LIBERAL

The rock crusher at Wright's bridge is a busy place. Nine teams are hauling the crushed rock onto the roads.

Hands are scarce and the haying men have a hard time of it. The hay is more or less ruined for horses by the heavy rains of last week. Fall grain will soon be ready for the binder, as it is ripening very fast, and binder twine is high. The late clover is being cut for hay and a great deal is rotting on the ground. Corn is making a rapid growth, and spring wheat will out-yield fall wheat from present indications. Rust is hitting the fall wheat. Barley will be a short crop, both in straw and yield.

On March 4, 1907, congress passed a law changing the name "forest reserves," to "national forests." The former name was considered a misnomer, as the government forests are not "reserves" in the generally accepted sense of the word; rather are they to be developed and used.

WANT NEW NORMAL

Pendleton Sponsors for Training School Point Out Its Need

Fred Lockley, former Pendleton newspaper man, has been delegated by the citizens of Pendleton who are boosting for the establishment there of another state normal school, to present to the public the necessity of such an institution in order that the state may be properly equipped to turn out trained teachers for the children of Oregon.

Mr. Lockley was in Oregon City on Saturday and discussed the proposed school. He points out, in the following interview, the lack of preparation of Oregon teachers and shows the advantage of having a teachers' training school in eastern Oregon.

"In looking up the law relative to the location of the proposed eastern Oregon Normal school at Pendleton a rather interesting situation was discovered by the sponsors of the new school," said Mr. Lockley. "It seems that the constitution of Oregon provided that all state institutions should be located at the state capital. The constitution has never been amended, so there is no legal authority for the location of the Soldiers' home at Roseburg, the state university at Eugene, the state normal school at Monmouth or the Oregon Agricultural college at Corvallis. It was thought best in securing the location of the eastern Oregon State Normal school at Pendleton to amend the constitution to validate the location of the state institutions, which are not located at the state capital and to authorize the location of the Eastern Oregon State Normal at Pendleton.

"In submitting the question of establishing a State Normal school in Eastern Oregon the sponsors of the proposed measure give some interesting facts in connection with the present Normal school situation.

"Among the facts brought out are the following: During the year just passed there were 6,055 school teachers
