

## BY OUR BLOOD WE LIVE

If you tire easily, are subject to cold hands or feet—if you catch colds readily or have rheumatic pains—your blood or circulation is probably at fault and you need

# SCOTT'S EMULSION

OF NORWEGIAN COD LIVER OIL

which is nature's easily-assimilated food, to increase your red corpuscles and charge the blood with life-sustaining richness. Scott's creates warmth to throw off colds and gives resistance to prevent sickness. No Alcohol in SCOTT'S. Every Druggist has it. SCOTT & BOWNE, Bloomfield, N. J.

## THE FASHIONS

One-piece dresses have come to stay. In silk, satin, foulard, taffeta, pongee, Georgette crepe, chiffon, voile, crepe, in fact, running the entire gamut of materials, these dresses are spring favorites. Of course, this type of dress demands a separate coat, for even in summer there are times when a wrap is necessary. The velours, duvetyns and other piled fabrics were so popular for the winter that we have for spring and summer similar fabrics, only in a weight suitable for the weather. Light-weight velours in white, sand color, gray, and many brighter shades are particularly appealing for the separate coat. The model illustrated shows the latest effect in spring coats. It is developed in sand-colored velours, has the smart barrel or bowling-pin effect in its wideness at the hips accentuated by pocket sections. A wide, soft collar, and cuffs in gauntlet effect, are other features which aid in giving this modest style. For automobilizing, this coat might be

braided and embroidered most elaborately. A taupe-colored wool jersey suit was braided with soutache braid of the same shade around the bottom of the coat, on the collar and on wide pocket-pieces on the skirt. Another suit was combined with striped satin which made the collar and the lining. The latter was a most important feature of the suit.

The short bolero coats have returned to us after an interim of many years. Sometimes they are combined with straight, pleated, narrow skirts, giving a straight so-called Egyptian silhouette. Some of these skirts the designers have launched in opposition to the bowling-pin silhouette. In the

Illustration the short jacket has been combined with a six-gored box-pleated skirt.

### The Youthful Sports Skirts

The new sports clothes show a youthful note, and yet embody that simplicity which is requisite to make gay colors practical for every-day wear. The skirts, gathered or shirred at the waistline, sometimes straight hanging, and sometimes brought in at the ankles to give the new barrel effect, are made of a wide variety of materials. Tussur, rajah, pongee and similar weaves are the mainstay for the more expensive skirts, while cotton fabrics, in white and in striped effects, may be had at varying prices. Cretone which has had such a vogue for smocks and trimmings in seasons past is pressed into use again this season for these same sport skirts. They are often made cretewise of the goods so that the selvedge of the cretione is used instead of a hem, and the other selvedge edge makes a heading around the waist. It seems to make little difference what the type of cretione is, whether it has a Paisley design or a willow-ware pattern. The very newest thing for sports skirts, but not the least expensive, are the skirts made of ribbon. Wide ribbon is sewed together, selvedge to selvedge, until the width of the skirt is obtained. They are gay and joyous in effect, especially when combined with the sheerest of summer blouses.

Never has there been a greater variety of styles for separate blouses than there is this season. It makes very little difference what type of waist you like best; if the sleeves have the proper look and the collar is well designed you may be able to wear it. The Russian and peplum effects, in Georgette, chiffon, chepe de Chine and satin are having a wonderful vogue, but so are the waists which come only to the waist and tuck themselves modestly beneath the skirt band. A very new mode of trimming waists of crepe de Chine is to have collar, cuffs and belt not of a contrasting but of the same colored linen. Organdy waists are being combined with silk and satin overblouses. A novelty in waists, and one which is most practical as well, is the blouse of fine gingham for sports. Blouses of this type are made up in stripes and checks and remind one of children's rompers and play frocks. Sometimes they are combined with white pique. I saw a very pretty pink one recently which had a white pique vest with the fronts of the waist cut in scallops and stitched onto the vest.

Stitching is a most popular mode of trimming at the present time. It is used on women's suits and coats, on dresses and on skirts. On wool materials it is done with a coarse knitting silk, put either on the bobbin or the upper part of the machine; on cotton materials it is done with mercerized cotton in the same way. Children's clothes are trimmed with stitching in varied colors; for instance, a blue serge coat had stitching of red and green silk. A very pretty buff chambray dress had parallel rows of stitching in blue, brown, green and pink on the collar and cuffs and above the hem.

## KICKERS FORM TONG

Non-Coms Under "Bill" Logus Have Merry Time With "Crabbers"

The non-commissioned staff section of the Third Oregon Infantry, under the command of Captain William R. Logus at Vancouver, work chiefly indoors these days, preparing orders, ration and field returns, circulars, copying description and assignment cards; in short, conducting the paper work of the regiment. They are a hard-working bunch and do not have the advantage of the outdoor drilling, marching and guard duty that the other men have. Their work is pushing the pen and ticking the typewriter, but their work is none the less essential and important to the success of the regiment in the field.

