

AMERICAN RIGHTS TO BE DEFENDED TEXT OF MESSAGE

HINTS MADE OF STEPS TO SAFE
GUARD LIVES AND
PROPERTY

WASHINGTON CONFIDENT CRITICAL POSSIBILITIES WILL BE PREVENTED

President With Entire Cabinet Pre-
pares Notes—Effect on Gen-
eral Public Foretold
by Administration

WASHINGTON, Feb. 11.—Publica-
tion by the state department tonight
of the text of the notes sent yesterday
to Great Britain and Germany, respec-
tively, revealed that both countries
had been warned in most emphatic
terms against menacing the vessels
or lives of American citizens travers-
ing the recently proclaimed sea zones
of war.

Germany was advised that the United
States "would be constrained to
hold the imperial government to a
strict accountability" for such acts
of its naval authorities as might result
in the destruction of American vessels
or the loss of American lives, and that
"if such a deplorable situation should
arise," the American government
would "take any steps it might be nec-
essary to take to safeguard American
lives and property."

To Great Britain the United States
pointed out "the measure of responsi-
bility" which would seem to be im-
posed on the British government "for
the loss of American vessels and lives
in case of an attack by a German na-
val force." If England sanctioned the
general misuse of the American flag
by British vessels, and thereby cast
doubt on the valid character of the
neutral ensigns.

The two communications were to
have been presented today respec-
tively to the British government by Am-
bassador Page and the German govern-
ment by Ambassador Gerard. They
were prepared by Counselor Robert
Lansing and revised by President Wil-
son and Secretary Bryan after con-
sultation with the entire cabinet.

The British, Spanish and Brazilian
ambassadors, who happened to call
at the state department, received copies
of the notes, as did the ministers of
Sweden, Norway and Denmark, who
especially requested it. The docu-
ments created something of a sensa-
tion among the diplomats generally
because of what some regarded as
their drastic implication.

High officials of the American gov-
ernment pointed out informally that
it had been deemed advisable to speak
in unmistakable terms now rather
than to wait the alarming effect on
American public opinion which might
ensue from the sinking of a vessel
with scores of American citizens. The
notes, officials were confident, would
serve as a preventative of the critical
possibilities discussed in them.

Diplomats examined with great in-
terest the language of the communica-
tions and some of them construed
the note to Germany as a warning that
the loss of American lives by sinking
even a belligerent merchant ship
would be covered by the representa-
tions of the American government, be-
cause of the insistence that all mer-
chant ships must be visited and
searched and passengers taken off be-
fore ships can be sunk.

YOUR FRECKLES

Need Attention in February and March
or Face May Stay Covered.

Now is the time to take special care
of the complexion if you wish it to look
well the rest of the year. The Febru-
ary and March winds have a strong
tendency to bring out freckles that
may stay all summer unless removed.
Now is the time to use ointment—double
strength.

This prescription for the removal of
freckles was written by a prominent
physician and is usually so successful
that it is sold by druggists under guar-
antee to refund the money if it fails.
Get an ounce of ointment—double
strength and even a few applications
should show a wonderful improvement,
some of the smaller freckles even van-
ishing entirely. (Adv.)

Room For Gossip.

Mrs. Exe—But don't you and your
husband take your vacation together?
Mrs. Wye—Oh, dear, no. If we did we
wouldn't have anything to tell each
other when we got home—London
Standard.

How Mr. Davis Got Rid of a Bad Cough.

"Some time ago I had a very bad
cough" writes Lewis T. Davis, Black-
water, Del. "My brother McCabe Davis
gave me a small bottle of Cham-
berlain's Cough Remedy. After taking
this I bought half a dozen bottles of
it but only used one of them as the
cough left me and I have not been
troubled since." Obtainable every-
where. (Adv.)

Pacific highway tree planting day
in Jackson county, which was set for
February 22, has been postponed owing
to the absence of Commissioner
Madden and the resultant inability of
the people in charge to secure the
county court's official sanction and
help. The date will be announced
later.

