

A CITY OF SILENCE.

Conditions That Make Santa Cruz de la Sierra Noisiless.

Amid gusts of Scotch mist and under heavy skies we drifted hither into a sand paved, silent, tropical city street, past rows of languid stores, and on the last afternoon of the year, with Cochabamba (a town in the center of Bolivia) 335 miles behind us, we sat down dripping and sunburned in the central plaza of Santa Cruz de la Sierra.

The capital of all the vast tropical department of eastern Bolivia owes its fame largely to its isolation. Far away one hears much of it; once there, he finds little. Like the eminent men of many secluded corners of South America, it is important only through the exceeding unimportance of its neighbors.

It is a city of silence. Not only its bare feet, but its primitive ex-curtains make not a sound in the sand streets. There is no industry to add its strident voice, and every street fades away at each end into the trackless, whispering, jungled montana.

In this rainy season, which begins in earnest with the new year and lasts through April, it had many muddy pools and ponds, along the edges of some of which the streets crawled by on long heaps of the skulls of cattle, bleached snow white by the sun.

The larger ponds were almost lakes and carried the mind back to Kandy, Ceylon. Frequently the streets were flooded deep for an hour or more until the thirsty sand had drunk up the tropical deluge. For these eventualities the town has a system of its own. At every street corner four rows of weather blackened piles protrude a foot or more above the sand, and along these stepping stones the shod minority passes from one roofed sidewalk to another.

The houses invariably consist of a large room, by day opening directly on the porch sidewalk, though the best of them are rather bare in appearance, despite a small forest of frail cane chairs, black in color, as the best provided Cruces family is not rich by our standards.—Henry A. Frank, in Century Magazine.

RAGAMUFFIN ABYSSINIA.

Its Despotism Descend From Menelik, Son of Solomon.

Abyssinia is the Ethiopia of the Bible, and it is almost unchanged since the birth of civilization. The line of despots that rule Abyssinia today are the lineal descendants of Menelik, the son of the queen of Sheba and King Solomon. They seem to have inherited very little of the well known wisdom of their famous sire, however, for Abyssinia is today the unregenerate ragamuffin among nations—and also the picturesque remnant of the world's oldest civilization.

For Abyssinia, surrounded by tropical wilderness and without a seaport, is a country apart from the modern world—a country of turbaned and sandaled men, of veiled women wearing silver anklets, of mighty hunters who still take their game with leopards and hawks as in Biblical days; a land where gentlemen live by plunder and monks by alms and a man has as many wives as he can buy or steal.

Abyssinia is a fortress of antiquity, defying the world by its sheer physical impenetrability. But a few degrees from the equator, it is a great mass of igneous mountain ranges flung down upon a tropical plain. Lower Abyssinia is burning desert and fever ridden jungle. The interior is healthy upland cut by great gorges, many of which are wholly impassable. In the midst of this wilderness is Lake Tsana, forty-seven miles long and more than 5,000 feet above sea level. It is the source of the Blue Nile.—Exchange.

Electricity In the White House.

The White House is said to have the most intricate and complete electrical system installed in any building in this country. There are in the mansion nearly 170 miles of wires providing for 3,000 incandescent lights, a bell system, a private telephone system for the president and his family exclusively, burglar alarms, fire alarms and a power system which supplies current to ventilating fans and an automatic elevator.

Niagara by Electric Light.

Generally speaking, it is hard to improve on nature, but those who have seen Niagara falls lighted at night by electricity are agreed that the effect is far more impressive and beautiful than anything that daylight affords. The lights are of more than a hundred million candle power.—Youth's Companion.

The P. P.

"I put my faith in the wisdom of the plain people," said the statesman.

"Yes," replied Senator Sorghum. "The wisdom of the plain people is all right. The only thing I fear is that some of them are getting so that they know too much."—Washington Star.

Small Comfort.

"Never despair. Somewhere beyond the clouds the sun is shining."

"Yes, and somewhere below the sea there's a solid bottom. But that doesn't help a man when he falls overboard."—Baltimore American.

Smart Girl.

Teacher—Now, Nellie, would it be proper to say, "I can't learn you nothing?" Nellie—Yes, mum. Teacher—Why? Nellie—"Cause you can't."—London Telegraph.

His Job.

"It takes two to make a bargain."

"Yes; my wife and the storekeeper. But I'm paying the bills single handed."—Detroit Free Press.

