AN INSECT MARVEL.

Curious and Complex is the Tongue of the Butterfly.
Of all the marvels in which the world of insect life is so rich none is more curious and remarkable than the tongue of the butterfly.
This is always of great length. When not in use it is coiled like a watch spring in a flat spiral close to the head. But when the butterfly visits the flower on which it feeds the tongue is uncoiled, the tip inserted deep in the heart of the flower and the juices sucked up.
The butterfly's tongue really consists of two tubes. Each of these has a concave inner face, whose edges interlock one with the other, so as to form a third or central tube.
In butterflies we have the highest development of the insect race, so far as beauty is concerned. In other respects, however, they do not hold so high a place. They are outwitted in intelligence by ants, bees and wasps and in perfection of external parts and mechanical excellence of the joints by beetles.
The colors and patterns on the wings which make butterflies so beautiful are due to the arrangements of innumerable scales that can be distinguished only with a powerful microscope. In some cases these scales are themselves colored, but often the effect of color is only optical, due to the reflection of light from the delicate ridges on each scale.—New York American.

SAFEGUARDING ROYALTY.

Precautions in Olden Days When an English Monarch Was Ill.
The British law retains some peculiar provisions with reference to the "illness of the king." These provisions are mere survivals in the present settled order of government, but there was a time when the king's incapacity afforded opportunity to aspirants to the throne to shorten his day at a minimum risk of detection. Accordingly certain wise precautions were matters of law.
In his "Institutes" Coke says: "If the King be taken sick there ought to be a warrant issue from the Privy Council, addressed to certain physicians and surgeons, authorizing them to administer to the Royal patient poisons, syrups, lazities, medicines, etc.; still, none of these should be given except by consent and advice of the Council, and they ought to set down in writing everything done and administered, and they should compound all drugs themselves and not entrust their preparation to any apothecary."
Coke thus wrote of precedent in 1610, and today the law is practically as he found it, although now the privy council simply hears reports of the progress of the king's malady and leaves actual treatment entirely to the physicians in direct charge of the case.—Pearson's Weekly.

Antiquity of Shorthand.

Shorthand is apt to be looked upon as an essentially modern art. The predecessors of Pitman—Byron in the eighteenth century, Mason in the seventeenth—are dim and distant figures beyond which it seems useless to venture. Cicero dictated his orations to his freedman, T. Tullius Tiro, and was inconstant when temporarily deprived of his services. He complained in a letter to a friend that while "Tiro takes down whole phrases in a few signs, Spithurus [his provisional substitute] only writes in syllables." We need not, however, suppose that the "notae Thronianae" were actually invented by the freedman in question. As M. Guenin points out, the Romans created very few of the arts of peace, contenting themselves, as a rule, by copying from the Greeks. M. Guenin, however, indicates the banks of the Nile as the cradle of the art.

Blunderbus.

In using the word "blunderbus" we unconsciously imply a sense of disparagement for the shooting powers of our forefathers contrasted with the precision of the modern rifle. The word itself has, however, a terrible enough meaning and disdains all connection with "blunder." "Blunderbus," in fact, as we have it, is a strange corruption—perhaps not altogether untinted with the sense and sound of "blunder"—of the old Dutch word "donderbus," which can be literally translated into the English "thunder box" or "thunder barrel."

Unfailing.

The prime minister sent for the wisest man in the land.
"I've got a lot of stuff about our country that I'd like to have known throughout the world, but it's pretty dry, and I'm afraid other peoples won't read it. What shall I do?"
"Put it in a book," said the sage, "and make the title 'Secret Diplomatic Memoirs.' They'll eat it up, statistics and all."—Boston Transcript.

He Liked It.

A man who lives alongside of a graveyard was asked if it was not an unpleasant location.
"No," said he: "I never resided in all my life with a set of neighbors that minded their own business so steadily as they do."—Pittsburgh Press.

Home Millinery.

