

COUNTY AND
CITY LOCALS

Optometry means eye service. Claire Miller has returned from the Oregon Agricultural College. The many friends of Clayton R. Freytag, who is now a member of Co. M, Idaho National Guard, will be pleased to learn that he has been promoted to corporal. Clayton is the son of O. E. Freytag, of this city.

The Rev. J. W. McCallum was called to Tacoma Monday by receipt of news of the serious illness of a little niece. He made the trip by auto and was accompanied by his family and Mr. and Mrs. Hendry.

Harry Bradley, prominent farmer of Eagle Creek, was seen on our street Tuesday.

Gilbert Robbins, well known farmer of Molalla, was transacting business in town the first of the week. In a letter from Walter Grossenbacher, he reports having seen F. H. Verstak, Arthur Daly and Trunk Rittenhouse at San Francisco, and they are apparently well and enjoying life of the navy. Walter is now in Los Angeles.

Mrs. A. Naterlin has returned from Shepherd's Hot Springs, Wash., where she has been spending some time for the benefit of her health.

Optometry means eye service. John Lewthwaite, Sr., and John B. Lewthwaite, Jr., are in Ocean Falls, B. C., this week where they attended the opening of a mammoth paper mill constructed by the Pacific Mill Limited Co., of San Francisco, at a cost of \$2,000,000.

Mrs. Williams, of Lewiston, Idaho, arrived this week and will be the guest of her mother, Mrs. M. J. Moreland, and her brother, C. A. Moreland and wife.

Friends of the family of Mr. and Mrs. Brenton Vedder will be pleased to learn that George, their youngest child, who has been critically ill for some time, is now improving rapidly.

Miss Margaret Bruening, of Mt. Pleasant, has returned to her home after a visit with friends in Portland.

Miss Ruth Brightbill has returned from Seattle where she has been visiting friends.

Chris Mural, of Homedale, was in town Tuesday on business.

Mrs. Grant Nash presented her husband with a daughter last Friday.

The six-year-old son of W. M. Howard, residing five miles south of Oregon City, struck out on horseback for Portland Sunday afternoon to see something of the great world. He was missed, and late in the afternoon motor cop Meads picked him up in Milwaukie and took him home.

Charles Porter, son of Mrs. R. W. Porter of Gladstone, has been appointed chief grain inspector under the grain inspection act recently passed. Mr. Porter is well and favorably known in Oregon City, where he represented the Portland Flouring Mills for many years.

Miss Christina Blum, who has been visiting in Albany, has returned. Mrs. S. W. Moody and little daughter of Eugene are the guests of Mrs. Moody's sister, Mrs. C. L. Stafford.

Mrs. Moody formerly resided in Oregon City where she has many friends.

Mr. and Mrs. Edwin T. Farr and son, formerly of Marshfield, have arrived in Oregon City to reside. At present they are the guests of Mrs. A. L. Farr, mother of Mr. Farr.

A car driven by J. E. Erlich, of the Coast Chemical Co., collided with a car driven by Earl Anthony at the corner of Main and Tenth streets Saturday evening. No one hurt, but both cars slightly damaged.

Mr. and Mrs. R. O. Young and two little daughters left Sunday evening for Floriston, Cal., where Mr. Young will assume the management of the

paper mills. They have been the guests of Mr. and Mrs. Edward Young, and made many friends during the stay in Oregon City.

Mr. and Mrs. G. F. Johnson are entertaining Mrs. E. B. Johnson, of Seattle.

Mrs. Charles Teats left for Boston, Mass., last Thursday evening, via California, to join her husband, who preceded her to the "Hub" about a year ago. The Teats will make Boston their home.

Burr Johnson is visiting his grandparents in Pendleton, and may spend the summer with them.

Mrs. Eliza Anne Hise, who died last Thursday at the home of her son, George Hise, of Bolton, was buried Friday afternoon from Holman's undertaking parlors. Rev. W. T. Milliken, pastor of the First Baptist church, conducted the services. Mr. and Mrs. John Loder sang two beautiful selections. Interment was made in Mountain View cemetery.

J. M. Potter, formerly editor of the Ashland Tribune and later of the Medford Tribune, has succeeded Earl C. Brownlee on the staff of the Courier.

The dance given last Saturday evening at Winkle hall, West Linn, under the auspices of the P-K Artisan orchestra was a great success.

Miss Letitia Willoughby left for Stella, Wash., on Monday to make her home with relatives.

Rev. J. R. Landsborough, pastor of the Presbyterian church, is in Dallas, Tex., attending the General Assembly of the Presbyterian church. He will return about June 1st.

Mrs. G. W. Grace is very ill at her home on Washington street. Hardening of the arteries is the cause.

Mr. and Mrs. Lionel Gordon are visiting Mrs. Gordon's parents, Mr. and Mrs. H. P. Brightbill.

