Resume of the News of the Week from All Parts of Oregon

Governor Withycombe's notification to Clatsop county officials that bootlegging and gambling conditions at Astoria and around the mouth of the river must be mitigated bore fruit Saturday night and Sunday.

The governor's orders reached District Attorney Erickson Friday. They were based on numerous complaints, the governor said, which had been received from officials of the Woman's Christian Temperance union and others, that much liquor was being drunk and considerable gambling was going on in Astoria and adjacent places. Officials were told that unless these conditions were speedily abated a special prosecutor might be appointed.

Results were swift. Saturday night a number of resorts in Astoria were raided. Eleven men were arrested for being drunk, one for selling liquor and seven for gambling.

Today, when the steamer Northern Pacific arrived at Flavel, she was met by a squad of 16 officers, representing the Sheriff and police, who found considerable liquor.

The stock of Mrs. Charles Gregory's women's furnishing store at Dallas, Ore., was totally destroyed by fire Saturday night. The fire was discovered at 11:45, and immediately reported to the night watchman, who was using the fire hose to flush the street, but upon breaking in the whole room was found to be a mass of flames and none of the \$10,000 stock was saved.

The fire was caused by defective wiring, and the loss was partially covered by a \$6500 insurance. It is impossible at this time to estimate the great loss from smoke and water to the stock of the Dallas grocery, which is located next door.

The logging camps at Powers, Summer, Ten Mile and Coos River closed Monday night for the Fourth of July season and will remain idle until Friday morning. The loggers generally are celebrating at Bandon and Powers and some will visit North Bend and Marshfield, neither of which places are holding formal celebrations.

Some of the loggers left Saturday for San Francisco on the steamship Kilburn.

A conservation mass meeting to be held here about July 19 is contemplated in connection with the visit of Carl S. Vrooman, Assistant Secretary of Agriculture, to Portland.

Plans for the meeting are still tentative. W. J. Kerr, president of the Oregon Agricultural college and a member of the Oregon Council of Defense, has been in communication with President H. L. Corbett, of the Chamber of Commerce, and the Council of Defense will cooperate probably with the Chamber in arranging the meeting. W. H. Crawford, of the local conservation office, expects to hear in more detail from President Kerr today.

Mr. Vrooman is due in Portland July 18, and will be there for two days. A trip in the forests with Geo. H. Cecil, of the local forestry office, will be arranged, and the conservation rally, if held, will give the public a chance to hear Mr. Vrooman before he leaves the city.

Two new batteries of Oregon Field Artillery are soon to be recruited, if present plans are carried out, and one of these at least will be raised in Portland. With Battery A, the oldest artillery organization in the West, Oregon then would have given a complete battalion of field artillery to the service.

Captain Cicero Hogan, in charge of recruiting for the Oregon National Guard, at 106 Fifth street, Portland, asks especially for saddlers, horse-shoers, blacksmiths and cooks to join the proposed batteries.

Johnny William, the small son of Mr. and Mrs. J. C. Duckwall, of the Odell district near Hood River, is recovering from a serious case of strychnine poisoning. The little boy, discovering a box of pills used by his grandmother for heart trouble, ate a generous quantity.

Nolan Moore, 17 years old, adopted prominent residents of Seaside, was killed almost instantly Sunday morning when the light automobile which he was driving plunged down a 50-foot embankment on the Tillamook road to Neah-kan-nie Mountain, about three miles south of Seaside. Mrs. Moore suffered several bruises and a dislocated knee cap and Mrs. L. C. Henry was badly cut about the head. Mrs. Olivia White, the fourth occupant of the car, escaped practically unhurt.

An incubator baby, a four-pound mite of humanity, is the latest attraction in the maternity ward at the Good Samaritan hospital, Portland.

She is Miss Taylor, daughter of Mr. and Mrs. Fred Taylor, 83 East Seventieth street North, and she arrived by means of a Caesarean operation Saturday night.

At present she is fed nothing but water, of which she is given two or three teaspoonsfuls at a time. The water is dropped into her mouth from a medicine dropper. Later a diet formula will be prepared for her, and she will be allowed milk.

The Jensen shingle mill in Wheeler, Ore., was destroyed by fire Sunday morning; loss \$10,000, no insurance. The mill was of three-machine capacity and was shipping two to four cars of shingles each week.

The adjoining lumber-mill plant was saved. This fire is a big blow to the shingle industry of this district and leaves a large crew of skilled workmen without employment. Mr. Jensen left today for Portland to try and raise funds for rebuilding his mill.

BEST OF ALL ASSETS.

Character It Is That Wins the Great Battles of Life.

"God Almighty hates a quitter," said Tom Reed of Maine. The nation roared applause from the Atlantic to the Pacific and from the lakes to the gulf for the virtue of this rough expression of manhood. The sentiment is one of perennial value.