Poetic Lady—Oh, had I the wings of a dove! Practical Lady—They're not using them very much in the newest hats.—Philadelphia Record.

Looks like everything in the world comes right if we jes' wait long enough.—Mrs. Wigs.

Canby Loses Game

Oregon City high school defeated the Canby high school at a basketball game in the county seat Friday night of last week, the score being 31 to 16. Waite and Skivington played a good game for Canby, but were unable to find the needed support in their teammates. During the game a committee of girls from the Oregon City school sold candy in the grandstand erected at one end of the old armory, where the contest was staged.

PEOPLES OF THE WORLD.

The Aryan or White Race and Its Numerous Divisions.
The division of the earth's population according to race is as follows: Indo-Germanic or Aryan race (white), occupying Europe, America, Persia, India and Australia, about 775,000,000; Mongolian or Turanian (yellow and brown), living in Asia, about 682,000,000; Semitic (white), living in Asia, Arabia, etc., about 65,000,000; negro and Bantu (black), found in Africa, about 150,000,000; Malay and Polynesian (brown), inhabiting Australasia, about 35,000,000; American (Indian red), found in North and South America, number, including halfbreeds, about 25,000,000.
The Slavs are one of the chief divisions of the Aryan race. They are divided, as a race, into two leading families, the eastern and western Slavs. The eastern Slavs comprise the Russians (Great Russians, Little Russians and White Russians); Bulgarians, Serbo-Croats, including the Servians and Montenegrins, and Slovenes in Carinthia, Carniola and part of Syria. The western Slav family is divided into the Poles, in Russia, Austria and Prussia, and the Kassubers; the Czechs, or Bohemians, and the Moravians, with the Slovaks in Hungary, and the Lusatian Wendes or Sarmis in Saxony and Prussia. The theory is that their original home was in Volhynia and White Russia.

VICTIMS OF NIAGARA.

Water Birds Go to Sleep and Are Swept Over the Falls.
Swimming too near the brink of the falls, hundreds of water birds, even swans, ducks and geese, go over Niagara falls to their death each year in the migratory season. So many birds pay the penalty for their daring each year that bird lovers on both the American and Canadian sides of the falls are considering steps to lessen the annual toll of the feathered life.
Since a majority of the victims are claimed in the night, the theory is advanced that the birds go to sleep while swimming and don't wake up until the rapids have carried them over the danger line. Usually they are killed outright in the fall. Sometimes they are only stunned and are picked out of the river below the falls and sold for food.
In 1912, so Ernest Harold Baynes, the naturalist, relates, 140 whistling swans went over Horseshoe falls. Boys and men fished the birds out, knocked them on the head and sold them.
"James Savage of Buffalo," Mr. Baynes says, "with some friends once saved a flock of swans by chasing them in a power boat and making them fly away just before nightfall. It was a daring thing for these men to do, for if by any chance the engine had become disabled nothing could have prevented their going over the falls."—Philadelphia North American.

African Marriage System.

You cannot fancy how deeply complicated the African marriage system is nor how many ramifications there may be to a woman palaver. One day Mr. Heminger was sitting in a hut talking with two members of his congregation, wives of one husband. He was talking to them about their slurs, which were of an obvious character. The younger woman had been accused of stealing food. Then he turned to the elder, Wawa, she of the ten children, five of them dead and five of them cruel.

"Wawa," said he, "why cannot you live at peace with this wife of your husband? Why are you always quarreling?" (They are notorious scampers.) "Well," said Wawa, "she was bought with one of my children, and I cannot forget it."—Jean Kenyon MacKenzie in Atlantic.

Turks' Names For Greeks.

