

TANANNA, A WILD YUKON JUNCTION

(Continued from Page 1)

put it until he got sober, so he declared I was a Siwash and he went to the bar alone.

"Austrian Joe" had sat in his chair and made no remarks while the bully tried to provoke me to a fight, and I concluded that what "service" a guest got in this dump he would have to fight for.

Joe refused the man a drink, told him he had had enough. "You're a liar," said the longshoreman. Like a cat Joe sprang from his chair, there was a quick, overhand blow on the temple and over went the "bad man," falling backwards with a crash. For a minute he lay dazed, then arose. Joe held open the door and told him to beat it before he got it again. He ambled. Then Joe came over to me and remarked, "That's the way to handle it to 'em, my boy. Don't let any man call you a liar."

And I wished mother were there to advise me.

"Austrian Joe" was a man 65 years old—a "square man." He was one of the early comers in Alaska and had a string of saloons along the river towns. In my long stay in that town I got to know him well, and I passed many hours of the early mornings with him, listening to his stories of the early days.

But back to the first morning. At about four o'clock the saloon began to fill up. One after another they came in—and they were the toughest looking bunch of men I ever saw. The most of them were boat hands, the toughs who follow the river. There were Swedes, Frenchmen, Greeks, Russians, and one giant negro "nigger" Green. Then there were the miners and prospectors from Nanan and the Fairbanks districts, who were going outside. Some had "made it," and were joyously celebrating, some had been working for wages, and were spending cautiously, but all were drinking, or waiting to be asked to a drink.

A big Greek started something. He was drunk, dry and busted. Joe refused to let him open a bar account, when he grabbed a water pitcher and declared he would have it through the bar mirror. Joe, on the opposite side of the bar, struck him in the face with his hat, and before the Greek could recover from his astonishment, Joe had jumped over the bar and made a strike for his temple. The Greek ducked and took the blow on top of his head, and then he begged. The door was opened and he followed the first tough.

I wondered what manner of a town and hotel I had gotten into, and I went out for a walk to think things over. I went up to the post where a couple of small government boats were unloading at the wharf, and sat down to watch them and kill time until the breakfast hour. Soon a man with a boat cap on came up and began an argument with the mate. "Come ashore you sneak," he said, "and I'll make you look more like a baboon."

The mate ran up the gang plank and the two brutes went at it, fighting like dogs, while the soldiers gathered around and enjoyed the set-to. Down in the mud they rolled, grasping at each other's throats like maulmettes, and striking each other in the face. Finally the mate went under and he said he had got enough, and the victor let him up. And when he stooped over to get his cap from the mud the cowardly boatman struck him in the temple. He fell like a log, and then the mate kicked him in the face with his heavy shoes until the deck hands rushed in and stopped him. It was a horrible spectacle of brutality.

Then there was a scattering. I got the hunch and faded. Two days later the post commander was searching the town for witnesses, as the injured man had demanded an investigation. It was said that not a single witness could be found, except the deck hands. The soldiers were too far away to see the details, and I didn't see it at all.

It developed that both men had worked on the boat, and having had trouble the mate had got the other fellow fired. So he went up to get square. Two days later he was on the street with a terrible blackened and swollen face, and declaring he would "get that Siwash."

And all these strenuous incidents happened within five hours, and that night I had nightmare.

The government's orders had just come in to Tananna forbidding the sale or giving of liquor to any soldier in uniform—and what a roar went up. The soldiers were crazy mad—that is many of them were. A big fellow came into the hotel, followed by a dozen or more and started his howl.

"What do you know about it?" he yelled. "We soldiers of Uncle Sam are 'Siwashed'—we're in the same class with the fish-eating Indians, posted at the bars, and forbidden a drink, just because the W. C. T. U. in the States is afraid some little Willie boy might get hold of a glass of beer in some mobilization or training camp. Don't Wilson know that Alaska is a country by itself?"

And then he declared that he would count the days until his time expired and he could be a white man again. And the other soldiers backed his play to the grandstand. And in the small hours of the next night I was told the soldiers went on a mass drunk, as a protest against the restraining order and as a demonstration that they could get plenty of booze bottled and bootlegged.

"Austrian Joe," whose sympathies I surmised might be with Germany, told me that for weeks the soldiers had been "just a-rarin'" to go to the front; that they wanted active service and declared that it was "more than hell" to be shut in this winter, while Pershing and his boys were smelling powder in France.

Then he said an order came per-

mitting all the soldiers who wished to leave to go to the front, and he said only 12 in Fort Gibbon signed up. "Noise is one thing, fighting is another," Joe observed. "Alaska in the winter time looks bad to the soldiers, but the trenches look worse."

