

THE FASHIONS

Fashion continues in ways of straight and unabated fullness. Skirts fall in soft, clinging folds, so much so that the tendency toward the narrower silhouette becomes very apparent, though we need not yet anticipate the very narrow skirt.

It is already rumored, however, that skirts for spring will be two and a half yards wide. But it is really looking a little too far ahead to be thinking of spring styles already. At present, skirts are still very ample. Box pleats and side pleats are very freely used, and this means that a good deal of material is used in a dress or skirt. The pleats hang in straight lines, generally unstitched, while in some cases they are stitched as far as the hips and below that point are pressed into position.

The gradual lengthening of skirts that has come with the vogue for straight lines is noticeable in many dresses; but women, on the whole, have not taken readily to the longer

skirts, and the short skirt for street costumes is still favored by a great many. A long street skirt is really not graceful in a tailored suit, and women are not willing to sacrifice becoming styles so readily.

In afternoon and evening dresses, however, the longer skirt is not at all ungraceful. Some afternoon and evening dresses show slight variations from the straight lines. The Turkish trouser effect and draped skirt come from Paris as a departure from the extremely straight hanging and clinging effects.

Full overskirts are also much used for evening, fashioned of soft silk voiles, tulle and lace. Black and white combinations occur very often in evening gowns. Black net worked up with white beads over a white satin foundation is one of the striking combinations used by an expert

French designer. A sash of black satin forms a wide girdle, which is weighted at the ends by heavy black and white bead tassels.

Bead Embroidery Very Prominent

Bead embroidery is a strong rival just now of the darned-stitch embroidery worked in silk and worsted. On white backgrounds, white and colored beads are used most effectively. The white chalk beads on dark satins and silks form very handsome trimmings. Beads of various colors arranged in designs to imitate the popular Paisley effect is one of the newest developments in bead work.

Other very attractive color combinations are also seen, such as dull blue, old rose and brown on light tan backgrounds.

Recent costumes from Paris also show that machine stitching is a very prominent form of trimming. Rows upon rows of stitching are used at the edges of coats and on collars and cuffs. The stitching is often done in silk of a darker shade than the material is used on, and sometimes in the same shade.

Pockets Still Persist

When we consider the traditional fickleness of fashion, it seems as though the life of the pocket has been very long, indeed; but the pocket still flourishes on suits, coats and dresses and shows not the slightest sign of becoming extinct. The latest development in this line is the long, loop-like pocket placed over the hips and standing away from the skirt. The smart afternoon dress of black satin shown in the sketch illustrates this type of pocket, also the new tie-on collar, which crosses in front and ties at the back, somewhat like the tie-on jumpers. The long loop pocket is usually made of a color which contrasts with the dress, or else it is of the same material, but its presence is emphasized by home trimming in bright silk embroidery or in beads. Or, if it is made of the same material, it is simply lined with a contrasting color.

The Pinched-Back Coat

Hip-length coats with the pinched effect at the back and a straight front are very smart for the serviceable suit for daily wear or for the sports suit. The back is belted with a rather wide belt stitched down over short pleats, which produces the pinched effect. With this type of coat the full box-pleated skirt makes an excellent costume. In manish mixtures and jersey cloth, these suits are worn for shopping, sports, and for practical use. The sketch illustrates one of these jaunty suits in bright green jersey cloth.

FAME IN A FEW WORDS.

Authors Who Are Now Known Only by a Single Work or Passage. Philip James Bailey wrote "Festus" when he was twenty-three and lived to be eighty-six without adding appreciably to his early laurels. His "Festus" was compared by enthusiastic admirers to the works of Shakespeare and Goethe. No one reads "Festus" now, but its memory survives in one familiar quotation, a one-time favorite for use in autograph albums: We live in deeds, not years; in thoughts, not breaths; in feelings, not in figures on a dial. We should count time by heart throbs. Life most lives. Who thinks most, feels the noblest, acts the best.

