A Fight for Life

It has been fight or die for many of us in the past and the lucky people are those who have suffered, but who are now well because they heeded nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's, called "An-u-rie." You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To delay may make possible the dangerous forms of kidney disease, such as Bright's disease, diabetes or stone in the bladder.

To overcome these distressing conditions take plenty of exercise in the open air, avoid a heavy meat diet, drink freely of water and at each meal, take Doctor Pierce's Anurie Tablets (double strength). You will, in a short time, find that you are one of the thousands of neighbors who are cured of their backache.

Mr. A. W. CUMMIS says: "I suffered greatly with my back and kidneys. I called in doctors and they did me no good, but recommended an operation. I saw Anurie for kidneys and backache advertised so sent up to the drug store and got a package, and it cured me. This was one year ago. I was down in bed and had taken many different kinds of medicines but obtained no relief from them."

Mrs. ROSA MURRAY, of GRETCHVILLE, WASH. says: "I was troubled with the backache for the last five years. I sent for a package of Dr. Pierce's Anurie Tablets, which cured me completely. I will recommend Anurie to all my friends who are troubled with backache."

Step into the drug store and ask for Anurie, or send Dr. V. M. Pierce, Buffalo, N. Y., 106, for trial pkg. Anurie—many times more potent than lithia, eliminates uric acid as hot water melts sugar.

The Clarkes school intends to

JUDGE DIMICK'S LETTER

TELLS JUST WHAT'S WHAT

The following letter on a subject which was taken up completely in The Courier October 25, is from the pen of Grant B. Dimick, former county judge, and was published in The Oregonian of Sunday. The statements attributed in this letter to Mr. Vogler were made, according to The Oregonian's original story, by S. Benson, chairman of the State Highway commission:

Oregon City, Or., Nov. 24.—(To the Editor.)—In perusing the columns of your valuable paper of Sunday, October 14, 1917 I was somewhat surprised to see a large amount of space devoted to crushed rock and plank roads in Clackamas county, together with an illustration as to what has been accomplished on what is known as the bluff road in district No. 35, and also improvements on the Mt. Hood road in districts Nos. 8 and 48.

While I am not at this time connected with the county court of Clackamas county, I was instrumental, while county judge of this county, in beginning this work, which The Oregonian mentioned, and have in my possession a number of letters from E. Henry Wenne, praising the work done at that time.

In the article mentioned I notice where F. W. Vogler has contributed considerable space as to what the people are doing in that section of Clackamas county and in the road districts above mentioned and that the county court of Clackamas county has not done anything to help those people in carrying on their road work.

For more than 20 years it has been the policy of the county court of Clackamas county to develop its rural districts and it has always expended more money in the rural districts than has ever been produced through either general or special taxes levied in those districts. In order to correct the statements of Mr. Vogler, I greatly desire that The Oregonian publish the figures which I now present, showing what the county court has done toward aiding the taxpayers and citizens living in the districts where this improvement mentioned in The Oregonian has been carried on for the year of 1917.

I will take the bluff road mentioned which is located in road district No. 35. The regular road fund in that district apportioned according to law for 1917, amounted to \$756.83.

The special road fund raised by special tax in said district amounted to \$1433 and, in addition to the above amounts, the county court of Clackamas county advanced from the general fund \$2779.99, which has been paid out in addition to the regular and special road taxes raised in that district.

A part of this same road work mentioned by Mr. Vogler is located in district No. 8 and the regular road fund apportioned to that district under the law, was \$893.40. The special road tax levied in said tax amounted to \$1690.30. In addition to those sums the county court has appropriated out of the general fund of the county the further sum of \$722.27, over and above their general and special taxes. In said road district No. 48, the general road tax apportioned, under the law, amounted to \$253.87 and a special tax raised in that district amounted to \$267.06. The county court has, in addition to the general and special levies above mentioned, appropriated out of its general fund and given to that district an additional sum of \$1079.95.

Therefore, it can be seen that this road mentioned by Mr. Vogler is located in districts Nos. 8, 35 and 48 and that in addition to the total amount of general and special taxes raised in those districts for the improvement of the road mentioned, the county court of Clackamas county expended from the general fund the further sum of \$4581.41, this last mentioned sum a large part of which was raised within the municipal corporations of Oregon City

and West Linn. I would like very much to have Mr. Vogler inform me how he can harmonize this interview with the facts as I have stated them.

In addition to the expenditures above mentioned the county court of Clackamas county furnished all road machinery, tools, galvanized culverts and built bridges on that road, and not one dollar of those expenditures have been charged up to this road district, nor to the general fund expenditures, included in the \$4581.41 above mentioned.

All of this work has been done under the supervision of T. A. Roots, county road master for Clackamas county, and in addition thereto Mr. Proctor, county commissioner, resides in that immediate neighborhood and also assisted in seeing that the county funds were properly expended.

We are building each year a few miles of good substantial hard-surfaced roads, over which the larger number of people are accommodated and would build more each year if we had the money. This same hard-surface improvement, a part of which was laid from Sellwood to Milwaukie, has stood the test under heavy travel for two years, although Amos Benson takes a "fit" over our hard-surface pavement occasionally and goes into print and tells the public "that the road is no good and will not last a year," but as the road still stands as good as the day it was laid, my friend, Amos Benson, was simply enjoying the same "hop dream" that Mr. Vogler indulged in when he "broke into print" in the Oregonian. Respectfully

GRANT B. DIMICK.

PROTECTION FOR GAME

States Strengthen Game Laws or Provide for Preservation

The perpetuation of migratory birds and game was made the subject of over 200 separate state and other laws passed in 1917, according to the summary of game laws of that year issued by the Bureau of Biological Survey, United States Department of Agriculture. Thirty-eight of the forty-three states which held legislative sessions made more or less extensive changes in

their game laws. Several codified their statutes, and effort to bring open seasons for migratory birds to conform to the federal regulations was wide spread. A number of shooting seasons were shortened, and in some states the killing of such birds as sage grouse, quail, prairie chickens, wild turkeys, doves,

and shore birds was prohibited in certain localities for several years. The Mount McKinley park in Alaska was made a federal game reservation. Forty state game preserves were established by state action in ten states as follows: sixteen in California, six each in Montana and Wyoming, four in Arizona, three in

Idaho, and one each in Oklahoma, Oregon, Tennessee, Washington, and Wisconsin.

The Vaughn Drag Saw

A Proven, Practical Machine

The design and the construction of the VAUGHN is based on and is the result of hard earned experience. It is made under the personal supervision of a mechanical engineer who has had 15 years of practical experience with the wood and timber conditions of the Pacific Northwest. It is the only proven, Practical machine of its kind.

These machines are equipped with either a 3½ or 4 H. P. engine. The 4 H. P. is the lightest and most powerful machine, and on an average will cut about twenty per cent more than the 3½ H. P. Under fine conditions the 4 H. P. Vaughn Drag Saw has cut 30 CORDS IN 10 HOURS, again under bad conditions they may have cut only 14 cords, while the average cut under fair conditions is 20 cords.