But what makes the man who does not know when he is defeated and fights to the finish, be the finish his or his opponent's? Is it not character, and is not character at bottom only the moral equivalent of stalwart backbone?

The quitter fails, and fails because he lacks the force of character. The strength of will, which sees possibilities beyond capacities and regards obstacles as opportunities, discouragements as incentives. The fight which is worth attempting at all is the fight which deserves to be fought through. "It's dogged as does it," as when Freeman said to Sayers, "Now, Tummy, lad, 'tis thou or I," and he won the last round and the match.

There was character. It may not have been ideal character. It certainly was not character in its highest expression. But it was the sum of the man's whole personality. All the power of him, all the pith and punch of invincible determination, went into the winning of his fight. The bulldog shows the same strength of will when he lets himself be choked or cut to pieces rather than let go his grip on the other dog's jugular.

It is this readiness to be killed, if need be, if one cannot best one's adversary, which wins the battle of life for men and the wars of nations for their existence. Such a readiness is a form of character and the product, whether aware or unaware, of a fight to achieve character. It is the reaction of the spirit to the long working of life and circumstances upon the raw and plastic ore of human nature.

Make money, then, and do so honorably. Get understanding for the sake of social service as well as your own growth. Win power over men through right methods of approach and appeal. But with all your getting and gains achieve character above all.

Nothing can take the place of character. It knows of no substitute. Cleverness, cunning and shrewdness are paper money. Character is the gold which alone gives them value. Pierpont Morgan rated character above collateral as security for loans and credit. Character is the best of all assets.—Spokane Spokesman-Review.

Hints to Milliners.

"No successful milliner can work alone," says a milliner in the American Magazine. "If she does her hats will come to have a sameness year after year that will lose her patrons. If she cannot go to Paris she must visit shops, such as mine is at present, and see as many smart people as possible. This is a fact generally recognized by all good shops. Those in the middle west and far west who cannot send their representatives abroad send them to New York instead, and the smaller milliner who cannot afford even this must keep up with the smartest people in her own town and the nearest large cities and even supplement this by the smart trade magazines."

Grow Rhubarb in Your Cellar.
To cultivate a fine specimen of rhubarb you do not need any garden at all, but just a corner of a cellar and an old barrel or deep box.

Bore a dozen holes in the sides of your barrel for ventilation and a few in the bottom for drainage. Then place in it a layer of clenders about two inches deep and cover this with ordinary garden soil. Now plant your roots side by side, and cover them with another layer of earth.

Water them occasionally and keep the top of the barrel covered with a piece of carpet.—Pearson's Weekly.

"Is It Safe?"

The Great Western railway, as part of its "safety" movement for the prevention of accidents to its employees, has issued a token which it is hoped will remind railway servants to think before taking action. The token, which is of brass and the size of a penny, bears the words: "In every action ask yourself, 'Is it safe?' This will disclose unseen dangers, inspire forethought, induce care and prevent accidents." On the reverse side of the token is the inscription, "A charm against accidents. 'Is it safe?'—London Times.

Save the Dollars.

Few exist who are unwilling to be handed a fortune. Few exist who are unwilling to work for it.

Many educate and train to become expert dollar getters, and they qualify. But they are willing money spenders and are a long way from dollar piles and money mastery.

Develop your dollar pile. The main chance is while dollar getting. Think!—Detroit Free Press.

Time to Go.

"Did you know that the Bentleys are moving?"

"Moving? Why, they've only been here a year. People are just beginning to get to know them."

"That's why they are going."—New York Times.

Could Sympathize.

He—I told your father frankly I couldn't support you. She—What did he say? He—He said that he had the same experience.—Exchange.

Be gentle, but like the nettle, which is not so gentle that it is trampled on.—Youth's Companion.

Straightened Him Up.

Solomon Bequette, Flat River, Mo., writes: "Two years ago I was down on my back till I could hardly go. Foley Kidney Pills straightened me right up. I recommend them to all who have kidney trouble." Rheumatic pains, aching joints, sore and swollen muscles indicate that the kidneys are not properly filtering impurities from the blood. Foley Kidney Pills get right at the trouble and give prompt relief. Painful, irregular and sleep-disturbing bladder troubles also yield quickly to their tonic healing action.—Jones Drug Co.

THE FASHIONS

Yellow sands and cool, breezy shores will very soon begin to draw the usual crowds that flock to the seaside in the summer months.

