

MOTION PICTURES IN CHINA.

There Were Lively Times For the Man Who Introduced Them.

At the end of the Russo-Japanese war, says the Los Angeles Times, Mr. Brodsky, a native of Odessa, Russia, came to San Francisco. After the great San Francisco fire he left the city with an old motion picture machine and forty or fifty reels of "junk" film. With that he sailed for the Orient. The motion picture was unknown in China when he reached there with his paraphernalia, and he ran into many dangers in showing his wares. To the natives his camera and projecting machine was a "magic box." He had to pay his first audience to enter his theater, which, by the way, was only a tent. In that way he finally won the crowds.

Matters were progressing well when Brodsky one day put on a wild west film in which a band of cowboys appeared on the screen, charging straight at the spectators and firing revolvers. The moment the audience saw those shooting cowboys bearing down upon them they rushed, panic-stricken, from the tent theater, cutting their way out with knives.

After that the cautious natives were slow to come back. But finally Brodsky hit upon the plan of having a few Chinese come and examine the apparatus, pass their hands over the blank sheet that was the screen and assure themselves that there was nothing to hurt them.

Gradually he established picture theaters throughout the country until now there are eighty of them.

Once he was thrown into a Chinese jail, but finally made his escape after getting the whole populace into the jail to view his motion pictures. At another place he was to have been executed as a "devil," but he frightened the people and made them change their minds by telling them that he could easily put them on the screen and make them work there forever.

CONTRARY ORIENTALS.

They Have a Habit of Doing All Things the Other Way.

Every European who has lived long in the east will, I think, bear me out, says Earl Cromer in the Quarterly Review, when I say that in the most trivial acts of life the easterner somehow or other manages always to do or say exactly opposite to what would be done or said by the westerner.

I was one day looking out of the window of the viceroys' house at Barrackpore and noticed that a native policeman was walking up and down the terrace. His attention was attracted by a piece of paper which fluttered to his feet. He stopped and eyed it intently. I conceived that under similar circumstances a policeman of any western nation, even if he had been barefooted and his toes had not, from the constant use of boots, lost their prehensile qualities, would, had he wished to possess himself of that bit of paper, have stooped to pick it up. But the Bengali policeman kicked off the wooden shoe from his right foot, seized the bit of paper between his two first toes, brought up his foot to the level of the knee and, without stopping, conveyed the paper from his toes to his fingers behind his back.

A friend of mine who was a very acute observer of eastern ways told me that on one occasion, in order to test the intelligence of an Egyptian, he asked him to indicate his left ear. The most uneducated member of any European nation, supposing he understood the difference between right and left, would certainly have seized the lobe of his left ear with his left hand. The Egyptian, however, passed his right hand over the top of his head and with that hand took hold of the top of his left ear.

The American Peril.

At Weihai, Hunan province, an amusing incident occurred during a campaign against houseflies. Following the lecture, in which the dangers of the fly had been emphasized, some Chinese ladies were being shown the health exhibit. One of the pictures showed a common housefly magnified many times. On seeing it one of the ladies exclaimed: "Is that the kind of flies they have over in America? No wonder Dr. Peter talks about the danger. If we had such big flies here in China we would have to be careful of them too!"—Christian Herald.

Fourteen Inch Guns.

The making of fourteen inch guns is a stupendous operation, requiring batteries of open hearth furnaces to produce the material, a great casting plant and presses and heating furnaces of the largest size, running into millions in value. The tube of a fourteen inch navy rifle is about sixty-two feet long, and a ninety ton ingot, five feet in diameter, is required.

Wide Awake Eskimos.

The Eskimos are rapidly learning the value of money. The day has long gone by when they would give a polar bear skin or a bale of foxskins for a fishhook. They now know the value of their furs and bring them to the best markets.—Argonaut.

A String to Them.

Mrs. Flatbush—What became of that string of pearls your husband was going to give you? Mrs. Bensonhurst—Oh, he had hold of the string.—Yonkers Statesman.

Her Own Idea.

"His wife is a woman of one idea." "That so?" "Yes; whenever he starts to do anything she has the idea that he's doing it wrong."

