LIFE IN MOLALLA Rowdy Boys Make Curfew Seem Needed According to Editor

A petition is being circulated to have the council pass a curfew ordinance which will not permit children under sixteen on the streets after nine o'clock unless accompanied by a parent or guardian. It seems that this is very necessary here. There is a bunch of boys who have made themselves very annoying by their rowdy conduct, especially when there have been dances in progress. There is no excuse for children to run loose on the streets at night. The council should heed the petition.—(Molalla Pioneer.)

CITROLAX

Best thing for constipation, sour stomach, lazy liver and sluggish bowels. Stops a sick headache almost at once. Gives a most thorough and satisfactory flushing—no pain, no nausea. Keeps your system cleansed, sweet and wholesome.—R. H. Weibrecht, Salt Lake City, Utah, writes: "I find Citrolax the best laxative I ever used. Does not gripe—no unpleasant after-effects."—Jones Drug Co.

"Printing with a punch"—at the Courier.

MANHATTAN ISLAND.

It Was Once a Spot Apart From the
Island of Manhattan.

The Magazine of American History has called attention to a distinction in New York nomenclature that, despite the authority it quotes, "every Manhattanese" does not know. The magazine cites the following footnote to "The Spy," by James Fenimore Cooper and then comments on it:

"Every Manhattanese knows the difference between Manhattan Island and the island of Manhattan. The first is applied to a small district in the vicinity of Corlear's Hook, while the last embraces the whole island, or the city and county of New York as it is termed in the laws.

"In other words, the latter is the present borough of Manhattan. Manhattan Island was a knoll along the old water front of the East river about an acre in extent surrounded by creeks and salt marsh and made an island by the tide. Near it was Henry Eckford's shipyard, an ancient landmark. It may be identified on General Egbert I. Viele's map of the water courses.

"In the recollection of the present streets it lay between Livingston and Houston, Sheriff and Cannon streets, Columbia and Stanton streets intersect on what was about the center of the island. Just north of it was one of the tidal mouths of a stream that arose near First avenue on Sixth street, flowed through Tompkins square and reached the river between Manhattan Island and Burnt Mill or Branda Munnah Point, about Third and Lewis streets."

ALASKA'S FERTILE LANDS.

Facts About Our Vast and Little Under-
stood Territory.

Alaska is the most misunderstood and misrepresented section of the United States. People generally, and sincerely, believe that the name Alaska is synonymous with snow and ice and couple it accordingly with ice cream freezers and cold drinks. Yet the principal cities of Alaska along its southern coast line—Juneau, Ketchikan, Cordova, Valdez and Seward—do not average as cold in midwinter as New York and are seldom as cold as Baltimore and Washington during cold waves.

Alaska is one-fifth the size of the whole United States, and its prodigious area of about 600,000 square miles nearly three times the size of the German empire, spreads from the temperate zone to the arctic circle. No other quarter of it is in the latter. Below the circle lies a magnificent belt of fertile soil.

It is estimated by government authorities that the agricultural area of Alaska's fertile valleys and plains, on many of which cattle can be wintered without feeding, aggregate 30,000 square miles, with a climate like that of northern Europe—Norway, Finland and Sweden. This land is richer and more productive than that of any other country in the world, well watered, fairly well timbered, and 320 acres are open free to the settler if he wishes to take up a homestead.—John A. Schleicher in Leslie's.

The Story of "Hard Hit."

"Mr. Orchardson, if I thought that by killing you I could paint a picture like yours I would stab you to the heart." Such was the remark made by Pellegrini, the famous caricaturist, to the Royal academician, Sir William Orchardson, when at a private view he first saw "Hard Hit," the picture of the ruined gambler. "It was," said the artist, "the greatest compliment I could have had." Curiously enough, the model who sat for the ruined gambler was rather fond of cards himself. One day the artist noticed that he looked somewhat depressed. "What is the matter?" he asked. "I was awfully hard hit last night," he answered. "By Jove," replied the artist, jumping up with delight, "I've got it at last! 'Hard Hit,' of course." And that is how the picture got its name.

Where Shelley Was Drowned.

Spezia, the principal naval station of Italy, and about fifty miles southeast of Genoa, described as "the Portsmouth of Italy," has interesting literary associations. It calls up memories of Byron, Shelley, Leigh Hunt, Charles Lever and Mary Somerville. Lever was in residence at Spezia intermittently for some years, and there wrote three of his books. But a more tragic interest is attached to the magnificent bay, for it will be remembered that it was while sailing in a new boat across the gulf to his home at Lerici that Shelley was drowned.

Musical Note.

"What opera did you hear last night?" "Cecil had the program, and he said it was Libretto." "How amusing!" "Yes, wasn't it? Because it really wasn't Libretto at all!"—Harvard Lampoon.