The Turks have definite names for the Greeks who inhabit Ottoman territory and for those who are their enemy masters. The latter are Yunnan and their country Yunnanistan—names derived from "Yonla"—while the Greeks and Turks are Rum. By origin this is simply "Romans" and is an inheritance from the Byzantine days, when the inhabitants of Constantinople, the New Rome, were called Romioi, while the provincials were known as Hellenikoi. "Rum" was the conquering Turkish name for the Byzantine empire. It survives in Roumelia, while the popular Greek language of the present day is still known as Romaine. But every Greek, in Greece or in Turkey, calls himself a Hellenic.—London Chronicle.

An Ominous Symptom.

"A good wife is heaven's greatest gift to man and the rarest; gone the earth holds," remarked Mr. Jarphly the other morning. "She is his joy, his inspiration and his very soul. Through her he learns to reach the pure and true, and her loving hands lead him softly over the rough places. She is—" "Jeremiah," said Mrs. Jarphly solemnly—"Jeremiah, what wickedness have you been up to now?"

Even Break.

"Well, did your husband succeed in beating the carpet?"
"My sportily inclined brother says that the contest was a draw."—Louisville Courier-Journal.

Just What Did He Mean?

"Do you remember when you proposed to your wife?"
"My boy, I can never forget it."—Richmond Times-Dispatch.

Grief is crowned with consolation.—Shakespeare.

Contractors Are Sued

Passing the buck to the Oregon Engineering & Construction company, the city of West Linn has sued the contractors for \$201.38; which sum the city across the river has been asked to pay the Home restaurant, of Oregon City, for meals furnished laborers on the West Linn pipeline and reservoir. The West Linn people think the contractors ought to put up, and have so instituted action on behalf of the restaurant.

The State Laws of Oregon--

The State Laws of Oregon governing State banks are perhaps more stringent than those of any other state. The depositor's protection is beyond question, as it should be. The strong directorate and efficient management of this Bank, together with proper equipment and modern methods, insure each depositor security, safety and careful attention. Upon this showing your business is solicited. 4 percent interest paid upon time and savings deposits.

THOS. F. RYAN, Vice-President.
JOHN R. HUMPHREYS, Cashier.

Mythical Horses.

Pegasus ("born near the source of the ocean") was the winged horse of Apollo and the Muses. Bellerophon rode this animal when he charged the Chimera.

Sleipnir ("the black horse of Odin") had eight legs and could carry his master on sea as well as land. This animal is believed to typify the wind, which blows from eight different points.

Al Borak ("the lightning") was the horse commissioned by Gabriel to carry Mohammed to the seventh heaven. He had a human face and the wings of an eagle. Every step he took was equal to the farthest range of human vision.

According to Thessalian legend, the first horse was miraculously brought forth by Neptune striking a rock with his trident.

A Voracious Monster.

The most voracious of all marine beasts of prey is the orca, or killer whale. It reaches a length of twenty-five feet, and its jaws bristle with teeth from four to six inches long and as sharp as a dirk knife. Its digestive power is proportioned to the tremendous efficiency of its jaws. It seems also to be an atrocious glutton, as one specimen examined contained in its stomach thirteen porpoises and fourteen seals.

A Boomerang.

"Call that art!" exclaimed a would be critic, pointing to a painting in a studio. "If that dandy is a work of art, then I'm an idiot!"
"The latter part of your statement," rejoined the artist calmly, "would seem to furnish conclusive proof that it is a work of art."

A Lover's Quarrel.

She (turning at the door)—I think you are just hateful, and I'm never going to speak to you again, so there's no use coming into the music room after me, because I'll be on the rustic bench at the far end of the conservatory.—Smart Set.

Drowned His Voice.

Teacher—Tommy, I asked you to spell candy. Why don't you do it? His Sister—Please, miss, his mouth's watering so he can't talk.—Boston Transcript.

It Is Better to Begin a Good Work in the Evening than Not at All.—Old Saying.

Franklin on Fresh Air.

