MR. CALAVAN AT SALEM

Hears Mr. Churchill Advocate County Unit Plan for Schools

J. E. Calavan, county school superintendent, is at Salem, where he has been grading teachers' examination papers for the past week. Mr. Calavan reports much interest taken in the address to a gathering of superintendents, made by J. A. Churchill, state superintendent of public instruction, on Wednesday. Mr. Churchill spoke favorably of the plan of county unit schools, and suggested that legislation with this plan as its basis would be proposed at the coming session.

The plan is to centralize the authority over all the schools in a county, excepting those in districts of the first class. Each county adopting the plan would be divided into five districts. Each district would elect a member of the county school board. This board of five members would appoint a county school superintendent, who would be the practical educational and business head of the schools in the county.

The county school superintendent would nominate the teachers for all the schools. He would place the teachers where they could do the best work. The taxes for the schools would be levied on a county unit basis.

Where the county unit has been adopted, Mr. Churchill said, great benefit has resulted, particularly to the rural schools, as a trained county superintendent, with proper authority, is more able to establish and maintain an efficient school than are the average rural school directors.

FARMERS GATHER

Clackamas County Soil Tillers Among Those Visiting O. A. C.

A considerable number of Clackamas county people are included in the 900 who have registered at the Oregon Agricultural college this week for the farmers' week ceremonies and studies. Several farmers' clubs and societies are meeting in connection with the other work being carried on at the college, and this fact has drawn several from this county. Important subjects from the farmers' point of view are occupying the entire attention during the week.

More than 200 women are attending the home-makers' conference. A plan for home study clubs in household economics is being developed. "The purpose of farmers' week is to help in the solution of state problems," said Director R. D. Hetzel, of the extension service. "The main purpose of these sessions is to give visitors a clear understanding so that their determination to get at the solutions of problems affecting their business may be strengthened."

The announcement was made that a special rate for hauling agricultural lime has been pledged by the Southern Pacific Railroad company. This will be lower than any rate ever before granted on western commodities. A bill has been framed to be presented to the state legislature calling for an appropriation of \$50,000 for the establishment of a state-

MINES INCREASED OUTPUT

Survey Made by Geological Experts
Places Gold Value at \$1,861,796

Preliminary estimates of the production of metals from Oregon mines in 1916, by the United States geological survey, department of the interior, show increases over 1915 for gold, silver and copper, and a decrease for lead. The output of gold in 1915 was \$1,861,796 and the estimated output for 1916 is \$1,900,000, an increase of \$38,000. The output of silver in 1915 was 117,947 ounces, and the estimated output in 1916 is 227,500 ounces, or 109,550 ounces more. The output of copper in 1915 was 451,172 pounds, and the estimated output in 1916 is 2,527,000 pounds, an increase for 1916 of 2,076,000 pounds, and the output of lead in 1915 was 62,957 pounds, as compared with 22,000 pounds in 1916, or 41,000 pounds less. These preliminary figures are compiled by Charles G. Yale, of the San Francisco office of the geological survey.

The increase in gold is merely nominal, but that of silver has about doubled. The most notable increase is in the quantity of copper, an increase caused by the incentive offered by high prices.

There are less than a hundred productive metal mines in Oregon, and the number of placers is about double that of the deep mines. However, two-thirds of the gold output and virtually all that of the other metals, is derived from deep mines. No very productive new properties have been opened during the year. The entire output of the deep mines is derived from less than 160,000 tons of ore, having an average value of about \$9 a ton. Baker is still the most productive county in the state, yielding annually nearly 90 per cent of all the gold. The Cornucopia and the Baker mines, in the Cornucopia district, Baker county, are the most productive deep mines in Oregon. Other large deep mines in Oregon are those of the Commercial Mining Co. (Rainbow mine) at Rye Valley, in the Mormon Basin district; of the Columbia Gold Mines Co. at Sumpter, Cracker Creek district; and of the Homestead-Iron Dyke property at Copperfield, Iron Dyke district.

Obituaries

Miss Anna Frances Dreblow

The funeral of Miss Anna Frances Dreblow of Riverside, Cal., who died at the home of her sister, Mrs. Carl Juhnke, on Monday, was held from the Holman chapel here this afternoon. Interment was in Mountain View and the Rev. J. R. Landsborough, Presbyterian, officiated. Miss Dreblow was 44 years old and was a native of Blue Earth, Minn. She had made her home with her sister for the past six months. Several sisters and brothers survive her.

Mrs. Martha Vohs

Mrs. Martha Vohs of Highland, wife of Edward Vohs, died at the Good Samaritan hospital Saturday morning, December 30. Mrs. Vohs had been for nearly two months in the Oregon City hospital under the care of Drs. Mount. On Wednesday she was moved to Portland, where she died. Mrs. Vohs, who was 21 years old, is survived by her husband; a baby boy, Charles Edward; her parents, Mr. and Mrs. Joseph Fellows; two brothers, Hiram and Stephen Fellows, of Highland, and one sister, Mrs. Amanda Creason of Portland.

