AMERICAN EFFICIENCY

Germany's efficiency has been held up as a degree of excellence unattainable by a democracy. The accomplishments of the United States since April 6, 1917, refute the truth of the claim. In the short space of time since that day the United States has accomplished the following:

Declared a state of war as existing between this country and Germany; seized 91 German ships and begun repair work on them;

Authorized unanimously a war fund of \$7,000,000,000;

Appropriated \$600,000,000 for merchant shipping and as much for air fleets;

Agreed to loan our Allies \$3,000,000,000 and advanced them a large proportion of that sum;

Passed a selective draft law and in a single day registered nearly ten million men for military service;

Enlisted 600,000 volunteer soldiers in the Regular Army and in the National Guard of the States;

Sent a Commission to Russia to aid Democracy there and a body of railroad men to Russia and another to France to advise and assist in railroad transportation in those countries;

Began the construction of 32 camps for our soldiers;

Sent to England a fleet of destroyers and to France a detachment of troops;

Authorized and now enforcing, and barge, whereby our enemies will receive no more food or material from us;

Passed a food conservation law;

Organized many voluntary commissions and boards who are aiding the government and the people in the speeding up of work, conservation of food, and other national movements;

Drafted by lot 687,000 men for military service;

While the government was accomplishing these things the American people have loaned the United States \$2,000,000,000 and offered \$1,000,000,000 more, over four million citizens subscribing to the loan.

In addition they have given over \$100,000,000 to the American Red Cross and \$3,000,000 to the Young Men's Christian Association.

All these things were accomplished while our soil was not invaded or even threatened with invasion and without any disturbance of business conditions. All was done with the calm determination and judgment of an earnest, patriotic people performing a service for civilization and mankind and maintaining the rights, the dignity, and the honor of the greatest nation in the world.

The German leaders declared America's entry into the war as a bluff. This is our answer.

The German Imperial Government was nearly fifty years in perfecting its military efficiency. In less than four months the American republic has made such strides as to indicate that in less than two years' time the boasted superiority of German efficiency will have been discredited. There is such a thing as American efficiency, and time will prove that German efficiency cannot withstand it, fighting as it is for liberty, justice and humanity.

THRIFT THOUGHT

Madam Housewife, It can be used in many ways in preparing your family's meals. Here is one suggested by the United States Department of Agriculture:

Take a slice of bread and ends of leaves on the back of a stove or in a slow oven. Crush with rolling pin and serve the fragments with milk or cream and sugar and fruit, if desired, as a breakfast food.

This product closely resembles some commercially prepared breakfast foods and is obviously less expensive.

About the State

George W. France, postmaster at Ten Mile for the past two years, was arrested there Monday and taken to Portland, where he will be arraigned before a federal commissioner on a charge of attempting to prevent army enlistments.

France was recently acquitted on a charge of insanity. His Socialist influence is said to have created considerable trouble.

Three prisoners at the penitentiary walked away from the day field honor camp at the prison Sunday and are still at large. They are Charles Burnett, serving from three to 16 years from Multnomah county on a charge of larceny from a building, and Herbert Matthews, alias Curtis, serving seven years from Marion county on a charge of attempting to commit an unlawful crime of rape. A third, whose name is not known, is also at large.

Insurance Commissioner Wells has received advice from Salem from the various members of the Oregon Congressional delegation in reference to the protest filed by the Insurance Commission some time ago against a plan to obtain marine insurance on ships going directly to the head offices of the respective insurance companies, rather than through Oregon agencies.

Four more cases of poisoning were reported among children in Bend, Monday, believed to have been caused by the eating of candy found in the ruins of a hotel recently destroyed by fire. It is thought that the candy absorbed toxic substances generated by the heat of the fire.

Only one death, that of 5-year-old Henry Couillard, has so far been reported, and physicians hope that the lives of the others may be saved.

That officers of Klamath county are preparing to take summary measures in the disposition of I. W. W. cases coming up there is indicated in a telegram received at Salem by Attorney General Brown from District Attorney Duncan, of that county. The Attorney General is asked if under the vagrancy law a Justice of the Peace can require those found guilty to work on a rockpile, or if imprisonment sentences are pronounced, if the sheriff can, upon order of the court, require prisoners to work on a rockpile or on roads.