Bullets and Snow.

To test the penetration of rifle shots snow walls six feet six inches thick were erected in Aurolle, France. Rifles were fired at a distance of fifty-five yards. In each case the ball was stopped at a penetration of five and a half feet.

Easy to Guess.

A woman writer says girls ought to know what their beaus make. Don't they? Unless times have changed the girls get three-fourths of it during the courtship and make a clean sweep after the wedding.—Houston Post.

Sam Case Freed

Samuel Case, of Parkplace, under indictment by the grand jury for murder, as a result of shooting his brother some weeks ago, was released from the county jail Wednesday afternoon on a \$5,000 bond. As Mr. Case left the jail he was met by Mrs. Case, and later a group of friends greeted and congratulated him in front of the courthouse.

We take particular pains with the stationery we print for our customers.

POULTRY PICKINGS.

If the chicks have been properly cared for during the hot summer months they should make an excellent showing now.

Chicks hatched in September, if properly grown, will give excellent chickens for frying after the holidays. There will be a good demand for them.

Provide now runs for the ducks and sow the old runs to rye. This will keep on growing during the fall and winter and not only furnish green food, but kill all impurities that may be in the soil.

The best stroke of genius any man can show just now is to sort out every old hen and sell her.

An ear of corn broken once or twice and thrown out for the hens to work at does them a lot more good than giving them ready shelled corn.

PIGEON KEEPING FOR SQUAB RAISING

(Prepared by United States department of
agriculture.)

Many varieties of grains are used in feeding pigeons. A good mixture of staple grains may be made of equal parts by weight of cracked corn, hard red wheat, Kaffir corn and Canada peas, with a small quantity (10 per cent) of hemp and millet seed added during the molting period. Other grains which may be substituted for or added to these are oats or hulled oats, buckwheat, Egyptian corn, barley, cowpeas and milo maize, while a small quan-

WHITE RUNT PIGEON, FEMALE.

tity of stale bread, rice, rape, millet, canary, vetch and sunflower seed may be fed for variety. Canada peas are expensive, but seem to be essential to the best results, especially during the breeding season, and apparently take the place of green feed to some extent. Green feed, such as cut clover, alfalfa and grass, lettuce and plantain leaves, may be fed to advantage, but is not absolutely essential.

A variety of good, hard grains is essential to success, and grains which are in poor condition should not be fed. Old grains which are hard are better than new soft grains, especially for pigeons with squabs. Red wheat is considered better than white wheat by many pigeon breeders. Good wheat screenings are often fed with success, as they usually contain a variety of seeds. Various stimulating seeds, such as lentils and vetch, are sometimes fed as a tonic to breeding birds during the molting period.

The grain may be fed on the floor of the pen in troughs or kept before the birds in hoppers. It is not generally considered advisable to feed the grain on the ground, especially on heavy soil where it may get wet and moldy. Unless the floor is kept clean it is better to feed the grain in troughs than on the floor. The troughs should be made so that the pigeons will not roost on them and soil the feed with their droppings. Hoppers are used with good success, but may attract rats in some pigeon houses. They should be fitted with wires or nails about two inches apart so that the pigeons cannot waste the feed by throwing it out on to the floor. If the grain is not fed in hoppers the pigeons should be fed twice daily—in the morning and in the afternoon—at regular hours, giving from one and one-half to two quarts of grain at each meal to twenty pairs of pigeons and adding an extra pint if the pigeons have many squabs. As pigeons feed their squabs on their own pigeon milk for ten days, it is important that they get plenty of grain during this time. The feeder must regulate the quantity of grain according to the appetite of the birds, giving them all they will clean up in one to two hours. The cost of feeding a pair of pigeons varies from \$1 to \$1.50 a year at the present price of grain.

Clear drinking water, grit, broken oyster shell and charcoal should be kept before the pigeons all the time. Salt is fed to pigeons in various forms, and a supply of this material is generally considered essential. Pigeons not accustomed to eating fine salt are apt to eat too much if given a large quantity at one time, although fine salt is used with good success by many careful feeders. Salt may be fed in a lump form, such as rock salt or as fine salt moistened and baked into a hard lump, without danger of the pigeons eating too much. Salt may also be fed mixed with grit, charcoal and oyster shell.

Call the Poultry Flock.

Call out all your unprofitable fowls. Remember that a small flock of layers is better than a large flock of loafers.

W. C. T. U.

The W. C. T. U. held a very interesting meeting at the Baptist church last Monday afternoon, a large number of members and mothers being present. A number of papers were read, and after the meeting a reception was held for the teachers and the mothers of Oregon City and surrounding country. A pleasant hour was passed and dainty refreshments were served by the members of the W. C. T. U. Mrs. R. M. C. Brown, as county treasurer and Press correspondent,

OLD COIN VALUES.