Not having slept much the night before I went to bed early that night, but sleep was impossible on account of the noise of carousing in the bar-room below. It was a din of pool balls, songs and cursing. From long force of habit, night is day in Alaska, and even during the summer months there is far more action at night than in day. Very few, except the river hands, arise before noon.

As I lay in bed I wondered if the towns kept getting tougher on the lower river, and if so about what would I find at St. Michael.

BOYS START FOOT BALL

High School Eliminates All Hazing and Holds Tug-of-War

Twenty-five high school boys turned out late last week for the first football practice of the season, and are enthusiastic over the excellent outlook for a good team this year. The enrollment in the high school is 40 per cent boys, according to Superintendent F. J. Tooez, and in the lot is material for a fast gridiron squad, regardless of the fact that some of last year's brightest football stars have left school.

Monday the freshmen and sophomore classes staged the first tug-of-war contest but it was not decisive and the boys of the two classes will hold a bag rush on Canemah field next week for a decision. This form of sport is arranged to permit the young fellows to vent their early season enthusiasm, which formerly was directed to hazing. The juniors and seniors participated in a tug-of-war the same day and the juniors won. The winning teams of the two contests will battle for school supremacy.

The heavy registration of boys in the high school is an unusual feature in view of the conditions which attract the attention of boys away from school, Superintendent Tooez says.

Pigs—3 months old, \$8.00 each.—Orlando Fellows, Hoff, Rt. 1. Phone Beaver Creek.

GRADUATE REWARDED

Teachers Trained in High School Here Get Fine Positions in State

Maude Kennedy, who was graduated from the teachers' training course at the Oregon City high school last year, has been offered a teaching position in this county. Miss Kennedy was one of the most interested pupils in the work she was taking last year and her success as a teacher is freely predicted by School Superintendent F. J. Tooez.

Nearly all the graduates of the training class, about 30 in number, have been placed in excellent position this year, according to Superintendent Tooez. Salaries range between \$50 and \$75 a month. That the innovation of a teachers' training course in the Oregon City high school has been highly popular, especially with the girls, is indicated by the fact that the high school boasts the largest class of students in teaching work of any school in Oregon.

Seeks Divorce

Jennie Poulos, married to Tom Poulos at La Grande, Union county, on July 13, 1915, seeks a divorce on the ground of desertion through a complaint filed in Judge Campbell's court here Friday. They have a son 5 years old. Mrs. Poulos wants to resume her maiden name, Jennie Dyer, and wants \$100 attorney's fees.

Hubby Used His Fists

The alleged cruelty of Harry R. Shadburn is the basis of a divorce complaint filed in Judge J. U. Campbell's court here yesterday by Elsie A. Shadburn. The couple was married in Oregon City on April 8, 1911. Mrs. Shadburn charges that her husband repeatedly struck her with his fists so forcibly as to bruise and pain her.

She Charges Cruelty

Anna M. Johnson, charging cruelty and non-support, Tuesday filed suit for divorce from Carl Johnson, to whom she was married in this county on May 30, 1914. His treatment was such, the complaint says, that Mrs. Johnson was forced to leave their home at Gladstone on June 27, 1916.

Gets Money and Children

Judge Campbell yesterday signed a divorce decree in favor of Mrs. Mary T. Schultze, separating her from I. R. Schultze. The decree gives Mrs. Schultze custody of two minor daughters and calls for the payment by Mr. Schultze of \$20 a month for their support.

Probate Petition

Mary Ackerson, widow of Truman C. Ackerson, Friday filed a petition in the county court to have her late husband's will probated. The estate comprises principally a 51-acre farm valued at \$4000, and there are 11 heirs to share in it. Mrs. Ackerson lives at Donald, Or.

Says He is Bigamist

Charging that her husband, Dave Drullard, has another wife at Muskogee, Mich., Jennie M. Drullard Saturday filed a divorce case against her husband. The couple was married on July 7 last at Portland. Mrs. Drullard asks the restoration of her maiden name.

Sues For \$200

Seeking a judgment for \$200 for professional services, Fearey Bros., of Portland, Saturday brought action against Augusta Jaeger.

General Farm Topics

SAVE THE BREEDERS.

Every Animal Capable of Breeding Should Be Retained on the Farm. (Prepared by United States department of agriculture.)

DON'T SELL BREEDING ANIMALS.

Maintain and increase breeding herds. Feed cheap roughages. Feed live stock as little human food as possible.