Ill health caused the suicide in McMinnville Sunday of J. K. Agee, a pioneer of Yamhill county. Mr. Agee shot himself through the head and died almost immediately after. He left a note to his son, William Agee, whom he was visiting, saying that his suffering was greater than he could bear.

Mr. Agee lived in Portland. He was a pioneer of the early '50s. He is survived by 13 children. The funeral will be held Friday.

Shot by Granddaughter Mrs. C. D. Dickie, 49, of Oswego, was accidentally shot by her three-year-old granddaughter, Lucile Dickie, Sunday and sustained a fracture of the right thigh. She was sent to the Good Samaritan hospital. Her condition is serious.

Mrs. Dickie was alone in her home with the child when the accident happened. She lost considerable blood, and is very weak. The granddaughter found the revolver on a bureau in a bedroom.

Spiritualists Close Meeting Sunday was the last day of the Spiritualists' camp meeting at New Era and the following program occupied the day: Mrs. Nettie Kioh and J. Metcalf in messages and addresses in the morning. In the afternoon, Dr. Almon Ira Lucas, a Portland psycho-analyst, and Mrs. J. Downes, of Portland, were heard. There was a great camp fire in the evening.

82nd Street Open The 82nd street road between this city and Portland has been opened for automobile traffic, it was announced by Roadmaster T. A. Roots. This is the only big piece of work on roads that will be done in the north end of the county this summer and work will be centered on the roads to the south, especially on the New Era hill to eliminate dangerous grades.

Robert Murray and A. J. Halbach, who were employed at the Crown-Willamette mills here, left for Vancouver, B. C., Saturday to join the Canadian army.

A meeting of the Western Wain Association will be held at 10:30 a. m. next Saturday at Dundas, Ore. The subject for discussion will be "Cultivation and Filling." An invitation has been extended to all those interested in walnut culture to attend the meeting.

Robert Susmich, of Garden Valley, and Earl Davis, of Winchester, members of the Fourth Company, Coast Artillery, were discharged from military duty last prior to the departure of the troops from Sunday following protests by their parents. It is reported that the boys were anxious to see the government and had concealed the fact that they had joined the artillery company until a few minutes before the soldiers were to leave for Fort Stevens.

Susmich is the son of a prominent Garden Valley farmer and is only 16 years of age. His brother is now serving in the army.

The body of John Watkins, which was picked up on the beach near Oysterville, Wash., was sent last week to Eugene. Watkins was a father and left Hammond last Monday morning with his father, Thomas Watkins, on the launch Tillie to troll outside the mouth of the river. The father is still missing and is supposed to have been drowned.

That State Fire Marshal Wells' inspections started in the state by the Portland inspection in Salem, finished last week, are to bear fruit is evidenced in the statement of Mayor Walter E. Keys Monday that an ordinance is being prepared to cover the salient features in the report.

The report included 23 recommendations covering water supply, fire department, school and general conditions.

\$100.00 IN GOLD FOR ORIGINAL SHOW POSTER

The board of directors of the Manufacturers and Land Products Show wants an original and striking design to be used in advertising the big Oregon exhibition to be held at Portland, November 3 to 24, 1917. In order that the best talent in the state may be employed at the task and that the product shall be the finest advertising poster ever shown on the Pacific Coast, a cash prize of \$100.00 in gold will be given for the best and most effective design, in colors, the competition to close August 10, 1917. The terms of the competition are:

The finished poster must be representative of Oregon's manufacturing enterprises and farming possibilities, must be patriotic in tone and suitable in coloring effect for advertising the big show on billboards and indoors as well.

Poster must be made in three colors, when printed, and design must be of suitable size to be enlarged or reduced to size 24x36 inches, approximately.

The design accepted shall become the property of the Manufacturers and Land Products Show, with full rights to its use and copyright.

Designs must be submitted not later than August 10, 1917, to David M. Dunne, president of the Manufacturers and Land Products Show, 704-S Oregon building, Portland, Ore., in colors as desired in the finished poster.

