

THE ESKIMOS OF THE LOWER YUKON

(Continued from Page 1)

near the camp I could see that it was located at the bottom of a little depression on the hillside, where evidently a small stream ran. On either side of this stream were exactly similar draws, where small streams had worn down channels and where they all came together at this bottom and emptied into the Yukon. But it was only on the middle stream that the pay streak was found. The other streams were exact counterparts, and all conditions were the same, yet only the middle one had the yellow stuff.

And such is mining in Alaska. There is no explaining it. Mining experience does not count. A "cheeko" stands a better chance than a "sour dough," for he will stake anywhere, and often strike it, while the experienced miner will try to figure it out, and miss it. Of all the gold countries of the world Alaska is said to be the most uncertain—the biggest gamble. A "sure thing" won't show a color and 50 to 1 shot will come through a winner.

I had been wondering where the upper river Indian would leave off and the Eskimo commence. I found it was at Marshall, and it was most curious. Not a sign of an Eskimo in any of the towns we had passed, and in Marshall they were nearly all of that race, breed, tribe, or whatever they are. And the curious observation was that the Indians and Eskimos are almost as distinct as the Indian and white man.

It was a strange sight to me—this sudden change. The Indians had suddenly disappeared and in their places were the short, fat and squatly Eskimos, looking wonderfully strange to a newcomer in their parkas and mukluks. Men and women dress alike, and a little distance away you cannot tell a squaw from a buck.

The men have large, round bodies, like a tree trunk, and short legs. The women are short and fat. All have the same face cast—broad, high-cheeked stupidity. All wear the parkas and mukluks winter and summer, but the most of them wear the hoods of the parkas thrown back in summer.

You have all seen pictures of the Eskimos with their one piece dress and fur lined hoods. These pictures are true to life. A following article will more fully describe these interesting people.

The strike on Willow Creek was made by some "sour dough" prospectors, a rush followed and the river supply town sprang up in a day. There are two stores, two saloons and the usual bunch of log cabins. After the pay streak had been narrowed down to the one creek, the men began to go out, and I was told 300 miners have left the camp within the last six months. Yet I was told that the cleanup that day from one of the claims was \$40,000. I was first on shore at Marshall and as I watched the passengers come off, waiting for my roommate, I saw the man who asked me to carry his baggage in my stateroom from Dawson. He had stowed away somewhere in the bottom of the boat eight days and nights. How he got food and water I do not know, but probably with a bribe to the steerage hash hoister.

While we were tied up to take on oil, from a tank high on the river's bank, two Eskimos came alongside in their kayaks—boats made of walrus skins. One gave an exhibition of boat handling and harpoon throwing. The boats are very light, round bottomed, and there is a hole in the center just large enough to let one's body in. They tip as easily as an egg shell, and it takes long practice and many duckings before a white man can learn to balance in them. One peculiarity is that they use a one-end paddle instead of the long double-end usually used in canoes, and they keep changing it from one side to the other.

On the boat was a party of four tourists who did not mix with the rest of the passengers—two men, a boy and a young lady. The boy had every indication of being a "mam-ma's pet." He had his breakfast brought to his room and spent a lot of time polishing his nails. The passengers soon dubbed him "Ceil." He was a journalistic student, so it was said.

As we watched the native do his canoe stunts and expressed our admiration of his dexterity, the boy remarked that it was no great trick to ride a kayak.

One of the passengers asked him if he had ever ridden one and he replied no, then he advised him that he was hardly competent to express an opinion. "I'll bet you a dollar I can ride that kayak the length of two barges and back and not capsize." "You're on," the tourist said and both gave a dollar to a lady passenger to hold.

Then the fun commenced. The boy went to his stateroom and stripped down to his undershirt and trousers, and every passenger on board went below and forward to the head barge, from where he was to make his start.

The captain got a life preserver which an Eskimo in the other kayak took and prepared to follow the boy and pick him up when his boat went over.

