Miss Mamie Eaffe, of Oswego, has been married to Herman Bottger, of Ech, the ceremony having been performed in Washington.

Wednesday evening an entertainment was given by pupils of Canemah school to celebrate the standardization of the institution.

Mrs. V. G. Wright and Miss Ruth Brightbill, of the county seat, have returned from a visit to California.

Mrs. Sarah Wamett, who has been visiting her daughter, Mrs. E. M. Scouton, of Mountain View, has left for Seattle en route to her home in Minnesota.

Mrs. M. E. Greaves, of Canemah, has been entertaining her daughter, Mrs. C. L. Jackson, of Halsey, Idaho, and Mrs. Clyde Driscoll, of Wasco.

Miss Marie Harvey, who was injured on the South End road some weeks ago when an auto driven by a drunken man ran into a buggy in which she was riding, has recovered sufficiently to return to her work.

An old indictment against G. W. Taylor has been vacated by an order signed this week by Circuit Judge Campbell.

California children will get many of their Christmas trees from Clackamas county, eight carloads of young fir having been shipped south from the county seat.

Oregon City will rent advertising space in its new municipal elevator according to Chairman John F. Albright, of the elevator committee.

Teachers and parents of school children at Twilight have formed a mutual association for the better understanding of school work.

According to papers filed in the probate department of the circuit court, Samuel Case, of Parkplace, who died recently following an operation, left an estate valued at \$3,100.

Card of Thanks

We hereby thank our many friends and neighbors for their kind assistance in the illness and death of our beloved son. We also desire to express our appreciation for the beautiful floral offerings.

ODDITIES IN JAPAN

Natives Have a Topsy Turvy Way of Doing Many Things.

BATHING IS A SACRED RITE.

And Whenever a Native Has a Moment to Spare He Resorts to the Tub, With Its Peculiar Code of Ethics. Houses Without Windows.

I just can't get used to how turned around, upside down, inside out, topsy turvy, things are in Japan. A Japanese carpenter draws the plane toward himself, and a blacksmith sits down to work.

A Japanese blacksmith never knows the joys of getting tickets to the circus, for he hasn't any place for the advance man to paste up his three sheets. The whole front of a Japanese blacksmith shop is open, with other buildings jammed up so close on each side that the circus man couldn't get a poster in.

A Japanese book begins on our last page and finishes on our first paragraph. And their sentences begin at the top of the page and read down, like long columns of figures. They wear white to funerals and judge poetry by the beauty of the handwriting.

Japanese houses haven't any chimneys, so you may see a whole plateau of houses with not a single curl of smoke as far as the eye can reach. The Japanese cooking is done outside the house in a little charcoal stove. They have no stoves to keep themselves warm, only little hibachis, gullion jars with charcoal in them covered with fine ashes. There isn't enough heat in one to sing a miller, and whenever they get too cold they take a warm bath.

Bathing is a sacred rite. Whenever they have a spare moment they run and take a bath. When business is dull they hurry to a public bathhouse and jump in. If they miss one train they take a bath while waiting for the next. They take hot baths—steaming, sizzling hot. And the strange thing is they don't do the bathing in a tub. They have little foot baths about the size of crocks that they use for washing themselves, and when they are thoroughly clean they climb into the tub.

If you should get into the tub first the proprietor would break into tears and tell you that you were bankrupting him, for the same water is used all evening, no difference how many guests the toilet has.

After soaking awhile they crawl out, steaming all over, gently blot themselves, get into kimonos and sit around bare ankles. One would think that before the evening was over a feet footed runner would have to be dispatched for medical assistance, but instead of that they never catch cold!

When I got here and was invited into a Japanese home I found that they hadn't any chairs. In fact, there isn't a stick of furniture a foot high in a Japanese house. You have to sit on the floor. A person of my build was never meant for sitting on the floor. When I got down on the floor and try to draw up to a Japanese table my feet are so in the way that I can't get up to where there is anything doing. The waitress has to walk around my feet to bring me the change. By the time the meal is over she is pretty well fagged out.

A Japanese house hasn't a single window. And it's only the most stylish of houses that have a pane of glass. A person who has a pane of glass somewhere in his house sets the social pace in that neighborhood. Instead of glass they have paper pasted on sliding frames, and through the paper the light filters. Naturally one wonders how they keep the rain out. This is little trouble, for outside the paper walls are a series of wooden doors, which also slide back and forth.

When time comes to retire you look around for the bed, but there isn't one in sight. It is rolled up in a drawer, and the Japanese wouldn't know a bedstead from a quilting frame. Millions of people in Japan have grown to manhood, voted, paid taxes and gone to their reward without ever having clapped eyes on an American bedstead.