Inspects Dairy Cattle.

E. L. Westover, U. S. dairy husbandry specialist, who is cooperating with the Oregon Agricultural college, has just completed inspecting the dairy associations of this district. He left for Corvallis, where he is launching a movement to raise the standard of the dairy cattle, eliminating the poor milk producers.

R. L. Holman, Leading Undertaker, Fifth and Main St.; Telephones: Pacific 415-J; Home B-18.

RHUBARB IS VALUABLE AS FRUIT SUBSTITUTE

The value and the use of rhubarb as a part of the diet are strongly emphasized by domestic science experts of O. A. C. It is pointed out that this fruit is easily raised and can be obtained at a reasonable price on the market, and is therefore within the reach of every family. In general, the effect of the use of rhubarb is the same as that of oranges, except that it contains oxalic acid, which makes it unsuitable for people afflicted with gravel. Although it is botanically a vegetable, it is generally used as a "fruit." Rhubarb is especially beneficial in the spring when the system has been nourished on heavier food, and because it becomes available earlier than most other vegetables.

Suggestions are also advanced for the preparation of rhubarb for table use, and several recipes are given, two of which are as follows:

RHUBARB PIE

1 1/2 cups rhubarb stalks cut in 1/2 inch pieces; seven-eighths cup sugar; 2 eggs; 3 tablespoons cracker crumbs. Mix sugar, cracker crumbs and egg, add rhubarb and bake in open crust as for custard pie. Make a meringue of the egg whites, cover pie and brown in a slow oven.

STEAMED RHUBARB SAUCE

1 quart rhubarb cut in 1/2 inch pieces; 2 cups sugar. Cut off the leaves and the root and wash the stalks, and cut in one-half inch lengths. Put the rhubarb into a double boiler, add the sugar, mix well and cover the boiler tight.—Bertha Davis, Instructor in Home Economics at O. A. C.

FRUITS, VEGETABLES AND MILK BEST FOR THE BODY

Fruits, vegetables and milk are the foods supplying in best form the minerals needed by the body to build bones and teeth and make blood and body cells. Drying the fruits and vegetables when plentiful will afford a cheap and pleasing supply of the food elements later in the year when they are either scarce and high-priced or altogether lacking in the markets.

Meat, milk, eggs, cheese, nuts, peas and other legumes are staple muscle-making foods that supply materials for body growth and repair. Although these materials are indispensable in some form it is not necessary to supply them in the highest-priced form. A pound of cottage cheese supplies as much muscle material as a pound and a half of common cuts of meat—and costs less. When eggs and milk are used generously the other foods of this group are used only sparingly.

Rice, potatoes and cereals are the chief sources of heat and energy of the body, and they are relatively inexpensive. Bread is cheap at any price. Breakfast cereals are used by most well-managed households. The package form is more expensive than the bulk. Rice has five times the food value of potatoes, but never costs five times as much and should be served often. Sweets serve much the same purpose as the starches, and honey may be substituted for sugar with economy in many instances.

The fats of meat cuts and of fowl are trimmed off by careful housekeepers and tried out to be used as flavorings. When served on the meat there is frequently great waste.

Fruits and vegetables likewise serve the admirable purpose of supplying bulk and preventing constipation. Some of the greens and salad plants are especially acceptable for this purpose.

In the present food crisis American housewives are making a more careful study of food values and the best means of supplying them than ever before, to do their part toward feeding the nation wisely and without waste. More consideration of food values is requisite to success, and proper training in food habits is one of the earliest and most important forms of education. Valuable suggestions may be had by writing to the U. S. Department of Agriculture for Farmers' Bulletin No. 808.—A. Grace Johnson, Assistant Professor Domestic Science, O. A. C.

Stopped his Backache

George Lawrence, railroad fireman, Kittrell, Miss., writes: "I used three one-dollar bottles of Foley Kidney Pills when I was so sick I hardly could stay on my engine. My back ached all the time; my kidneys acted sluggish! dull headache; felt sleepy all the time; nervous; had to rise six to eight times each night. Foley Kidney Pills cured me." They strengthen the kidneys so they can filter out of the blood the uric acids and other poisons that cause rheumatic pains, backache, stiff joints and sore muscles.—Jones Drug Co.