Bailey is very far from being the only author to live in men's minds by virtue of a single line, stanza or passage. It is a narrow margin by which to escape oblivion, but it serves. True, it is not the writer himself that is remembered, but as long as some spark from his brain still glimmers he is not totally dead. It may be a line from a song. "Meet me by moonlight alone" and "Don't you remember sweet Alice, Ben Bolt?" are repeated as catchwords by thousands who never heard of J. Augustus Wade or Thomas Dunn English. Very often, however, the lines that survive are of high literary value. Theodore O'Hara, soldier of fortune, wrote:

On fam'd eternal camping ground Their silent tents are spread, And glory guards with solemn round The bivouac of the dead. By these four lines he won for himself admission to the eternal camping ground of poetry. William Knox, a Scotch versifier (1789-1825), owes his fragmentary survival not so much to any great poetic merit in his mortuary couplets as to the indorsement of Abraham Lincoln, who loved to repeat: Oh, why should the spirit of mortal be proud? Like a fast flitting meteor, a fast flying cloud, A flash of the lightning, a break of the wave, He passes from life to rest in the grave. —Philadelphia Ledger.

THIS—And Five Cents

DON'T MISS THIS. Cut out this slip, enclose five cents to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for bronchial coughs, colds and croup; Foley Kidney Pills, for pain in sides and back, rheumatism, backache, kidney and bladder ailments, and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic, especially comforting to stout persons.—Jones Drug Co.

There were cut from the national forests in the fiscal year 1916, 604,920,000 board feet of timber. Of this amount, 119,483,000 board feet was cut under free use privilege by 42,055 individuals. In all, 10,8440 sales of timber were made, of which 97 per cent were under \$100 in value, indicating the extent to which the homesteader, rancher, miner, small millman and others in need of a limited quantity of timber draw upon the forests.

NAVAL DISASTERS

Their Rarity Is a Tribute to the Skill of Our Seamen.

THE WRECK OF THE SAGINAW.

This Catastrophe Brought Into Play the Wonderful Ability and Energy of Commander Sicard and His Officers and Crew—An Epic of the Sea.

American naval officers are noted for their efficiency, fearlessness and energy not alone in the stress and turmoil of war, but also when emergencies arise where a battle with the elements may be more perilous than would be the heaviest big gun fire of an enemy.

Maritime disasters happily have been rare in our naval history. Their rarity, indeed speaks volumes for the skill of our navigators, to whom negligence or incompetence has hardly ever been imputed. At most an overcautiousness may be urged in one or two instances; but generally speaking, our naval vessels have been caused by violent convulsions of nature in her angriest mood or from causes over which our naval commanders had no control.

In the latter class was the wreck of the United States steamship Saginaw on Ocean Island in the north Pacific Oct. 29, 1870. This disaster was due to faulty charts that did not show the existence of an outlying reef upon which the vessel piled up in the darkness of the night. Through the energy and good seamanship of its commanding officer, Lieutenant Commander Montgomery Sicard, who realized at once that his ship was a total loss, every soul was safely landed, together with such stores and provisions as the time permitted which elapsed between the accident and the ship's breaking up.

Without delay he organized a camp on shore, establishing and enforcing the strictest rules, for upon them depended the lives of all concerned. He managed to secure a boiler from the wreck, and he converted it into a distiller, thus obtaining a constant supply of fresh water for drinking. It is difficult to imagine the sufferings those poor fellows would otherwise have undergone, since there was no potable water on the island.

Recognizing the fact that his party might be detained many weeks, if not months, and that Ocean Island was a breeding ground for sea fowls, he at once drew a line around his camp and forbade any one crossing it without authority, lest the birds be scared away and the only source of food disappear with them.

Raids for obtaining eggs and fowls were stealthily carried out at night under specific orders by selected and carefully instructed men. In this manner, reflecting great credit on Sicard's forethought, there was never any lack of food, such as it was.

Since the scene of the disaster was a thousand miles removed from the ordinary path of vessels traversing the Pacific, little or no hope could be entertained of casual rescue. In some way or other word had to go to the outside world. One of the Saginaw's boats, prepared for this perilous service, was dispatched under Lieutenant John G. Talbot, with four seamen, to the Hawaiian Islands, some 1,500 miles away across a wintry ocean. Upon this slender thread hung the salvation of a hundred and more men.

The difficulties, storms and dangers encountered, the hardships and sufferings endured, make this trip of these gallant sailors one of the finest among the countless epics of the sea. Terribly exhausted by privation and the ceaseless struggle against old ocean's fury, their ears all lost in a heavy gale of wind, the boat pushed on under sail, only to be capsized by the surf in landing on the beach of the island of Kauai.

It is related that Talbot sighted the very last outlying rocky islet of the Hawaiian group, fortunately recognized by one of his crew, and from there beat up against the trade wind to Kauai. Had he missed this islet, no more, in all probability, would ever have been heard of him, and it is equally likely that his shipmates on Ocean Island might not all have survived until success should crown a second attempt to communicate with civilization.