The lad was plainly nervous, but he was game. For a long time after he had got into the boat he held onto the barge, apparently afraid to let go. The passengers hooted him. But he took his time, waited until he had got over his nervousness and then carefully let go. For a full minute he sat perfectly still, then slowly picked up the paddle and put it in the water. With the first motion of his body the light canoe began to rock, but the boy seemed to fully realize that if he made any motion to grab the sides he was a goner, so he kept his head, kept his balance and let it rock.

In a few minutes he was carefully paddling, only on one side. Then he slowly changed over to the other side. Each minute he gained confidence, and then he began to crack jokes at the passengers, all the while keeping his eye on his work.

"See me make that turn?" he called out, as he got to the end of the barge and made the turn. "Going to challenge the Indian to a race as soon as I win my dollar." He made the prescribed course in safety, then made it the second time, so the man who had bet with him could have no squeal, and the second time he told the Eskimo not to follow him. It certainly was an exhibition of nerve. After that we didn't call him the pet.

The show was over, the oil was stored, and we fell back to speculating on whether or no we would catch the Umatilla. We were making very slow progress with our family group of boats, and the prospects were cloudy.

I awoke in the night. The boat was still. I opened the door and looked out. A dense fog had settled over the river and we were tied fast to the shore trees. No boat would dare move a rod after a fog comes. It is impossible to see a rod ahead, and without the shore signs a pilot would soon have his boat tied up fast for days—until another steamer comes up or down and pulls him off.

And the chances of making the Umatilla looked more slim each hour.

CLARKES

(Too Late for Regular Page)

Judge Anderson came out to this place on Monday evening, October 29, and addressed a meeting for food conservation.

W. H. Wettlaufer went to town on Tuesday on business.

Clark brothers went to Molalla last Monday on business and they purchased a horse.

T. E. Anderson, manager of the Clear Creek creamery, motored through Clarkes and Timber Grove the other day.

Young girls in Clarkes had a gathering at the home of Mr. and Mrs. Sam Elmer last Saturday afternoon.

Miss Ida Zwahlen left for town on Wednesday morning for a short stay.

The Clarkes school had a program last Friday with a few visitors present.

The Clarkes school had a Halloween program on Halloween day.

Boat brothers are improving their farm. They are clearing a patch of stumps and dead snags near the road.

Miss Mary Bottemiller is staying with Mr. and Mrs. Ralph. She has been under a doctor's care for the past few months. She also visited her aunt and uncle, Mr. Alvin and Mrs. Nettie Kleinsmith, and her cousin, Lorena Kleinsmith. She also called on Mr. and Mrs. Scherrie, who were former residents of Clarkes. Mr. Scherrie has been ill for a year.

Mr. Sullivan motored to Portland last Sunday to visit his family. Mrs. Sullivan is on the sick list.

W. H. Bottemiller and son, Kenneth, went to Milwaukee last Sunday to visit his mother and sister, Mrs. Lena Keller.

Sam Elmer is digging his potatoes with the aid of Robert Zwahlen. Farmers are wishing for rain, because the weather is too dry. They are idle, as they cannot plow nor sow.

We had a hard frost last Saturday night which ripened the potatoes that were still green.

PARKER-RUSSELL NUPITALS

Chas. Parker, Local Engineer, Weds Portland Young Woman

The home of Mrs. F. S. Leverett, of Portland, was the scene of a pretty wedding Thursday evening, when her niece, Miss Hazel Russell, became the bride of Charles T. Parker, of Oregon City. The Rev. Oswald W. Taylor, of Portland, officiated and the bride was attended by her cousin, Miss Kathleen Sealy, as maid of honor and by Miss Loreen Parker as bridesmaid. Ralph Parker was best man. Mrs. Bruce Stewart sang before the entrance of the bridal party and Miss Geraldine Coursen played the wedding music.

At the informal reception which followed the wedding ceremony the coffee urns were presided over by Mrs. Francis Sealy and Mrs. Clyde Mount. Assisting about the rooms were the Misses Marcia Parker, Elizabeth Murphy, Eileen Sealy, Marguerite Thomas and Florence Strief. Misses Irma Austin and Lila Miller were in charge of the punchbowl.