It is pointed out by various papers throughout the state, says the Gold Beach Reporter, that at the recent election, Ben W. Olcott, for secretary of state, received about 20,000 more votes than were ever before received by any candidate for office in this state. Wait till the next gubernatorial election and it will be seen that Ben W. Olcott for governor will receive more votes for governor than even Ben W. Olcott for secretary of state received.—Coquille Sentinel.

The Courier—\$1.00 per year.

A BIG NAVAL EVENT

Launching of the First Warship of Our Young Nation.

SHE WAS THE UNITED STATES

It Was a Great Day in Philadelphia When Our First Naval Vessel Built Under the Constitution Slid Into the Water on May 10, 1797.

In the long list of splendid vessels which in a hundred combats have maintained the honor of our national flag the United States stands at the head. After three years of unavoidable detention the first naval vessel built by the United States under the constitution was to be committed to the waves. The day chosen for so great an event in our history was May 10, 1797. The hour for the launching was set for 1 in the afternoon, and the whole city of Philadelphia, it is said, went down to Southwark to behold such a rare show.

One estimate puts the number present at the launching at 30,000 souls. A goodly number for that period. Another authority declares that an hour after the launching took place the streets of Philadelphia near the river front were still choked with people going home.

It was feared that a strong northwest wind, which for several days had kept back the tides of the river, would make the waters of the Delaware much too shallow to permit the launching. Yet at sunrise on the morning of the 10th the best points of observation began to be occupied by an eager throng.

By noon every hilltop and every housetop commanding a view on each side of the river and every inch of space on the stands put up about the vessel and before the houses on Swanston street was covered with human beings. In the river a hundred craft rode at anchor, gay with bunting and richly dressed dames. At 1 precisely the blocks were knocked from under her, the lashing of the cable cut and amidst the shouts of the great multitude the United States slid gracefully down her ways.

The builder of this first naval vessel of the United States was Joshua Humphreys. The launching was witnessed by the president of the United States and the heads of the departments, who were stationed in the United States brig Sophie. Commodore Barry was in command of the vessel.

The figurehead on the vessel was carved by William Rush and represented the genius of America wearing a crest adorned with a constellation. Her hair escaped in loose, wavy tresses and rested upon her breast. A portrait of Washington was suspended from her neck, and her waist was bound with a civic band.

In the right hand the figure held a spear and belts of wampum—the emblems of war and peace. In her left hand was suspended the constitution of the Union. Above was a tablet on which rested three books, to represent the three branches of government, and the scales of justice. On the base of the tablet were carved the eagle and national escutcheon and the attributes of commerce, agriculture, the arts and sciences.

Scarcely was the frigate in the water than the journals of the country who were in favor of the French republic and took exception to the class rule of the country, as they designated it, began to scoff and to jeer. "What would the executive do with his navy of one forty-four gun ship? Send her to hunt up the Africa and demand satisfaction for the insults heaped upon the town of Newport and the French Minister Fauchet? Send her to avenge the flogging given by an Englishman to the captain of an American ship? Would he use her to stop the plundering of our seamen and the plunder of our merchantmen? Or would he use her against the French?"

These radical Republicans noted that Tallmadge himself had been heard to say that France had nothing to fear from a nation of debaters that had been trying for three years to build three frigates.

The United States was one of the first vessels to do service in the War of 1812, with that brilliant sea captain, Stephen Decatur, in charge, and the most remarkable of the engagements in which she fought was with the Macedonian. Of all the battles between American and British ships there was none so often discussed and so well remembered up to our civil war as this sea fight, for the reason that the victory was well won for the Americans, and the Macedonian was brought into port, and for many years she carried the stars and stripes.—Philadelphia Press.

Few Norwegians Can Swim.

It is a curious fact, says the London Lancet, considering the geography of the country, that the proportion of Norwegians who can swim is small, the number of deaths in Norway from drowning being about 600 a year. Only about 12 per cent of all the school children between the ages of twelve and fifteen have learned to swim. Norwegian sailors say the extreme coldness of the waters that leave their shores accounts for this.

A Quick Decider.

Clerk—The firemen turned the hose in our basement, sir, and drenched two piles of that silk dress goods. Merchant—Advertise a big sale of watered silk right away.—Boston Transcript.

Long ailments wear out pain and long hopes joy.—Stanislaus.

