THE ROAD BONDS

There are many interesting features about the proposal to bond the state of Oregon for \$6,000,000 to build the roads for which two generations of our people have been pleading. The road bond proposal is a good one if we have assurance that it is free from the taint which it is well to guard against in such matters.

Oregon needs good roads, we must have them if we are to keep the state upon the map of progress. The roads which are named for hard surface improvement are the most important highways of the state. Properly constructed they will be of untold value, not only because of the use made of them by the people of the state, but because of the attraction they will hold for travelers from all parts of the world. Building these highways on a permanent plan will mean that within a few years the money that has been spent on them for years will no longer be needed and can be utilized for the improvement of other county roads throughout the state.

With the bond issue to care for the main arteries of travel the several counties of the state, with the same road levy as at present, will find little trouble in completing their road systems. The automobile owner will bear the burden of the bond issue, and since the automobile owner has not registered strong opposition the voters generally should be satisfied to see the measure carry at the special election called that the voters may decide the matter.

It is a fact that the automobile destroys macadamized roads almost as soon as they can be built. Other traffic finds the macadam a satisfactory surface. If the motorist wants better he should be, and apparently is, willing to pay for it. It is undoubtedly true that the motorist will save, in gasoline, tire and repair bills, more in a year than the amount of his increased license fee.

Given the entire \$1,900,000, approximately, of the bonds authorized by the Beane-Barrett bill to co-operate with the federal government, according to the Shackleford bill, and given the entire \$6,000,000 bonds authorized by Oregon house bill 550, the present quarter-mile state highway tax, together with the present license on automobiles, would pay off the whole bond issue in 25 years and would leave a surplus fund of \$450,000.

The voters will not mortgage their grandsons by voting favorably upon the bond issue. It is an important measure to the future of this state, but its burden upon those to come will be light. The bonds authorized by the bill which will be referred to the people in June will be in various denominations and will mature serially, payable five per cent each year commencing with the sixth year after they are issued. Within 25 years the entire cost of the proposed road improvement will be paid off and for a quarter-century we shall have enjoyed the blessing of good highways.

20,000 LEAGUES

Ever so many years ago Jules Verne told us, in his entertaining and over-imaginative yarn, "20,000 Leagues Under the Sea," of the submarine boats that his fancy pictured to him. He told of the deep sea divers who gathered precious pearls from the forests on the bottoms of trackless oceans—of the fish, of the hulks of wrecked boats that were found there.

If Jules Verne lived today and told us of a machine that carried his characters to Mars, there to commune with another people, to inhabit another world, we would laugh at his far fetched fancy just as his readers laughed at him when he wrote of the submarine, the divers, the sea-bottom forests.

Skepticism is the same old brand of

bigoted foolishness today that it was when Jules Verne's pen was in working order. What we cannot see we do not believe. The sounds we do not hear we do not heed. Undoubtedly our peace of mind is just as great as it would be if we were laboring with problems that will be cared for by future generations, but the fact that nothing is impossible has not sufficiently impressed itself upon our worldly minds.

We laugh at talk of a hereafter. We thought Prof. Lowell was mad when he preached to us about the canals on the planet Mars. If we were told that the chemist in his laboratory could produce life we would call the doctor and have our adviser sent to Salem. The man who makes brave to tell us that someday, war ended, the prodigals all comfortable at home, the world will realize the universal brotherhood—the kingdom of mankind—is crazy; just as crazy as Jules Verne was when he told us of the submarines that had not been dreamed of then.

But the submarines came. We have explored the bottoms of the seas, we have rescued priceless cargoes from the deep; we have seen birdlike machines floating through the air more rapidly than a bird can fly; we have almost seen life restored to the dead, disease conquered. These things we are forced to believe because they are before our very eyes. But the things we cannot see we will not believe, proving our own ignorance above all else.

Nothing is impossible. We who live today may also live again. Our life here on earth may be long enough to reveal to our own eyes the rich fields and the great people of Mars; we may see life created, may see it restored to dead bodies, may see the universal brotherhood. What we cannot see we cannot believe; yet, nothing is impossible!