Experience has convinced me of my error. I now look upon fresh air as a friend; I even sleep with an open window. I am persuaded that no common Air from without is so unwholesome as the Air within a close room, that has been often breathed and not changed. Moist Air, too, which formerly I thought pernicious, gives me no apprehensions. You physicians have of late happily discovered that fresh and cool Air does good to Persons in the Smallpox and other Fevers. It is to be hoped that in another Century or two we may find out that it is not bad even for People in Health.—Benjamin Franklin.

Making Fur.

The first step in tanning a skin with the hair on is to stretch it tight and smooth, flesh side up, on a board and tack it by the edges to its place. Scrape off the loose flesh and fat with a blunt knife and work in chalk freely with plenty of hard rubbing. When the chalk begins to powder and fall off remove the skin from the board, rub in plenty of alum, wrap up close and keep in a dry place for a few days. By this means it will be made pliable and will retain the hair.—Philadelphia Press.

KNOWLEDGE.

Virtue is an angel, but she is a blind one and must ask of Knowledge to show her the pathway that leads to her goal. Mere knowledge, on the other hand, is ready to combat either in the ranks of sin or under the banners of righteousness, to navigate a corsair's vessel or a missionary ship.—Horace Mann.

Won by Losing.

Rastus—Ah done proposed t' yoh wife erbout six months befoh yo' all married her, Mose. Mose—Am dat er fact? Rastus—Yassah; an' I done had an rabbit's foot on mah pussen at de time, but she turned meh down. Mose (with a sigh)—Rastus, yo' all sho wuz lucky in havin' dat rabbit foot wid yo'. Deed yo' wuz.—Pittsburgh Press.

YOUR CARES.

We brought no cares into this world, and naked of cares we shall leave it. Therefore to hug them here is foolish.

Shopping.

"I say, Mabel, if we aren't going to buy anything let's look at something more expensive."

R. L. Holman and T. P. Randall, Leading Undertakers, Fifth and Main St.; Telephone: Pacific 415-J; Home B-18.

MORE ABOUT ROADS

Maintenance Just as Important as Construction, Says Writer

"Perhaps the worst thing which could happen to the cause of good roads," says Farm and Fireside, "would be the building of all those now needed, with no provision for keeping them up after their completion. No 'permanent' road is permanent in the sense of not needing repairs and upkeep. We have shown in these columns that a concrete roadway 16 feet wide can be kept in condition for twenty years or more by the expenditure of from \$25 to \$35 per mile a year. There is probably no road, permanent or temporary, which can be kept in really good condition for less."

"Some charge for maintenance there surely will be on every permanent road. When issues of bonds for better roads are voted on, this matter of maintenance should be provided for."

"In many cases the permanent road will be far easier to maintain by the ordinary tax levy than were the old unimproved highways. In such cases the new road, instead of adding to the local burden, will lighten it."

EVERYBODY SHOVELS

Even President of Willamette Valley Road Digs in Mud

When the heavy storm of the first of the week precipitated an avalanche of mud and stones upon the tracks of the Willamette Valley Southern railway near Kansas City Tuesday night, everybody concerned with the road got out and shovelled the obstructing muck off the rails. Even President Grant B. Dimick and vice-president O. D. Eby donned overalls and old shoes and helped clear the right-of-way.

In spite of the efforts of the railroad men, the slide caused considerable delay on the road, and the south-bound train for Molalla did not pull out of the county seat until after eleven in the evening. By that time the rails had been uncovered, and the tired passengers were started on their way to their homes.

Severe Storms in Northwest

Reports from many points in Oregon and Washington tell of one of the worst storms in years. Wind, rain, hail and lightning combining to do much damage.

At Falls City, the power dam was swept away; at Bay City a 80-mile gale did much harm, and at Seattle and other northern points snow was so bad as to stop traffic.

Bakers to Wed

Mrs. Lucile A. Baker and Henry Baker, both of Hubbard, have secured a marriage license in Vancouver, Washington. During the week Miss Mildred V. Dowd and P. H. Miller, of Aurora, also secured a license in the Washington Gretna Green.