E. W. Murphy, an Oregon University man, began journalistic work Monday as reporter on the Morning Enterprise.

W. S. U'Ren of Portland was a visitor in Oregon City Wednesday.

IN THE DIVORCE COURT

Hubby Charges Spouse With Stealing Money and Provisions

Two days after the couple was married John Trachsel charged his bride, Marie, with stealing \$10 and within a short time butter and cream were added to a list of articles he is said to have accused her of pilfering. They were married February 25, last, and the wife is 55 years old. Cruelty is the ground upon which she seeks divorce in a complaint filed here Friday. She would resume her former name, Maria Loertscher.

When Frieda Brown called R. C. Brown a "lazy fool," and otherwise taunted her hard-working spouse, adding insult to injury by kicking him, according to his complaint, Brown rebelled and Friday he filed suit for divorce in Judge Campbell's court. The couple was married at Tacoma Oct. 15, 1914. From April 8 to November 5, 1915, Brown alleges, his wife stayed away from her home for some unknown reason, but after he reinstated her in the home upon her return, she continued her cruel treatment, he says.

Ernest W. and Emma J. Bailey are not suited to one another; they quarreled continually and their social status is widely different, according to the divorce complaint filed by Bailey Friday. He says that constant quarreling affected his sleep, and thus broke down his health. They were married at La Grande, Ore., on October 19, 1910, and have one son. Bailey offers to contribute \$10 a month to the support of the child and allow his wife the custody of the youngest.

Courier and Daily Journal—\$4.75.

Clackamas Farmers Take Interest

The local office of the Extension Service of the O. A. C. in conjunction with the U. S. Agricultural department, is fast getting returns from the various units of the Council of Defense recently organized in this county, and reports, as far as they go, are encouraging. They indicate that the farmers are realizing their responsibility in the campaign of food preparedness and many additional acres will be planted; offerings of seed are being made at a satisfactory rate, on the one hand, and many calls for information as to where they can get seed are proving the necessity of this very medium of exchange offered by the O. A. C. service.

Prof. E. B. Pitts is anxious to impress upon the farmers the willingness of the service to aid them in any way possible, and asks them not to hesitate to write him about their troubles.

As fast as the blanks, which were sent out to the various units throughout the country, are received, the figures are being compiled and the information forwarded to Washington. The girls of the Honor Guard have volunteered their services in this work, and are proving a great help to Prof. Pitts and his assistant, Mr. Case.

FOR RENT—At Jennings Lodge, a cozy five room cottage, newly papered and painted, with one third acre of land adjoining. Two blocks from car and only a short walk to the bathing, boating and fishing grounds in Willamette river. \$8 per month. Inquire Carl L. Smith (next door).

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the blood on the mucous surfaces of the system thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative powers of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists.

AIRCRAFT SCOUTS.

Their Value in Naval Warfare in Locating Submarines.

NOT GOOD AT SINKING THEM.

While They Are Clever at "Spotting" the Submerged Boats, It Is Only by Great Skill and Good Luck That a Bomb Can Be Dropped to Its Mark.

In some ways an aeroplane is more effective in locating a submarine than a destroyer or a patrol boat, and it may even be able to detect the vessel, says C. G. Grey, editor of the London Aeroplane.

There is a popular illusion, which is not exactly a delusion, that the observer in an aeroplane can see as far down into the water as a submarine is likely to dive. Up to a point this is true, for if the water is clear it is possible to see some twenty or thirty feet into it from a point vertically above, and if such water is only forty or fifty feet deep a submarine is not likely to dive beyond the visibility point.

It is quite another matter, however, where the water is a kind of leaden gray in color and where ten feet of water over the periscope is enough to hide a submarine as effectively as if she were twenty fathoms down. Therefore it is fairly obvious that the scouting air craft have to depend on surface vision quite as much as the patrol boats. Where the difference does come in is in the angle of vision from which that surface view is obtained.

For instance, a patrol boat might well miss seeing a periscope half a mile away, especially if the periscope were between the boat and the sun, so that the reflection of the sun off the water was dazzling the lookout men. The aircraft observer, on the other hand, perched up aloft, would have a far better chance. The periscope, cutting through the water, makes a very distinct wake which spreads out on each side so that it makes a light but quite distinct "road arrow" of foam.

When the periscope is above water the top of the conning tower is not far below, so that this also is visible unless there is a heavy breaking sea. And probably the bubbles from the exhausting air can also be seen.

Thus an escort of seaplanes should have a far better chance of spotting the presence of submarines than could any escort of surface ships. At the same time it is well to remember that an escort of destroyers or some similar type of armed ship is necessary, because the aeroplane or airship of today is not capable of carrying guns big enough to sink submarines with certainty, and the art of bomb dropping from aircraft has not become sufficiently a science to make the certainty of the bombs reaching their mark as great as is the certainty of a shell from a four inch gun doing so.

Therefore the aircraft by themselves can only hope to keep submarines submerged by dropping bombs at them, though they may sink one here and there by a combination of personal skill and good luck, whereas by acting as "spotters" for the highly trained gunners of destroyer flotillas they can co-operate very materially in the actual destruction of enemy submarines.

