THERE IS EVERY PROBABILITY that the \$232,000 to be raised in the general road fund this year will be partially wasted in much the same fashion as in previous years. The county commissioners seem to have set their face against progress and toward a system that long ago has proven its utter uselessness.

For the last five years, the amount of money spent annually on county roads has varied from \$200,000 to \$300,000. The total amount spent is in the neighborhood of a million, including the special district taxes as well as the general county road levy.

Yet for this great sum of money, the county has but little in return. Supervisors are sent out each spring and summer to fill the mudholes with gravel, patch the bridges, and fill up the ruts. Each year is the same. Each year children are kept from school because of the mud. Each year the automobile tourist complains that Clackamas county's roads are as bad as any in the valley. Each year the farmer is troubled in getting his produce to the market. Each year sees the same lack of progress, each year is but a repetition of the year before. If the road policy of this county does not change, if the county commissioners and the taxpayers do not wake up, the roads in this Willamette valley will be in the same miserable condition 50 years from now as they are 1915.

The folly of building for a trunk line a macadam road, or a gravel road, is identical with building a house of paper or a boat with cloth. They cannot last. They are not permanent. Eastern states now know that the only sane road investment is a hard surface road. In time, if the country lasts long enough, perhaps this western country will reach the same wise conclusion and stop sinking perfectly good money in a road policy that produces nothing but mud and dust, that has no other effect on a community than to reduce realty values, make farming more difficult and even, at times, stop traffic.

If the county court was determined to follow a business policy, it would appropriate a fixed sum from the general road tax to be spent for hard surfaced highways each year. The vote of the people a year ago did not show that they were opposed to hard surface. The fight was on the bonding plan alone. If eight or 10 miles of hard surface roadway was constructed each year in this county it would be only a short time until every trunk line, leading into all sections of the county, would be built. Such a plan would entail no debt and, if carried out wisely, no district friction.

The Enterprise sincerely hopes that the Live Wires, the Commercial club and other civic bodies, outside of Oregon City as well as in the county seat town, will take up this issue. A petition, signed by the leading citizens of the county, would be a powerful argument with the commissioners.

THE SERIES OF SPELLING BEES, now half over, are a demonstrated success. They represent the climax of the year's school work in this county.

The bees are probably the greatest success from the standpoint of the interest they arouse in the parents. Every spelling match has drawn parents by the score to the schoolhouse where they have an opportunity to meet the teacher and see the actual classroom conditions under which their children work. Then there is the social side of the matter; the chance offered for neighbors to meet and for farmers from one district to talk with farmers from another. The spelling bee as a social gathering is a long step toward using the schoolhouse as a social center.

The children, of course, are greatly benefited. Spelling is a study that is more difficult to master than such a subject as history, mathematics or grammar for many pupils, as it is purely a matter of memory. Classes in spelling were dry, uninteresting affairs before the spellings bees began, but now with interest aroused, they are the feature of the day in the school and pupils wait eagerly for the spelling period. Pupils who have shown no interest in the subject, now endeavor to lead their class.

The record of the bees already held is enough to convince the most skeptical. At Boring two girls spelled every word in the book and no spelling bee is ended until the hundredth page in the spelling book is left far behind.

Superintendent Calavan and his assistants, Supervisors McCormick and Vedder, deserve great credit for the schedule of spelling bees, a feature of school work that Clackamas county alone of all in the state can boast as a regular part of the year's work. It was largely due to the efforts of Mr. Calavan that the system was perfected in its present detail and it was through his efforts that it has been carried into successful operation.

IN AWARDED BIDS for the construction of the interstate bridge at Vancouver, there was a fight made for the home industries on the largest item of expenditure—the steel work.

The bridge proper across the Columbia river was awarded to the American Bridge company of Pittsburgh, alias United Steel Products Co. of New York, alias the Pittsburgh Steel trust.

This award was made on a difference of \$80 as against the Northwest Steel Co. of Portland and Vancouver, Wash., and the local company was given the bridge across the slough.

The big contract takes \$417,216.20 to the east for fabricated steel work that could have been made at home, and gives the home concern \$89,140.50 for a few cents below the slough.

The Northwest Steel company was \$300 below on all the steel work for the approach and the main bridge, and Governor Withycombe of Oregon made an appeal to give all the work to the home industry.