The choir of the Presbyterian church, under the direction of Miss Moretta Hickman, is preparing to give a Christmas song service Sunday evening. Indications are that the programme will surpass all previous efforts of the choir.

The Jaw of an Otter.

You can find an example of nature's adaptation of the jaw to use in the case of certain carnivora, like the otter—a big weasel that has acquired aquatic habits. The jaws of such beasts are so fixed in the sockets that dislocation is impossible. In some instances you cannot, even after the animal is dead, separate the jaw from the head. This arrangement is evidently designed to enable the beast to bite to the greatest advantage without danger that the chewing apparatus will come loose.

Exactly.

Little Mrs. Hunter had heard so many jokes about the brides who couldn't market successfully that she made up her mind that the first request she made of the marketman would show her to be a sophisticated housewife. "Send me, please," she said, "two French chops and 100 green peas."—Exchange.

The Menu.

"Will you have some of the tomatoes and lettuce with French dressing?" chirped the young wife.
"No," returned the husband, musing on his bachelor dinners, now forever gone. "My salad days are over."
"Well," spoke up the wife sharply, "the next course is the roast."
And she served him a large portion, piping hot.—St. Louis Post-Dispatch.

Managing John.

"You really must impress upon John the folly of his line of action."
"What's the use? He won't pay the least attention to me. He'll only listen to fools now." (After a short pause.) "You speak to him."—Exchange.

Flechner Tries Again

Though a similar suit had been dismissed by the justice court some weeks ago, Gustave Flechner Wednesday filed suit in the circuit court through his attorneys, Stone & Moulton, against the Oregon City Courier, the Courier Press, M. J. Brown and A. E. Frost, asking for \$85.

MANY USE FORESTS

Mining Companies and Settlers Benefitted by Great Reserves

In his annual report just issued, the Secretary of Agriculture devotes considerable space to the timber resources of the National Forests. He makes it very plain that the "resources of the forests are being utilized to build up the country."

The Secretary says that the forests "furnish the timber required by settlers, communities, and industries within and near their borders. This is obtained without charge by settlers, prospectors, and other local residents for personal use; at cost by settlers and farmers generally for domestic purposes; and at market value by individuals or corporations desiring to purchase it. During the last 11 years the number of permits for free timber to settlers has been multiplied 13 times, and the number of sales 27 times. The amount cut annually by settlers under these permits is more than four times what it was in 1905, while that under commercial sales has increased eightfold. * * * probably not less than 45,000 persons or corporations obtained timber directly from the national forests."

The Secretary further states that "more than half of the timber now cut annually is used in the vicinity of the forests. This includes all that taken free and under sales at cost, and approximately 45 per cent of the commercial cut. Hundreds of mining districts throughout the West, from small projects requiring an occasional wagon-load of props or lagging to the great copper district of central Montana, which consumes about 380,000 pieces of mining timber annually, are supplied. Railroads also are furnished a large part of the ties and other material required for their lines in the Rocky Mountain regions. A million and a half ties are now cut from the forests yearly."

In conclusion, the Secretary points out that "the national forests also meet the demands of the general lumber market. More than 300,000,000 feet are annually cut for the nationwide trade. Since 1908 there have been taken from them 5,000,000,000 board feet of wood and timber products."

"Printing with a punch"—at the Courier.

Diseased Meat Traced

Portland officials, assisted by agents of the State Dairy and Food commission, last week traced the diseased pork offered to a Portland market to the ranch of a man named Bott, living on the Milwaukee road. Bott was arrested, and later was released on \$200 bonds. It is alleged that Bott sold to Portland markets other shipments of pork from animals that had died of hog cholera; aside from the half-ton shipment that led to his trouble.

...Additional... ...Locals...

W. W. Everhardt, mayor of Molalla, has announced himself a candidate for the republican nomination for county assessor. Mr. Everhardt is well known in the southeastern section of the county, and is very popular.