FIGURES DEBATED AT LIVELY MASS MEETING MONDAY

QUALITY OF WATER WARMLY
DISCUSSED BY H. S. MOUNT
AND J. E. HEDGES

PURE MOUNTAIN WATER LEAGUE WELL REPRESENTED AT SESSION

Reports of State Board of Health Read
by Both Sides—Engineers H. A.
and E. P. Rands Take No
Part in Discussion

That with a water rate never
over \$1.65 and with no direct tax of
any kind, Oregon City could easily fi-
nance the South Fork water project,
was the assertion of representatives of
the Pure Mountain Water league at
the mass meeting in the Commercial
club rooms Monday night. Although
opponents of the plan were present, no
substantial arguments were advanced
against the figures.

Going even further, league members
were authorities for the statement that
at the end of 10 or 20 years the rate
would be as low as at the present
time and that the raise necessary to
pay for the line would be only a tem-
porary matter. By leasing the pres-
ent water power now controlled by the
city, by selling water to Estacada, or
by the natural increase in consumers
as the town grows, income could be
produced which was not figured by the
water league.

The attack of the proposed line was
led by J. E. Hedges and George Ran-
dall and Dr. L. A. Morris, president
of the water league. J. E. Jack, Dr.
Hugh Mount, L. Stipp, John Fair-
clough, J. W. Moffett and others sup-
ported the plan. Dr. Morris acted as
chairman of the meeting. Engineers
H. A. and E. P. Rands were present
but took small part in the discussion.

The contention of the opponents of
the project was that the present fil-
tered water was pure and that from
any standpoint it would compare with
Bull Run water. Reports of the state
board of health were quoted to show
that under analysis it was pure. Dr.
Hugh Mount answered this point by
quoting reports of the state board of
health and showed the water to be
filled with organisms. The point was
also raised that water made pure by
the use of chemicals may not be good
for the human system.

Beyond general assertions that pro-
jects seldom were constructed for the
sum estimated before the project was
begun, no attack was made on the
proposed cost of the line. J. W. Moffett
showed that only one item, \$60,000
for excavation, could vary and that
even though that item were doubled,
the cost of the line would still be under
the bond issue.

Councilman Henry M. Templeton
made a short talk which was based on
a clause in the amendment to the ef-
fect that the council had power to levy
and collect a tax to meet the water
bonds. He asked if the receipts of the
water department would pay for the
line, why was such a clause in the
amendment. J. E. Hedges also raised
this point and he drew from it the con-
clusion that it was an admission of
the part of the backers of the pipeline
project that the water rates could not
meet the bonds. "L. Stipp, who as an
attorney has been in close touch with
the legal side of the question, an-
swered that in order to sell the bonds
it was necessary to incorporate such a
provision in the amendment. It was
in no way an admission that plan of
the water league or the figures of the
league would not work out, he said.

In a statement read by Dr. Morris,
the water league presented its case. It
showed that by saving \$10,000 a year
in closing the filtering plant and by
raising the water rates 32 per cent,
the cost of the new line could be easily
met in 30 years. Roughly, the saving
in operating the water plant would
equal the interest in bonds and the in-
crease in water rates would apply on
the principal. The statement of Dr.
Morris, showing the method of financ-
ing the project, follow in part:

5 per cent interest on \$250,
000.00 \$12,500.00
3 per cent sinking fund 7,500.00
4 1/2 per cent interest on pres-
ent water bonds (\$40,000) 1,800.00
Operating expense of gravity
system 4,224.00

Total \$26,024.00

Detailed Statement of Expense of Op-
erating Gravity System One Year.
Superintendent, \$125.00 per
month \$1,500.00
One laborer, \$2.00 per day 624.00
Office rent, expense of col-
lection, etc 720.00
Oregon City's share of ex-
pense of man at intake 480.00
Incidentals 1,000.00

Total \$4,324.00
Income from present plant
approximately, 1915 \$20,000.00
32 per cent increase on above
income 6,400.00

Total \$26,400.00
A thirty-two per cent increase in the
present water rate would make the
consumer who now pays \$1.25 per
month pay \$1.65 per month.

In the above statement all expenses
are met, except those of our present
warrant indebtedness amounting to
\$48,000.00, drawing 6 per cent interest.
This will be taken care of as follows:

Such money from the bond issue as
is not necessary to pay for the pipe-
line and head-works, etc., estimated by
the engineer at from \$15,000.00 to \$25,
000.00, will be applied to the redemp-
tion of outstanding water warrants
and the balance will be paid from the
3 per cent sinking fund which will be
received during the first four years as
no bonds will be retired during that
period. If any water warrants should

SCENES NEAR THE INTAKE OF SOUTH FORK LINE

The falls are situated on the South Fork of the Clackamas river several
hundred feet above its mouth and 1600 feet below the proposed intake.
They are 65 feet high and are situated at the bottom of a canyon several
hundred feet deep. The other picture was taken on the upper Clackamas,
near the mouth of the South Fork and shows the condition of the main
street itself.