Only Very Rare Specimens Can Com-
mand a High Price.

"The 1804 dollar," said a coin expert, "is believed by thousands of persons to command an enormous premium. There never was an 1804 dollar made in that year," he continued. "The 1804 dollar was made some time between 1830 and 1860. The country is flooded with counterfeit coins of this date, many of which have been made from 1841 dollars. A large number of them have the mulling on the edge, which could have been made only by a machine which the government did not begin to use until 1830.

"The Queen Anne farthing is another coin which has gained a high value in the public mind, because a collector once paid a high price for several that had never been in circulation. The used coins bring as high as \$10, but they are often offered to dealers at ten times that price. The Jewish shchel, worth to dealers about \$1, is often held for as much as \$250 by enthusiastic amateurs who are misled by dates and the strange characters stamped on the coin.

"In the public mind a coin more than fifty years old is hoary with age and so rare as to be almost priceless, but a silver dollar of 1795 is actually worth no more than \$2 to dealers, and then only if it is in an excellent state of preservation, for a great many of them were coined. A half dollar of 1803 is worth as much as 15 cents more than its face value, but collectors and dealers find that there are so many of them in circulation that there is no profit in buying and selling them. In fact, a person might have a hundred United States coins of different denominations and dates, no two alike, but all more than 100 years old, which would be worth to a dealer not over \$10 above their face value."—New York Times.

GLACIAL EPOCHS.

This Old Earth of Ours Has Had More
Than One Ice Age.

Every one with intelligent interest in the history of the world on which he lives has heard of "the glacial epoch," or the ice age. The inhabitants of the northern portion of the United States have no doubt a general understanding that the gravel hills and ridges and the huge boulders with which they are familiar are due to an irresistible invasion from Canada by "the great ice sheet" at a date just preceding that which geologists term "recent," yet many thousands of years ago.

It is, however, not strictly correct to speak of the "ice age" or the "glacial epoch," for there have been many of them. It is now known that even this latest or pleistocene glacial epoch has several important divisions, and in the Rocky mountain region it appears that important changes in the form and height of the mountains, due to a wearing down by erosion, took place between the glacial subepochs.

More than fifty years ago it was recognized by English geologists that certain masses of gravel and breccia and certain plain and grooved rock surfaces in rocks of Permian age in India indicated a glacial epoch vastly older than that of the Canadian ice sheets, but it is only within the last thirty years that geologists have learned that glacial conditions have recurred at many different times in the earth's history. The evidence of this has been found in all continents in Europe, Africa, Asia, Australia, South and North America. The formation of great ice sheets took place at different periods in the larger divisions of geologic time back to the protozoic—that is, to the age of the oldest known sedimentary rocks, a great many million years ago.

Glass Razor Strop.

"The best razor strop I ever had was a piece of glass," said the boss barber, as he sharpened the razor with a pull in it. "An old barber gave it to me, and I tell you it worked fine. Unfortunately I let it fall and broke it, and I have never been able to get one like it. There's some kink in the grinding which I can't seem to figure out. In these days a good razor strop is a mighty hard thing to find, and I would give a good deal if I could only get that piece of ground glass back again. It sure did put a cutting edge on the razor."—Pittsburgh Dispatch.

No, He Had No Opinion.

"Before we take you on the jury, Mr. Smith, we must ask whether you have formed any opinion of the prisoner's guilt or innocence."

"No," said Smith grimly. "No, I ain't formed no opinion."

"And, Mr. Smith, have you or have you not any conscientious objections to capital punishment?"

"No," said Smith, more grimly still, "not in this case."—London Opinion.

Very Likely.

"Our ancestors had very few boards of health, insanity commissions and so on."

"Perhaps it is just as well. Probably they would have locked up Sir Isaac Newton, Copernicus and also Christopher Columbus."—Louisville Courier-Journal.

Great Difference.

"Some say that marriage is a lottery with us."

"That's a step above the south sea islands, where they marry a girl to the man who can offer the most coconuts. There it's a raffle."—Louisville Courier-Journal.

Disparagement.

"I hope you never talk about your neighbors," said the exasperated friend. "I never do," replied the frivolous woman. "They're an awfully uninteresting lot."—Washington Star.

desires all local branches of the W. C. T. U. to send her all items of interest in the work in their localities, and all finances for the advancement of the county work to be sent to her.

Oregon City high school's football team, which defeated Vancouver a week ago at Canemah field, went to the garrison town last Saturday, and scored nothing, while the Vancouverites scored 20. Claire Miller, of the Oregon City team, got his knee hurt in a scrimmage, and may be out of the team for the balance of the season.

UNDERGARMENTS— STYLISH AND COMFORTABLE
