

Do You Dread Hot Weather?

Does it cut your energy, disturb your stomach or bring you near prostration? The well man isn't afraid of heat. But it is trying on the weakened body.

BUILD UP YOUR STRENGTH

Get your digestion in order, remove all irritation, dispel all stagnation. Put yourself in shape to enjoy the summer with a good tonic.

PERUNA INVIGORATES

It restores the perfection of digestion and removes the inflammation of conditions (catarrh) that make you weak. It freshens the blood, steadies the nerves, and supplies just what you need to enter the hot season with confidence. Peruna is a real tonic, with special efficacy in catarrhal conditions. Liquid or tablet form—whichever is most convenient—will safeguard your health.

The Peruna Company, Columbus, Ohio

About the State

Resume of the News of the Week from All Parts of Oregon

Mystery surrounds the disappearance of Robert Sutherland, a rancher, who was accidentally drowned in a whirlpool on the main highway through Picture Gorge, the high water of the John Day river having cut away the bank and part of the road. Mr. Sutherland left home last Thursday morning to go to M. Carl's place in Butler Basin, and it is supposed that in the dark he rode into the hole, which is said to be 20 feet deep, and was drowned. His horse was seen Friday by an Indian, with the saddle turned and wet. The Indian informed the nearest neighbor, who gave the alarm, and several of the ranchers immediately went to the gorge. All they found was Sutherland's hat in a willow bush.

A grappling iron is being made and the whirlpool will be dragged to see if the body is still there or has been washed down the river.

Sutherland was 28 years old.

Frank Jones, the tramp who knocked Private Adam Garren from a bridge at Graves Creek ten days ago, inflicting serious injuries, was escorted by members of Company I, Third Oregon Infantry, to Grants Pass Saturday and turned over to the Sheriff of Josephine county. Jones is charged with assault with intent to kill.

A record strawberry price that will probably not be touched again through the season was set at Hood River by the Fruitgrowers' Exchange, which sold the first two full crates shipped for the season to the Portland Hotel for \$10 a crate.

From now on express shipments of local fruit in quantities will go forward each day. The first carload is not expected before next week.

Manufacturers and mining concerns in the vicinity of Baker are threatening to shut down their properties if they are called upon to pay any higher wages because they say they cannot afford to do so. At an informal meeting yesterday of a number of the big interests in Baker and the outlying territory the labor question was discussed and it was decided that any further increase in the price of labor would make it prohibitive for the plants to remain in operation.

The 17th ambulance car for service in France of the allotted score which Oregon is to furnish has been received, according to an announcement made by Wells Gilbert, of the Oregon committee, in Portland this week. Mr. Gilbert also announced that the University club had volunteered to donate the staff car for Oregon's equipment, the supply car to be furnished by the Federal government.

Many Oregon boys already have applied for service as drivers of ambulance cars in France.

The elk obtained for Klamath county last February by the Klamath Sportsmen's association of Klamath Falls were turned into their new 60-acre range, obtained from the government by local sportsmen, today. The elk came from Wallowa county.

According to grades compiled by the registrar's office for the semester just ended, J. Bothwell Avison, a senior in the University of Oregon, won scholarship honors in the law school.

Mr. Avison is the first regular graduate of the law school and completed the semester with an all "S" day for 300 berry pickers to begin work the latter part of this week and the first of next.

"The local help available is not going to be near sufficient to handle the crop," says the exchange manager, "and we should call on the school children of Portland if we cannot get help elsewhere."

Degrees were conferred on the 1917 graduating class of the University of Oregon, 114 in number, Monday morning, following the commencement address of Le Baron Briggs, of Harvard. This ended the 41st annual commencement of the university.

THE STOCKMAN.