THE CHRISTIAN LENT

Lent began last week, and religious relations oblige many persons to observe the 40 days to Easter with spiritual prayer and fasting. There are, however, others who find profit in taking stock of themselves at this season and preparing their lives to share the renewal of energy which comes with spring.

Society sets aside some, at least, of its pleasures. The Roman, Lutheran and Episcopal communions hold it up as a duty for their members to forswear worldly ways for some six weeks of the Christian year. This diminishes the means of social gaiety and facilitates the release of all who need a genuine Lent. Many who feel themselves overworked and physically or mentally rundown take advantage of the time and through exercise and dieting put themselves into good condition again.

Old-English "lenten," which means "to lengthen" and refers to the lengthening of days, marks a real opening of spring in northern regions. These 40 days to April 8 provide an admirable opportunity for physical regeneration. The snows and frosts of winter wane and weaken apace. March is a glorious month for getting outdoors again. Four weeks of living in the open as much as possible and of treating our stomach in Spartan wise will work wonders in making us feel alive and alert again when Easter arrives.

These six weeks form a period of preparation for renewing the joy of life. Mothers and daughters are making ready to bloom out in fetching frocks and dainty bonnets. Husbands and sons glance at the neglected garden and frowny lawn. Catalogues of seedmen cumber the mails and lure the trusting householder. That spring feeling makes itself felt in the blood as well as in the softening air and increasing light. Man no less than nature senses the stir of reviving life and realizes that the sun

nears the glorious upturn of the year. Lent has its meaning and use for the sinner as truly as for the saint. —Spokesman-Review.

NATURE'S GREAT BLESSING

Oregon City's pure mountain water is best appreciated after a trip through the state and into those cities which drink fluids varying from a dusty gray to a brick red and call the stuff water. Roseburg, for instance, takes its water from the Umpqua a short distance below a county bridge and in the heart of a farming country, and Grants Pass, situated on the Rogue River below Medford, and other towns, drink a liquid taken from a hole dug on the river bank. These two Oregon cities—otherwise prosperous and progressive—are typical of many towns in this state.

When placer mining is at its height, water flows from Grants Pass faucets the same color as the red clay which forms the river bank. The housewife who would do her own washing must often let the water set over night so that some of the dirt will settle.

These conditions exist in spite of the fact that both Roseburg and Grants Pass—like many other towns with poor water supply—are situated in the heart of a mountainous region. Certainly they would not have to build an expensive 25-mile pipeline to the mountains as Oregon City had to do. Of course, both Roseburg and Grants Pass have privately owned water system and must pay interest on investment and profit to the companies.

Ranking with its mills and water power as a community asset is Oregon City's pure mountain water. Two years ago the city voted \$375,000 in bonds to build the line by a tremendous majority, yet if the issue were to be put before the people again the majority for the pipeline would be still greater. Why an Oregon town, willing, like the two southern Oregon towns mentioned here, to vote railroad bonds and incur other debts for the sake of progress, will continue to drink common river water and risk the health of their people when pure mountain water is within easy distance is a puzzle.

Felt Like 90; Now Like 21

Many persons complain about feeling old before they should. Like a weak link in a chain, a weak organ enfeebls the whole body. Overworked, weak or disordered kidneys lower vitality. A. W. Morgan, Angora, La., writes: "I suffered with pains in the back. I am 43 years old, but I felt like a man of 90 years old. Since I took Foley Kidney Pills I feel like I did when I was 21." In 50c and \$1.00 sizes.—Jones Drug Co.

Obituaries

Mrs. Hattie Knox

Mrs. Hattie Knox, wife of Horace Knox and daughter of J. W. Roots, died on Wednesday last week at Arleta, Ore. Mrs. Knox leaves to mourn one daughter, Ieaz Knox of Boring, and two sons, Roscoe and James Knox, of Boring, her husband and her father and mother. She had one brother, Thomas A. Roots, now road master of Clackamas county, and two sisters, Mrs. Amy Moran and Mrs. Myrtle Telford, of Boring. The family is well known in this county.