After their wedding trip to southern California, Mr. Parker and his bride will make their home in Oregon City. Mr. Parker is expecting orders to active duty as a lieutenant in the engineer corps of the army.

HOLLAND BOND \$2000

Man Indicted for Larceny Has Bond Increased by Court

Harry Holland, of Portland, indicted by the grand jury this week for larceny from the dwelling of C. E. Bolds on the Tualatin river, was brought into court last Thursday and his bond was raised to \$2000. The sum was furnished by a brother, Holland and G. W. Clark, also of Portland, are jointly charged with the theft of many valuable articles from the Bolds home. He is said to be under indictment in Portland and is also wanted at Vancouver, Wash., on similar charges. Officers had searched several days for Holland before he was found.

And speaking of strikes: It isn't the plutocratic, unfair employer, nor the workingman who gets the worst of it usually. It is mother and the kiddies.

Notice of Road District Budget Meeting

Notice is hereby given that, pursuant to Chapter 234, General Laws 1913, and Chapter 222, General Laws 1915, a meeting of the legal voters of Road District No. 56, Clackamas County, Oregon, will be held at Upper Highland School House, in said district on the 24th day of November, 1917, at the hour of 10:30 o'clock A. M., for the purpose of considering the following estimates of the amount of money to be raised by special tax in said district for the ensuing year:

ROADS AND HIGHWAYS—Improvement and maintenance of Wm. Beeson Road, \$700.

Improvement and maintenance of Mires and Beeson Road, \$700.

Improvement and maintenance of Nicholas Road, \$700.

PROBABLE RECEIPTS—Probable receipts of said road district from sources other than from direct tax—taxation upon real and personal property for the ensuing year, \$2100.

BALANCES—Amount of all Balances on hand, none.

Subscribed by three resident freeholders of said district and by the road supervisor of said district this 20th day of October, 1917.

Also subscribed by County Judge. A. J. COTA, H. S. ANDERSON, County Judge. EMMA I. KANDLE, Freeholder. C. G. STONE, Freeholder. R. B. MASON, Freeholder.

Notice of Road District Budget Meeting

Notice is hereby given that, pursuant to Chapter 234, General Laws 1913, and Chapter 222, General Laws 1915, a meeting of the legal voters of Road District No. 8, Clackamas County, Oregon, will be held at Cherryville schoolhouse, in said district on the 24th day of November, 1917, at the hour of 10:30 o'clock A. M., for the purpose of considering the following estimates of the amount of money to be raised by special tax in said district for the ensuing year:

ROADS AND HIGHWAYS—Improvement and maintenance of Mount Hood Road, \$900.

Improvement and maintenance of North Road, \$135.

Improvement and maintenance of South Road, \$135.

Improvement and maintenance of Middle Road, \$630.

PROBABLE RECEIPTS—Probable receipts of said road district from sources other than from direct tax—taxation upon real and personal property for the ensuing year, none.

BALANCES—Amount of all Balances on hand, none.

Subscribed by three resident freeholders of said district and by the road supervisor of said district this 23rd day of October, 1917.

Also subscribed by County Judge. C. W. KERN, Road Supervisor Road Dist. No. 8. H. S. ANDERSON, County Judge. H. H. WATKINS, Freeholder. J. PARNELL AVERILL, Freeholder. A. W. BOTKIN, Freeholder.

Notice of Road District Budget Meeting

Notice is hereby given that, pursuant to Chapter 234, General Laws 1913, and Chapter 222, General Laws 1915, a meeting of the legal voters of Road District No. 44, Clackamas County, Oregon, will be held at Mount Pleasant Hall, in said district on the 24th day of November, 1917, at the hour of 7 o'clock P. M., for the purpose of considering the following estimates of the amount of money to be raised by special tax in said district for the ensuing year:

ROADS AND HIGHWAYS—Improvement and maintenance of ½ on Hog Hollow road, \$970.

Improvement and maintenance of ½ on Waldron road, \$970.

