

THE BRUNSWICK

ALL PHONOGRAPHS IN ONE

THE BRUNSWICK is a final type phonograph—a composite model. In it are found all the desirable present-day features—plus. Up to now it has been the custom for each phonograph to have its own individual refinement—some have two or three, maybe four, valued features, but none had them all. None could play all records as well as the Brunswick.

The Brunswick is frankly a combination of all wanted perfections. Thus new levels in phonographic art are obtained.

Plays All Records

Heretofore each manufacturer had produced a phonograph that played his own records. The Brunswick does away with this old plan. The Brunswick may play any record, every make, without being restricted.

This wonderful Brunswick costs no more than ordinary phonographs, although many would be willing to pay more.

And we give terms on The Brunswick to make it easy for you.

Know for Yourself

Come and hear this marvelous phonograph. Note particularly the remarkable tones of the Pathe records on The Brunswick. Then ask us to play other makes—your favorite selections. You'll prefer them as played by The Brunswick.

Let us show you all the details—the acoustically perfect sound chamber—the accurately timed automatic stop—the super-motor—and the tone control. Also other costly extras. Then compare the prices. We feel sure you will prefer The Brunswick.

Prices \$30.00 to \$175.00

The Smartest Women in Town

Acknowledge that our stock of toilet articles is as large and complete as in the larger cities.

Regardless of what your needs may be you will have no trouble finding it in our store.

PRACTICAL THRIFT

Showing That, After All, It's The Little Things That Count

"Don't take the top sheet," is the order issued by a large insurance company to its employees when taking stationery from the stock room. The reason is, the top sheet is soiled and dusty and must be thrown away, only to leave another top sheet to become soiled and wasted.

Over the electric button in a large hotel is the request: "We would appreciate the favor if you will turn out the light when leaving the room." Some hotels furnish a large cake of soap for each room daily, whether the guest changes or not, the bulk of which is wasted, while other hotels furnish a small cake just large enough for a day's use. Some hotels have the heavy and costly counterpane laundered every day, while others have the maids turn the covers back each night to avoid soiling.

The reason for these small economies is not niggardliness, but good management. Of what use is a large cake of soap when a small one answers the same purpose? Why burn the light when you are out of a room? Why soil expensive linen when a little care would prevent?

If every employee in a large office wastes but one sheet of paper a day, and every guest burns hours of needless light, the yearly cost is enormous. If a hotel can save but a cent a room a day on soap, it means a yearly saving of \$1500 in a hotel with 500 rooms. If every bundle that goes out of a department store has half a cent's worth of needless paper and twine, the loss is a large item in the firm's annual profit and loss account.

A certain restaurant found that it cost \$30,000 a year to supply bread and butter gratis, and by charging but ten cents for this service turned a loss of \$30,000 into a profit of \$50,000. That is good management, however much we may grumble at the ten cent tax.

Success in business, success in life, is a matter of applying thrift principles to little things. We too often forget that dimes make dollars. And as waste counts up fast, so savings grow apace. If you were allowed to go over the books of any savings bank you would find hundreds of accounts that show steady, systematic saving. It may be but a dollar or two a week, but in the long run it mounts up. A certain young lawyer in New York who was once a pack peddler made it a steady habit when a boy to save fifty cents weekly, and he was as regular as the clock. It was the beginning of a successful career. Another young man, about to be married, saved five dollars a week for two years out of a salary of fifteen dollars and never missed a week.

The results of such systematic work will surprise even yourself. You know that fifty times two make a hundred, but if you can apply the principle to a bank account you are

bound to believe it. Little leaks can sink a ship as well as a great hole in the bow, and do it with less confusion. Little savings can make you rich as well as a great strike. The reason so many people are poor is simply because they cannot stop the little leaks. They spend little sums all the time, and in the multitude of little spendings reach a total that proves disastrous. Thrift in little things will make you thrifty in big ones; but you never can have the big things unless you give heed to the little ones. Watch yourself for a few days and see how your money gets away from you. You will surprise even yourself.—Longmont (Colo.) Times.