A long pig has the frame for a big hog. It is the farmer's work to put on the right kind of sideing. When not at work have a blanket handy to throw over the clipped horse, and he will not take cold. If lambs are due to arrive the caretaker should visit the flock once or twice during the night. Pigs have short legs and not much strength. They can't wallow around in long straw. Run the straw through the cutting box and then scatter it about the pen good and deep. There will be no delays in the spring work if the work teams are properly prepared at the start. If a ewe loses her lamb keep her milking as a foster mother.

AMERICAN SEED FOR SUGAR BEET INDUSTRY

(Prepared by United States department of agriculture.)

No grave difficulties, it is believed, stand in the way of the domestic production of high quality sugar beet seed sufficient in quantity to meet the needs of this country. Until the outbreak of the European war, however, the American beet sugar industry was almost entirely dependent for its seed supply upon Europe. Since that time efforts have been made to increase the production of sugar beet seed in the United States, but the supply is still so limited that several American beet sugar factories were idle last year for this reason.

For this condition of affairs there seems to be no good reason. In practically all instances American grown seed has been found to be superior to the imported. From an agricultural point of view, the whole problem appears to be largely a matter of planting greater acreages in this country. That this has not been done before is due almost entirely to the low price at which seed could be obtained from abroad.

The production of beet seed requires two seasons of growth. The mature beets resulting after one season from the seed must be harvested, the leaves removed and the roots carefully sliced with a dirt covering to preserve them in a dormant condition through the winter. These roots are planted at the earliest possible time the following spring and rapidly produce seed stalks from three to six feet in height. These are harvested with a sickle at the proper time and the seed carefully threshed, cleaned and cured.

Because of the fact that little attention has hitherto been given in this country to the production of sugar beet

The illustration shows one of the many widely varying types of sugar beets found in commercial fields of this country.

seed, there are no distinct types of sugar beets in the country. In many fields, whatever the name of the so called variety grown may be, from six to twenty distinct types of beets can be found. In fact, it is said scarcely two beets growing side by side in the same field have closely related external characters of leaf or root, and the quality of roots varies in both sugar and purity.

The first step in the development of a permanent beet seed industry in this country, therefore, is the development of true types with reference to both sugar beets and seed stalk production. As the domestic beet sugar industry now represents an investment of more than \$100,000,000, it is obvious that the proper development of such an important element in it as the seed supply should receive the greatest attention.

About Infertile Eggs.

It is a mistake to assume that infertile eggs cannot spoil. They will not spoil in the sense that fertile eggs become heated or partly incubated, but their contents will evaporate and become watery, and if they are allowed to remain in a damp, musty cellar or adjacent to vegetables or overripe fruit they will absorb these objectionable odors and thus contract a very bad flavor, and they are subject to mold and bacterial contamination the same as other eggs.

Different—But Satisfactory

Indigestion causes worry, nervousness, sick headaches, biliousness, coated tongue, bad breath, bloating, gas, constipation and constant distress. W. A. McRae, Raleigh, Ga., writes: "Foley Cathartic Tablets cleanse my system thoroughly and do not gripe or hurt at all. I recommend them to others and all find them entirely satisfactory and wonderfully different and more pleasant than anything ever seen." They cleanse the bowels, sweeten the stomach, invigorate the liver.—Jones Drug Co.

EXTENSION DIVISION AIDS RED CROSS ORGANIZATION

University of Oregon, Eugene—All the machinery of the extension division of the University has, at the direction of President Campbell, been placed at the disposal of the Red Cross for the organization work in the state of Oregon, and has been accepted. The tender was made by Director Earl Kilpatrick, of the extension division, to John L. Clymer, director of the Pacific division of the Red Cross, with headquarters in San Francisco.

Work under this arrangement has already been begun by the extension division. Alfred Powers, a newspaper and magazine writer of recognized ability, has been engaged for three months beginning June 1 to direct the publication work that will be undertaken by the extension division for the Red Cross. Mr. Powers, who is a graduate of the University of Oregon, class of 1910, is coming to the University at a salary considerably less than he has been receiving in his position as superintendent of the Oakland (Or.) schools, because of his interest in Red Cross work and his desire to be of service.