South Fork of Clackamas Is Held Ideal Water Source Crystal Mountain Water Free From Any Contamination

Tumbling down over cliffs that pile
on each other until, to the observer at
the bottom of the canyon, they seem
to reach half way to the sky, the South
Fork of the Clackamas river presents
an ideal source for the future water
supply of Oregon City.

The intake of the proposed line is
on the east fork of the South Fork,
about 600 feet above its junction with
the west fork. The stream flows
through a tree-covered canyon that
rises hundreds of feet on both sides
until the summit of the heart of the
Cascade mountains is reached.

The east fork, which in itself is
large enough to supply a town of 100-
000 persons, is fed entirely by spring
water. Three miles above its conflu-
ence with the west fork of the south
fork, lies the source of the stream, a
lake about 1000 feet across. Around

the lake are hundreds of springs which
flow at almost a constant rate all year.

The east fork of the south fork and
the lake at its headwaters are entirely
in a forest reserve. If the pipeline
is built the South Fork Water commit-
tee has been assured that the govern-
ment will declare the watershed a spe-
cial municipal reserve and prohibit
hunting, fishing and camping on the
grounds. Forest rangers would be no-
tified to keep a close watch on the
water shed to protect it against fire
and campers.

The water, which seldom meets the
sun, is as cold as ice and so clear that
the smallest pebbles can be clearly
seen on the bottom of the deepest
spots in the stream. The canyon is
filled with spray in many places from
the falls in the stream. The falls of
the South Fork have a drop of 60 feet

and both the east and west fork of the
South Fork have large falls.

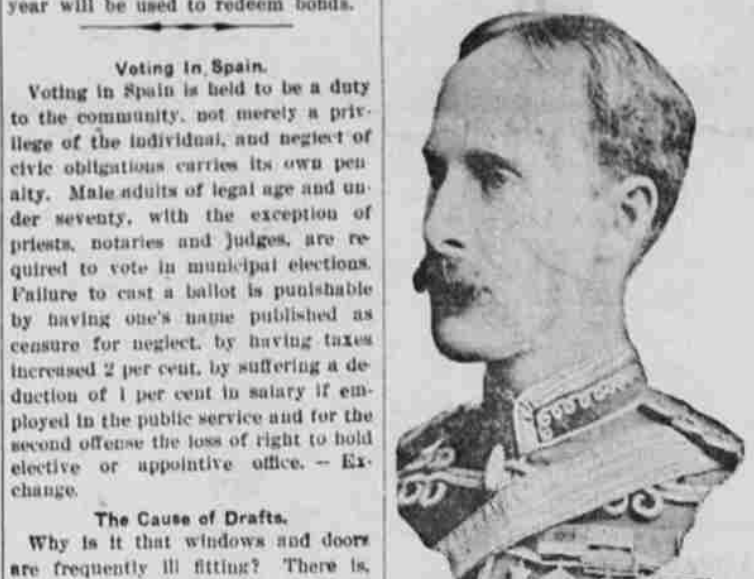

The elevation of the intake site is
520 feet which gives ample pressure
to take the line over the slight rises
in the route of the line. The site is
about 1600 feet above the falls of the
South Fork. The route follows down
the canyon of the South Fork into the
canyon of the Clackamas itself, then
down the Clackamas. Just above Es-
tacada, the route begins to leave the
Clackamas and goes over the Spring-
water divide, coming out at Linn's
mill. Then it goes past the W. F. Har-
ris farm, the J. U. Campbell place and
heads direct for the intersection of the
Molalla and Maple Lane roads. The
county road is followed into Oregon
City.

The problem of securing a right-of-
way is a comparatively simple one, as

the Portland Railway, Light & Power
Co. and the Southern Pacific have of-
fered to donate land to the city, al-
though it will be necessary to sue the
railroad company to secure a clear
title to the property. Farmers have
looked on the project favorably and
the line will run on the county road
several miles. Six thousand dollars
was the estimated cost of right-of-way
but it is now apparent that the cost
will be only a small fraction of that
amount.