Elhora Brecht

Elhora, the eight-year-old daughter of Mr. and Mrs. Eugene Brecht, died at the home of her parents Tuesday last week. The funeral service was held from her late home last Thursday and was conducted by the Rev. Mr. Kraxberger of the German Lutheran church of Oregon City. The school which she attended sent its pupils to the funeral in a body and furnished the music, assisted by Mrs. H. H. Blake and the teacher, Raymond Boyer. Interment was in Clackamas cemetery. The pallbearers were Emma Erickson, Alice Erickson, Lucile Bennett and Helen Sieben.

Mrs. Elizabeth Clossner

Mrs. Elizabeth Clossner died at her home at Harmony Tuesday following a brief illness. She was the wife of David Clossner and was nearly 80 years old. Mrs. Clossner came to Clackamas county with her family in 1892 and located at Harmony. Eight grown children survive her in addition to Mr. Clossner. The children are: Edward Clossner, Springfield; Mrs. Lena Anderson, Kirby, Ore.; Mrs. Sophie Cox, White Salmon, Wash.; Mrs. Eliza Brown, Salem; Mrs. Ollie Tracy, Logan; Mrs. Laura Tucker, Springfield; Frank Clossner, Portland, and George Clossner, Redland. The body is at the Holman parlors in this city and will be buried on Thursday at 2 o'clock in the Springfield cemetery, following services at the Springfield church.

TALKS OF FARM WORK

Illiteracy in Oregon and Washington Lower Than in Other States

A few interesting facts about the agricultural industry of the Pacific northwest were imparted to Chicago people recently by E. E. Faville of Spokane, Wash., when he attended the land products exposition. Mr. Faville seems interested in the farm progress of Oregon and he says: "The rapidity with which these states have adopted a system of diversified farming and live stock raising has been wonderful," in Mr. Faville's opinion. "Especially has there been a marked increase in the growing of alfalfa and other forage crops—an initial step toward crop rotation and essential to the maintenance of soil fertility.

"The original impetus resulting in this economic advancement was imparted in 1913, when Professor P. G. Holden, prominent in agricultural extension work, conducted 960 meetings in a territory embracing 225 square miles.

"At that time the Pacific northwest was a buying region. Now it

25c Per Month is the Average Cost of Operating a Mitchell Water System

Don't Envy the City Man's Home Make Him Envy Yours!

The city man envies the ruralite for his pure air, his elbow room and his broad guage life in general but he pities him for one thing—His Water Supply. A few years ago and this pity was well founded, but now the shoe is on the other foot.

THE Mitchell Water System The MITCHELL SYSTEM enables you To use as MUCH water as you wish WHEN YOU WISH, to have as MANY faucets as you want WHERE you want them at no extra cost; to regulate your own pressure—as MUCH or as LITTLE as you wish; to use your water for gardening—Irrigating—sprinkling or for whatever other purpose you may desire. That's why a MITCHELL WATER SYSTEM gives you the best of the City Man.

The Mitchell Water System supplies you with unlimited dependable supply of pure cool water at no more cost (usually not as much) per month than is paid by the average city man for his restricted supply. This is not so of other water systems, which often are a source of a great deal more trouble than satisfaction owing to improper construction or poor installation. We have installed hundreds of Mitchell Systems in all parts of the Northwest—they are giving satisfaction to every buyer. We, if given the opportunity, will gladly give you the benefit of our six years' experience in the pneumatic water supply. We will plan for your home a Mitchell System that will exactly fit your requirements—that will give you service which will please you now and continue to do so for years and years—that's our policy—COMPLETE AND PERMANENT SATISFACTION TO EVERY BUYER—and we have the goods that uphold every claim we make for them. Write us today for our free book on country and suburban water supply systems. Ask for book.

has an annual surplus of food and feeds to sell, and the importation of butter and dairy products has entirely ceased. In the last five years Oregon has increased the number of her dairy cattle 30 per cent, with the Washington increase showing 40 per cent. The increase in other cattle has been much more marked, 120 per cent in Oregon and 370 per cent in Washington. Among the many other promising improvements may be mentioned a system of great terminal warehouses for the handling of the largely increased grain harvests and a better method of handling grain on the farms.