W. S. U'Ren, one of Oregon's most well known attorneys, was in the county seat early in the week. He says that the Oregonian has become accustomed to having him in the same building with it, and that the "tall tower" no longer trembles when he rides up in the elevator.

Fred McCausland has returned from a hunting trip up the Columbia, sloughs, and bagged about 34 ducks.

W. A. Walsh, who died recently in Estacada, was formerly publisher of the Polk County Itemizer, and was well known throughout the state.

Mr. and Mrs. C. K. Cooper, of Long Beach, Washington, have been the house guests of Mr. and Mrs. E. H. Cooper in the county seat.

Lee Eckerson, of Canby, was among the week's county seat callers. Mrs. S. F. Galbraith and her niece, Miss Alberta Dunn, have been visiting friends in Salem.

FIRE DAMAGE HEAVY

National Forests Injured by Carelessness of Neighbors

During the past fire season on the National Forests of Oregon and Washington, there were the usual number of fire trespass cases, but the Wenatchee National Forest in southern Washington took the prize for the number of convictions—seven in all. Four of the cases were the result of burning without a permit, and the other three were due to leaving camp fires burning.

In one case a fire was started in a slashing without a permit and got away from the men, covering over 60 acres and jumping across the Wenatchee River. The men were arrested, admitted their guilt, and were given the minimum fine and costs.

Of the camp fires left, the most serious of the three cases was that caused by a boy member of a surveying party. The boy was left alone for a while, and built a camp fire to get warm. When he left, he threw something over the fire to smother it, but as it was in rather deep humus, this was the worst thing he could do. In a day it had developed into a bad fire and burned over 40 acres. The boy's responsibility was shown, he was arrested, confessed, and was fined \$10 and costs.

The Courier has a full line of Legal Blanks for sale. If you are in need of Legal Blanks you will find that it will pay you to come to the Courier.

HINTS REGARDING WEEDS

Farm and Fireside Offers Suggestion For Curing Evil

"If you have a field, or part of a field, infested with mustard, quack grass, Canada thistle, or morning glory," says M. E. Woodbury in Farm and Fireside, "the best way to destroy these pests is to fallow the plot for a full year. Of course you will lose one crop, but this is better than to lose and keep on losing year after year. One of the first things to forget is that you can kill noxious weeds with a spring-tooth or disk harrow. There are but three effective tools for this game."

"Most important is the common hoe. Second is the old-fashioned two-horse cultivator, and in following we fasten the gangs together so as to cut about 24 to 30 inches wide. The third tool is the plow, which is useful to get the land in condition in the spring, but afterward it is too slow.
"When the land has been spring-plowed, cultivate east and west. Then keep on alternating every two weeks all summer, first cultivating north and south and then east and west.
"Work as late through the fall and into the winter as you can. Go over to kill all the weeds the cultivator has missed, and should there be any in the fence corners, ditches, or along the fence rows, destroy them with the hoe."

"The second year plant the land to corn. Cultivate thoroughly and follow with a hoe every two weeks. When the corn is too high to cultivate, keep on with the hoe and kill every weed that has grown. The third year plant the land to anything you choose. But you must still use the hoe and look the land over occasionally."

The Courier is \$1.00 per year.

TOO FINE FOR ESTACADA

South Fork Water Costs Too Much, Council of Eastern Town Decides

Estacada's city council, after deliberating on the question for some weeks, has finally concluded that the water rental demanded by the South Fork Water commission for a portion of the Oregon City pure mountain water supply is too great; and with regret the council has concluded that it will have to forego the pleasure of drinking from the same pipe as do Oregon City and West Linn. Estacada has it figured out that it would have to pay \$780 a year for South Fork water, and in addition make connections with the South Fork line that would cost in the neighborhood of \$1,500.

The Estacada council will not refer the matter to a vote of the people. It will confine its energies to improving the present water supply of the city, and will shortly call for bids for the construction of a settling tank and filter, and for extensions of the present service.