This season sees the bathing suits carrying out the same colorful note that predominates in sports clothes, and in materials there is also a similarity, namely, in the use of one of the most favored of fabrics—wool jersey. This versatile material seems to make itself at home in any sphere. After having made its importance felt in sports clothes, one-piece frocks and semi-formal suits, the bathing suit has been lately added to its conquests. Yet, other materials compare very favorably with jersey cloth at the fashionable beaches. Black satin has lost none of its usual charms; taffeta, mohair, alpaca and poplin still retain their popularity; and the rubberized cloths are likewise favored to a great extent.

If the one-piece slip-on frocks have been a success in our every-day life, the same style adapted to bathing

suits is still more successful. One could ask for nothing more practical than the one-piece bathing dress worn over bloomers, and to it may be added all the prevailing fashion features. There are suits of this type decorated with embroidery, with deep trimming bands, large pockets, and with girdles arranged according to the latest whims of fashion.

Following out one of the late styles in skirts is the bathing skirt illustrated with a deep band at the lower part. This band is stitched at the front and back, but the sides are loose to give the effect of bulging pockets or an adaptation of the barrel idea which is still exploited by certain designers. This suit is of black satin with the band of striped satin.

The second sketch shows a chemise bathing suit fashioned of wool jersey with a trimming of braid, and the pointed pockets and long, soft girdle which are featured again and again in the frocks of the hour.

White Turkish toweling with a light blue border trims a dark blue taffeta suit very effectively, forming the sailor collar and a band at the edge of the skirt. White pique and tussur silk collars appear on many suits, and braid is a very popular trimming.

A complete bathing outfit by no means ends with the selection of the suit. Beach wraps, hats and caps, shoes and stockings, are quite as important. There are sets of matching hats, shoes and huge bags which are considered very smart. Rubberized silks in plain colors, as well as striped and flowered effects, are especially attractive for the beach wraps, which are usually made with very large collars.

In hats and caps, the choice lies between round sailors with straight brims and rather high crowns, and the small, close-fitting rubber caps. Tam-o'-shanters and the Chinese shaped hats are also seen a great deal. On many hats and caps there are novel ornaments of rubber in bright contrasting colors.

To be without a sweater at the seashore is almost as bad as being without a bathing suit. The knitted wool sweaters made with body and sleeves in one seem to be at the height of popularity just now. They are mostly of the kind that is slipped on over the head, with an opening only at the neck. Some of the newest ones are knitted to fit closely at the waist, with the top and the lower part knit more openly. They are usually light length. Knitted in silk, these look more like waists than sweaters. Orange, rose, light green and royal blue are very prominent colors, sometimes relieved by white collars and cuffs. They are worn with white linen, gabardine, flannel or silk skirts.

There is a wonderful variety of separate skirts for sports wear and general use. The models are box pleated, side pleated, gathered or plain, cut in two or three pieces, and generally carrying large pockets.

EXCHANGE STOCK RANCH AND RANGE. 1120 acres; good land and ranch, 400 acres in cultivation, 300 acres or 400 acres more can be put in cultivation; mostly all under good barbed wire fence; will produce fine wheat or rye; plenty of water for stock; fair buildings; 1 mile to school; 90 head Durham cattle; 45 cows and steers; balance young stock. Free of encumbrance. Must change climate on account health. Will exchange for farm in valley.—Dillman & Howland, 8th and Main street, Oregon City.

The Oregon City Courier and the Oregon Daily Journal (except Sunday) for \$4.75.

HOW SOUTHERN FARM TENANTS ARE MANAGED

President Wilson's suggestion to southern farmers, that they plant foodstuffs instead of cotton, has raised the question, whether he did not overlook the fact that a large percentage of southern farmers are tenants and are not free to decide what they will plant. The question was put to a southern landowner, a thorough democrat, who is doing what he can to change the system which gives him economic control of others. He says:

It is the usual custom on delta plantations, by contract, that the tenant plants just as the landlord directs. In other words, I not only tell my tenants what to plant but how to prepare the land and when to plant it, also what variety of seed to use. This is absolutely essential to the proper management of a plantation. In fact, I refused to rent last year to some Italians because they would not agree with me to plant the properties as land and to work the land as directed by me at all times. I found that under the system of not having control of this, they were permitting my land to be seriously damaged by not rotating crops.

The tenant is not told to plant cotton or to get off the place. He is simply told to plant cotton or to plant corn, whatever the landlord wishes.

In certain parts of the delta, tenants have been required to plant all cotton, or nearly all, but, in the main, they desire to do this. There are some exceptions. In my case, however, I have insisted upon each tenant's planting for himself a garden, and, in addition to this, I have required the tenants to plant a larger acreage in corn than most of them desire. I, of course, have to raise all of the corn by wages crop, because as a rule, I cannot rely upon the tenant to raise his own corn. He will not give it proper attention, but, in addition to this, as a rule, he consumes a very considerable portion of this in roasting ears, etc., before the corn is laid by. In order, however, that the increased acreage that I require the tenant to put in should not interfere with his profits to any extent, I did not charge him rent, as is usual, for corn, but simply took an interest in a crop, but, in doing that, I am requiring him to set apart mine separate from his, in order that I may get my proportion of the corn.

