K C Baking Powder is guaranteed absolutely pure and wholesome.

There is no Rochelle salts, no harmful residue left in the food that is leavened with K C.

Even the most delicate can eat hot breads raised with K C without distress. Try K C Baking Powder breads if yeast-raised bread does not agree with you.

THE FASHIONS

July lived up to tradition this year, affording us an opportunity to wear our sheerest lingerie frocks and our smartest sports costumes during the holidays. The nearby resorts were crowded on the Fourth, which chanced to be an ideal day, with well dressed men and women. A tiny flag or a bit of red, white and blue, was a detail of most costumes; the men wore it on coat lapel, in hat band, or protruding from a pocket; the women pinned it daintily to the underbodice of the sheer blouse or frock, from where its colors shone out softly and effectively; or tucked a small silk flag into the girdle of the white frock, or into

the military preparations going on about us.

Summer Costumes Combine Comfort and Charm

There were not many among the holiday crowds, however, who looked uncomfortably "dressed-up." Fashion has at last managed to combine comfort with grace and charm. The sports costume predominated; various styles of middie and Russian blouses were worn with trim fitting skirts; chic suits of striped and plain mohair, pongee or linen, with Norfolk coats and pleated skirts, were favored; and sweaters coats, with self or contrasting skirts, were also popular. The middie blouse costumes were developed in the regulation white linen, duck or galatee, with collar and cuffs of blue and white, with collar and cuffs of blue and white, with collar and cuffs of blue and white. The modified Russian and "slip-on" blouses favored the white and colored Japanese silks, pongee, plain or figured Shantung, or Georgette, and were usually combined with skirts of thin, light or dark silks. One especially pretty costume developed in plain natural colored pongee, trimmed and combined with a skirt of dark blue foulard dotted with bright green, is illustrated here. It is a slip-on model with cool, becoming sleeves, and an effective collar. The skirt is a simply gathered design, short and full, but unusually graceful.

The plain white Russian blouse costume of Georgette crepe is particularly effective and cool for these hot summer days, and perfectly appropriate for summer evening wear at roof garden or summer show. The simple voiles, too, are being developed in charming models with a touch of black, or a bright color at girdle or throat. The new voiles are washable in most mixtures, and generally satisfactory.

Cool Frocks for Street Wear

Dark blue taffeta, Georgette, serge and satin is the leading color for city street wear, in spite of its apparent warmth. As most of these frocks, however, are made with white or self-colored transparent sleeves, they are in reality quite as cool as a light colored frock. Dark blue Georgette is often used for the entire dress, colored and cuffed with taffeta, and trimmed with a band or two of the taffeta on the skirt. The straight-line, one-piece serges which one meets so often on the avenue owing to the lure of the shops; for those

who fly town at the first hint of summer are tempted by the shops, and motor in frequently to visit them—are often trimmed effectively with braid or beads, in designs worked out in colors. For instance, a dark blue serge and Georgette frock seen a day or so ago, had an odd, applique design in blue velvet trimming the jumper, which was of the serge; the design, which was a small leaf, was repeated on the collar and cuffs. Sashes which are a feature of both linen and serge frocks this summer, offer a pleasing opportunity for introducing a bit of colored embroidery. The sash

on the serge frock is generally of black satin and the embroidery is worked out in colored wools, soutache braid, or beads. These motifs may be as bizarre as desired and are often repeated in the trimming of the hat.

Variety in Tailored Hats

It is no longer the price of the hat which counts, for there are some very inexpensive hats being worn just now by the best dressed women, but the chic of its coloring and trimming which is important. For instance, the soft, light weight Bankok, the Wen-Chow, and the chair-cane hats are all favored, finished with just a touch of colored wool, beads, or a bright bit of applique embroidery which harmonizes with suit or frock. One of the smartest hats seen this season was a dark tan Wen-Chow with one of the new quartered crowns in dark purple satin, trimmed with a motif in delft blue and white Chinese embroidery. A purple satin hand-bag with another blue and white motif completed the effect, which was charming. This hat and bag were worn with a dainty little corded frock of tan crepe de Chine, made with a petticoat of cream batiste embroidery which showed just a bit below the silken skirt.

You can get the Courier for one year for \$1.00—if you pay in advance.

BOLD CAR THIEVES

Tricks of the Clever Crooks That Steal Automobiles.

DARING IN THEIR METHODS.

One of Their Pet Schemes is to Disguise Themselves as Repairers and Openly Tow the Car Away—Ordinary Safeguards Are a Joke to Them.

The man who steals an automobile is one of the cleverest mechanics in the country. He knows every make of car from the steering wheel to the tires, and there is scarcely any precaution taken by the owner of the car to safeguard his property that the automobile thief cannot beat.