MAY INDICT

Country Papers Wrathful About Print Paper Costs

The bald statement of the federal trade commission in its report fixing the price of news print that "there is not now and there has not been a serious shortage of news print," that "reports of alleged shortage were widely circulated for the purpose of justifying high prices" and that "important manufacturers in the United States and Canada were banded together to secure unreasonable profits," has caused widespread indignation among a number of the publishers, particularly those of the country

press. Just how far these statements will be used to press the situation through the department of justice is not known, but it is more than likely the situation will not be allowed to rest as it is and that some form of indictment will have to be faced.

The "relief" gained in the price fixing process is far from what it should be for the smaller newspapers. Of course hope is felt by the manufacturers that further agitation may be lulled to slumber, so far as the metropolitan newspapers are concerned, by the concession of the \$2.50 price and that in this manner the storm will be permitted to die a-borning. But the country press, when it gets its breath, is likely to organize into a force that will have to be reckoned with.

Some companies, it is said at the commission office, that expected to enter the agreement are now selling at prices below those named by the commission. Among these notably are the Crown-Willamette company and the Powell River company, both of which, it was said, had contracts running for 1917 at considerably lower figures.

It will be noticed also that there is the possibility of a little bit of string on the agreement so far as its tenure is concerned. The commission in its notice to publishers says that the prices will be operative for six months and, if found too low, will be readjusted.

Age and Youth.

W. D. Howells said of old age at one of his Sunday afternoon lectures: "Age is modesty than youth. I've often noticed that when I tell a mother that her daughter is the image of what she was herself at nineteen the mother is delighted, but the daughter looks startled."

Life in the Navy.

"And what do you sailors do?" asked a visitor on one of our battleships. "Well," responded the jolly tar, "we does what we please until we are told to do something else, and then we does that something else pretty darn quick."—Boston Transcript.

Busy.

"Bliggins says a man ought to attend to his own business." "Yes. But he thinks it's his business to show everybody else how to attend to his business."—Washington Star.

How It Ended.

"Ma and pa had a terrible argument last night." "How did it end?" "Ma's going to get a new dress and opera cloak."—Detroit Free Press.

Will Probated.

Maude C. King Friday filed a petition in the county court to admit the will of the late William D. King to probate. King died at Boring, Ore., on February 10 last, leaving the widow and one minor child to share in an estate valued at \$500. Maude C. King was named executrix.

CONFIDENCE WILL WIN.

On the Other Hand, Men Who Think They Will Fail Usually Do.

The man or boy who begins an undertaking by saying, "I know I shall fail," generally does fail, while the one who says, "I know I shall succeed," generally does succeed. A very successful business man once said, "I always had perfect confidence in myself and always made sure that I should succeed before I began anything," which was not saying that he paid no attention to the possibility of failure. This was considered and disposed of before the venture was made.

I remember that a woman once came into a business office in which I was employed. She had with her a tall, strong looking boy of about fourteen, who had come to apply for the position of office boy.

The manager of the office, a keen, live business man, explained the duties of the situation to the boy and asked: "Do you think you could do the work?"

"I-I don't know," was the hesitating reply. "I'm afraid that maybe I couldn't."

"You might try, James," said his mother, who seemed anxious that he should secure the place.

"Yes," he replied in a hesitating tone. "I s'pose I might, but I'm afraid I can't do all those things."

"Then it is not of the least use for you to try," replied the business manager, a little sharply.

And the boy went away with his mother chiding him for his lack of self confidence.

Ten minutes later another boy of about fourteen came in by himself, walked up to the counter, took off his cap and asked to see the manager. He, too, was an applicant for the place.

The business manager carefully explained the duties of the situation, and the boy listened very attentively, while seeming to weigh the matter well in his mind.

When asked if he thought he could do the work he promptly replied: "Oh, yes; I know I can."

"And you don't feel afraid that you won't succeed?" "Not a bit afraid. I can do it."

"I think you can, too," replied the manager, approvingly. "I think you'll succeed."

And he did. He is in the same office still, but is no longer an office boy. He is the head bookkeeper, with a large salary and a fair prospect of becoming a partner in the house some day.—Philadelphia Inquirer.

HOMEMADE STERILIZER

Will Help Farmers to Prevent Milk From Souring in Transit

number of milk-producing centers. For this demonstration the department has had constructed more than 20 of the homemade sterilizing outfits. Already the health authorities in 150 cities have asked the department to send these outfits for local demonstration.