Petition for Probate

The estate of Alfred Gersten, who died at Mandal, Norway, on December 113, includes a tract of two and one-half acres of land in the George and Marietta Crow donation land claim in this county. The property is left to two sisters in Norway, according to the petition for the probate of the will filed here Wednesday by Carl L. Oberg.

The Courier and the Daily Journal \$4.75.

GAUDY PAUPERS.

Beggar Women of Vigo, Spain, Sport Elaborate Gold Earrings.

Perhaps you labor under the delusion that the principal vocation in life of a handkerchief is to attend at discreet intervals the nose when that necessary feature indulges in a little Marathon. Not so in Vigo, Spain. Yet handkerchiefs are much more in evidence in this quaint Spanish seaport than in our nasal Yankee midst.

Here, however, they are raised to an exalted position far ahead of their plain usage of the western world. In Vigo they cover the head of every peasant woman and even the infants in arms. What matter if the child lacks shoes, if even a scanty slip is its sole sartorial effect? Always its head is carefully muffled from any advances of the sun by a bright hued handkerchief carefully knotted under its tender infantile chin.

A Paisley shawl and a pair of elaborate filigree gold earrings are the two necessary adjuncts of a typical Vigoesque toilet. In the evening fashion as well as the handkerchief over the infants of Vigo invariably share. The toddlers not only have big ears, but they are also gold trimmed.

Even pauper women in filthy rags begging by the roadside have ears ornate with golden bangles flaunted in the face of poverty.

The tatters of these few beggars are the surprisingly few evidences of dirt you detect in this picturesque little fishing village. With its steep, straggling cobble streets climbing up characteristic Spanish steps to the top of its fortress topped mount it seems almost a spotless town after the unspeakable sights and smells of Bahia.—Pittsburgh Press.

CALLED THEM INDIANS.

How the Red Men of This Country Came to Get That Name.

"But," said the little girl who has now reached the dignity of owning a geography, "why did they call the people they found in this country 'Indians'?" The people who live in India ought to be called by that name."

Now, that was a very appropriate question for the little girl to ask. And the answer to the little girl and to any other little girls and boys who may be puzzled by the same thing is that Columbus and his men didn't start out to discover America. They didn't, of course, know there was any America here. What they did believe was that the world was round and that by sailing far enough they would come up on the other side. You all know now that what they believed is true, but in those days most people believed that the world was flat and that if a ship sailed far enough out into the ocean it would fall off the edge.

Columbus said that if he took a ship and sailed and sailed he would at last come to India. Now, India was a very rich country, and for hundreds of years Europe had been trying to find an easier way to get there, so what Columbus said appealed to a good many merchants and traders, and Spain finally fitted out some ships for Columbus.

You all know that Columbus finally did reach America, but he believed he had sailed clear around the world and had come to India from the other side, so he named the people he found on the shore "Indians." And after it was found that this was not India, but a new world, people went on calling the people Indians because that was as good a name as any for them, they thought.—Kansas City Star.

English Is Bad Enough.

"Why talk of the difficulty of pronouncing Polish, Austrian, Russian or Roumanian names," says a writer in the San Francisco Chronicle, "when ninety-nine out of every hundred cannot pronounce scores and scores of English names? Just think of Bertie pronounced as Barry, Dilwyn as Dillon, Belvoir as Boover, Featherstonhaugh as Festunhaw, Daltzell as De-el, Ruthven as Rivven. And these are by no means the worst cases!"

Man's Perversity.

If the law were to edict that man and wife should never be together for more than six months in the year it would be broken every day and men and women would stand hunger and stripes to come together for twelve months in twelve: if love of home were made a crime a family life would arise more touching than anything Queen Victoria ever dreamed.—W. L. George in Atlantic.

Happily Disposed Of.

"Mr. Beatz," the grocer said wearily, "I ask you for the last time. Will you pay that \$20 you owe me?"

"For the last time?" Beatz replied cheerfully. "I'm glad to hear you say that, old man. You know, I was getting awfully tired of hearing you ask that foolish question!"—New York Times.

An Old Coat.

My coat and I live comfortably together. It has assumed all my wrinkles, does not hurt me anywhere, has molded itself on my deformities and is complacent to all my movements, and I only feel its presence because it keeps me warm. Old coats and old friends are the same thing.—Hugo.

Too Few.

Huh! (during the spirit)—I don't believe in parading my virtues. Wife—I don't see how you could. It takes quite a number to make a parade.—Boston Transcript.