PROBABLE RECEIPTS—Probable receipts of said road district from sources other than from direct taxation upon real and personal property for the ensuing year, none.

BALANCES—Amount of all Balances on hand, none.

Subscribed by three resident freeholders of said district and by the road supervisor of said district this 31 day of October 1917.

Also subscribed by County Judge. A. S. NEWTON, Road Supervisor Road Dist. No. 44. H. S. ANDERSON, County Judge. CHAS. RIDER, Freeholder. C. REESER, Freeholder. JOHN BALL, Freeholder.

Notice of Road District Meeting to Vote Special Road Tax

Notice is hereby given, pursuant to Sec. 15, Chap. 299, General Laws of Oregon for 1917, that a Road District Meeting of the legal voters of Road District No. 56, Clackamas County, Oregon, will be held on the 24th day of November, A. D. 1917, in said Road District at the hour of 1:00 o'clock P. M., in Upper Highland School House to vote an additional tax in said road district for road purposes as by law provided.

H. S. ANDERSON, County Judge.

While the University of Oregon, having investigated, tells farmers that New Zealand is a new and profitable market for Oregon eggs, we, poor cusses, are forking over our 60 to 70 cents a dozen for the same kind of fruit right here at home. And merchants cannot supply the demands.

MOTORCAR ECONOMY.

How to Make a Gallon of Gasoline Go Further Than It Does.

In the first place, use care in the selection of fuel. Gasoline which does not vaporize with sufficient readiness to remain in the cylinders and is either burned or lost without developing its power. Furthermore, the gasoline must be pure, with a minimum amount of residue which will serve to form carbon.

Secondly, the gasoline must be burned under the most favorable conditions conducive to a development of maximum power following each explosion. Such conditions require tight piston rings and valves, which prevent the leakage of compression or the power of the explosion; a uniform and quickly attained engine temperature; a hot, fat spark occurring as early as is possible without producing a knock, and a sufficiently flexible carburetor which will give proper mixtures at all engine speeds. The above mentioned maintenance of engine temperature is an important consideration, especially in cold weather.

Thirdly, the carbon should be removed from the engine as soon as an undue accumulation is indicated, usually every 500 to 1,000 miles, depending upon the kind of oil used, the condition of the rings, the nature of the fuel, and the like.

In the fourth place, the mixture should be set to as lean a point as will run the motor under normal conditions when the engine is warmed to its average temperature. Nearly every carburetor will permit the needle valve to be screwed down one or more notches. In fact, it is well to set the carburetor to so lean a mixture that the engine will not pull properly before it is thoroughly heated. The difficulty thus encountered may be overcome by the use of the choke or other adjustments of the carburetor which serve to give a richer mixture when starting. A lean mixture may be further assured by the use of some of the well tried out attachments designed to furnish auxiliary air to the engine under certain conditions.

Fifth, the carburetor should be inspected by an expert and the strainer drained frequently to prevent the accumulation of dirt which may lodge under the float valve and cause the latter to leak when the engine is shut down.

Sixth, the engine should never be left running while the car is standing idle. If adjustments are properly made the engine will start easily, and the current from your starting battery is cheaper than gasoline. Furthermore, the engine should not be raced at random for testing purposes, unless you have a definite idea as to just where the trouble lies.

Seventh, all brakes should be free so that they do not drag, bearings should be well oiled, tires inflated to the pressure recommended by the manufacturer, and the whole car so free in its motion that it can be pushed by hand without difficulty on a hard level pavement.—H. W. Slauson in Leslie's.

Dynamite Whiskers.

The name "whiskers" is applied to fiery crystals which gather upon the outside of the wrappings of frozen dynamite. The "whiskers" are more "irritable" than dynamite itself. A case is on record where sticks of dynamite had been thawed out in hot water and the can of hot water in which it was done left in the blacksmith shop without being emptied of the residual scum of grease and whiskers. The first blow of the blacksmith's hammer on a nail by anvil was sufficient to set off the "whiskers" by concussion. The can was blown to pieces, but fortunately no one was hurt.