These outfits the department has offered to lend any local dairy official or health officer who will agree to demonstrate them in actual practice to milk producers in his locality. The outfits, which cost not over \$15 and can be made by any local tinsmith, when placed on a range or a two-burner oil stove, generate steam enough to kill the bacteria in milk cans, pails, strainer cloths and separator parts. At the same time the device removes foul odors, leaves the utensils dry as well as sterilized, and adds materially to their life.

The sterilization of milk utensils is of importance to the dairyman who wishes to produce a good-flavored milk which will not sour readily. This is shown by the fact that milk cans, washed in the ordinary way, may harbor millions of bacteria, and milk contained in these cans is sure to have a high bacterial count, which tends to affect not only its keeping quality but its flavor as well. Other experiments show conclusively that milk which starts in sterilized utensils has a much better chance of reaching market in good condition than milk which has been handled in utensils that simply have been washed in the ordinary way.

IRISH SONG

Sure, th' breezes that blow are no lighter than you are—
When you trip o'er the grass, faith,
'twill scarce bind a stalk;
And your eyes are as bright as th' drops o' th' dew are,
Arrah, birds stop to listen whiniver you talk,
For the songs that they sing are no music beside you—
Th' sound o' your voice is like sun after showers;
'Tis sure that I am that if all Nature died, you
Would soon take th' place that was left by th' flowers.
—James Leo Duff.

DR. MORRIS ELECTED

Bond Booster Committee Effects Permanent Organization

Dr. L. A. Morris was Friday night elected chairman of the Commercial club's committee of 12 which has the \$6,000,000 road bond campaign in hand for Clackamas county. Permanent organization of the committee was effected at a meeting Friday night with the election of Dr. Morris as chairman, Wallace Caulfield as secretary and M. D. Latourrette as treasurer.

To arrange for a series of meetings throughout the county a committee comprising Livy Stipp, John Risley and Dr. Hugh Mount was ap-

pointed last night. The committee plans to take the bond campaign to every accessible district in the county, where special meetings for the presentation of the benefits of the proposed bond issue will be held. The same committee will have charge of the publication and distribution of literature supporting the bonds.

11 EWES—22 LAMBS

Redland Farmers Have Great Success With Sheep Flocks

Diversified farming has gained a strong following in Clackamas county within the past few years, but it has not crowded out the sheep industry and the county supports a number of large flocks. Among the farmers who divide their attention between sheep and other stock and crops is Ed Bates, of the Redland country. Mr. Bates has 13 ewes on his Redland farm and this spring his flock was increased by 24 lambs. Mr. Bates' record is said to be one of the best in the county for the spring lambing season, for 11 of the 13 ewes on the farm produced twin lambs. The flock on the A. M. Kirchem farm at Redland is another that made a creditable record for the season. A

flock of 10 ewes produced 15 lambs for Mr. Kirchem.

SCOTT'S EMULSION

OF NORWEGIAN COD LIVER OIL usually stops a stubborn cough or chest cold when ordinary specifics fail.

It helps strengthen the lungs and throat—adds energy to the blood—and gives the system the force to help resist disease.

Use SCOTT'S Refuse Substitutes

Scott & Bowne, Bloomfield, N. J.

No Eggs, Milk or Butter

The following recipe shows how an appetizing, wholesome cake can be made without expensive ingredients.

In many other recipes the number of eggs may be reduced one-half or more by using an additional quantity of ROYAL Baking Powder, about a teaspoon, in place of each egg omitted.

EGGLESS, MILKLESS, BUTTERLESS CAKE

1 cup brown sugar
1 1/2 cups water
1 cup seeded raisins
2 ounces citron
3/4 cup shortening
1 teaspoon nutmeg
1 teaspoon cinnamon
1/2 teaspoon salt
2 cups flour
5 teaspoons Royal Baking Powder

The old method (fruit cake) called for 2 eggs

DIRECTIONS—Put the first eight ingredients into saucepan and boil three minutes. When cool, add the flour and baking powder which have been sifted together; mix well. Bake in moderate oven in loaf pan (round tin with hole in center is best) for 35 or 40 minutes. Ice with white icing.

Booklet of recipes which economize in eggs and other expensive ingredients, mailed free. Address Royal Baking Powder Co., 135 William Street, New York.

ROYAL BAKING POWDER

Made from Cream of Tartar, derived from grapes, adds none but healthful qualities to the food.

No Alum

No Phosphate