The temptation of high prices now being offered for live stock and the uncertainty about the prices of feeding stuffs have led to the selling for slaughter.

PERCHERON MARE.

ter of breeding animals in some sections of the country. This is a serious mistake. Farmers should not sell their breeding animals unless they can replace them immediately with better ones. Every breeding animal is absolutely essential to the maintenance of the live stock of the country. There is a shortage of meat animals throughout the world and farmers cannot hope to import new breeding stock to replace those now foolishly killed off. Every breeding animal must be regarded as the seed essential to the domestic meat and draft animal supply of the nation.

Feeds not available or needed for human consumption should be used as largely as possible in feeding live stock. By feeding straw or corn stover, especially for wintering mature stockers and breeding animals, farmers will make the best possible use of these roughages. In this way a large proportion of the straw and stover ordinarily burned or wasted can be manufactured into meat and milk. Grain roughages, wherever they are available, should be fed to release corn for human uses. Grain, where fed, should be used as economically as possible.

Every animal should be a factory for turning into food material inedible for human beings. This will necessitate changes in many feeding formulas, and stockmen are urged to apply at once to the United States department of agriculture or their state agricultural colleges for information as to the most effective and economical methods of feeding live stock under existing emergency conditions.

Pruning Necessary.

Pruning is a necessary part of orchard practice, says C. W. Rapp of the Oklahoma Agricultural College of Horticulture. An unpruned tree is much like an untrained horse—both can work and will work well if properly trained. It is true that an untrained tree will produce some fruit, but it will not do its best. Much of the energy that should be directed toward fruit production will be used to produce useless wood. The tree will grow excessively and will often become misshapen. Proper pruning—the removal of dead, dying, diseased and excessive wood—together with the proper shaping of the tree, is an essential part of successful orchard practice. Such treatment must be followed if the orchard is expected to produce fruit as it should.

Profitable Pork.

Eighty-eight pounds of juicy pork made in eight weeks, and in some instances as high as ninety to 100 pounds, is the pace made by the Oregon experiment station, and made recently. It was done by using a well balanced ration. If such gains can be made on common materials in experimental feeding let farmers strive to do as well in home feeding.

Cultivate Cabbage.

It will pay in dollars and cents to take care of the cabbage crop this year, says M. F. Ahearn, associate professor of horticulture, Kansas State Agricultural college. Cultivate the crop, keep down weeds and fight insects. The most dangerous insect enemies of the cabbage crop are the cabbage worm, the cut worm and cabbage aphid.

Mrs. Moore Leaves

Mrs. Carl Moore, who was a deputy in County Clerk Harrington's office for some time after the resignation of her husband, who enlisted, will leave late this week for Los Angeles, where she will take up musical studies. Mrs. Moore before her marriage to Carl Moore of Gladstone was a popular performer on the Orpheum stage and since her marriage has delighted many local audiences with her pleasant voice.

Courier and Daily Journal—\$4.75.

PAIN IN THE BACK.

It Should Not Be Ignored, as It May Mean Serious Trouble.

Backache, like headache and many another ache to which the human frame is subject, is a symptom that may be caused by a great many different conditions.

A chronic pain in the back may mean very serious trouble. Tuberculosis does not respect any part of the human body. When it attacks the spinal column it is called Pott's disease. Among the initial symptoms is a backache that the patient complains of long before signs of deformity show themselves. If the backache is ignored much valuable time may be lost. A careful examination at the earliest complaint of pain and stiffness may give the physician an opportunity to prescribe a course of treatment that will arrest the disease before it causes deformity. The tuberculin test enables the physician to make sure that the backache is not caused by a less serious condition. A negative tuberculin test means that he must look further for the cause of the pain.

Much backache could be spared young adolescents if they would persistently carry out a system of simple calisthenics designed to strengthen the back. If they begin it in childhood it will prevent many of them from outgrowing their spines. Of course all children should use the seats and desks that enforce a good attitude.

In many cases of young adolescents who have grown very rapidly it will be found advisable to permit the wearing of a carefully fitted support or belt. In older persons who suffer from constant backache the cause may be a weakening of the abdominal muscles. In that case an abdominal belt becomes a necessity.—Youth's Companion.

GREAT NATURAL BRIDGE.

Justice Marshall Called It "God's Greatest Miracle in Stone."

The great Natural bridge, which is one of the natural wonders of the United States, overlooks the James river valley, in Virginia, being on the western slope of the Blue mountains. It is just about the center of the state. It approaches Niagara in grandeur and exceeds it in height and awful mystery. It is a single block of limestone, with many shades of color. The walls are smooth, as if cut with chisels, and there is no sign of displacement. The visitor follows a tumbling cascade down a deep fissure in the mountain under some of the largest arbutus trees in the world and, turning down a line of steps cut into the rock, suddenly finds himself by a swift stream in a dark canyon and the great bridge far above him.