Prejudice squints when it looks and lies when it talks.

It is estimated that four-fifths of the water available for irrigation and domestic use in the state of Oregon comes from the timber clad slopes of the national forests. The average acre of national forest land in the state sends to the streams sixteen times as much water as does the average acre of land outside the forest boundaries.

County Clerk Iva Harrington Saturday issued a marriage license to Lillie Schliekeiser and Hans Schroeder, of Sherwood, route 5.

1100 FIRES IN DISTRICT

In Oregon There Were 683 Forest Fires During Past Year

Eleven hundred seventy-six fires on the national forests of Oregon, Washington and Alaska burned over 9,000 acres of timberland, destroyed 25 million board feet of merchantable timber worth \$23,000 and young growth and forage worth \$12,000, and cost the forest service \$19,000 to subdue during the fire season of 1916, according to a complete report just compiled in the office of District Forester George H. Cecil, Portland. In addition to the timberland, more than 10,000 acres of open country was also burned over.

The fires on the national forests of this district for 1916 were designated as follows: Alaska 28, Washington 465 and Oregon 683. In number of fires reported, the Siskiyou national forest in Oregon leads the district with 243 fires. The Snoqualmie forest in Washington stands second with a record of 177 fires for the season. The least number of fires occurred on the Tongass forest, Alaska, where three were reported.

Sixty per cent of these 1176 fires were discovered and put out before they had gained headway enough to cover a quarter of an acre. Thirty-two fires, less than three per cent of the total number, burned over more than ten acres and did damage to exceed \$100 before they were put under control. Any one of the 1144 other fires, if left to itself, might have become a large forest fire, says District Forester Cecil.

Campers caused 23 per cent of all the fires reported. Lightning was responsible for 19 per cent, railroads for 8 1/2 per cent, logging operations 6 1/2, brush burning 6. The remainder were from miscellaneous and unknown causes. These figures do not indicate that campers are becoming more careless with fire than formerly, but that there was a great increase in the number of tourists and campers visiting the forests, according to Mr. Cecil.

Nearly \$3,000 of the \$19,000 spent by the forest service in fire fighting in this district last year was used on private land within or adjacent to the national forests, to subdue fires which threatened to enter the forests. Timberland owners furnished co-operation to the amount of \$5,264.63. Excellent co-operation was given by the state foresters of Oregon and Washington.

B. N. HICKS NAMED

Former Oregon City Attorney Will Aid in Dry Law Work

B. N. Hicks, an attorney of Portland and formerly of Oregon City, has been made superintendent of the law enforcement department of the Oregon Anti-Saloon league and will begin his duties when the new bond-dry prohibition law goes into effect.

Attorney Hicks has had wide experience in the work such as is contemplated in Oregon under the amendment. For two years prior to the admission of Oklahoma into the union Mr. Hicks conducted the campaign for the dry cause in the constitution and immediately following that had charge of the law enforcement department of the anti-liquor organization, and as legal adviser.

It will be Mr. Hicks' purpose to work as an aide to the district attorneys throughout the state, assist in compiling evidence and in offering legal advice to the various communities where there is a suspicion of law infraction. The department, of course, will make no effort to usurp the powers of prosecution of the various unit officers, but it will give them aid whenever possible.

Mr. Hicks conducted the legal work in connection with the dry campaign of Clackamas county, when Oregon City was made dry, and carried the fight to the supreme court, where he won the case. In his new office he will be associated with R. P. Hutton, superintendent of the Oregon Anti-Saloon league, and will have offices adjoining.

Rev. Philip Deschner, who has been acting as field secretary of the Anti-Saloon league, and who has been in Oregon City many times, left Tuesday night for Dallas, Tex., to become professor of theology at the Southern Methodist university there and to assist in starting a dry campaign.

G. A. R. Veteran Buried

R. O. Woodward, father of R. E. Woodward of Oregon City, was buried at Mountain View cemetery Friday. Mr. Woodward died at Los Angeles on January 20 at the age of 84 years. He was a veteran of the Civil war and a member of Meade post, G. A. R., of this city. Mr. Woodward was a survivor of the battle of Gettysburg. Six children and 25 grandchildren survive.