The record of every fighting man must be most carefully kept right up to date, including his promotions, sickness, etc. Their work, being a confining and serious nature, it is to be expected that there would be periods of reaction. The non-commissioned staff of the Third Oregon includes one regimental Sergeant-Major, E. A. Robbins; three battalion sergeant-majors, H. P. Vickrey, G. H. Skinner and W. F. Smith, and two color sergeants, C. A. James and A. J. Jones.

No matter how good the grub, how fine the officers, how comfortable the quarters, there is always one class of men that quickly develop into regimental kickers. Nothing satisfies them. They simply enjoy the pastime of kicking at everything, both in particular and in general. The non-commissioned staff boys, having listened to all kinds of kicks from the kickers, hit upon the idea of corralling the growlers into an organization, which has become known as the Duck Sing tong.

With the assistance of a certain intelligent Chinese friend, they drew up a constitution and by-laws. Their initiatory ceremonies are solemn and appalling. Their vows have all the secret society obligations of the modern fraternal orders backed off the map.

No man is eligible for membership until he becomes a confirmed crab, a pessimistic, persistent and perpetual kicker. He must show no symptoms of ever having spells of optimism. Prospective members are interviewed by a committee, and if no signs of optimism or a tendency to be content with their surroundings appear, they are placed on probation and closely observed during this period.

If during this stated time he is discovered to be a constant growler at the mess, the quarters, the weather or the parade grounds, he is then taken into full membership, but is expelled in everlasting disgrace the moment he utters anything pleasant regarding his condition or surroundings, and forever blacklisted. The present incumbents of the chairs of Duck Sing are Battalion Sergeant-Major H. P. Vickrey, Tin Ha Jue Mun Ming But Jee Jook Jea, or in English, "most illustrious kicker in the universe"; Battalion Sergeant-Major G. H. Skinner is the great chief kicker, or the Tau Ho Di But Jook Jea. Sergeant-Wayde R. Bagnall is the chief kicker and is known among his brethren as the Tau Ho But Jook Jea. Battalion Sergeant-Major W. F. Smith is the keeper of the rolls, or Shue Gay.

There are also a number of hatchmen and gunmen, who are kept exceedingly busy in the tasks assigned them by lot and who have grown quite proficient in their duties, the nature of which are part of the inviolable secrets of the order. From the number of members of the regiment bearing brands upon their hands in various symbolic Chinese characters, the tong is in a flourishing condition.—Oregonian.

## FLY CAMPAIGN ON

Swatting the Festive Fly Will be City's Popular Pastime

The annual "swat the fly" campaign was started here Friday when Dr. J. W. Norris and Chief of Police Lee French investigated conditions about several livery barns and stables in the city.

The result of the search for unsanitary conditions will be a report submitted to the city council at its next meeting, asking that several places be ordered cleaned up. The Williams' Bros. transfer barns are an object of attack in the report. Once before, officers say, Williams Bros. were ordered to clean up their barns and successfully fought the order.

## BROKEN DOWN IN HEALTH

Woman Tells How \$5 Worth of Pinkham's Compound Made Her Well.

Lima, Ohio.—"I was all broken down in health from a displacement. One of my lady friends came to see me and she advised me to commence taking Lydia E. Pinkham's Vegetable Compound and to use Lydia E. Pinkham's Sanative Wash. I began taking your remedies and took \$5.00 worth and in two months was a well woman after three doctors said I never would stand up straight again. I was a midwife for seven years and I recommended the Vegetable Compound to every woman to take before birth and afterwards, and they all got along so nicely that it surely is a godsend to suffering women. If women wish to write to me I will be delighted to answer them."

Women who suffer from displacements, weakness, irregularities, nervousness, backache, or bearing-down pains, need the tonic properties of the roots and herbs contained in Lydia E. Pinkham's Vegetable Compound.

## OPPONENTS JUGGLE FACTS

Counties Outside of Multnomah Receive More Than Contributed

In an effort to turn the voters of the road bond bill, C. E. Spence, manager of the grange, is said to be making the unfounded assertion that none of the money raised from the bonds will be expended on roads in the Willamette valley south of Multnomah county; that all of the money contributed by Willamette valley counties in automobile licenses and in taxes from the quarter mill state road tax will be required and will be expended in completing the Columbia river highway.

The plain facts are: 1st. Reliable engineering estimates secured by the highway commission agree that \$1,750,000 will complete the Columbia river highway from Astoria to The Dalles.

2nd. Multnomah county pays 37 1/2 per cent of the state tax and 40 per cent of the automobile license fees but under the highway plan embraced in the road bond bill not one cent of the money so paid will be expended in Multnomah county.

3rd. Multnomah county will pay in automobile fees and state road tax approximately \$2,400,000, which is more than sufficient to complete the Columbia river highway and leave a balance of \$650,000 to be applied on other roads. These figures do not take into account the amounts that will be paid by Clatsop, Columbia, Hood River and Wasco counties, which will also be available for completing the Columbia river highway. The amounts paid into the fund by these counties will further reduce the amount of Multnomah county's contribution to the Columbia river highway and leave a considerably larger sum than \$650,000 to be applied on the Pacific highway and other roads contemplated in the road bond bill.