To make the bed ready the servant opens the drawer and unrolls the quilts on the floor, putting a tomato can looking thing under one end for a pillow. Then she shuts all the paper windows and pulls to all the wooden slides so that not a breath of air can get in and the bed is ready. Money in the palm wouldn't persuade a Japanese to sleep with the window open.

Their theory is that during the day the air becomes full of dust and germs so that if you keep your windows sealed during the night none of the germs can get in. Homer Croy in Leslie's Weekly.

Queer Spelling.
Jack was looking over the dictionary and once he laughed aloud.
"Why are you laughing?" asked Dot.
"Is your book interesting?"
"No, not interesting," answered Jack, "but amusing. It spells words so different from the way I spell them!"
—Sacramento Union

Might Take the House.
"Have you like built in furniture?"
"First rate. In fact, it has one great advantage."
"And what is that?"
"Installation men can't come and move it out!"—Birmingham Age-Herald.

Whatever disgrace we have merited, it is almost always in our power to re-establish our reputation.—La Roche foucauld.

A lot of Oregon papers are "beefing" about that worm that lost this state the apple prize. It seems there should have been time enough to look for worms before the apples were put on display. Why didn't somebody look then?

News dispatches tell us that the price of turkeys has gone up in Chicago. Chicago needs no boast; the butcher and poultry man always charge more for turkeys at this time of the year.

DAIRY WISDOM.

A neat butter package will attract a customer at once.
There is no wisdom in keeping poor cows or breeding down. The man who does it is a back number.
Every up to date dairyman will raise his heifer calves. These calves should be sired by a pure bred butter bull.
The cream should be strained into the churn to remove every bit of curd or possible specks of dirt.
You know it's mighty easy to freeze or at least chill a lot of profit out of a dairy cow. Protect her if you want the proceeds.

It has become very evident, says Hoard's Dairyman, that too little attention and ambition on the part of dairy farmers has been paid to the building up of first class grade herds. The emphasis has been upon pure bred herds, whereas really but few men are fitted to enter successfully into the many details that must be worked out in breeding pure bred cattle. But any farmer can develop a fine herd of grades if he will but be obedient to the few principles that control. These are:

RAISING HERDS OF HIGH CLASS GRADES

First.—The best possible kind of a sire, as good if not better than is necessary with pure bred. As we have observed before, the sire that is mated with pure bred females is backed up on that side with the same ruling tendencies of the breed that exist in him, but the bull at the head of a herd of grades must have prepotency and strength of breeding sufficient to overcome the adverse tendencies of such females. For that reason we say that he needs to be a better and more prepotent bull than as if he were at the head of a pure bred herd. Farmers who are looking for a cheap, loosely bred bull for use on grade females make a great mistake.

The Ayshire cow in official and competitive tests has proved herself to be a most economical producer of milk and butter, yielding the largest possible amount for the food consumed and at the least possible cost. The Ayshire is prepotently the milkman's cow, producing the most desirable milk for his use, because of the large quantity of high quality, rich in total solids, placing it above the required standard of the different state laws for market milk. The cow shown is an Ayshire.

Second.—Rigid selection and culling of the herd and the keeping of some sort of a record in order to know how to select and cull. Some grades have shown wonderful power as producers.

A grade Guernsey cow was bought by William Butterworth of Illinois for \$80. She was a cross between a pure bred Guernsey sire, who was evidently a good one, and a Shorthorn grade cow. This Guernsey grade cow was tested for one year by the Illinois university authorities, with the following year's record: 13,702.8 pounds of milk averaging 3.84 per cent fat, or a fraction over 526 pounds of butterfat was contained in her milk.

It is within the reach of the ordinary farmer to build up grand herds of grade cows if he will have the courage in the first place to purchase a really first class sire and keep doing so. The prices at which fine grade dairy cows sell show that there is a clean bit of money in breeding such cattle aside from the profit of their high milk production.

Bull For County Use.
A Holstein bull valued at \$5,000 has recently been put at the head of the herd of the Marinette county hospital farm in Wisconsin. This bull has been leased to this county for two years by the Wisconsin College of Agriculture, and by the terms of the lease the college is to have the first chance to purchase at market price any heifers sired by this bull that may be for sale from the county herd. This herd of cows has made the institution self supporting, and it is stated that the farmers of the county have drawn on it freely for stock to improve their milking herds. The placing of such a valuable bull as the one just leased from the college on this farm will make the herd an even greater asset to the dairy farming interests of the county.