Courier and Daily Journal—\$4.75.

Don't Have Catarrh

One efficient way to remove nasal catarrh is to treat its cause which in most cases is physical weakness. The system needs more oil and easily digested liquid-food, and you should take a spoonful of

SCOTT'S EMULSION

after each meal to enrich your blood and help heal the sensitive membranes with its pure oil-food properties. The results of this Scott's Emulsion treatment will surprise those who have used irritating snuffs and vapors.

Get the Genuine SCOTT'S

AMERICA TO THE IMMIGRANT.

A Former Roumanian on the Heartache of Finding a New Home.

What, I wonder, do they know of America who know only America? The more I think upon the subject the more I become persuaded that the relation of the teacher and the taught as between those who were born and those who came here must be reversed. It is the free American who needs to be instructed by the benighted races in the uplifting word that America speaks to all the world. Only from the humble immigrant, it appears to me, can he learn just what America stands for in the family of nations.

The alien must know this, for he alone seems ready to pay the heavy price for his share of America. He, unlike the older inhabitant, does not come into its inheritance by the accident of birth. Before he can become an American he must first be an immigrant. More than that, back of immigration lies emigration. And to him alone is it given to know the bitter sacrifice and the deep upheaval of the soul that are implied in those two words.

Oh, if I could show you America as we of the oppressed peoples see it! If I could bring home to you even the smallest fraction of this sacrifice and this upheaval, the dreaming and the strife, the agony and the heartache, the endless disappointments, the yearning and the despair—all of which must be ours before we can make a home for our battered spirits in this land of yours.

Perhaps, if we be young, we dream of riches and adventure, and if we be grown men we may merely seek a haven for our outraged human souls and a safe retreat for our hungry wives and children. Yet, however aggrieved we may feel toward our native home, we cannot but regard our leaving it as a violent severing of the ties of our life and look beyond toward our new home as a sort of glorified exile. So, whether we be young or old, something of ourselves we always leave behind in our hapless, cherished birthplaces.

And the heaviest share of our burden inevitably falls on the loved ones that remain when we are gone. We make no illusions for ourselves. Though we may expect wealth, we have no thought of returning. It is farewell forever. We are not setting out on a trip; we are emigrating. Yes, we are emigrating, and there is our experience, our ordeal, in a nutshell. It is the one way passport for us every time. For we have glimpsed a vision of America, and we start out resolved that, whatever the cost, we shall make her our own. In our heavy laden hearts we are already Americans. In our own dumb way we have grasped her message to us.—M. E. Ravage in Harper's Magazine.

The Welling of England.

If the king of England were to renounce the throne and resolve to become an ordinary citizen he would be called George Welling. How does the name Welling come to be the king's surname? This is the answer:

Queen Victoria married Albert, duke of Saxe-Coburg-Gotha, of the senior branch of the house of Saxony. The family name by which this house, dating from the middle of the tenth century, came to be known afterward was Welling, and this was and is the surname of both branches—the Ernestine and Albertine—of the house of Saxony. The name comes from the castle of Welling, near Magdeburg, which claimed Wittkind as its founder of the race.—London Answers.

The Apache of the High Seas.

The submarine is the veto power of the sea. It is purely offensive and destructive. It contributes nothing to wealth or civilization. It is in a class apart from other craft. The other forms of water craft can be used and are used to make the world a better place to live in. They convey merchandise and passengers. They serve as a means of communication between nations and peoples. The submarine is a mere killer. It cannot even fight. It must kill furtively and secretly, like an assassin.—Edward G. Lowry in World's Work.

Fruits and Vegetables.

Irish potatoes and most other vegetables and fruits tend to make the body tissues and fluids alkaline, so correcting the tendency of meat, eggs, fish and similar foods to create acid conditions. Since the body performs its work best when it is neutral or slightly alkaline, this function of fruits and vegetables is important, especially to the hearty meat eater.

Preparedness.

