evening. Refreshments were sold during the evening and the proceeds went to the Mount Pleasant school fund. John Mason of Oregon City gave several readings. Miss Anna Erickson sang a patriotic song entitled "America, My Beautiful!"

The committee in charge were, refreshments, Mrs. E. McLane, Mrs. Forward, Mrs. O. F. King, Mrs. E. and Miss Anna Erickson.