Drying Up a Cow.
A cow should be dried off for six weeks before calving. It may take two weeks to dry her off, that depending upon the persistency of milk flow. To dry off a cow the rich feed has to be removed and the cow allowed to pasture short grass or eat hay. Some milk is left in the quarters at each milking at first; then a milking is omitted; then the milking is done every other day, and afterward only a little milk is taken, as seen to be necessary. There is no specific rule for such work, and it requires the best judgment and experience of the attendant.

CHILDREN.
Children need our help. He who helps children helps humanity with a distinction, with an immediacy, which no other help given to human creatures in any other stage of human life can possibly give again.—Phillips Brooks.

HE SAVED HIS MONEY

Seattle Capitalist Got His Wealth While Working as Soldier of Sea

Seattle, Wash., Nov. 24: Sergeant Major James Deaver, United States Marine Corps, wealthiest enlisted man in the United States services, was retired here last week after thirty years continuous service with Uncle Sam's sea soldiers, possessing real estate, stocks, bonds, mortgages, and personal property valued at more than one hundred thousand dollars.

Deaver had no capital when he entered the Marine Corps in 1885 and has been dependent entirely on his pay as an enlisted man, and his own efforts in the accumulation of wealth. He will continue to draw from the government about \$70 a month retired pay for so long as he may live.

By strict economy Deaver managed to save several thousand dollars in the first fourteen years with the Marines, and when he was transferred to Seattle in 1899, predicted that this city would one day be the metropolis of his savings in Seattle really when values were low. He sold his holdings several times and re-invested opportunistically until his wealth passed the six figure mark.

The wealthiest enlisted man resides with his wife and young son in their beautiful home at 4226 South Alki street, overlooking the waters of Puget Sound.

ERNEST GERBER DIES

Member of Prominent Clackamas County Family Passes Away

News was received Saturday of the death in California of Ernest Gerber, the son of Mr. and Mrs. Fred Gerber, of Logan. Mr. Gerber passed away early Saturday morning, the result of an illness of over a year's standing. It was in an effort to find a climate better suited to his health that he left his home and went to California.

Mr. Gerber was 23 years of age, and spent the greater part of his life on the Gerber homestead at Logan and in the county seat. He was a young man of many talents, and was highly regarded in the community in which he had made his home. Besides his sorrowing parents, he is survived by a brother, Edwin Gerber, and by a sister, Mrs. Thomas Anderson.

Mr. and Mrs. Fred Gerber were with their son when his death occurred. His brother Edwin had gone to California with him, but left the south last week. The remains will be brought home for burial.

A Story of Mark Twain.

When Mark Twain was beginning his career as a humorous lecturer he one day arranged with a woman acquaintance that she should sit in a box and start the applause when he should stroke his mustache. The lecturer started off so well that he did not need any such help, however, for he caught the audience from the first. By and by, when not saying anything worthy of particular notice, he happened to pull his mustache, and his anxious ally in the box at once broke into furious applause. Mark was all but broken up by the misadventure and ever afterward carefully avoided employing such help to success.

Lives Women Spoil.

The man whose life can be "spoiled" by a woman is not much of a man. You do yourself great injustice when you think that so much depends upon that one particular girl. It does not. Many a man does his best work because some foolish girl does not know enough to marry him.

We would never have heard of Walt Whitman if it had not been for a case of disappointed love.

"Out of this I have written these songs," said Whitman.

Perhaps you will lose that girl and out of it you will be a far greater man than you could be with her. Maybe the really right girl is waiting around the corner.—Nautlius.

Their Favorite Beliefs.

Said:
The Poet—I am misunderstood.
The Laborer—I am underpaid.
The Diplomat—I am eternally mistrusted.
The Housewife—I am a drudge.
The Debutante—My life is really a tragedy.
The Small Boy—I shall never get filled up.
The Doctor—I shall die of the disease which I treat the best.
The Lawyer—I did not make the law.
The Schoolmaster—I know.
The Philosopher—I wonder.
The Scientist—I hope.
The Fool—I think.—Life.

Music of the Blood.
Have you ever heard your blood? Have you ever put one of those large seashells to your ear and heard what the children say is the sound of the sea, the "music of the waves"? Well, that is really the sound of your blood—as it circulates—echoed in the empty shell. You can hear it sometimes when your head is on a pillow, but it does not sound musical then. Try the shell at any time and you will find that your blood is always flowing. Stick your thumb in your ear and listen. That is nature's way of constantly carrying the nourishment from well digested food to every part of your body.—London Standard.