Waste From Small Leaks.

The importance of mending the thinnest leak in a water pipe is shown in a circular issued by a small city in which water meters are used. This, as quoted by Popular Mechanics, states that under a pressure of forty pounds in twenty-four hours 170 gallons of water will pass through a hole a shade larger than the period at the end of this sentence. An orifice the size of a fairly large pinhead will permit 3,000 gallons to escape in the same time.

Sap of a Tree.

Sap is pumped up through the wood in a tree and will even go through dead wood, but will not return by the same medium. Therefore a tree may live until the roots starve. Sap ascends on the inside and descends on the outside. Therefore the descending sap alone builds new tissue of wood and bark.

Three Legs of a Stool.

Andrew Carnegie was once asked which he considered to be the most important factor in industry—labor, capital or brains? The canny Scot replied, with a merry twinkle in his eye, "Which is the most important leg on a three legged stool?"—Christian Register.

Well Defined.

"Dad," said little Reginald, "what is a bucket shop?" "A bucket shop, my son," said the father feelingly—"a bucket shop is a modern cooperative establishment to which a man takes a barrel and brings back the bung-hole."—Puck.

An Egotist.

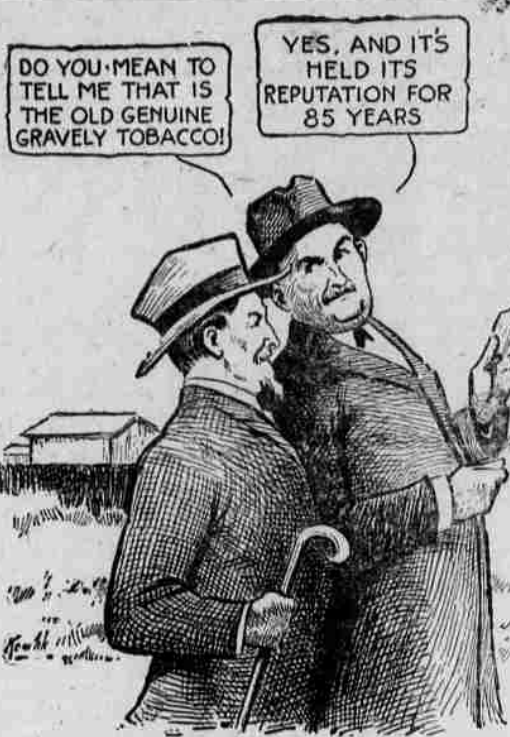

Tommy's Pop—An egotist, my son, is a man who thinks he can form an impartial opinion of himself.—Philadelphia Record.

Beware of the man who offers you advice at the expense of a mutual friend.

Unions Call Meeting

Union men have called a mass meeting to be held at Busch's hall next Saturday evening for the public discussion of their problems and have requested all union sympathizers to attend. Several prominent labor leaders are said to be ready to address the meeting. The meeting starts at 7:30 in the evening.

Are all those who have predicted the end of the war to be classed as prophets or liars?

GRAVELY'S CELEBRATED Chewing Plug

BEFORE THE INVENTION OF OUR PATENT AIR-PROOF POUCH GRAVELY PLUG TOBACCO MADE STRICTLY FOR ITS CHEWING QUALITY WOULD NOT KEEP FRESH IN THIS SECTION. NOW THE PATENT POUCH KEEPS IT FRESH AND CLEAN AND GOOD. A LITTLE CHEW OF GRAVELY IS ENOUGH AND LASTS LONGER THAN A BIG CHEW OF ORDINARY PLUG.

BELIEVE BILLY POSTER, THAT NEW POUCH IS A PEACH

STRIKE AFFECTS BIG MILLS

(Continued from Page 1)

then, the Crown-Willamette order will be one of the first the men will be asked to work upon.

The unions are firm in their demands and say that they will not give a bit of ground until they get what they ask for. They have issued a card of warning to all members, which says:

"Keep away! Don't be a strike-breaker and traitor to your fellow-workers. Company agents will misrepresent the conditions to you. Pay no attention to them. Be loyal to yourself, your fellow-workers and your country. Do your bit to make this strike a success. Notify others and ask them to remain away."