He was roundly applauded for his statement that this would mean the

distribution of more than \$200,000 in wages at Portland for high grade skilled labor but it was of no avail.

The commission made up of the Multnomah and Clackamas county commissioners seemed to have an idea that the recommendations of the Kansas City engineering firm were sacred.

This was a test case, where public officials had the right to reject any and all bids, had the right to group bids, and in some cases awarded bids to higher bidders, but sent the payroll east on a bagatelle of \$80.

ESTACADA, LIKE OREGON CITY, feels the need of a supply of pure water and, judging from the Estacada Progress, believes like Oregon City that the east branch of the South Fork of the Clackamas river presents an ideal source.

There is really not much doubt that West Linn and Oregon City and Estacada will be able to get together on the water question. To the two cities by the falls it means assistance in meeting a debt of \$375,000 and to Estacada it will bring a permanent supply of the best water in the world.

In discussing the proposal, the Progress says:

"Estacada now has about 70 water users and the income from this source amounts to about \$100 a month. The present bonds for the city water amounting to \$10,000 mature in 12 years and at present Estacada is paying the interest amounting to \$500 a year. The water fund now has a substantial excess but this amount should be added to regularly to pay ultimately the bonds." The Progress believes that Estacada could afford to pay about \$500 a year for the use of South Fork water.

Those in touch with the financial side of the project here hold out the hope that many Clackamas county communities will become partners in the line. With West Linn, Oregon City and Estacada all planning to secure water from the pipe and with the matter suggested in other cities, such as Gladstone, perhaps it would be well to call the project the Clackamas county pipeline instead of an Oregon City affair.

CALIFORNIA LEGISLATURE is facing a bill providing for the reading of Bibles in public schools. The defeat of the measure is highly probable although an active lobby is working for its passage.

Such measures as this do not take into consideration the personal views of thousands of parents who are not Christians, yet who have as many rights under the law as a bishop. If enacted, the bill would be a source of constant friction between the various isms, dogmas and creeds with the school house as the arena. It would be a violation of the constitution of the state of California in spirit as well as the federal constitution.

If the friends of freedom were half as active as are its enemies, there would be fewer of these attempts to force religion upon those who do not wish it. Every legislative session sees these extremists at the capitol and they are never abashed by defeat.

The reading of a few verses of the Bible in a school room would be a good practice, but the feeling and friction that would follow would be a constant disturber in the community.

A STORY under a Rockwell City, Iowa, dateline last week told of the death of Michael Conran, a section hand. The peculiar thing about this man was that he left a fortune of \$30,000.

As late as 1887 he had nothing but his job on the old Iowa Central, but he saved his money and bought land. He prospered and bought more land until he had two sections, or 1200 acres, in his name.

The case of Michael Conran is not unusual although many still say that there are no more such opportunities. Land in many parts of Oregon, including Clackamas county, is selling as cheaply as land in the middle west when Conran bought his property and there were just as many in 1887 who said that values would not go higher as there are now. It was only a few days ago that an Oregon farm was sold for \$10,000 that was traded for a team of horses 30 years ago. And the end is not yet.

THE CRISIS now faced by Columbia county can in no sensible way be used as an argument against the bonding method of building permanent highways, although the next time the issue is brought before some Oregon county, opponents of bonds will probably use the experience of Columbia county.

The trouble in Columbia county is caused by the weakness of men rather than any defect in the bonding plan. It is a case where district feeling and personal differences coupled with dissatisfaction of the state engineer's office and, perhaps, mismanagement has caused a loss of public funds. No opponent of Engineer Bowlby in Columbia county has found fault with the bonding plan.

Nearly \$20,000,000 was expended by the Oregon-Washington Railroad & Navigation company in the states of Washington, Oregon and Idaho during the year 1914, according to figures just compiled. The exact amount is \$19,735,803.73. The statement further shows that more than 13,000 names appear on the annual payroll and that between 65,000 and 75,000 persons are dependent on the operation of the Union Pacific system in the northwest. For the year ending June 30, 1914, the Oregon-Washington Railroad & Navigation paid \$1,390,698.65 in taxes. In the three states \$5,042,425.71 was spent in the construction of new lines.

With the coyote out of the way, eastern Oregon is now facing a still greater problem in the jackrabbit pest, according to a correspondent in the Heppner Herald. Jackrabbits are considered the best of food by coyotes but with the crusade against the coyote, because of the supposed inflection of rabies, a success, there is nothing now to check the destruction of the range by the jackrabbit.