"Other fine movements have been set going also, as, for example, that of better roads and the rural credit system just now receiving united attention from farmers and business men alike. As a result of all this intelligent effort, the earning power per farm in the Pacific northwest has been increased to \$4,000—the highest in the country.

"Since better farming always leads to better homes and a better people, a splendid school system, in which agricultural education plays an important part, has been built up. The percentage of illiteracy in Oregon and Washington is lower than in any other state."

SETTLING ACCOUNTS.

People Are Now Paying Up at Shorter Intervals Than Formerly.

Business men are agreed that a very noticeable change has come about in the past five years in the matter of paying accounts. While that length of time ago yearly settlements were the rule, settlements at much shorter periods are now getting to be the fashion. Just what has brought this about is hard to say. Possibly there are a number of things which have worked together to bring about this good result. Of course, years ago, before this country began raising stock, there was but about one time in each year when a farmer had any money. Consequently no one else had any except at that time. Now, with creameries paying off every two weeks and with live stock marketed any time during the year, money flows far more evenly.

Then, too, banks are coming to be far more generally used than before, which accounts for an even flow of money. The farmer borrows money to tide him over till he sells something rather than stand off his creditors as long as he formerly did.

A number of younger men have gone into various businesses of late years most of them without sufficient capital to enable them to carry accounts long. They were therefore compelled to make frequent collections, and that might be said to have started the habit of paying up all around.

Automobiles, which are alternately blamed and credited for almost every thing, may be said to have had something to do with the matter of credits. Automobile accessories run into money very fast, and garages, being of comparatively modern creation, started out at once to keep book accounts down. The motorist, therefore, was educated at the start to pay up his garage bill frequently. This helped along other lines of business as well.

Many lines of business make monthly collections the rule, and it is admitted by every one to be the best plan all around.—Osage (La.) Press-Journal

A Woman's Experience With Grippe

When a cough or cold "hangs in," and you have aches and pains in your joints and muscles, it is likely that grippe is taking hold of your system. Mrs. J. A. Rodgers, Switzer, Conn., says: "I am susceptible to colds, often ending in grippe. In this case I have found Foley's Honey and Tar to prevent colds. This sterling family remedy loosens the phlegm, stops irritation, allays soreness and inflammation and frees the air passages. Good for children.—Jones Drug Co.

CRTDIT MONEY AVAILABLE

Probably \$1,500,000 in Rural Credit Bonds Will be Floated

Money from the rural credits fund will be available for lending purposes to the farmers of the state by the middle of March or the first part of April. The new act, making the provisions of the rural credits amendment to the constitution operative, is now in effect, and the state land board held its first meeting last week to forward the operation of the amendment as rapidly as possible.

It was agreed that of the issue of any one year 10 per cent of such issue should be in five-year bonds and 10 per cent in 10-year bonds, the following to be in long-term bonds.

It was also agreed that to secure rapid action on the fund and get money to the farmers as soon as possible State Treasurer Kay should invest \$50,000 of the industrial accident fund in five-year bonds at par. The state also will invest in the 10-year bonds. The long-term bonds will be sold on the general market by competitive bidding, and it is believed a considerable premium may be secured from the sale of such securities.

The short-term bonds, the board considered, would not be so attractive, and as a result there was doubt as to the amount of the premium they might bring. On the other hand, the law provides that the industrial accident fund shall be invested in good securities, and it is considered that the investment in the rural credits short-

AFTER THE GRIPPE

Vinol Restored Her Strength

Canton, Miss.—"I am 75 years old and became very weak and feeble from the effects of La Grippe, but Vinol has done me a world of good. It has cured my cough, built up my strength so I feel active and well again."—Mrs. LIZZIE BALDWIN, Canton, Miss.