All the designs submitted shall be passed upon by a representative committee, and designs failing to win the prize shall be returned to artists submitting them without delay.

ROUND-UP TO COST \$30,000 Expected to Exceed Attendance of 1916 Fifty thousand dollars will be expended by Pendleton in putting on the 1917 Round-Up, September 20, 21 and 22, which insures the very best in contests, horses, steers, performers and contests worth seeing. Special Pullman trains have already been engaged and will come from Portland, Spokane and St. Paul. The attendance will be equal to if not greater than 1916. The railroads have granted the usual special rate of one and one-third fare for the round trip from all points in the northwest. The railroad officials assure the management there will be no falling off in attendance and the only question with them is whether or not they will be able to furnish the equipment.

Shot by Granddaughter Mrs. C. D. Dickie, 49, of Oswego, was accidentally shot by her three-year-old granddaughter, Lucile Dickie, Sunday and sustained a fracture of the right thigh. She was sent to the Good Samaritan hospital. Her condition is serious.

Mrs. Dickie was alone in her home with the child when the accident happened. She lost considerable blood, and is very weak. The granddaughter found the revolver on a bureau in a bedroom.

HOME-MADE EVAPORATOR FOR HOME-GROWN STUFF

Growers of win-the-war crops may save the most valuable part of their surplus products by evaporating them at home in a simple and cheap home-made evaporator designed by the O. A. C. Horticultural department and fully explained in Extension Bulletin 215, now ready for distribution. The title of the bulletin is "A Moderate-Sized Evaporator for Fruits and Vegetables." Photographs and drawings are used to make plain the text, and by means of all these almost any one who cares to undertake it may build at home an effective evaporator.

The capacity of this evaporator is six bushels. Since most of the evaporated products can be dried out to a good keeping stage in about six hours, it is readily seen that the products may be handled in commercial quantities if two or more families go in together and build and operate one of these evaporators in common.

By following the ideas of the bulletin in a general way it will frequently be possible to construct the drier out of such materials as are at hand, or to remodel some unused building, such as the smoke-house, with heat produced by the idle heater at the laundry stove.

Men and women who used to sundry their fruits and keep off the flies by mosquito netting for several days to each batch find great satisfaction in drying their fruit and vegetables in a few hours, rain or shine.

HISTORY OF CRATER LAKE TOLD BY FATHER OF PARK

Judge Will G. Steel, who is known in Oregon as the "Father of the Crater Lake National Park," told this story at the recent National Parks Conference in Washington:

Forty-six years ago I was a farmer's boy in southern Kansas and attended school five miles distant. My lunch was carried in a newspaper. One warm day in May or June I sat in the schoolroom eating the contents of that paper. When through I scanned the columns, reading the short articles, among which was a description of a sunken lake that had been discovered in Oregon. It was said to be 5,000 feet below the surface of the surrounding country, with vertical walls, so that no human body could reach the water. In its center was an island 3,500 feet high, with an extinct crater in the top. In all my life I never read an article that took the intense hold on me that that one did, and I then and there determined to go to Oregon and to visit that lake and to go down to the water.

Two brothers in Portland at the time. Two years thereafter I went to Oregon with my parents and we were met at the steamer landing by my brothers. Before getting over the dock I asked them where that sunken lake was, and found that they had never heard of it.

It was seven years before I was able to find anyone who had ever heard of it. Then I was told that there was something of that sort in southern Oregon, but my informant was not sure. Nine years later I found a man who had actually seen it and he gave me a good description of it and greatly increased my desire to see it. However, I was not able to get there until the summer of 1885, when we made the trip in company with three friends, arriving there in July.

Crater Lake was discovered by a party of twenty-two prospectors, led by John W. Hillman, then of Jacksonville, Oregon, June 12, 1853, and named Deep Blue Lake. Mr. Hillman was the last survivor of this party and died in Hope Villa, Louisiana, March 19, 1915, in the eighty-third year of his age.