The water itself is considered even
better than the famous Bull Run wa-
ter used in Portland. The Bull Run
river is fed by the snow while the
South Fork by springs. A chemical
analysis shows the proposed source of
Oregon City water to be even better
than the Portland supply.

GENERAL HAMILTON HAS ENCIRCLED LONDON WITH MILES OF TRENCHES

GENERAL SIR IAN HAMILTON

General Ian Hamilton is military
governor of London and has prepared
the defenses of that city in case of in-
vasion. London is encircled by miles
of trenches. General Hamilton was
chief of staff to Lord Kitchener in
1901-2 in South Africa and was one of
the defenders of Ladysmith in the
Boer war.

The Rogue River Public Service cor-
poration will install an electric ditch
digger.

REAL ESTATE TRANSFERS

Real estate transfers filed with the
county recorder Monday are as fol-
lows:

William Davis et ux. to William Da-
vis Jr., 63.5 acres township 3 and 4,
south, range 2 east of Willamette meri-
dian; \$10.
Sarah E. Rilea to Robert J. Rilea
et ux., lot 1, Linwood tracts; \$1.
J. S. Mills et ux. to Mary J. Mills,
lot 18, 1/2 lot 17, block 3, Parkplace; \$1.
Frances H. Mullan to Lizzie O.
Spaulding, lot 3, block 5, Hollywood
park; \$150.
Nelle M. Tounace et vir. to Anna R.
Hansce, 42.100 acres in section 5,
township 3 south, range 3 east of Wil-
lamette meridian; \$1000.
Emeline F. Morris to Lena A. Dan-
iels, et vir., all of the property of Ro-
bert L. Morris in Clackamas county; \$1.
S. E. Brumfield et al. to Mary J.
Mills, lot 18 and 17, Parkplace; \$1.

Suit Against Multnomah County To Be Tried Here

The suit of the White company
against Multnomah county for \$2718.30
for the loss of an automobile truck
which fell through the Sandy bridge
April 25, 1914, will be tried in this
county. A change of venue has been
secured and the papers were filed with
County Clerk Harrington Wednesday
afternoon.

The automobile company co-operat-
ed in the Good Roads day last April

With End Of Shower Now Near, Action Necessary To Land Big Cash Prizes

With but a little over two weeks re-
maining in the Shower of Gold it be-
hooves every lady whose name appears
in the list of entries and who is de-
sirous of being with the winners at
the close, to make every day between
now and the close of the race count
double.

Yes, the end of the race approaches
on the wings of time. Almost before
we realize it the ballot box will have
been locked and sealed, the keys in
the hands of the campaign judges and
it will be all over but the shouting;
and, oh yes, the announcing of the win-
ners' names.

And now the question arises: will
you be one of the winners? Will your
name be one of those called off by the
official judges as entitled to these
magnificent prizes to be awarded the
night of March 6th? Of course, you
will be. You can be you know. The
prizes are here for some one and it
may as well be you.

So buckle on the armour, line up the
votes and subscriptions as you never
have in the past and the work will be
rewarded with the prize.

Do not get the idea in your head that
you have all summer to get the votes
to make you a winner of these prizes.
Remember that every moment you
lose some one of your active competi-
tors are piling up the votes and steal-
ing a march on you. This should not
be and is not fair to yourself and
those of your friends who have given
you their help in the past secure in the
fact that you would be a winner. Do
not allow yourself to lag on the final
lap of the great race.

Make every day show results and
never get the idea in your head that
you have any "chance" or can have too
many votes to win, for from present
indications it is going to take a mighty
big vote to win the minor prizes, let
alone the grand capital prize of four
hundred dollars.

H. A. RANDS SHOWS PIPE LINE COST

ENGINEER DECLARED \$375,000
WILL COVER EVERY
EXPENSE

EVERY DETAILED ITEM EXPLAINED

Excavation Presents Only Variable
Cost in Entire Project—Letter
Is Read at Monday
Night Meeting

The cost of the pipeline project is
thoroughly explained in a letter by
Engineer H. A. Rands which was read
at the water meeting in the Commer-
cial club rooms Monday night. The
letter addressed to Dr. L. A. Morris,
president of the Pure Mountain Water
league, and answers a letter from Dr.
Morris.