RAILROADS START MOVE TO UTILIZE ALL SPACE

Uncle Sam's tremendous war business has already begun to move and is the principal reason behind the concerted campaign undertaken by the railroads to induce the shippers not to waste an inch of car space. Estimates by the New York Journal of Commerce indicate that 64,000 freight cars will be needed to haul construction materials to the 16 cantonments which will house the new American army. This does not include cars that will be needed to move troops nor the 3,500 to 5,000 workmen who will be attached to each military city. Then, too, it must be remembered that many of these cantonments will be located where no terminal railroad facilities exist, and these will have to be constructed before work on the cantonments themselves can start.

Figures given out by the War Department indicate the tremendous burden that will be placed upon the railroads.

Concrete work in each cantonment is estimated to require 4700 barrels of cement, 1400 cubic yards of sand, 2500 cubic yards of broken stone or screened gravel, over 2500 kegs of nails, 5,600,000 board feet of boards, 7,800,000 board feet of dimension stuff, 177,000 feet of 4x4 inch timber, 2,800,000 feet of flooring, 1,200,000 feet of siding and 1,400,000 feet of matched boards. These figures in the northern and southern states to allow for climatic adaptations. The northern states will require more lumber than given above.

Estimates of the total requirements of electrical equipment for the sixteen military cities amounts to 20,800,000 feet of insulated wire, 260,000 feet of lamp cord, 125,000 key sockets, and about the same number of shades; 150,000 cleat receptacles, 22,000 snap switches, 27,800 combined switches and plug cut-outs; 75,000 plug fuses; 3,000,000 pairs of unglazed porcelain tubes; about 7,000,000 1 1/2 to 2 1/2 inch wood screws; 9,600 pounds of friction tape, 4,000 pounds of solder and other items on a similar scale.

In order to extinguish fires in these cantonments about 8300 fire extinguishers, 5000 water casks, 120,000 water pails and 380,000 feet of hose will be on hand.

The plumbing calls for about 1,600,000 feet of pipe, 40,000 closets and tanks; 30,000 shower bath heads, and tremendous quantities of pipe fittings, sinks, boilers, etc.

Bear in mind that while the railroads are hauling all this load for the government over tracks and into terminals that they have been compelled in many cases to build especially for the purpose, all the factories of the country must be kept supplied with fuel and raw materials, the huge crops must be moved to market and the greatest industrial traffic the country has ever known kept moving smoothly day and night.

Patriotism of the American people will have to be indicated by making maximum use of freight cars in the future. Perhaps the greatest economic waste of today is in failure to utilize freight car capacity. Averages show that but 43% of car space is used. Increased loading is an obvious necessity if the government is to be supported properly.

Fined for Smoking
Milton Morse, George Liechner, Clarence Fossard and Percy Stevens, monomers, who were arrested Sunday for smoking cigarettes, were fined \$5 each by Justice of the Peace John R. Kelso, in Milwaukee Monday.

TYPEWRITERS WANTED

Men Are Needed for Service in Quartermaster Corps

The United States Civil Service Commission announces that, as a sufficient number of male and female stenographers will not be secured from the examination to be held June 30, 1917, to meet the needs of the public service, an examination has been announced to be held at forty of the principal cities in the Northwest on July 7th.

Men typewriters without a knowledge of stenography are desired especially in connection with the Quartermaster Corps, U. S. Army, at an entrance salary of \$1000 per year. A majority of the clerks in the Quartermaster Corps, U. S. Army, are being selected from the typewriter register, and all male typewriters who can qualify are urged to apply for the examination July 7th.

Arrangements will be made by the District Secretary to examine all persons who write to him, subject to the subsequent filing and approval of applications, provided the request is received at Seattle in sufficient time to arrange for examination at the place nearest to the applicant's residence where the examination will be held.

Inquiries concerning the July 7th examination should be addressed to Herbert F. Ward, Secretary, Eleventh Civil Service District, Room 303, Post Office Bldg., Seattle, Washington.

CAPT. NEWTON MARRIED

Mrs. K. L. Newton Agreeably Surprised at Son's Announcement

A dispatch stating that a marriage license had been issued in Chicago to Frank Newton, who is a captain in the United States army, came as an agreeable surprise to Mrs. K. L. Newton, of this city, mother of the

prospective groom. Mr. Newton was formerly in business here and was at one time employed in the purchasing department of the city of Portland. He is a Spanish-American war veteran.