Able to Pay.

They were rich, and the daughter was taking lessons on coyness and social small talk.

"A penny for your thoughts," she archly remarked to an abstracted visitor and then felt, from the look of horror that overspread her parent's face, she must have been guilty of a false step.

"Why didn't you offer him a sovereign?" was the mother's criticism after the visitor's departure. "We've got money, and you must not be afraid to let folks know it."—London Scraps.

AID OFFERED FARMERS

Cultures for Fodder Fields Ready for Distribution Once Again

Announcement is made to the farmers of the state that the Oregon Experiment Station at Corvallis, through its Department of Bacteriology, has now resumed the distribution of "inoculating cultures" for legumes.

Formerly these cultures were distributed free for residents of the state, a charge being made to cover the cost of mailing. Due to lack of certain funds whereby this work has been sustained it was necessary to discontinue the preparation and distribution of these cultures, thereby depriving the farmer of the benefit derived from their use.

Last year over 700 cultures were distributed, the results obtained being generally reported to the institution. That their use again proved its worth is shown by the fact that 68 percent gave better crop yields per acre.

Because so many urgent demands have been made upon the College for continued distribution of these cultures and because of the gratifying results the farmers obtained by them, it has been decided to resume distribution at a minimum charge covering preparation.

These bacterial cultures are prepared in two sizes. Size A, containing enough inoculating material for 3 to 15 acres, inclusive.

Size A costs 40 cents for each culture, and size B costs 60 cents for each culture. The price is very low in consideration of the fact that most commercial firms charge from \$1 to \$2 per acre.

These cultures contain bacteria capable of aiding the plant in utilizing nitrogen, that essential plant food, from the atmosphere. They are of value only to leguminous crops and a different strain of the organism is prepared for each legume. Each is carefully selected and tested before being sent out. All are sent well packed and sealed, with simple printed directions enclosed for their use.

Following is a list of those legumes from which the College is ready to supply the demand: alfalfa, red clover, alsike clover, soy beans, garden peas, vetch, and garden beans.

In ordering always specify the kind of crop you wish to sow. Order far enough ahead to allow 3 to 5 days notice, since it takes a little while for these bacteria to develop to full strength. Include cash, money order, or stamps with order. No culture is sent out until proper remittance is received.

Address Bacteriologist, Oregon Agricultural College, Corvallis, Oregon.

Ladies of Beaver Creek S. S. Banquet

ed by Men Saturday Evening

A ship race between "The Great Northern," the vessel occupied by the men and "The Turtle," occupied by the ladies, from Portland to San Francisco was undertaken. Each ship was advanced according to the number of men and ladies in attendance at the regular Sunday School sessions. The crew reaching San Francisco first was to be rewarded by a banquet, given by the other crew. The ladies won, and received their reward last Saturday evening. When the contest closed "The Great Northern" was still out in mid-ocean, the voyage having been in progress several months. Before the banquet was served, an appropriate literary program was given. Mr. Chris Fisher presided and announced the following program:

The Song of the Turtle, an original composition, by the winners; an original poem, Fred Blum; solo, Miss Ethel Hensien; instrumental selection, Chris Muralt; history of the voyage, Chris Fisher; music, Miss Stella Hughes; reading, C. Chapman; guitar solo, Robert Traman; reading, Fred Blum; musical selection, Mrs. A. Thomas.

The County Sunday School Officers were invited and short addresses were made by Chas. F. Romig, President of the County Association, and Mrs. A. MacDonald, Superintendent of the Girls' Teen Age Dept. Mrs. Badger, the Superintendent of the school, made a fitting address also.

The front of the large hall was decorated with eight scenes, views of different stages on the journey. These were prepared by Arthur Lindley, a lad of fifteen, and added much to the enjoyment of the evening. Arthur certainly shows a wonderful talent as an artist and we hope in the future to hear more of him in the realms of art.

The evening's pleasure closed just before the mid-night hour with a most excellent supper, consisting of oysters, sandwiches, pickles, cake, etc., prepared entirely by the men. The ladies were not even allowed a place in the kitchen.

Mrs. MacDonald, of Oregon City, remained over for the Sabbath School, and gave an address there. She reports a real live Sabbath school, one that is worth while.

Oregon papers are generally turning down the advertisements of liquor mail order houses. That was to be expected. Yet we note that one paper, Ashland Tidings, boasts of it. The editor must be trying to keep his courage up.

If the recent elections in the East showed that there was no great confidence in the nation regarding the Wilson administration, what are the republican papers so worried about?