In the overturning of the boat four of its occupants were drowned, the brave Talbot among the number. Happily one seaman got ashore, more than half dead, to bring Sicard's dispatches to the American minister to the Sandwich Islands, who at once chartered a steamer and sailed the same day to the relief of the marooned ship's company of the Saginaw. Except for the sad ending to Talbot's mission, this wreck, however unfortunate in itself, is a splendid example of the resourcefulness and skill of the American naval officer and so may be regarded with vastly more pride than regret.—Rear Admiral Caspar F. Goodrich in Philadelphia Ledger.

Odd Name Oddly Won.

The inn known as the "Same Yet," at Prestwick, has a curious history which Mr. Hackwood relates: "The house originally bore the 'Seven Stars,' but many years ago it became necessary to have its faded sign repainted. When the painter asked the landlord what he was to put on the board he received the answer, 'The same yet.' And the man took him at his word."—London News.

Have the courage to appear poor and you disarm poverty of its sharpest sting.—Mrs. Jameson.

Smoker for Tonight

The second smoker of the new Falls City Athletic club will be held at the Masonic temple this evening, and several interesting bouts are scheduled. A comedy curtain raiser between Bill Madocce and "Cap" O'Donnell will precede bouts between Fredericks and Lough, "Kid" Irish and Carl Schultz, and Ben Borden and Joe Sylvester. The main event on the card is an encounter between Shell McCoole of Portland and Carl Martin of Oregon City.

MURDERER IS BURIED

Toni Cerboni Unattended as Remains are Buried in Potter's Field

Without benefit of clergy, without friends, without flowers and without the sympathy that goes out from the ordinary mortal who passes on from this tearful vale, Toni Cerboni, Italian murderer of Sam Sacchetti at Mayberry station on Sunday, December 3, was lowered into a narrow grave in a corner of the potter's field at Mountain View cemetery on Tuesday.

Toni's sad life was ended last week when his almost lifeless body was found hanging by the neck from the bars in a cell in the county jail, held up by a suspender strap cut from overalls. All efforts to revive the spark of life in the Italian's body failed. Italian friends in Portland, men who had retained counsel to defend Cerboni against the charges of second degree murder, placed against him following his willing confession of the killing, deserted the murderer at the last and his only attendant at the grave was the undertaker's assistant, who lowered the simple fir casket into its resting place.

The power of mind over matter was the cause of Toni's death. In spite of all his sympathizers could say to him, Toni was convinced that he would be hung. He was so certain of this that even an Italian priest who visited him could not change his mind. Though the state did not and could not hang the man he was hung just the same, although by his own hand. Cerboni was a native of Naples, Italy, aged 38 years, and had been in America 14 years. During the past five years he had labored in Portland and in Clackamas county.

GETTING A HOMESTEAD.

How Government Land Open to Settlers May Be Acquired.

Prospective homesteaders are compelled by the federal government to take oath that they have informed themselves of the character and quality of the lands they desire to enter. Ordinarily the law limits homestead entries to 160 acres, but this may be slightly exceeded under some circumstances. Settlement is initiated through the personal act of the settler in placing improvements upon the land or establishing residence thereon.

Those prohibited from homestead entries are persons who have already made entries, except under special conditions—foreign born who have not declared their intentions to become naturalized; those owning more than 160 acres in the United States and, in general, persons under twenty-one who are not heads of families. A person serving in the army or the navy may make a homestead entry if some other member of his family is residing on the land applied for.

Homestead entries are made by presenting to the land office of the district in which the lands are situated an application properly prepared on the prescribed blank forms, which must be executed not more than ten days before its filing. Residence must be established upon the tract within six months after the date of entry, unless an extension of time is allowed, and must be maintained for three years, although absence for a portion or portions of each year is allowable for not more than two periods, aggregating as much as five months, upon proper notice to the land office of departure and return. Cultivation of the land is required for three years. During the second year not less than one-sixteenth of the area must be actually cultivated, which increases afterward until final proof to one-eighth.

There are at present more than 254,000,000 acres of unappropriated and unreserved lands in the United States subject to entry, exclusive of the territory of Alaska, which has 15,000,000 acres.—Thomas F. Logan in Leslie's.

MAKE QUICK DECISIONS.

Wrong to Waste Valuable Time Over Trifling Problems.