Some car owners fondly imagine that when they chain the wheel of their car with a fairly thick steel chain they have made it impossible for any crook to move the auto from its anchorage. The simplicity of this safeguard must cause hilarity among the motorcar crooks, for the ordinary steel chain can be cut in a second with the appliances that the motor thieves carry in their outfit.

But most car owners consider they have made the car immovable by merely locking the switch box. It will interest them to know that the car thieves can beat this precaution very easily. The clever mechanic who makes a business of stealing cars can cross wires so as to cause ignition and move the engine without bothering with the switch box at all. A method that is kindergarten to the car thief is to connect wires from the dry cell battery direct to the ignition coil, thus starting the motor without difficulty.

Some cars have devices by which the gasoline supply can be locked, and this is regarded by some owners as placing a hopeless barrier in the way of the thief who would run off with the standing car. For how can a car be moved when the supply of gasoline is shut off? Nothing easier. The motorcar thief carries with him his own supply of gasoline in a flask. With this gasoline the automobile thief can negotiate a good run with the car by connecting his flask of gasoline direct to the carburetor. Feeding the gasoline to the carburetor through a rubber hose, the automobile thief can send the car sufficiently far to enable him to put the gasoline tank and the car in regular commission and speed where he will to safety and a sale.

But the commonest and therefore the safest trick of the automobile thief requires no expert mechanical knowledge. It simply requires nerve, which these thieves possess to an unusual degree. This trick is the old one of driving up in an auto that looks like a garage repair wagon, hitching a rope to the car that is to be stolen and towing it away. The thieves dress for the part in oil soaked overalls. When they have selected the car to be stolen, picking one that is in a side street and not likely to be under the eye of a policeman who may have been tipped to watch the car, the thieves come up to the scene in their old car, looking like the ordinary crew sent for from the garage to repair a car that is in trouble or isn't working as well as its fastidious owner would wish.

They alight from their own car and make a great pretense of examining the car that they intend to spirit away. They remove the hood and scrutinize the motor. They get out a kit of tools and tinkers for awhile with some part of the machinery. If any one should happen to be watching them or looking on from a neighboring window all the men do has the appearance of natural work by honest workmen from the repair shop. Presently the men hold a consultation, pointing to some part of the motor machinery, and apparently come to the conclusion that the car cannot be started with the tools at their command. Then they hitch a rope to the car and tow it away at the end of their own car. Could anything be more simple?

How can you beat such a game as this? Carrying away part of the machinery does not prevent the thieves from towing the car away. One sure way to prevent robbery is to have the car watched. The policeman on that patrol will keep an eye on it if you are only going to make a visit to some office building and coming back in a short time. But if you keep your car in the street the entire day no one can watch it. You are simply taking a chance with the car thieves.

There are other ways of making the path of the motorcar crook as steep and difficult as possible. One motorist believes he has solved the thief problem by having a slot cut in the clutch pedal shaft. Through this he passes a bar which he locks. So far his car has not been stolen. Another way is to remove the rotor. This makes it very difficult for any thief to steal the car, for he would have to carry a number of rotors to be sure of having one that would fit that particular motor. — Philadelphia North American.

Dry and Moist Air.

A cubic foot of dry air weighs more than a cubic foot of moist air at the same temperature and pressure. The addition of vapor to a cubic foot of dry air enlarges the volume of the mixture if the air is free to expand, as in the atmosphere, and as the vapor has only about two-thirds the density of dry air at the same temperature and pressure the density of the mixture is less than that of dry air.

Don't put off tatching till the storm is at hand.—Irish Proverb.

Cut This Out—It Is Worth Money

DON'T MISS THIS. Cut out this slip, enclose with 5c and mail it to Foley & Co., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for bronchial coughs, colds and croup; Foley Kidney Pills, for lame back, weak kidneys, rheumatism, bladder troubles and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic, for constipation, biliousness, headache and sluggish bowels.—Jones Drug Co.

Passing in Review

News of the Week from War Zones of Europe and Mexico

Chagrined by the non-arrival of prisoners who recently were released, after undergoing imprisonment since the Dublin rebellion, and who were expected at Cork recently, 1000 Sinn Feiners wrecked the recruiting office at Cork, hissed the military pickets and sang republican songs.

General Pershing reported that it was generally believed both by Mexicans and foreigners along the line of communication of his expedition that a crisis between the United States and Mexico had been averted and that had brought about a new friendly relationship between the Americans and Mexicans.

The Fourth and Eighth regiments of the Fourth Pennsylvania infantry brigade, under command of Brigadier-General C. T. O'Neil, of Allentown, Pa., arrived at El Paso, Texas, late last week. They were followed closely by three battalions of other regiments already in camp completing the Pennsylvania contingent of guardsmen in El Paso. Guardsmen and regulars in El Paso now total about 26,000.