Washington when a surveyor for Lord Fairfax visited the Natural bridge and carved his name, where it may still be seen. The original bridge tract was granted by King George III, to Thomas Jefferson in 1774. After he was president Jefferson visited the place, surveyed it and made the map with his own hands. Jefferson spoke of the place as "a famous place that will draw the attention of the world." Chief Justice Marshall wrote of the bridge as "God's greatest miracle in stone." Henry Clay wrote of "the bridge not made with hands that spans a river, carries a highway and makes two mountains one."

Value of the Apple.

The apple is pre-eminent in the household economy, for no other fruit excels it in culinary usefulness. It graces the table in a far greater variety than any other fruit. Of all fruits grown in North America the apple leads in amount and intrinsic value. No food of an overproduction, however, if the means of transportation and distribution are perfected. What if we do raise 125,000 carloads of apples or 62,000,000 boxes a year? This is but half a box to a person, not counting what we export. That isn't very many.—Exchange.

Scandinavians.

The term "Scandinavians" is not confined to the Norwegians. The Norwegians are indeed Scandinavians, but so also are the Swedes, Danes and Germans. For that matter, the English, French and Americans of English stock are also of the Scandinavian stock, since it is more than probable that Germany was originally stocked from the land of the northmen, and it is from the north German stock that the so called Anglo-Saxon comes.

Chemistry of Human Body.

The average human body, besides the carbon, hydrogen, oxygen and nitrogen of which it is chiefly composed, contains three and three-fourths pounds of lime, one pound eleven ounces of phosphorus, two and two-thirds ounces of potassium, and one and one-half ounces of sodium, one and three-fifths ounces each of magnesium, sulphur and silica and about one-sixth of an ounce of iron.

A Japanese Bridge.

One of Japan's most interesting monuments of antiquity is the bridge of the Brocade Garden, built in the sixteenth century, a mass of pags and crude joints—not a nail of metal in the entire length of 750 feet, and as good today as when built.

Ways of an Orchid.

One of South America's curiosities is an orchid which has a peculiar tube that it lets down into the water when it wants a drink. At other times it is kept curled up.

Australia.

Australia is the largest island in the world. Its area is nearly three-fourths that of Europe.

Reese Wants Citizenship

Jacob Reese, an Austrian barber of Oak Grove, Monday filed application for final certificate of citizenship. Reese has been in America since April 4, 1903, and is the father of five children. He and his family came to Oregon on April 11, 1911.

Wants Pay for Services

A. G. Thompson yesterday filed a suit in the circuit court demanding payment of \$500 for professional services from Jessie E. Crim. Thompson charges that only \$160 of a bill totaling \$660 has been paid.

GARB OF OUR ARMY

How Uniforms Have Changed Since Colonial Times.

EFFICIENCY NOW THE RULE.

The Picturesque Dress of the Continentals and the Bearskin Coats of 1812 Would Look Sadly Out of Place in These Practical Days.

There is little in the businesslike, simple uniform of the American soldier reminiscent of the colorful, bizarre garb of the early army of the United States.

From the time of the Revolutionary war or soon thereafter the tendency was steadily toward simplicity, but it was not until after the war with Spain that khaki was adopted and the easily visible blue trousers and shirt discarded.

Today the American soldier's uniform is designed for comfort, serviceability, protection from both weather and discovery by the enemy—in short, for efficient service. What some of the picturesque old uniforms were devised for is more than one can say unless it was for their picturesqueness.

Washington's armies, when they had uniforms, wore the familiar "Continental" of buff and blue or gray, but regiments from different states had for the most part uniforms of their own.

The majority wore whatever clothes would protect them without regard for uniformity. One part of the American troops who received the surrender of Cornwallis at Yorktown were in uniform, but the most of them still wore rags of homespun.

The uniform for the period between 1802 and the war of 1812 reflects the style adopted by European armies for the time. The three cornered cocked hat of the revolution had been abandoned, and the officers wore chapeaux bras, while the enlisted men of the infantry and artillery wore round leather hats with bearskin crests, creating a very picturesque effect.

During the war of 1812 several types of uniform were worn by the American forces. There was little left to remind one of the Revolutionary war. Instead of the long cutaway, enlisted men wore single breasted, close buttoned coats, with the skirts fashioned after the civilian dress coat of the day. Facings disappeared, and the collars became enormously high, rising to the tip of the ear. Hats were high, some infantry wearing headpieces much like those worn by the calmen of the days just preceding the taxmen.