4th. Not one cent of the money paid by counties of the state, other than that contributed by Multnomah, Clatsop, Hood River, Wasco and Hood River counties, will be required to complete the Columbia river highway and the other roads outside of the counties enumerated.

5th. In other words, under the \$6,000,000 road bond plan, Multnomah county automobile owners and taxpayers will not only pay sufficient funds to complete the Columbia river highway but will also contribute to the fund that will be expended on the Pacific highway and other roads in the Willamette valley and in other sections of the state.

## MR. PINCHOT WRITES

Tells Courier That Shortage of Food May be Nation's Peril

Gifford Pinchot, of Milford, Pike county, Pennsylvania, who was one of President Wilson's uncompromising detractors prior to the recent national election, has sent to the Courier by special delivery to insure its arrival and perusal, the following noteworthy communication. It indicates, that when politics and national honor must be considered, honor is found paramount. Gifford Pinchot has expressed in his own words the sentiments of a united nation—a multitude of patriots:

Milford, Pa., April 26, 1917. Mr. C. W. Robey, editor Courier.—In this great time, when every citizen must do his part, the president has made his appeal to the men who live on the land. He is right in doing so, for the safety of our country just now is in the hands of our farmers. What I mean is not merely our safety and the safety of our allies in the matter of food. I mean that the safety of the United States against foreign invasion hangs on the decision of the farmers of the forty-eight states.

The two great weapons in this war are arms and starvation. The war against German arms will be won or lost in France—the war against starvation will be won or lost in America. The Kaiser cannot whip the French and English armies and the English navy while England has food. But it is still possible that the German submarines may be able to keep food enough from reaching England to starve her into submission.

If the submarines win, the first item in the Kaiser's terms of peace will be the English fleet. With the English fleet in his possession, the Kaiser will be master of the world. What will happen to us then? Every man who stops to think knows the answer. We shall have money, food, labor, land—everything that is desirable in the world except the power to protect what we have. Experts estimate that it will take us nine months to get ready to meet a German army of even 150,000 men, with modern artillery. Under such circumstances, would the Germans treat us any better than they have already treated France and Belgium?

Even if the armies of our allies should crush the German military power this summer, before the shortage of food can reach the point of want, the world would still need vast quantities of American food. But if they do not, only one course can make us safe, and that is to grow food enough on our farms for ourselves and our allies, and to put ships enough on the sea to carry the food, in spite of the submarines, to the men who are fighting our fight.

If the war lasts beyond this summer, it will be the American farmer who will win or lose the war, who will overcome militarism and autocracy, or allow them to spread and control the world, ourselves included. This is no fanciful picture, but sober fact. Many a man will make light of it until he comes to think it over, but I venture to say that few will treat it lightly after careful thought. It is no more impossible than the great war itself appeared to be, only a few days before it began.

It is true that we can greatly increase the available food supply out of grain now used in making liquors, and by reducing household waste. But when these two things are done, they will not be enough. The health and appearance of the family are a good test of the wholesomeness of their diet, according to the United States department of agriculture farmers' bulletin 808, on how to select foods. If they are strong, well developed for their ages,

"THE STORE THAT UNDERSELLS BECAUSE IT SELLS FOR CASH"

# New Embroideries and Nets

For Graduation and Summer Dresses

See Our Morrison-Street Window Display

"A bargain for us is a bargain for our customers." We bought these Embroideries at a saving of 1/3 to 1/4 and at this sale we offer them to our customers at the same proportionate reductions.

Swiss Embroideries at 49c and 59c || Organdie Embroideries at 75c and 98c

The very Embroideries that are most in demand now for lingerie, waists and dresses for graduation and Summer wear—both organdie and Swiss embroideries, shown in hundreds of handsome new patterns.

Embroidery Flouncings in 40 and 45-Inch Widths 39c to \$1.98 Yard

Another splendid illustration of how you can save money by trading at this store—several hundred yards of beautiful new flouncings in 40 and 45-inch widths—attractive designs of perfect workmanship on organdies, voils and batistes of fine qualities.

New Net Flouncings 40-Inch Width, 95c Yard  
A wonderful collection of pretty new designs embroidered in white or colors on white or cream nets.

Wash Blond Nets at 75c, 85c and \$1.25 Yard  
45 and 72-inch Wash Blond Nets in medium and fine meshes and in white and cream—a popular material for graduation and Summer dresses.

## DIVORCES ARE MANY

In One Day Five Couples are Separated by Judge

The divorce court record for Clackamas county this week threatens to exceed anything that the marriage license books in the county clerk's office can show. Monday orders signed by Judge Campbell separated five couples. Jessie L. and William H. Elwood were divorced, and decrees were issued to Charlotte B. Moore from W. H. Moore; Elizabeth Hughes from John Hughes; Maggie Boxley from W. L. Boxley; and Eva F. Finch from William C. Finch. Mrs. Boxley was given custody of two minor children, James and Dorothy, and Mrs. Finch is permitted to have custody of Wilva and Ray F. Hughes.
