Mrs. Soule was formerly Miss Mary Thomas, daughter of early Oregon City pioneers. After her marriage she made her home in one of the most attractive houses of Oregon City, this being the Abernethy home on the opposite side of the Abernethy creek, which was later washed away by high water from the Willamette river. Mrs. Soule visited many of these old time places and brought back to mind many pleasant reminiscences of the early days spent in the city by the falls. Many of these places have been changed by improvement. Mrs. Soule says she found very few of the familiar faces here while on her visit Thursday.

Don't Wait

Not only from Oregon City but from every part of the United States a cry for more houses is heard. The tendency with those who have the means to finance building operations is to adopt a waiting policy, hoping for lower prices of labor and building material. The after-the-war demand for lumber is such that lower prices can hardly be anticipated for some time to come.

July 1, 1919, there remained unshipped in the lumber yards on the Pacific coast, 10,000 car loads of lumber. During the first six months of 1919, orders on the Pacific coast exceeded production by 250,000,000 feet. Much of this lumber was destined for foreign shipments going to South America, Australia and the United Kingdom. The amount necessary to complete the orders is staggering when it is considered that the lumber unshipped would make a solid freight train from Portland to Albany, a distance of 76 miles; and the amount not manufactured, but for which orders were in, would furnish a like mileage.

With these conditions prevailing people who are facing ultimate building problems must not fool themselves. Costs are likely to advance rather than lessen.

Frost Proposal Is Considered Frost

(Eastern Clackamas News.) There is always some one taking the joy out of life. A bill has been drawn up and sponsored by a man appropriately named Frost, to make illegal the manufacture, sale and use of cigarettes. Such legislation has been made before and always resulted in a fizzle. There is something to be said for attacking the use of tobacco generally, but to forbid cigarettes and allow its use in other ways, is like straining at a gnat and swallowing a camel. The attempt should be laughed out of court.