War's increase of food prices in Europe, as shown by the bureau of labor statistics, has touched neutrals almost as heavily as it has the belligerents. The Teutonic countries have felt the pinch more than have the allies. The bureau's statistics give the biggest food price advances in Austria, where meats are more than 500 per cent higher than before the outbreak of hostilities. Beef, that in February, 1914, sold for 6.3 cents a pound, now brings 38.7 cents. Meat prices in Berlin show increases ranging from 45 to 160 per cent.

The Berlin Bankers' association, according to the Stefani news agency, has circularized all banks in Germany, instructing them that henceforth, by request of the imperial foreign office, Italians are to be treated as subjects of a belligerent state, in other words that payments to Italians in Germany are to be stopped. The German foreign office has officially informed the Italian government through the Swiss government that payment of workingmen's pensions due Italians has been suspended. The attitude of Germany toward Italian subjects in Germany and Belgium is causing much resentment in Italy.

Solution of difficulties between the United States and Mexico appeared Saturday to trend more and more toward settlement through an international joint commission. Informal conferences between Acting Secretary of State Polk and Eliseo Arredondo, Mexican ambassador-designate, was indicated, were developing questions for probable submission to such a body. General Carranza is said to approve the commission plan of settling differences as provided in the treaty of 1848, and state department officials are believed to be willing to let negotiations take this course, though preferring that adjustment be made through the present conferences. President Wilson, it is understood, is not dissatisfied with the direction negotiations are taking.

Although the contention of the British and French embassies that the German submarine Deutschland at Baltimore is a potential warship had little weight at the state department in view of the department's information that the vessel is purely a merchant ship, officials saw that other bothersome questions might arise in connection with the undersea boat's visit.

Exhausted by the desperate fighting of the two days, the German and British troops on the Somme rested on their arms Sunday night. In the lull which has followed what correspondents at the front describe as the fiercest fighting of the war, the British are consolidating their new positions north of the Bazentin-Longueville line and are bringing up their heavy artillery preparatory to resuming the great drive toward Peronne. After four assaults hurled in rapid succession at the German lines in the region of Ovillers and Bazentin, the Petit early Sunday had failed to dislodge the enemy, operations on both sides came to an abrupt halt.

Russian troops have captured the town of Balbut, in Turkish Armenia, by assault. This information was given in an official statement issued by the Russian War department Sunday. Balbut is 65 miles northwest of Erzurum and about 60 miles south of the Black Sea port of Trebizond.

At least three British and French cruisers are off the Virginia Capes waiting for the Deutschland to go out into the Atlantic on the way back to Germany, and for the Bremen, said to be en route from Kiel. One of the warships came within six miles of Cape Henry on Sunday. Incoming steamers report sighting foreign warships in all directions off the Virginia coast, indicating that a V-shaped pocket is being formed in which it is hoped to catch the Deutschland.

In recognizing the Deutschland as a submarine merchantment the government of the United States has reserved for future determination the status of this particular class of ocean carrier. The allies have determined not to make a formal protest against this decision. They merely will file a note pointing out the inherent warlike character of submarines and the ease with which they can be transformed to vessels of war. They will place squarely on the government the responsibility for any warlike acts by the Deutschland after she leaves American waters, thus paving the way for a claim for damages.

The Little Paint Man Says:

Good brushes are necessary to good painting. You can't do good work with brushes that shed bristles all over your work. Neither can you do the best work with a brush not adapted to the kind of work you want to do.

There are many kinds of brushes for many kinds of work; we have them all and can advise you as to the proper kind for your job. Our advice is free. Also consult us about the paint best adapted for your job. If it's outside, inside, floor, wall, furniture, each require a special paint. You will find them all here and all the other things that belong in a first-class Paint store.

REALTY BROKERS MEET

Number of Real Estate Dealers from This County Attend

Among the Clackamas county realty operators who have been in attendance at the first interstate realty convention ever held in the northwest are the following: August Muckelson and Andrew Koehner of Canby; William A. Morana, Boring; J. R. Kelso, J. I. Johnson and Maggie A. Johnson of Milwaukie, A. C. Howland and S. O. Dillman of Oregon City; W. A. Beck of Molalla and H. S. Eddy of Sandy.

This group has participated in the round of business and pleasure mapped and carried out by the hosts, the Portland Realty board, and has found the convention immensely valuable as an exchange for ideas that will tend toward the advancement of the real estate business generally.

Socialists Meet

The Clackamas county local of the Socialist party held its monthly meeting Saturday afternoon in Knapp's hall. Among the business transacted was the appointment of precinct committeemen in the various precincts. It is desired that Socialists in every community consider themselves as a committee of one. All Socialists and near-Socialists are invited to the next meeting, the third Saturday in August at 2 p. m.

Forced Sale