Manager Lewthwaite states that he was ready to meet committees representing the strikers as members of the force but not as representatives of the unions.

G. J. Schneider, first vice president of the International Union of Paper Mill employees, said that the workers are ready to mediate and attempt a settlement of the difficulties, and he added they might be induced to return to work while negotiations are under way.

Notice of Road District Meeting to Vote Special Road Tax

Notice is hereby given, pursuant to Sec. 15, Chap. 299, General Laws of Oregon for 1917, that a Road District Meeting of the legal voters of Road District No. 44, Clackamas County, Oregon, will be held on the 24th day of November, A. D. 1917, in said Road District at the hour of 8 o'clock P. M., in Mount Pleasant hall to vote an additional tax in said road district for road purposes as by law provided.

H. S. ANDERSON, County Judge.

Divorce Complaint

Martha Wilkerson, married to Samuel Wilkerson at Mystic, Ia., on February 26, 1896, Tuesday filed suit for divorce, charging desertion since July 11, 1916. Mrs. Wilkerson asks the custody of two minor children and title to property now in her husband's name.

Oswego Would Save

Owing to the great advance in the price of nicotine it is said the council will tear up and distill the floor of the council chamber, sell the nicotine recovered and use the money to pave Front street.—Oswego Times.

FARM AND GARDEN.

Use the poultry droppings where they will do the most good. Celery, onions, lettuce and cabbage are especially benefited by applications of poultry manure.

The best plant is easily transplanted, especially when the ground is moist and the weather cool and cloudy. An excellent plan is to use the surplus plants where the rows are thinned.

Golden Bantam sweet corn is at the top of the list for quality, but it will not yield so large a crop as Country Gentleman and Stowell Evergreen. These latter varieties should be selected for drying.

Don't grow small grains in the orchard. This is for the reason that they grow and require much food and moisture at the same time the trees are growing—namely, in early summer.

Field beans, where they can be grown, are excellent orchard crops and are not subject to the objection sometimes raised against corn, that it shades the young trees.

Sarcasm: The beautiful appearance of Oregon City's main street about three o'clock in the afternoon is a sight to impress strangers favorably with our fair city. It is so spotlessly clean that our street department has not seen fit to change its methods of cleaning since Hee was a pup.

Whatever you may think of strikes and their justification, you will notice that the walking delegate from the metropolis has a job—and the striker pays the wage.

Printer's ink is hard on the type-setter's apron, but it has never been known to soil the right kind of a merchant.

Let's tune up on that old Yuletide refrain: "Do your Christmas shopping early."

Service Flags Free

For our customers having one or more members of the family in Our Country's Service, in Army or Navy and purchasing merchandise to amount of \$1.00 or more we have arranged to give absolutely free

A Regulation United States Service Flag.

This flag is 2x3 feet in size and designed to be hung in the windows of the home from which members have gone to the service, and consists of one or more blue stars on a white field surrounded by an 8-inch border of bright red.

BANNON & CO.

Any time is dance time with a Victrola

The wise devotee of dancing should need no further reason for getting a Victrola—today! We might dwell on the fact that the Victrola as a dance "orchestra" affords always the best and the latest numbers, that its dance music is unflinching perfect in time, and that its musicians are the best; but to the true dance-lover the greatest privilege the Victrola brings is the joy of dancing whenever and wherever "the spirit moves."

Victrolas and Victrolas, \$10 to \$400. Easy terms.

Huntley Drug Co., The Rexall Store

EXCLUSIVE VICTOR AGENTS

FARM LOANS

We will loan you money on your farm and you can pay it back in 20 YEARLY PAYMENTS. You can make these payments at any local bank any month in the year. You can pay off the loan in full at any time or pay part of it at any time. With our loan you have no renewals and at the end of 20 years your interest and principal is all paid.

Write or come in and see us and we will tell you all about our plan.