The University extension division will be the center of all Red Cross work in the state of Oregon. The services of all departments of the division will be employed, and the extensive system of lectures given throughout the state will be devoted to Red Cross ends so far as may be desirable. Already the work of assisting in the organization of local units in widely-separated communities of the state has been begun, and in many places where there was doubt as to how to proceed in giving effective assistance to the great relief organization the necessary instructions are being given. The entire state has been mapped and studied in connection with the needs of the Red Cross, and the extension division, being in close touch with what is doing in each community to cooperate with the Red Cross, hopes to be able to strengthen existing chapters and to organize several others in important centers.

While in the national capital during his recent trip east, President Campbell mentioned to the assembled heads of state universities the matter of placing extension facilities at the disposal of the American Red Cross. The idea was received with enthusiasm, as it was also at national Red Cross headquarters.

The extension division will be glad to be of any assistance desired to the various Red Cross chapters formed or forming in the state.

WILL NOT CURTAIL SERVICE

Public Need Not be Alarmed Over Order to Railroads

"No serious inconvenience will be occasioned the public by the readjustment of the railroad service to meet the needs of the government. This assurance was telegraphed from New York by Julius Kruttschnitt, chairman of the executive committee of the Southern Pacific company and member of the railroad war board. The message will serve to allay apprehension of the general public that passenger service will be radically curtailed. Mr. Kruttschnitt's telegram indicated that the railroad war board has done nothing more than to suggest avenue of inquiry and investigation to determine means to increase transportation efficiency. The positive statement has been made that the board has neither directed or suggested that the roads reduce passenger service to the extent of seriously inconveniencing the public. So far no reductions in passenger service have been made beyond some in local and commuting service on eastern lines, and this, it is pointed out, should not cause alarm to anyone. The meeting of traffic men in Chicago June fifth was for the purpose of considering only the elimination of such service as constitutes duplication or unnecessary facilities. At Southern Pacific headquarters in San Francisco it was declared that the needed facilities for travel would always be available and that no one need have any worry as to interference with summer plans.

BEETLE INJURES BEANS

Usual Remedy Will not Apply to This Pest, Says A. L. Lovett

Young bean plants just beginning to grow well are being attacked by a small spotted beetle. This beetle is about the size and general appearance of a Lady Bird beetle, greenish-yellow in color with twelve black spots on the wing covers. They usually appear in considerable numbers and feed voraciously on the foliage, soon ragging the plant so thoroughly as to deplete it or even kill it. In addition to beans, practically all garden and truck crops are subject to injury by this beetle, particularly squash, cucumbers, corn and egg plant.

The usual recommendation of applying some poison to the foliage as practiced for most leaf-chewing insect pests will not serve in the case of this beetle unless supplemented by what is known as the trap-crop system. A spray or dust applied to the plant acts as more or less of a repellent and it is somewhat difficult to get the beetle to feed on treated foliage. Therefore in order to avoid their going down below ground and eating off the stems of the plants, it is advisable to leave a few plants here and there, known as a trap crop for the beetles to feed upon and treat the rest of the field. The most practical method is, in cases where beans are to constitute the main crop, to plant here and there through the bean field a few hills of squash. The beans should then be dusted with a powder consisting of sulphur 85 parts, powdered arsenate of lead 15 parts, and the squash vines should be left untreated. The beetles will then collect on the untreated plants and may be killed by mechanical means there. Where no other crop is available as a trap, a few hills of

Another Unmatchable Offering!