Mrs. John B. Jackson

Mrs. John B. Jackson, after an illness of several weeks, died at the family home at Clairmont on Tuesday morning. Mrs. Jackson was a native of Clackamas county, was born at Molalla on December 17, 1865, and 35 years ago married John B. Jackson at Molalla. She was a daughter of Mr. and Mrs. Henry Samson, Clackamas county pioneers. The family has lived at Clairmont for 20 years. Mrs. Jackson, before her marriage, was a school teacher in this county. Funeral services were held this afternoon, the Rev. T. J. Williams officiating, and interment was in Mountain View. Those who survive Mrs. Jackson are her husband; four daughters, Mrs. Edward Rechner of Camas, Wash., Mrs. J. H. Settlemier of Portland, Mrs. Letha Jackson O'Brien of Portland and Miss Ollis Jackson of Oregon City; the following sisters, who live in this county: Mrs. Charles Spangler, Mrs. Albert Hardesty and Miss Charlotte Samson and one brother, Marion Samson.

Judge Attends Meeting

County Judge H. S. Anderson was in Salem Friday to attend a meeting of the committee appointed at the recent convention of county judges and commissioners at Portland to devise plans for lessening the danger at unprotected grade crossings. The committee, says Judge Anderson, worked out a plan to eliminate much of the danger, and will make recommendations for special legislation along this line at the coming session.

Demurrer Overruled

Judge Campbell last Thursday overruled a demurrer in the case of J. W. Hobart against County Clerk Iva Harrington brought to enjoin Miss Harrington from officially recognizing a 10-mill special road levy voted in a district near Marquam. Attorneys for the county have been allowed two days in which to file answer to the complaint.

Card of Thanks

We desire to thank the friends and singers for their kind services and sympathy during our sad bereavement.

RALPH BOYER,
E. R. BOYER and Wife.

AN OLD TIME FARM

And the Methods That Were in Use In the Year 1840.

DAYS OF THE SIMPLE LIFE.

When All Kinds of Clothing Were Made at Home, When Eggs Sold For a Shilling a Dozen and the High Cost of Living Was Not a Big Problem.

In view of the modern day high cost of living and of the many wonderful advances made in the last century—the railroad, telegraph, the ocean cable, the telephone, the automobile and farm and labor saving machinery of all kinds and the amazing changes these inventions have necessarily wrought in all directions in almost every walk of life—it may be of interest to recall living conditions on a farm in the year 1840.

The farm I have in mind consisted of 200 acres. The stock was fifteen cows, a yoke of oxen, twenty sheep, an old white horse, a dozen pigs, fifty fens, ten geese, a few ducks and a dock of turkeys.

The farm produced practically everything the family consumed, both clothing and food. The sheep furnished the wool, which was carded at a "fulling" mill and made into rolls for spinning.

At home it was spun into yarn and woven on a hand loom. For beds it was left white; for clothing it was dyed any color desired. A competent housewife could make dyes of logwood, indigo or cochineal. The white and black wool were mixed to produce a gray like the Confederate uniform.

There were no ready made clothes; all clothes were made in the home. There was no woven underwear. Stockings were knitted at home as well as mittens and tippets. Caps with ear flaps were of rabbit skin. There were no shoes. In the winter boots came up to the knees.

Several cows were killed each year. There was a tannery near by, where the skins were tanned. A shoemaker made our boots. They were usually too small and gave much trouble and pain.

The flax, cut and laid down until the fiber loosened from the woody part, was put through a heckle worked by hand and then spun and woven. This strong linen cloth was used for summer clothing, towels, etc. The seed was saved to make flaxseed tea (a medicine) or poultice for bruises.

For food we had everything needed—fresh meat, potatoes, beets, cabbages, parsnips, pumpkins for pies, apples, which lasted from fall to spring, elder, which gave us vinegar or produced a cider champagne.

Half a dozen pigs killed in the fall gave us plenty of ham and bacon, lard, sausages and salt pork. The hams and bacon were hung up in the smokehouse, a small building with no opening except the door. A small fire produced more smoke than heat, but gave the hams and bacon a very delicious flavor.

There were plenty of chickens for roasting and potpies and eggs, turkeys for Thanksgiving and Christmas, occasionally a roast goose with apple sauce.

From the cows' milk we made both butter and cheese. What butter and cheese the family did not consume was sold in a nearby village. Butter usually brought 12½ cents a pound. Cheese was also made at home, as there were neither creameries nor cheese factories. Cheese was sold at 5 to 6 cents a pound. All eggs not used went to the village store and brought 10 cents to 12 cents a dozen.