One way to bring about a condition of national preparedness is to prepare yourself for the simplest elemental duties of a citizen and a soldier. Cigarettes before breakfast, an ingrowing toenail and a consequent inability to run 100 yards are just as reprehensible as a lack of patriotism.—World's Work.

Too Successful.

"Why couldn't Miss Jilt get damages in her breach of promise suit? Didn't her lawyer prove the man was worth \$20,000?" "Yes, but her testimony convinced the jury he wasn't worth 30 cents."—Baltimore American.

The Horse's Comment.

"The mule, being in a temper, kicked a few boards out of the side of the barn."

"One of those fresh air cranks," commented the horse to itself.

If the thief lacks opportunity he thinks himself honest.—Sterne.

Report to Engineer's Corps

Oregon City members of the Engineers' Reserve corps have been ordered to American Lake, Washington, to prepare themselves for duty in France. William Strohmeyer, Harry Smith, Blake Bowland, L. F. Holliday, W. E. Hancock and Chas. Nichols left for the training quarters Monday. Carl Martin, Earl Hutchinson, Harold Swafford, Wallace McCord, Lee Shannon and William Folger left Wednesday.

The Courier, \$1.00 per year.

LOCAL DOCTOR LIEUTENANT IN AMBULANCE COMPANY 14

Red Cross Ambulance Company No. 14, soon to see service in France, will be led by University of Oregon alumni and will be recruited largely from university students and graduates. Washington and California have already completed similar organizations. This leaflet presents the needs, in men and money, of Ambulance Company No. 14.

It offers opportunity for congenial and corporate service, and service that is immediate, to the 91 men that will compose the company. The Surgeon General of the United States army has assured the American Red Cross that the company will go into the government service as enlisted and will remain a unit throughout the war. In no other branch of the service can there be a like assurance.

The company in full strength will consist of 1 captain, 4 first lieutenants, 1 first sergeant, 11 sergeants, 5 mechanics, 2 cooks, 2 assistant cooks, 20 chauffeurs, 2 musicians, 43 privates.

This group of 91 men, about the size of an average university graduating class, makes, in addition to the medical talent required, at least seven appeals to special aptitudes. Service in Red Cross ambulance companies is not, as is sometimes thought, entirely gratuitous. When accepted by the government for active service, men and officers receive the customary pay of their respective grades in the army, together with the customary transportation, subsistence, clothing, equipment and quarters. Thus, a private receives \$36 monthly, a chauffeur \$36, and sergeants \$50 to \$80.

Dr. J. Eberle Kuykendall, who first proposed the organization of this company, is a graduate of the University of Oregon in the class of 1908, and took his degree from Cooper Medical college in 1912. As a student, Dr. Kuykendall called signals for the 1906 football team when, for the first time in thirteen years, Mutnomah was defeated. In his senior year he was captain of a champion track team. For five years he has been practicing medicine and surgery in Eugene. Dr. Kuykendall has been commissioned by the American Red Cross to be captain of Ambulance Company No. 14, as this unit is officially designated.

The captain and the first lieutenants must be graduate physicians. Three physicians, all graduates of the University of Oregon, Frank Mount, William B. Neal and M. G. Howard, U. of O. Medical school, will be first lieutenants.

While enlistments have been coming in by mail and by wire, one first lieutenant and a large number of the 86 enlisted men remain to be chosen. Alumni intending to offer themselves for this service must step forward immediately, to forestall disappointment, as Major-General Liggett of the Western Department of the United States army, has ordered that this company be recruited at once. No qualified recruit will be refused if alumni in sufficient numbers do not apply. As soon as the company is mustered in it will be ordered to go to Allentown, Pa., for training and before early service in France. Once in France, the company will serve with the French army until the arrival of the American army, when it will be transferred to duty with the American forces.