A Sale of

Minuet Silks

In 36-In. Width at \$1.49 Yard

In the Fashionable New Checks and Stripes Also Changeable Effects in Yard Wide Gros De Londres Silks

Two great offerings at a special price. Included are the beautiful new Minuet Silk in 36-inch widths. They come in the extremely fashionable small stripes and checks in rich, dark colorings; also yard wide Gros De Londres silks in changeable effects with rich jacquard over designs in contrasting colors, exclusive patterns, strictly high-grade silks of the finest quality especially priced for this sale at **\$1.49**

Splendid New Stock of Middy Coats and Smocks at \$1.00 to \$3.98

These popular garments are shown in Lonsdale Jean and Linens and in a full assortment of sizes and styles for both women and misses. Come make selections NOW, while our stock is at its best.

New Silk Mixed Suitings and Waistings at 75c Yd.

Just received—an unsurpassed assortment of beautiful new Silk Mixed Suitings and Waistings in the fashionable plain colors and pretty figure and stripe designs. All are in 36-inch widths.

Latest New Styles in

Women's Wash Skirts

At a \$1.25 to \$6.50

—Your particular attention is called to our splendid new stock of Women's Wash Skirts. Styles are the latest and best and values are unequalled. They come in white pique, white middle cloth and other fashionable materials. The new sports skirts are meeting with unusual favor. See them at your first opportunity.

More New White Waistings 36 to 40 Inches at 25c to 60c Yard

By far the best and most extensive line we have ever shown. Our Third street window display will give you some idea of the beauty of these new White Waistings. Over 200 different styles to select from. Your immediate inspection is invited.

A Special Sale of Men's New Sport Shirts at 55c

Styles with long or short sleeves in plain blue, white and in assorted stripes in fast colors. The following sizes on sale at the above special price: 25 in size 14; only 14 in size 14½; only 3 in size 16½; only 7 in size 17; only 6 in size 17½. Don't delay your visit to this sale.

ORGANIZE WELFARE CIRCLE

Mrs. W. L. Mulvey Elected President of Local Branch

At a well attended meeting in the Commercial club rooms here Monday a Child Welfare Circle was organized, with Mrs. W. L. Mulvey, president, Mrs. M. D. Latourette, vice-president, and Mrs. E. C. Latourette, secretary-treasurer. Judge W. N. Gatens, of Portland, gave an interesting talk on juvenile court work and Mrs. John Waldron, of Concord, also spoke. Mrs. Herbert Vernet was appointed a committee of one to obtain members. The next meeting of the circle will be held in the Oregon City library, June 18th.

Local Lad Buys a Bond

Lloyd Anderson, six years of age, son of Mr. and Mrs. E. B. Anderson, is probably the youngest bond owner in Oregon City. This young patriot is helping his country, for he has \$50 invested in a liberty loan bond and is helping win the war.

ZEROLENE The Standard Oil for Motor Cars

ASPHALT BASE—THE CHOICE OF EXPERTS

Factory experts, and leading coast distributors for all makes of cars, testify that Zerolene, correctly refined from California asphalt-base crude, gives perfect lubrication with least carbon deposit.

Less wear and more power because Zerolene keeps its lubricating body at cylinder heat. Less carbon because, being made from asphalt-base crude, it burns clean and goes out on exhaust.

Zerolene is the oil for your car—whatever the make—the oil for all types of automobile engines. For correct grade get our lubrication chart covering your car.

At dealers everywhere and Standard Service Stations

STANDARD OIL COMPANY (CALIFORNIA)

FORD

HUDSON

W. H. WALLINGFORD AUTHORIZED FORD AGENCY PORTLAND OREGON

Gentlemen: From our experience with Zerolene light in Ford cars, we are able to say that we have secured uniformly satisfactory results with this oil.

While we do not attempt to dictate to the owners of Ford cars the brand of oil which they shall use, we do know that Zerolene will give them efficient and satisfactory lubrication.

Very truly yours, W. H. Wallingford

H. O. HARRISON CO. DISTRIBUTORS HIGH GRADE MOTOR CARS

Gentlemen: Many owners of Hudson Super-Six cars use Zerolene. We hear nothing but praise for it as a lubricating oil, and we know from our own experience that it gives perfect satisfaction.