Social Is Success

A pie social at the Presbyterian church last evening was a great success. Mrs. Anna Schneider and Mrs. Verne Olinger assisted in a delightful musical program and a large gathering enjoyed a social evening. Those in charge of the affair were Mrs. F. W. Gaghagen, Mrs. W. C. Green, Mrs. E. L. Shaw, Mrs. Frank Schoenborn, N. W. Bowland, F. W. Gaghagen and C. F. Romig.

A Sub: From Texas

Moulton, Texas, Jan. 20, 1917. Enclosed please find money order to pay for my subscription for the year 1917.

I am always glad to read your valuable paper.

Very respectfully,
EMIL GIETNER.

Demurrer Sustained

A demurrer filed by Anna and E. M. Howell to the complaint of Bertha M. Hosford was sustained in Judge Campbell's court here Monday and Mrs. Hosford was allowed 10 days in which to enter further plea in the case.

POWER OF FROST.

Fall of a Fifty Ton Boulder of Granite In the Yosemite.

Delicate frost tracings on the wind-draped pines to be the work of fanciful and harmless sportiveness, but the hand that forms them is capable of greater deeds and other kinds.

An official of the geological survey tells of an experience that must have been wonderfully impressive to the spectator. He had been spending some weeks in exploring the Yosemite valley and the "great rocks," like El Capitan, that wall it in.

Standing one day of late autumn about the middle of the valley, he was startled by a report like a cannon shot, which filled the whole valley with echoes that roared and boomed, replied and multiplied, in a long continued, glorious tumult.

As the deafening sound died away in sudden muffling under the visor of El Capitan the spectator was able to distinguish the point of attack by the long, clattering descent of a vast quantity of rock.

The night had been a cold one in the valley, and on the 7,000 and 8,000 foot levels of the upper rim the temperature must have dropped almost to zero.

Frost, working quietly with his Archimedean lever, had just succeeded in shifting from the shoulder of the sentinel a trifle of fifty tons or so of granite. For near a thousand feet the boulder fell sheer, swift and silent; then, striking the cliff, it burst like a bomb, shattered into a myriad flying shards and splinters and dislodged a smother of fragments that trickled down to the valley in a stream that lasted for minutes.

Then from the spot where the boulder had struck dust began to rise into the sunny air, slowly building up like a summer cloud and every bit as snowy. It was the four of granite, powdered instantaneously by the terrific shock.

NERVE OF A STEEPLEJACK.

His Coolness and Resource In a Time of Extreme Peril.

Ordinary people standing on a narrow ledge whence they can see down 200 or 300 feet are so appalled by the danger of falling that their nerves give way, their bodies flinch and there comes to some at least an impulse to end the mental strain by a leap into the gulf. But the steeplejack is indifferent to height and proximity to the abyss.

The coolness and resource of these men were never better shown than in a case which happened in upper New York state a few years ago. A steeplejack had flown his kite over a chimney and subsequently drawn himself up to the top. He was just beginning his inspection of the work when by some mishap he dropped his rope and was left, like St. Simeon Stylites, alone on his pillar.

Attempts were made to fly another kite over him, but the wind had dropped. There were iron ladders inside the chimney, but the fires would have to be drawn and the chimney let cool for hours.

The steeplejack was then seen to unlance one of his shoes, take off the long blue stocking worn by such workmen and set to work carefully to unravel it, knotting the pieces of yarn together when necessary.

He then fastened a stone to the end, plunged the depth, picked the other stocking to pieces and added it to the first length of yarn and let it down far enough to meet a tall ladder, from which he drew up first a piece of strong string, next a rope and then after completing his inspection of the chimney top lowered himself to the ground.—Los Angeles Times.

Origin of an Old Saying.

Many think that the saying "Blood is thicker than water" originated with Commodore Tarnall of the United States navy, who assisted the English in the Chinese waters, and, in his dispatch to his government, justified his interference by quoting the words. It is, however, an old English proverb and is to be found in Ray's "Collection of English Proverbs," published in 1672. Walter Scott, too, makes Dandie Dinmont say: "Weel, bluid's thicker than water," Shes' welcome to the cheeses and the luns, just the same."—Philadelphia Press.

An Offensive Cravat.

A man once called upon Whistler with a letter of introduction, and an amusing scene followed arising out of the fact that the visitor was wearing a red necktie. Whistler declared it interfered with the color scheme of his room and "put him off" a picture he was painting in quite a different "key." Finally he obliged him to take off the offending cravat before he would condescend to exchange another word with him.

Faulty In His Diagnosis.

Mrs. Malaprop—Young Sharp will have to apologize to me before I speak to him again.