The fact that girls win a great majority of the spelling bees in the county and secure most of the places on the school debating teams is in no way a reflection on the amount of gray matter possessed by the average Clackamas county boy. Rather, it shows that the boy's interest is not centered in spelling books or dry debate subjects. The lad who would stay inside and study the spelling of words during the spring months in the Willamette valley is not normal and should receive careful attention.

BULGARIAN BUTTERMILK

Even when sourest, if it is still in good condition, buttermilk is a valuable medicinal agent. A refreshing acid, it is always nourishing without being insipid, says the Delineator.

The lactic acid which it contains attacks and dissolves every kind of starchy deposit in the blood vessels; keeps the veins and arteries supple and free from matter which might otherwise clog them, and destroys irritating calcareous deposits that may gather around the joints, as well as any poisonous waste in the muscles. It is not only beneficial to the digestion, but also for tuberculosis and all other pulmonary complaints. It is also a harmless substitute for intoxicants.

Drinking buttermilk freely—two quarts daily would not be too much—is said to preserve the complexion of youth, and as gouty difficulties generally arise from sluggish excretion it is a blessing to all who suffer from such complaints.

Buttermilk not only tones the stomach, but furnishes material from which healthy blood may easily be made. It is also easy of assimilation and, in cases where sweet milk would

prove objectionable from a medicinal point of view, it may safely be given with every assurance of beneficial effect.

Bulgarian Buttermilk.
While the above statements are applied to common buttermilk, the Bulgarian buttermilk is still more beneficial for the good health and the long life of mankind. As Bulgarian buttermilk is a comparatively new product, a little information about this product may be of interest for some of you.

It was known for more than 100 years ago that Bulgarian horsemen, Tartars and other nomadic people, whose main food consisted of "yabourth"—a certain kind of "sour milk"—enjoyed an unusual good health and a long life, but it is comparatively few years ago that a number of scientists agreed that the beneficial part of yabourth was the presence of the so-called bacillus bulgaricus, which germ then was isolated and for some time has been sold as a pure culture for inoculation of pasteurized milk.

When this Bulgarian milk-starter is added to buttermilk from pasteurized cream, we have the Bulgarian buttermilk, which is the very best purifier for intestinal putrefaction. And as our precocious and unhappy old age is due to poisoning of the tissues by numerous harmful microbes in intestines, "it is clear that agents which arrest intestinal putrefaction must at the same time postpone and ameliorate old age." ("The Prolongation of Life" by Prof. E. Mechnikoff, director of the Pasteur Institute, Paris.)

One of the reasons that the bacillus bulgaricus is so very active and beneficial for the human digestive machinery may be found in the fact, that this bacillus multiplies quickest with temperatures between 95 and 100 degrees Fahrenheit, the same temperatures as the human body, while the common lactic acid bacteria prefer a much lower temperature—about 70 degrees F.

Bulgarian Buttermilk Cheese.
Persons who for some reason or other cannot use a sufficient amount of Bulgarian buttermilk, may have nearly the same benefit from eating Bulgarian buttermilk cheese, and it is—as far as we know—the first time that kind of cheese is offered for sale on the entire Pacific coast.

Facts of Interest to the Consumer.
Under this heading writes the University of Wisconsin in its bulletin, No. 211, by Prof. J. L. Sammis, page 17:

"Buttermilk cheese has about the same food value, pound for pound, as lean beef steak, which sells at twice the price. Large numbers of city residents, to whom the prices of meat, eggs, etc., are objectionably high, find in buttermilk cheese a palatable and economical food.

"In the household, buttermilk cheese is eaten alone, like cottage cheese, seasoned with salt, paprika, pepper, mixed with chopped pickles, olives or nuts, or used in salads. On account of its smooth texture, it can be spread on bread like butter and thus used in sandwiches, either with or without butter.

"Bakers prefer buttermilk cheese, on account of its smooth texture for making cheese cake and other bakery goods, in which they formerly used cottage cheese."

To the above may be added, that Bulgarian buttermilk cheese is as much superior to common buttermilk cheese as the Bulgarian buttermilk is superior to the common buttermilk. Also that Bulgarian buttermilk cheese—with a little sugar and sweet milk, served as dessert—by many people will be preferred for fresh strawberries or even ice cream.