Coats of the infantry and artillery were uniformly blue and were made somewhat in shape by an order issued in 1813, the long tails being found inconvenient in the field and in fighting through wooded country and underbrush. The word "coatee" was coined for the new garment, and the only trimming consisted of tape on the collar. The high hat was changed to the bell crowned leather shako, and worsted or leather pompons replaced feathers.

Distinction between dress and field uniforms began to be made about the time of the war of 1812. The full dress consisted of the hussar jacket, and the shako had a double plait in each fold. The collar and sleeves were worked with silver braid. The trousers were white cassimere or buckskin for parade and dark blue for service.

Knee breeches sometimes were worn on social occasion, with yellow knee buckles instead of strings, yellow buckles in the shoes and a chapeau bran instead of a cap. The waistcoats were of white cloth in winter and of jean or nankeen in the summer.

When the Mexican war began a distinctive campaign uniform was adopted. The flat, soft forage cap came into prominence, and the frock coat was worn by officers. Men and officers alike discarded cross belts, but wore one body belt and a waist belt. The artillery wore jackets, which did not entirely disappear from the service until after the war between the states.

The influence of the French victories in Italy was reflected in the zouave dress that was fashionable when the war of the sixties began, and the dark blue blouse and sky blue trousers of our own service of that time fixed for years the fashion of state troops from one end of the country to the other.

After that war it was some time before the trappings which had been abandoned for field work were restored.

In the eighties the uniform was much as it was during the Spanish-American war, except that men and officers wore helmets much like those of the London bobby of today, instead of the slouch felt campaign hats used in Cuba. The coats were dark blue short frock coats and the trousers light blue. Stripes on the trousers denoted the branch of the service, and in the case of the officers plumes on the helmets were used.

It was not until after the Spanish war that khaki and olive drab came into vogue, although the marines and a few infantry units tested it in the war with Spain. The light blue trousers and dark blue coats are still worn in garrison for semidress uniforms, but in the field olive drab is the color.—Reheboth Sunday Herald.

A word spoken, an army of chariots cannot overtake it.

LEAVES BROTHER \$50

A petition for the probate of the will of Paul Paulson was filed in the county court yesterday by the widow, Sophia Paulson, who is the chief beneficiary under the terms of the will. Paulson died September 2, last, and his bequests are few. He left \$50 to his brother, Erick M. Paulson, and his widow gets the entire balance of his estate, estimated to be worth approximately \$10,000, of which \$1740 is the value of personal property. Mrs. Paulson lives in the vicinity of Lents.

RECEPTION TONIGHT

Commercial Club Will Entertain Boys Called to the Colors

The Oregon City Commercial club will act as host to the 21 men who reported here this afternoon for service in the national army. The young men from all parts of the county will be entertained with a fine program of music and with brief speeches made by prominent local men. In addition to the 21 who comprise the quota which will depart early tomorrow for American Lake the five alternates called into the city will also attend the reception.

Sheriff Wilson is in charge of the party of young men who will take up the tongs of war upon their arrival at American Lake tomorrow evening. He has arranged accommodations for those who do not remain with friends in the city.

DIED

Edwin S. Warren

Funeral services for Edwin Samuel Warren, who died at Portland Tuesday, will be held today in Finley's chapel, interment to be in Mount Scott park cemetery. Rev. W. E. Brinkman, of St. James' English Lutheran church, Portland, will conduct the services.

Mr. Warren was born in Oregon City January 6, 1866. He served as a member of the Oregon City council and as captain of company F. O. N. G. He moved to Portland in 1900 and remained there until the time of his death.

Surviving Mrs. Warren are a daughter, Mrs. F. P. Gram, of 329 East Thirty-ninth street, Portland, two grandchildren, Warren F. and Dorothy Jane Gram; two sisters, Mrs. C. O. T. Williams of Oregon City, and Mrs. J. E. Magers, of Portland, and two brothers, W. H. Warren, of Hood River, and James M. Warren, of Seattle.

Courier and Daily Journal—\$4.75.

The Telephone Eliminates Distance

OVER 1800 cities and towns in California, Oregon, Washington, Idaho and Nevada can be reached over the long distance lines of this Company.

When you have goods to sell, materials to buy, or orders to place, use "Long Distance." It will be found prompt, inexpensive and satisfactory.

You are there and back by telephone in the time it would take to pack your grip for a journey.

"Ask for Pacific Long Distance"