He declares that \$375,000 will abso-
lutely complete the construction and
probably leave a considerable sum to
be applied on the warrant indebted-
ness in the water department. Mr.
Rands' letter to Dr. Morris, complete,
follows:

I am in receipt of yours of even date,
requesting a statement of the reasons
for anticipating that the cost of the
South Fork water system will not
greatly exceed the estimate.

Though personally favoring the pro-
ject, I have as a rule refrained from
taking any public part in the discus-
sion believing that, as the engineer
and as such employed, and paid by all
the people of Oregon City, it is not
fitting for me to appear as too strong
a partisan in this matter. Your query,
however, is one which affects all
parties concerned and for that reason
I am glad to comply with your request.

The answer is exceedingly simple
and the line of reasoning easily un-
derstood, as follows:

In round numbers the contract of
the Oregon Engineering & Construc-
tion company amounts to \$293,000. Of
this amount \$220,000 is for the 133,000
feet of 16 and 18-inch pipe which is to
be supplied to the city complete in
place at \$1.50 and \$1.80 per foot for
the 16 and 18-inch sizes respectively.
The price then includes the first cost
of the pipe, the freight and the han-
dling, as well as the constructing of all
roads over which the hauling may have
to be done. It includes the cost of
the lead for the joints, the making of
the joints in the field, the repairing of
the coating after laying and the test-
ing.

If the contractor has overlooked the
item for freight, he will have to stand
for that; if he has erred in calculating
the hauling, he will have to stand for
that; if he has forgotten the lead, he
will have to stand for that. Oregon
City gets the pipe in place. That is
definite.

The quantity is nearly as definite.
While we may make small changes
here and there which may vary the
total length of the line by a few feet
one way or the other, you may rest as-
sured that we have not forgotten one,
two, three, four or five miles, as we
must necessarily have done to later
run the total cost up to what some
people think possible. The figure,
then, of \$220,000 for the pipe may be
said to be definite. The same is true
of the lump sum bid of \$200,000 for
the headworks, which item includes the
dam, the 600 feet of supply main and
the settling basin. The same is true
of the lump sum bid of \$200,000 for
the crossing of the South Fork, and the
item of \$8,000 for clearing. Nearly as
definite is the \$2,000 covering valves,
air valves, stand pipes, etc.

Of the total of \$293,000, \$233,000 may
be stricken off as definite.

The remaining \$60,000 includes \$57-
000 for excavation and tunnels, \$1,750
for trestles, and \$1,250 for other mi-
scellaneous items. The change from
wood to steel will enable us to elimi-
nate the trestles at probably some
saving in money. The item of \$57,000
for excavation and tunneling remains
and this from the very nature of
things is variable, for no man can see
even four feet under the surface at
the time. We believe, though, that
we have figured liberally, and that in
a general way, the estimate is as liable
to vary one way as the other. How-
ever, suppose we have erred in think-
ing that we had earth where later we
will find rock so that we are low on
this item by 10, 20, 30 or even 40 per
cent. Then this item for excavation
would jump from \$60,000 to \$65,000,
\$72,000, \$78,000 or \$84,000 and your
total to be paid the contractor would
jump from \$293,000 to \$299,000, \$305-
000, \$311,000 or \$317,000. That is a
difference of 10, 20, 30 or 40 per cent
in the variable item would result in a
difference of but 2, 4, 6, or 8 per cent
in the total cost.

It is quite probable that the total
amount paid the contractor will not
exceed \$500,000, or for that matter, if
we have erred in estimating rock
where later we find earth, the amount
may even be less than the \$293,000,
but in calling a bond election, it is not
wise to be too optimistic. In addition
to the construction proper, we have
to allow for right of way, engineer and
legal expenses, as well as for discount
on the bonds and interest on the bonds
during the first year. Because the
money is voted is no reason why we
will try to spend it. We will be just
to the contractor, for that is his due;
we will also be just to Oregon City,
for its citizens and those of West Linn
are paying the bills.

In conclusion, you may with confi-
dence state that the \$375,000 will cov-
er all expenses, absolutely complete
the construction, and probably leave a
considerable sum to be applied on the
warrant indebtedness.

Do You Find Fault With Everybody?
An irritable, fault-finding disposition
is often due to a disordered stomach.
A man with good digestion is nearly
always good natured. A great many
have been permanently benefited by
Chamberlain's Tablets after years of
suffering. These tablets strengthen
the stomach and enable it to perform
its functions naturally. Obtainable
everywhere. (Adv.)