TEST FOR JITNEYS
IS PORTLAND PLAN

EXAMINATION WOULD REDUCE ACCIDENTS, BELIEVE MEMBERS OF COUNCIL.

PORTLAND, Ore., Mar. 17.—More restrictions are proposed for the jitneys and auto buses as the result of a discussion of the jitney situation by the city council today.

It is now proposed to require all jitney and bus drivers to be at least 18 years old, and require them to pass an examination before being allowed to drive the machine. It is also proposed to have a city inspection bureau and inspect the machines and brakes, especially, once a month. The council also decided that all machines weighing more than 5500 pounds are to come to a dead stop at all railroad crossings.

Although Commissioner Daly had proposed a minimum fee of \$5 a month for five passenger machines, and 25 cents additional for every seat for the larger machines, Mayor Albee introduced another amendment fixing the minimum at \$3.

An amendment limiting the passengers to the number of seats was also introduced by the mayor, who said that the council had previously agreed to it. The subject of insurance for the machines was discussed.

Horace D. Jones, manager of the Auto Transit Welfare league, an organization of jitney owners, made a plea for the examination of the drivers, saying that competent men in charge of machines would limit the number of accidents.

It is proposed to get the ordinance in shape for tentative action next week.

MAY STOCK STREAMS
SAMPLE WATER FROM RIVER'S TRIBUTARIES.

PORTLAND, Ore., Mar. 15.—Acting under instructions of the state fish and game commission, Master Fish Warden Clanton has asked Professor Beaugard, of the University of Oregon, to take samples of the water in the streams of Clackamas, Washington and Yamhill counties that empty into the Willamette river from the west and to ascertain if the streams are suitable for stocking with trout. Back of this move is a plan to greatly increase the joys of amateur sportsmen in Oregon, and at the same time to make somewhat easier the lives of commercial salmon fishermen.

Observation has shown that salmon, when returning to freshwater to spawn, absolutely refuse to patronize the tributaries of the Willamette that flow into the valley stream from the west. This is believed to be owing to the fact that the salmon like the coldest water they can get and the western tributaries of the Willamette are all of them comparatively warm streams. The lesser rivers emptying from the east are all fed by the melting snows of the Cascades, and the Willamette itself is colder than its western tributaries, hence the salmon that do not turn from the east follow the main stream to its upper reaches.

Salmon and trout do not mingle well, at least not to the profit of the trout, and if it is found that the western tributaries are fit to support trout families, the fish and game commission will stock these streams with the game fish that sportsmen like so well.

REAL ESTATE TRANSFERS.

Real estate transfers filed with the county recorder Thursday are as follows:
N. O. Murray to W. H. A. T. Wallace, 12.43 acres in township 3 south, range 4 east of Willamette meridian; \$1.
Oregon Iron & Steel company to Lena P. Lewis, lot 27, Rosewood; \$10.
Burt P. McArthur et ux. to John W. Newborn et ux, 160 acres in township 3 south, range 3 east of Willamette meridian; \$1.
George Armstrong to Silas M. Cooney et ux, 25 acres in section 23, township 2 south, range 1 east of Willamette meridian; \$10.
Julia A. Mumpower et vir. to Clear Creek Creamery Co., 65.100 acres in Clackamas county; \$10.
Rosa Karlen et vir. to Portland-Oregon City Railway Co., 3 acres lot 6, block 1, Karlen 1st addition to Milwaukee; \$750.

Real estate transfers filed with County Recorder Dedman Friday are as follows:
L. Hoffer Miller et ux. to J. W. Minola, lots 1, 2, 3, in section 20, township 3 south, range 3 east of Willamette meridian; \$200.
S. S. Palmer et ux. to John J. Handhart et ux, 77 acres in section 11, township 4 south, range 2 east of Willamette meridian; \$10.
Lawrence Bowman to Eliza D. Miller, lot 4, block 2, Everhart's 1st addition to Molalla; \$1.
W. S. George et ux. to Henry Luten et al., 19 acres in section 32, township 2 south, range 1 east of Willamette meridian; \$1.
United States to Northern Pacific Railroad company, 1256 acres in Oregon; patent.

