Green Christmas In the Country

Mackburg, Dec. 25.—For all the ordeal of cold and snow through which we passed in December 8 to 10, we may have to endure the pessimistic gloomy prediction concerning a "Green Christmas," with its gruesome sequence. But we can afford to listen to evil foreboding in the closing hours of happy 1919, the year of the great triumph of right over wrong, with the return of cherished members of our families whom we were expecting never to see again, with plenty in our store for the present and the bright promises of abundance in the coming year, for through all the bitter cold the Winter grain lay under a snowy covering that not only gave it security from frost but in melting is fertilizing the ground to a degree that will manifest itself in sturdier growth. The plenty that has been scattered over a smiling earth by an Omnipotent Hand is too cheering to admit of depression from foreboding of ill.

Prophecies of evil are welcome to all the satisfaction they may derive from telling us that the recent inclement weather is but a prelude to that which is coming to us in the early days of 1920, when in all probability the Winter grain will be destroyed for we never have two such protective blankets of snow in the same year; that Mexico is going to drag us into War with herself assisted by Germany and Japan—as if she and Germany had not had enough of war with the U. S.; that prices are never to return to normal level; for the pessimist is always well informed upon matters inscrutable to everyone else; that the melting of such masses of snow is sure to cause a flood that will wash away everything that the cold has left.

We know that our Overruling Providence has been too kind to us in the past to visit us with such wholesale calamity now.

The two feet of snow are melting so gradually there is no threatening rise in the streams apparent.

The stock are all out in the pastures, which are as green as before being hidden from view. The bridges over the Molalla and its branches are still holding their own except that the one leading from Mackburg to Canby has lost its roof from the weight of snow, but will soon be ready for use again.