Every farmer made his own soap. It was called soft soap. It was soft, but very strong, and took the dirt off your hands and face very thoroughly and some skin also unless you were careful in your ablutions.

Little was heard of the world at large. Twenty miles from the railroad the great four horse stagecoach came every day, bringing the mails. There were few newspapers or magazines. The telegraph was unknown. The Atlantic cable did not succeed until 1866. There were only twenty-three miles of railroad in 1830.

All the wonderful agencies which have added to the power of man in the last century will not be lost, but will be added to constantly. The many problems of the modern day high cost of living can only be solved by time and the efforts of our greatest minds.—Warner Miller in New York Times.

How Indigo Is Produced.

A primitive but effective method of obtaining indigo in southern India is practiced by the natives. The plant is tightly packed the day it is cut, in a large vat, into which water is run, and boards are then placed over the top and are kept in position by heavy crossbeams. The plant is allowed to soak for ten or twelve hours, during which time a heavy fermentation takes place. The liquid is then drained off into another vat, after which coolies beat and stir the soaked mass thoroughly with dails until the dye begins to emerge. The whole is then allowed to settle. The clear liquid is drained off, and the residue is boiled in copper vessels. It is then pressed into hard cakes ready for the market.

A Cool Soldier.

A French grenadier who was exasperated at some injustice that had been done him by a field marshal pointed his pistol at the marshal and pulled the trigger, but it did not go off. Without moving a muscle the veteran cried, "Four days in the cells for keeping your arms in a bad state!"

Hair is not to be mentioned in a bald man's house.—Livonian Proverb.

Card of Thanks

We wish to extend our heartfelt thanks to the friends and neighbors who helped us so kindly in our recent bereavement.

Further Time Allowed

James West, formerly an instructor in the Oregon City high school, and now suing the city school board for breach of contract and for the wages he would have earned had that contract been continued, has been allowed 20 days in which to file a transcript of appeal in the supreme court. The action was decided against Mr. West in the circuit court.

Will Probated

A. J. Brown Tuesday filed the will of Adeline Brown for probate. Mrs. Brown died near Barton on December 30 last and left an estate valued at \$5655, consisting of real and personal property. There are six heirs, all living at Conesus, N. Y., with the exception of Mr. Brown. Mr. Brown asks for testamentary papers.

Derthick Club Meets

The regular meeting of the Derthick club is to be held tomorrow afternoon at the home of Mrs. J. W. Moffat at West Linn. Mrs. Moffat and Miss Morieta Hickman will be hostesses and have arranged for a delightful afternoon for the club.

Judgment of \$3000

A judgment in the sum of \$3000, with 6 per cent interest, was found in favor of Caspar Junker against George A. Wolf, one of the defendants in the suit of Junker versus Irwin L. Garver and wife, et al. The decree was signed yesterday by Judge Campbell.

Balsiger Gets Judgment

A judgment order was signed by Judge Campbell on Tuesday, awarding E. R. Balsiger \$386.94, with interest at 7 per cent from December 27 last, in his suit against Walter E. and Beatrice E. Marion, et al.

Appeal is Taken

An appeal from the justice court decision in the case of O. P. Callif against Christ Johnson and Ed Burnett, whereby the former got judgment against Johnson and Burnett for \$75.46 on a bill of \$82.74, was filed in the circuit court last Thursday.

The national forests of Oregon and Washington are being protected, not only from fire, but from the ravages of insects. Occasionally bark beetles become so destructive on certain areas that the infested timber must be promptly cut and burned to prevent further damage to valuable timber.

The work of classifying and opening to homestead entry such lands in the national forests as are chiefly valuable for agriculture is progressing rapidly. Already over seventy million acres have been covered by field examinations and the final reports acted upon.

Marriage License

County Clerk Iva Harrington Tuesday issued a marriage license to Louise Huriaux and Alfred Larson, 226½ Morrison street, Portland.

Investigations by the Forest Pro-

Demurrer Sustained

In the case of Kate Buchanan Chance against Robert B. Graham Judge Campbell last Thursday sustained a demurrer to the complaint and allowed Mrs. Chance ten days in which to plead.

Judgment for Graham

Orton A. Graham secured a judgment and decree from Judge Campbell last Thursday against B. J. Stitson, declaring a lease to Butteville property void and enjoining Stitson from further use of the property.

Marriage License

County Clerk Iva Harrington Friday issued a marriage license to Louise A. Trueb and Thomas T. Grigsby, of 1226 Concord street, Portland.

R. L. Holman, Leading Undertaker, Fifth and Main St.; Telephones: Pacific 415-J; Home B-18.

ducts laboratory, at Madison, Wis., have resulted in the use of spent tan-bark in the manufacture of asphalt shingles to the extent of 160 tons per week. The value of the bark has been thereby increased from 60 cents to \$2.50 per ton.