Vinol is a constitutional remedy which aids digestion, enriches the blood and creates strength. Unexcelled for chronic coughs, colds or bronchitis. Your money back if it fails.

Huntley Bros. Co., Druggists, Oregon City. Also at the leading drug stores in all Oregon towns.

term bonds will be an unequalled investment for that fund and also take care of the need of securing money quickly under the act.

It is estimated that between \$1,000,000 and \$1,500,000 worth of bonds will be floated during the next year. The land board instructed its clerk, G. G. Brown, immediately to send out instructions to the attorneys of the state land board, who now examine titles and make appraisals for the state school fund, relative to the operation of the rural credits fund; to issue rules and regulations relative to the handling of such fund, and to generally prepare the way throughout the state for making loans.

PLAN DAIRY SHOW

H. Thiessen, Oregon City, is Member of Committee on Organization

Plans for holding a Pacific National Dairy show in Portland were discussed by northwest dairymen meeting at Portland last week. As a preliminary step, a committee of 10 was appointed to draw up a plan of organization and work on the general arrangements for a dairy show to be held in Portland next fall.

J. D. Mickle, state food and dairy commissioner, acted as temporary chairman, and the following were appointed as an organization committee: H. Thiessen of Oregon City; H. C. Browne of the Rural Spirit; Robert Ireland, A. M. Work, Robert S. Farrell, W. K. Taylor of Corvallis; H. J. Dammeier, W. Warrens, Isaac E. Staples and Clifford Reid.

The dairy stock show is to be modeled after the one held every year in Chicago. It will represent every phase of the dairy industry. Besides showing 700 or 800 head of fine dairy cattle, the organizers announce that a display of dairy machinery and dairy products will be included.

The committee of 10 will have two or three weeks to work out the preliminary arrangements, and then to complete the organization, dairymen from the states of Oregon, Washington, California and Idaho will be called in to confer over the committee report. At this meeting the permanent organization will be established and officers selected.

To begin the actual arrangements

WOMEN OF MIDDLE AGE

Mrs. Quinn's Experience Ought to Help You Over the Critical Period.

Lowell, Mass.—"For the last three years I have been troubled with the Change of Life and the bad feelings common at that time. I was in a very nervous condition, with headaches and pain a good deal of the time so I was unfit to do my work. A friend asked me to try Lydia E. Pinkham's Vegetable Compound, which I did, and it has helped me in every way. I am not nearly so nervous, no headache or pain. I must say that Lydia E. Pinkham's Vegetable Compound is the best remedy any sick woman can take."

—Mrs. MARGARET QUINN, Room 269

Worthington St., Lowell, Mass.

Other warning symptoms are a sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness, inquietude, and dizziness.

If you need special advice, write to the Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass.

for a dairy stock show it may be found necessary, according to dairymen present, to obtain subscriptions amounting to \$15,000 or \$20,000.

Attention, Contractors

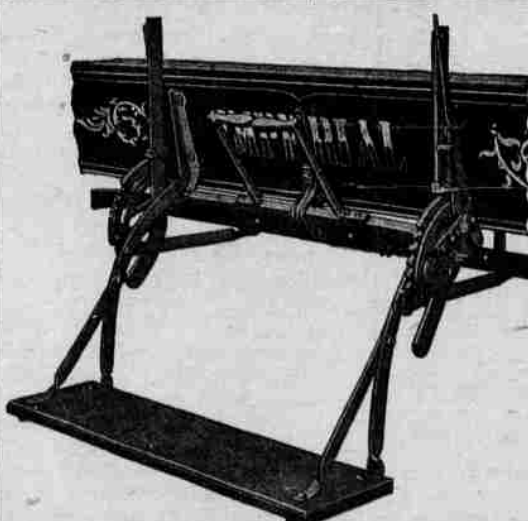

We are prepared to furnish bridge rods and drift bolts and solicit your patronage. Estimates cheerfully given. County work solicited. Shop on Fifth street.