While standing on the rim of the lake in 1885 with Professor Joseph LeConte, the thought occurred to me that no point around this wonderful cauldron had the hand of man yet desecrated with peanut stands or other marks of desecration, and that something should be done to save it forever for the people of this great country.

How to accomplish this was the question, so I turned to the professor for counsel. We discussed it at length and finally decided the only way was to have a national park created. Ways and means were discussed and the work of preparation commenced then and there. A petition to the president was prepared, asking for the withdrawal from the market of ten townships, which petition was granted the following January, when President Cleveland issued an executive order to that effect.

The work of interesting Congress commenced immediately and continued for seventeen years, when a bill was passed and signed by the president May 22, 1902, the anniversary of the marriage of my parents.

NEED STENOGRAPHERS BADLY Men and Women Urged to Take U. S. Examinations

The United States government needs, and needs badly, great numbers of stenographers and typewriters, both men and women, for service in the departments at Washington, D. C., and the situation in federal offices outside of Washington is scarcely less urgent. The supply of qualified persons on the Civil Service

WHAT CATARRH IS

It has been said that every third person has catarrh in some form. Science has shown that nasal catarrh often indicates a general weakness of the body; and local treatments in the form of snuffs and vapors do little, if any good.

To correct catarrh you should treat its cause by enriching your blood with the food in Scott's Emulsion which is a medicinal food and a building tonic, free from alcohol or any harmful drugs. Try it.

Scott & Bowne, Bloomfield, N. J.

I WONDER WHY THEY ARE TELLING MEN WHAT EVERYBODY HAS KNOWN FOR 85 YEARS!

THE POINT IS: NOW YOU CAN GET THE GENUINE GRAVELY AROUND HERE!

GRAVELY'S CELEBRATED Chewing Plug

BEFORE THE INVENTION OF OUR PATENT AIR-PROOF POUCH GRAVELY PLUG TOBACCO MADE STRICTLY FOR ITS CHEWING QUALITY WOULD NOT KEEP FRESH IN THIS SECTION. NOW THE PATENT POUCH KEEPS IT FRESH AND CLEAN AND GOOD. A LITTLE CHEW OF GRAVELY ENOUGH AND LASTS LONGER THAN A BIG CHEW OF ORDINARY PLUG.

P. B. Gravely Tobacco Co. Danville, Va. ESTABLISHED 1832

EVERYBODY IS FALLING INTO STEP - BILL POSTERS BILLBOARDS ARE BEING READ

Commission's lists for this class of work is not equal to the demand, and the Commission urges as a patriotic duty that citizens with this special knowledge apply for examination for the government service.

At present all who pass the examination for the Departmental Service are certified for appointment. Large numbers of stenographers and typewriters are needed for the Field Service, and practically all men who pass the field examination are appointed at an entrance salary of \$1000 per annum. Many women are required for various branches of the Field Service, and recently 20 women stenographers and typewriters have been appointed in the Puget Sound Navy Yard.

Examinations for the Departmental Service are held every Tuesday in 47 cities in the Eleventh District. Examinations for the Field Service will be held on August 18th.

For full information and application blanks apply to Herbert F. Ward, District Secretary, 11th Civil Service District, 303 Post Office Building, Seattle, Wash.

August and September unless it is controlled. It is this generation of worms that increases the loss to growers and now is the time to spray for them.

From Corvallis south, spray August 1 to 6. From Corvallis north, August 4 to 8. Use the arsenical solution applied as a fine misty spray, making every effort to cover the entire surface of the fruit. Evidence now indicates, concludes Prof. A. L. Lovett, O. A. C. entomologist, that a second application about August 25 to September 5 will be highly advisable.

Take Girl to State School Beulah Marcum, 14 years of age, was taken to the state training school for girls by juvenile officers Thursday. The girl's mother is seriously ill and cannot look after the girl, according to the officers.

"Results are Better"

MITCHELL
Mitchell Motor and Service Co., Seattle
"Results are better and cost of operation considerably lower while using Zerolene."

BUICK
J. D. Lauppe, Sacramento
"have found Zerolene to be a satisfactory lubricant for Buick automobiles."

DODGE