There are some folks in this world who never appear to be able to come to a decision on any issue, either big or little. They are constantly harassed by doubt and the fear that they will make the mistake of picking up something by the wrong handle. They spend their lives sitting astride the fence because they lack the courage to get down on either side of it. They strive to propitiate everybody and please nobody.

What more pathetic spectacle than to see a strapping big man chasing back and forth between the hat counter and the mirror on the wall in the agony of doubt and despair over the momentous question as to whether he ought to purchase a straw lid with a red band on it or blue?

Sympathy goes out to the woman who for weeks perplexes her pretty head over the problems as to whether she will have her new gown cut obliquely or on the bias. In the end she has it cut scalloped, and every time she wears it her regret is that she didn't have it made severely plain.

If your processes of decision are going to halt and buck and stall over the color of a handkerchief or the cut of a gown how can you hope to decide the really serious problems of life? Blessed is he who can marshal his wits in calm judgment, then decide whether he will stay on this side or cross over and burn the bridge behind him.

Rather than dilly-dally and shilly-shally through life, you had better, in the interests of strengthening your moral fiber, make a mistake by a quick decision now and then. Focus the best judgment of which you are capable on the question at issue, then take your stand and hold your ground.—Boston Post.

NEW YEAR GREETED

Mr. MacCallum Suggests Capitalizing Failure to Build Success

The new year was welcomed with enthusiasm Sunday at the Congregational church. The Rev. Mr. MacCallum

Values to \$1.25 in 27-Inch Flouncings, to close at 49c

Fine Batiste Flouncings in dainty patterns, with ruffled, hemstitched or scalloped edge.

Also in open-work and raised designs for dresses.

lum found in Paul's resolve to "forget the past and make the future a prize to be sought," inspiration for new year's resolutions. Pleading for more reverence for the Sabbath, he insisted that there was a line straight as a shaft of light from sabbath desecration to the increasing story of juvenile delinquency and unpunished crimes of the past few weeks. Real joy, he declared, lay along the path of ever increasing service in behalf of men.

The evening service was especially for the young people. A live song service preceded a sermon on "The Success of Failure and the Failure of Success." A man is a failure who, when he has failed cannot capitalize upon it, while success is the result of will and ability to convert failure into victory, Mr. MacCallum said.

Next Sunday at 11 a. m., the baptism and reception of members will be followed by the communion of the Lord's supper. "A Gospel of Comfort," will be the subject of the evening sermon, to follow another song service.

ROAD COST IS HIGH

Commonwealth Conference Would Prepare New State Highway Code

In 1915 Oregon spent the equivalent of \$9.19 on roads for every man, woman and child in the state. Montana alone spent more, \$9.77. Washington spent only \$5.84, more than one-third less than this state. Even California, with her marvelous highway system, spent only \$8.73. All of the \$6,183,000 was spent on Oregon roads in that one year. The figures are on the authority of circular No. 63 of the United States department of agriculture.

To get a highway code that will make more nearly possible a dollar's worth of road for each dollar spent is the purpose of the eighth annual Commonwealth conference of the University of Oregon, which is in session at Portland.

As a basis for the proposed legislation, a road-code drafted by the federal office of public roads will be presented. The Oregon association of county judges and commissioners requested last September that this code be prepared, and Rufus C. Holman, president of the association, will read it. The government men who framed it had at hand full data of Oregon laws and Oregon conditions. Two of the five sessions of the conference will be taken up with this tentative draft.

"It is in connection with road maintenance that Oregon's needs are most vital," said F. G. Young, professor of sociology at the state university and director of the conference. "No state provision and little provision in any county has yet been made for regular maintenance, but the securing of nearly \$3,000,000 from the government for roads in the next five years is conditioned upon satisfactory maintenance in Oregon."

SAYS "IRON" NEEDED

Paving Superintendent Wants to Quit if Court Won't Help Him

Charging that the county court and roadmaster forced him to lay the Worwick hard surface over grades improperly prepared, Harry Wors-

wick, superintendent of paving operations here last summer, threatened late last week to have nothing further to do with county paving operations if the court did not repair the Oregon City-Parkplace road.

Mr. Worswick claims that he laid his surface over grades that were not in proper shape and he says this is responsible for the fact that large puddles of water collect on the Parkplace road. Standing water will seep into the surface, Mr. Worswick says, and the pavement will rapidly disintegrate. The base was made without the usual crown to provide the proper drainage, Mr. Worswick says, and if the surface fails it should not be considered a fault of material conditions or workmanship.

