substituted. Those who installed the new power plant, failed to put in an exhaust pipe and the consequence was that the editor and Mrs. Ecker, his assistant, were overcome by gas from the engine and were in a critical condition for a few hours. However, they were about recovered the next day and with a few adjustments to the gas engine, they were enabled to get the paper out on Saturday afternoon.

This is not protected from the mountain air as other outlying districts, and the people of that place have suffered terribly from the cold during the past few days.

The thermometer had not materially changed during Saturday evening, for at 6 o'clock it registered zero. It was expected to reach far below that before morning. The Molalla country is one of the most beautiful in the spring, summer and fall, but this winter has failed to keep up its good record.

Interesting Weather News from Macksburg

MACKSBURG, Dec. 17.—Of the experience that inspired our immortal Whittier to write his "Snowbound," we have had a generous share in the past week.

Moreover the circumstances had what would have been impossible with our revered bard in his New England home, i. e., the charm of novelty. Two feet of snow with a temperature of 20 below zero is no rarity on New England's rock bound coast, while in our Pacific temperate climate with an inch of snow and the mercury rarely reaching freezing point for the entire winter, the inclemency of the past week was a surprise to say the very least.

The charm of temporary isolation is only for the dwellers in homes that can boast frost-proof cellars stocked with provisions for many months and barns whose walls wholly proof against frost's intrusion, are well crowded with provender for the stock through more than half the year.

With these defenses against the trying, but it is over now, the daily rigorous cold, even the most provident of ranch dwellers in a temperate climate are but indifferent supplied, consequently this unexpected turn in nature's course has been undeniably round has resumed its wanted course. The preparations for the beloved and sacred festival so near at hand are well under way. The day will in all probability, be celebrated with added zest owing to the ordeal just past.

Pity for those suffering from coal shortage and the consequent disaster to the house plumbing will increase the gratitude for our unlimited fuel supply and for the protection of our flocks from the disastrous fate that has fallen upon live stock in other parts of our country.

On Monday, December 15, we received the first mail that has reached our place for nearly a week, and have learned therefrom that the storm's destruction has fallen more lightly upon our region than elsewhere.

The celestial promised to all who should have the courage to rise before the earliest ray of dawn has been denied us by the cloudy sky on some mornings and by the intense cold of others, but now on a clear morning it is visible.

The four planets, Jupiter, Venus, Saturn and Mars are all in vision in the morning.

Jupiter in wonderful brilliancy with his bluish-white lights, but outshone by his beautiful sister, Venus, in dazzling white, Saturn in pale yellow and Mars in war-like red, may all be seen without a telescope when it is clear.

The Mothers' club is to meet in the present week at the home of its secretary, Mrs. G. M. Baldwin.
