DRAPER GIVEN DIVORCE TEMPORARY CUSTODY OF CHILD GIVEN WIFE

A decree of divorce was granted April 8, to Leon T. Draper from Lena Draper, the former to have permanent care of the child but the defendant to have the temporary custody until further order of the court, and \$20 per month alimony.

This case has attracted more than usual attention in this city as both parties are well known people here and after the complaint was filed against Mrs. Draper she denied all the allegations made by the plaintiff.

In his suit he alleges while he was in the service of the United States and in France defendant consorted with other men and was not a proper person to have the care of the child.

In answer to this complaint Mrs. Draper alleges all accusations are false and that the father of the plaintiff, J. W. Draper was the cause of the trouble and that if it was not for his interference she and Leon Draper would still be together and happy.

She claimed that her husband entered the service with her consent and she found it necessary to go to work to support herself and child. She left the child in the care of J. W. Draper and she alleges she was compelled to pay \$10 per month for its support while she was away working.

There was a mortgage on their home and this was held by J. W. Draper, who she alleges, insisted on payment when it was due and she borrowed the money to pay this.

She further claimed that J. W. Draper withheld the letters to her from her husband and she did not even know when he returned to Camp Lewis and that J. W. Draper took her child and went to meet the returned soldier.

LAND PLASTER

QUALITY REQUIRED AND TIME OF APPLICATION.

For clover or other forage plants and grasses apply 40 to 50 pounds to the acre.

Apply when growth begins in the spring, or half at that time and balance when there is a growth of a few inches. This will prevent young plants from burning out during the early summer.

On most soils it is very difficult to get a good stand of clover without the use of land plaster.

For winter wheat use 50 pounds to the acre, in the fall when the wheat is up, and the same amount again in the spring.