CITY OFFICIALS PERPLEXED OVER ELECTION AMENDMENT

Oregon City officials are perplexed over the new situation which has arisen since the enactment of the new constitutional amendment which provides that all city councilmen shall be elected at large from the precincts fixed by the county court. There are three wards in this city and one councilman is elected from each ward annually, thus providing for a rotating council of nine members. The law presents the problem of adjusting the terms of office to meet its requirements. Mayor E. C. Hackett thinks the law covers the incumbents and that they should serve until such time as their successors are elected. Attorneys of the city think a solution can be reached by holding a special election. The present councilmen, whose terms expire this year, will remain in office until the next state election unless a special election is held.

SIX ALIENS ADMITTED

German's Examination is Postponed Indefinitely

Six aliens were admitted to citizenship by Examiner G. W. Tyler, of Seattle, here Monday. They were William C. Mangum, Hugh Matheson and Robert J. Hodson, of England; Reier H. Lima and Olaf Larson, of Norway; and Adrian Rajouk, of France. The applications of Frank Matinjak, Austrian, David L. Jones, British, Frank Langensand, Swiss, and Frank Fuchs, German, were continued, the latter indefinitely.

Notice of Sheriff's Sale

In the Circuit Court of the State of Oregon, for Clackamas County. E. W. Smith, Plaintiff,

vs. Mrs. Minnie P. Smith and W. F. R. Smith, Defendants.

Under and by virtue of a judgment and order of sale issued out of the Circuit Court of Clackamas County, State of Oregon, on the 4th day of May, 1917, in the above entitled suit wherein E. W. Smith, the above named plaintiff, obtained a judgment against said Mrs. Minnie P. Smith and W. F. R. Smith, defendants herein, which said judgment was on the 7th day of May, 1917, entered in Book 40, page 366, records of said Court, I am commanded to sell the following described real premises:—

All of Lots three (3), four (4) and five (5) in Hecker's Addition to Oregon City, Oregon, according to the duly recorded map and plat thereof.

Notice is hereby given that on Saturday, the 7th day of July, 1917, at 10:00 o'clock, a. m., of said day, at the front door of the County Court House at Oregon City, Clackamas County, Oregon, I will in obedience to said order of sale and judgment order sell the above described real property or so much thereof as may be necessary to satisfy plaintiff's judgment, to-wit:—the sum of \$257.64 with interest at 10 per cent per annum from May 4th, 1917; \$40.00 Attorneys' fees; \$6.00 costs and accruing costs to the highest and best bidder for cash in gold coin of the United States.

Dated June 7th, 1917.
W. J. WILSON,
Sheriff of Clackamas County, Oregon.
By E. C. HACKETT,
Deputy.
O. D. EBY,
Attorney for Plaintiff.

Clerk-Carrier Examination
The U. S. Civil Service Commission announces that a male clerk-carrier examination will be held at Oregon City, Oregon, on July 14, 1917, to fill vacancies as they may occur in the

position of clerk or carrier at the Oregon City postoffice. Men only will be admitted. Age limits are 18 to 45 years.

Application blank and information for applicants may be obtained from the local secretary, Board of Civil Service Examiners, at the Oregon City postoffice, or the Secretary, 11th Civil Service District, 303 Post Office Building, Seattle, Wash.

Files Amended Complaint

An amended complaint has been filed by W. B. Kidd against Clackamas county in another attempt to collect \$876.36, which he alleges is due him for work on the Fly Creek cut-off on the Pacific highway near New Era. The work was found necessary by the contractors, it is claimed, over the original amount of the contract. Kidd's first attempt to collect this money was thrown out of court.

Rural Carrier Examination
The United States Civil Service Commission has announced an examination for the County of Clackamas, Oregon, to be held at Portland on

July 14, 1917, to fill the position of rural carrier at Eagle Creek, and vacancies that may later occur on rural routes from other post offices in the above-mentioned county. The examination will be open only to male citizens who are actually domiciled in the territory of a post office in the county and who meet the other requirements set forth in Form No. 1977. This form and application blanks may be obtained from the offices mentioned above or from the United States Civil Service Commission at Washington, D. C. Applications should be forwarded to the Commission at Washington at the earliest practicable date.

Amends Divorce Decree

Fred P. Jacobsen was granted a divorce from Ada M. Jacobsen and given the custody of a minor child at stated intervals by an amended decree which was filed in the superior court here Tuesday.