Miss Interest—Did he insult you?

Mrs. Malaprop—Did he? The last time I met him I told him that my uncle had locomotor ataxia, and he asked me if he whistled at crossings.—Stray Stories.

Rather Demoralizing.

"Are you still thinking about buying a motorcar?"

"Yes. It doesn't cost me anything to think about buying one."

"Don't you fool yourself. When a man gets an idea like that he's liable to neglect his business."—St. Louis Post-Dispatch.

Stone Wall.

No vice—Why do they call it Wall street? Loser—Rump up against it and you'll find out.—New York Times.

A. W. Meyer Will Leave

As soon as the Western Union company can place a man in the field the resignation of A. W. Meyer, present manager of the local office, will take effect. Mr. Meyer, who has been in charge of the office here since December, 1914, sent in his resignation that he might accept a position with the Columbia River Shipbuilding Co. as a draughtsman. Mr. and Mrs. Meyer will make their home in Portland when he is relieved here.

Puritan Undermuslins

THE dainty laces and embroideries on our Puritan Undermuslins are more beautiful and durable than you have ever before seen on undermuslins at so low a price.

The high types of laces and embroideries are characteristic of the thorough goodness of Puritan Undermuslins in every way.

In every branch of merchandise there is one great line that is recognized everywhere as the standard for high quality—Puritan stands for that line in undermuslins.

BANNON & CO.
Sell for Less

Insure Against Scale by Spraying

SAN JOSE SCALE is a factor that nearly every orchardist, farmer and fruit grower has got to reckon with. As a progressive grower you must fight the scale until you have it under control, for when it has once infested the trees in your orchard, if left alone, it will never let up until it has killed every tree. The one sure way to control the scale is to spray while your trees are dormant with some effective material.

Lime-Sulphur Solution

can be used successfully as a spray for fungus disease and for sucking insects. It mixes readily with Arsenate of Lead and in this shape is especially effective as a combination insecticide and fungicide spray. If you have any scale in your orchard or any fungus troubles, come in and tell us and we will give you all necessary information.

Prices of Lime-Sulphur Solution

\$ 9.50 per barrel (\$1 returned for barrel)
1.25 per five gallon can (container free)
.25 per gallon (container extra)

We also have the agency for SHERWIN-WILLIAMS DRY LIME-SULPHUR. It is not a substitute for Liquid Lime-Sulphur, but is exactly the same thing with the water evaporated; it is drawn from the same tank.

We offer S-W DRY LIQUID LIME-SULPHUR to orchardists as being more economical than the liquid, and more efficient.

Ask us to tell you why.

Huntley Drug Co.

The Rexall Store

STATE AID DENIED

Laugaard of Multnomah took the floor in the bill's behalf and Ritter moved for the consideration of the previous question. This accelerated matters a little bit, but almost every member took the opportunity to say a few words to explain his vote and the polling was fraught with delays.

The bill will go to the senate at once, where the fight is expected to be even warmer than in the house. Those who voted for the bill were: Anderson, Barber, Bean, Bowman, Brand, Cartmill, Childs, Cornelius, Crandall, Dedman, Elgin, Elmore, Fuller, Goode, Gordon, Gore, Griggs, Seymour Jones, Walter B. Jones, Kubli, Lafferty, Laugaard, Langer, Mackay, Mann, Martin, Meek, Porter, Rowe, Sheldon, Small, Starlin, Stephens, Sweeney, Thomas, Mrs. Thompson, Tichenor and Speaker Stanfield, 38.

Those who voted against the bill were: Brownell, Burdick, Burton, Callan, Clark, Corbett, Eaton, Forbes, Hodgen, W. A. Jones, Mathieu, Mueller, Fortwood, Ritter, Schimpff, Stott, Willett, 20.

Lewis absent; Peck excused.

BY OUR BLOOD WE LIVE

If you tire easily, are subject to cold hands or feet—if you catch colds readily or have rheumatic pains—your blood or circulation is probably at fault and you need

SCOTT'S EMULSION

OF NORWEGIAN COD LIVER OIL

which is nature's easily-assimilated food, to increase your red corpuscles and charge the blood with life-sustaining richness. Scott's creates warmth to throw off colds and gives resistance to prevent sickness. No Alcohol in SCOTT'S. Every Druggist has it.

SCOTT & BOWNE, Bloomfield, N. J.