Real estate transfers filed with the county recorder Saturday are as follows:
R. M. Hulbert to Max Getzler, lots 15 and 14, block 8, Quincy addition to Milwaukee; \$10.
H. R. Lindsey et ux. to Harrie Morehouse, tract of land in section 23, township 3 south, range 2 east of Willamette meridian; \$10.
W. F. Shannon et ux. to W. L. R. Laury, 40 acres in section 4, township 4 south, range 4 east of Willamette meridian; \$3350.

J. F. Harham et ux. to C. H. Hicks, 1 acre in Clackamas county; \$200.
William A. Deardoff et ux. to John E. Deardoff, 8 1/2-100 acres section 36, township 1 south, range 2 east of Willamette meridian; \$10.
Peter Davidson et ux. to Estate of Frank Mudgett, tract of land in section 18, township 4 south, range 3 east of Willamette meridian; \$450.
E. G. Canfield et ux. to Rudolf G. Adrien et ux, lots 1 and 2, block "D" Bolton; \$225.

Arthur Needham et ux. to Charles West et ux, lot 36, Sellwood Gardens; \$10.
Mollie Clackamas Land & Improvement company, to George J. Case et ux, lot 12, Metzler & Hart's addition to Molalla; \$10.
A. D. Calkins et al. to Thaddeus H. Brindley et al., 36 acres in sections 13 and 14, township 3 south, range 1 east of Willamette meridian; \$16,800.

David E. Lofgren to Olaf A. Forsgren, tract of land in section 5, township 5 south, range 3 east of Willamette meridian; \$10.
William Allen to Peter Doris, 120 acres in section 4, township 4 south, range 4 east of Willamette meridian; \$10.
Real estate transfers filed with County Recorder Dedman Monday:

Clark H. Denny to Carrie Denny, 15.04 acres in section 29, township 3 south, range 4 east of Willamette meridian; 10.70 acres in section 29, township 3 south, range 4 east of Willamette meridian; \$10.
C. A. Cobb et ux. to P. D. Jones, lot 8, block 28; lots 7 and 8, block 21; 1st addition to Estacada; \$10.
Robert Burch to Francis P. Burch et ux, tract of land in section 14, township 4 south, range 2 east of Willamette meridian; \$1.
Security Saving and Trust Co. to Richard Wilder, lot 18, block 4, Garwick; \$10.

Real estate transfers filed with the county recorder Tuesday are as follows:
George E. Street et ux. to George H. Hise et ux, blocks 65, 66, 72, 73, 67, Pruneland; \$10.
George C. Brownell et ux. to Portland, Oregon City Railroad Co., 47 acres in township 1 south, range 1 east of Willamette meridian; \$1.
J. F. Short, to J. E. Short, tract of land in sections 27, 28, 33, 31, township 4 south, range 2 east of Willamette meridian; \$500.

Lorena C. Anderson et vir. to Peter Geres et ux, 52 acres section 19, township 5 south, range 3 east of Willamette meridian; \$3500.
United States to Jacob Kernes, 80 acres in section 20, township 4 south, range 4 east of Willamette meridian; patent.
Security Saving and Trust Co. to Andrew Kerr, block "A," Waverly Heights; \$10.
George Hise to George Street, a section of block 10, Bolton; \$10.

ESTACADA WANTS PARK
TOWN WOULD MAINTAIN TEAM IF DIAMOND IS PROVIDED.

Estacada wants a ball park, and wants one badly, judging from the efforts being made by the business men in the east Clackamas town.

A tract of about three acres in the northern part of the Estacada park has been selected as the best site and an effort is being made to induce the Portland Railway, Light & Power company to clear and level the land. The property is covered with brush, but business men figure that it can be put in first-class shape for \$400.

The advantage of a diamond are considered many. Estacada business men promise that if the ball park is constructed, the town will maintain a semi-professional team and stage Sunday games all summer. Such a series would bring crowds to Estacada still greater than now flock to that town in the summer months.

Fewer flowers to the dead and more flour to the needy living might help some.

SCHUEBEL REPLIES TO "JUICY ROAST"

ELDORADO FARMER COMES BACK STRONG TO UNSIGNED ATTACK.

POLITICAL HISTORY IS REVIEWED

C. E. Spence Endorsed As Ideal Man For District Attorney—Several Points of Recall Are Touched.

ELDORADO, Ore., Mar. 15.—(Editor of the Enterprise)—Sometime ago someone wrote an article for the Courier which was published under the title "A Nice Juicy Roast."

