We are irrevocably against the continuation of the so called talk of conserving daylight by monkeying with the hands of the clock. It makes the dinner hour come to soon and the supper hour to distant from the former for the farmer. His working time is governed wholly by the rising and setting of the sun and he can't get away from it through the summer season. So far as the town man is concerned, let him get up with the sun, as does his country cousin, and do his gardening before breakfast. He absolutely won't work after supper, and the change in the clock would tend to shorten his morning opportunity. This argument should settle the question.

Starts Much Sickness

A clogging mass of undigested food that remains fermenting in the stomach or intestines sends the poison it develops through the entire human body. "Keep the bowels open" is one rule of health recognition. Cathartic Tablets cleanse the bowels, sweeten the stomach and benefit the liver. For indigestion, biliousness, bad breath, bloating, gas or constipation, no remedy is more highly recommended. No griping or nausea.

NUXATED IRON

THINK of the strong, healthy men and women you know—people who are prominent and who are doing things worth while and you will find that they usually possess remarkable force, vim and energy—the kind that simply brim over when the blood is filled with iron. Iron is red-blood food—it helps put strength and energy into the veins of men and creates new blood cells strengthens the nerves, rebuilds the weakened tissues and helps to install renewed energy and endurance into the whole system. If people would only keep their blood filled with strength-giving iron by taking Nuxated Iron when they feel weak, run-down and nervous, they might readily build up their red-blood corpuscles and quickly become stronger and healthier in every way. Unlike the older inorganic products it is easily assimilated, does not injure the teeth, make them black nor upset the stomach. Nuxated Iron often increases the strength and endurance of weak, delicate people in two weeks' time. It is dispensed by all good druggists.