The condition has aroused the county court to action and Judge Anderson said Friday that workmen would probably be sent to the road to "iron" it out. The ironing process cuts little ditches in the surface, permitting the puddles to drain. Mr. Worswick says the crowds on other roads surfaced last summer are sufficiently high to drain.

Obituaries

J. E. Smith

Tuberculosis was the cause of the death at the Oregon City hospital of Arthur Cady, aged 65, known here as J. E. Smith. Mr. Cady has been an employee of the local paper mills for a number of years and none of the members of his family is known to friends here. Until he died, Mr. Cady refused to tell the names of his kin. It is thought he had sisters living in Chicago and brothers else-

Complaint Filed Again

Annie Bzozoski last Thursday filed a divorce complaint against Saimon Bzozoski for the second time. A similar suit was dismissed a few weeks ago because Mrs. Bzozoski had not lived in this state a sufficient length of time. She alleges cruelty, says that her husband throttled her, that he induced her to spend her life's savings foolishly, and that he deserted her, leaving her destitute with two minor children. They were married at Hoquiam, Wash., June 15, 1915. Mrs. Bzozoski asks the restoration of her maiden name, Annie Hudock, \$350 permanent alimony and \$20 monthly. Judge Campbell Thursday ordered the husband to pay immediately \$100 for expenses of the action.

Marriage Licenses

Four marriage licenses were issued here last Thursday by County Clerk Iva Harrington. Those who are taking the matrimonial venture are: Muriel C. Seward and Roy L. White, Aurora; Lela B. Smith and Ellis E. Brown, New Era; Mabel C. Davis and Peter J. Schoppert, of Dolph, and Madeline Elizabeth Depew and Ernest Herbert Helmer, of Salem.

Notice

Bids will be received by the undersigned to operate the Beaver Creek Telephone Exchange for one year. E. H. SMITH, Sec'y, Oregon City, Route 3.

Found Way to Health Without Using Knife

Doctor Recommended Operation for Gall Stone Trouble but Mother Objected

MRS. MARY A. FERREE

In her work as an evangelist in the mountain districts of West Virginia, Mrs. Mary A. Ferree, who lives at 1964 Madison Ave., Huntington, W. V., was frequently called on to relieve suffering among her charges and became familiar with the practical value of remedies easily available. When her daughter became ill and the doctor finally said that the trouble was gall stones and that an operation was necessary, Mrs. Ferree would not consent. In a letter to the Pinus laboratories she says, "After four doctors had treated my daughter, and we had tried various remedies without avail, I heard of Fruitola and Traxo and tried it as a last resort. The first dose brought immediate relief and after using three bottles of testimony may be the means of helping others to health."

Fruitola and Traxo are compounded from the original Edsall formulas at the Pinus laboratories in Monticello, Ill., and can be purchased in Oregon City, Portland, Canby and Hubbard at the Huntley Bros. Co.'s drug stores; a doctor's prescription is not necessary. Fruitola is a pure fruit oil that acts as an intestinal lubricant and disintegrates the hardened particles that cause so much suffering, discharging the accumulated waste to the sufferer's intense relief. One dose is usually sufficient to indicate its efficacy. Traxo is a tonic-alternative that is most effective to rebuild and restore the weakened rundown system.

A booklet of special interest to those who suffer from stomach trouble can be obtained by writing to the Pinus Laboratories, Monticello, Ill.

Chronic Catarrh is Curable

Nothing is more distressing to the sufferer and his friends. Chronic catarrh is systemic—that is, it is present throughout the body, though it may manifest itself in a local ulceration. Only a constitutional treatment will overcome systemic catarrh. Local treatments sometimes help the acute manifestations, but they cannot overcome the systemic disorder.

PERUNA Has Helped Thousands

It is a foe to catarrh. The voluntary testimony of thousands establishes that. Peruna benefits in a number of ways. Peruna builds up the digestion, restores the strength, and helps put the system in condition.

Peruna has special value in catarrh. It gives vitality to the system, restores tone to the membranes and enables these to perform their functions. In many cases the benefits begin at once, and it rarely fails when treatment is continued properly.

The Peruna Medical Department will be glad to assist you to overcome this disease. The doctor's advice is free. Don't delay treatment. **THE PERUNA CO., Columbus, O.**