I am wondering if Brother Terrill enjoyed the "roast" as well as I did, having gone through the acid test before. I came out very well. I was shoved into an oven with a potato. The potato came out crisp and brown, but Bob Schuebel came out fresh as a cricket and ready for business. Apparently the writer of the article was so far along on the road to the bug-house that he forgot his name.

However, that don't make much difference as you can always tell a skunk by the smell.

But enough along this line! Let us enumerate a few things Bob Schuebel started about twenty years ago. The railroad was paying taxes on twenty-five hundred dollars a mile (\$2500) and other large corporations on the same basis. Bob Schuebel said this was wrong—all out of proportion with what the farmer and small home owner had to pay, so I opposed the deal and fought for a change for about 14 years before results were obtained.

How this finally came about is as follows: I went into the Republican convention as a delegate and insisted that all the men who aspired to the office of assessor, clerk and judge should sign a pledge that they would see that all corporation property would be assessed in harmony with other property, otherwise I would fight them in the open convention. The result was every last man signed that pledge. I got as much help as I could muster and worked for the nomination of Mr. James for assessor, because I thought I could keep tabs on him better than the other candidates. Mr. Nelson was not the man slated for that job as many of the old delegates will remember, yet he was nominated and elected, and the assessment on the railroads jumped to fifteen thousand dollars per mile and Mr. Thomas F. Ryan and P. A. Sleight, as members of the board of equalization, stood by the assessment.

The assessment on the railroad has been raised from time to time since, until they now pay on about thirty-nine thousand dollars per mile.

When I first started the fight, I claimed the railroads should pay on ten thousand dollars per mile, about one-fourth of what they pay now, yet such men as the writer of the roast found the same fault with me as they do now.

The man I had reference to as a witness on the Colton case, referred to by me as Walter Gorbett, as truthful and honorable a gentleman as lives in this county, and when he told his story on the witness stand, he told the truth and did not deserve treatment he received by Gilbert Hodges as prosecuting attorney, and I say again, if ever I confront him as a witness, it will not auger well for him if he employs the same tactics he used with Mr. Gorbett.

As to the recall matter, I was appointed on the committee to investigate the business methods of the county court.

I acted on the square in that matter and went to Mr. Beattie with everything that came up. Some things Mr. Beattie could not explain, but insisted that everything was straight. I told him any time I found those things explained I would say so, and give the facts the same publicity the other matters had been given. This surely was the honorable thing to do, which I did regardless of what friend or foe thought. The truth is, I at no time secretly or openly advocated the recall.

Several parties consulted me about becoming a candidate for judge or commissioner, but I always told them to wait. I did tell some when the time came that the recall was the proper thing, I would be willing to take up a fight along those lines. I managed to delay the recall two weeks and arose in the mass meeting after the report of the committee had been read and was going to advocate another delay, but made up my mind it was no use, so sat down and said nothing. At a meeting held at Oak Grove, I was asked the question direct, if I favored the recall, and I said I did not, as I did not consider it the proper remedy. This was soon after the mass meeting and before the recall candidates were selected. In that report I did not advocate the recall, but recommended a taxpayers' league, which should consult with the county court before any big undertaking was put through. This, I still believe should be the proper procedure before a recall should be thought of, if the court would refuse to listen, then it would be time enough to apply the recall.

As for my brother being in the race for district attorney, I will say this: If I had the say who should be our next prosecuting attorney, I would pick on Mr. C. E. Spence. Under his management there would be much less quibbling about technicalities, but rather truth and justice would be the order of the day, and just what I have some reasons to believe my brother would not need the prodding of the governor to make him do his duty, as has been the case heretofore in this county.

R. SCHUEBEL.
OLYMPIA, Wash., March 17.—Governor Lister has signed senate bill 211, which prohibits insurance companies discriminating in commissions paid agents.

WHAT THIS BANK AIMS TO DO.

To promote our customers' interests as we would our own;

To do all we can to make their relations here profitable and agreeable to them;

To contribute to their enterprises the enthusiastic co-operation, foresight and timely assistance which a good Bank can properly bestow;

To repay their confidence in us with confidence in them.

These are the aims of the officers of this Bank, and on this basis you are invited to make this your banking home.

The Bank of Oregon City
33 YEARS IN BUSINESS.