Where the naval air craft really do come in is in the immense surface of sea which they can cover in a very short time and their ability to take enemy submarines by surprise while lying on the surface "airing" their selves and charging up their batteries. A small fast scouting aeroplane does anything between eighty and a hundred miles an hour, and at a height of 7,000 or 8,000 feet it is fairly hard to see. On land one is generally warned of an aeroplane's arrival by the sound of its engines, but at sea the lapping of the water and the whistling of the wind through rigging or around superstructure drown the sound of the aero engine till it is fairly close. Consequently a seaplane has more than a sporting chance of getting within a mile or so of a submarine before it is seen, and if it gets within that distance it should be able to make things very unpleasant for the submarine, even if it has not the luck to sink it outright.

Even at night in moderately fair weather, which is naturally the best for submarine operations, big seaplanes with searchlights could do much to keep submarines under water and so add to their troubles by preventing them from stopping on the surface long enough to air their interiors and to charge their storage batteries.—New York World.

Resistance of the Wind.

Tests on a model of the mail carrier Neptune made in the wind tunnel of the Washington navy yard by Naval constructor William McEntee show that if this vessel were steaming against a thirty mile wind at 14 knots an hour it would require about 770 horsepower to overcome the resistance of the wind. This is about 20 per cent of the power necessary to propel her through the water.

Very Formal.

"Are you on very friendly terms with your neighbor in the apartments?" "Well, no. She's rather formal—always sends her card when she wishes to borrow flour and if she wants both flour and sugar she sends two cards."—Washington Herald.

One must fight as an archangel for freedom, but in freedom one must live as a saint.—Serbian Proverb.

Trouble Entirely Disappeared

Fathers and mothers worry over a child with a chronic cough. Knudt Lee, Wannaska, Minn., writes: "For several years my daughter had a bad chronic cough. Every time she caught a little cold, it aggravated the trouble. We tried many medicines, but not until we tried Foley's Honey and Tar did anything produce any great relief. In a few days the trouble entirely disappeared and has never returned." Foley's Honey and Tar for coughs, colds, croup, whooping cough.—Jones Drug Co.

50c 1/2-gal.
75c gal.
or 60c gal. if you furnish the bottle. One gal. will preserve 50 dozen eggs.

ST. OVEN IN PICARDY
Glean of English orchards dance Through the sunny fields of France; Flowers that blow at Nedonch Thrive in Gloucestershire as well; Children sing to fleet the time; What they deem an English rhyme—"Kiss me quick; apres la guerre Promenade en Angleterre."

English hearts are gladdened when Out of children's lips again Comes the lilt of English song When their absence has been long: Children running through the street Beating time with merry feet—"Kiss me quick; apres la guerre Promenade en Angleterre."

But to hear them as they sing Brings a sudden questioning: Here the children play and roam—How's my little one at home? In St. Owen the simple strain Takes the heart with hungry pain—"Kiss me quick; apres la guerre Promenade en Angleterre."

CHILDREN NOT NEEDED
Adult Help, 18 Years and Over, Is Wanted on Farms

Answers to questions sent to grange officers by the National Child Labor committee indicate that farmers do not want or need city children. Of the replies received to date, which cover 15 states, 62 per cent say unqualifiedly "No," to the question, "Are city school children wanted to

work in your district?" An Illinois farmer writes: "Farmers are in need of adult help, 18 years and over." The Minnesota state grange master says: "Nearly all the work is carried on by either gas or horse power and I find they do not understand how to drive a horse or handle machinery."

Of those who mention the lowest age at which a boy is useful, 64 per cent say 14 or over. Those who mention the need of children say they are wanted for berry picking or truck gardening, but only 12 1/2 per cent of all the answers say, without qualification, that children are wanted on the farms.

NARROWLY ESCAPE DEATH
Greaves and McNeill Plunge Off the Grade in Auto

To shoot off the grade in an auto, turn over and be pinioned beneath the machine twenty feet below road without sustaining at least one broken bone apiece, is "going some" even for insurance men. That was the experience Tuesday of Harry Greaves and James McNeill, the well-known insurance men.

Between West Linn and Willamette, they met H. L. George, salesman for Marshall Wells Hardware Co., in a narrow place. George miscalculated the distance, and swung back into the road too soon, catching the other machine's rear wheel and turning it so that it plunged off the grade. A small tree some twenty feet down stopped the car from falling the remaining distance to the rocks below. With help, the two men were liberated from the overturned auto, and upon taking stock, found no broken bones, but Greaves' arm was badly bruised.

These men sell accident insurance and probably had policies in their own companies, which may account for their escape, as it is seldom that

one carrying accident insurance is injured badly enough to draw down damages. The moral is obvious.

Church Notice
First Congregational—Rev. J. W. MacCallum, 9:45, Sunday School, C. H. Dye, superintendent. Services at the usual hours, 11 a. m. and 7:30 p. m. Y. P. S. C. E. 6:30 p. m. Thursday night meeting at 7:30.

Scandinavian Service
There will be Scandinavian service in the Methodist church in Oregon City next Sunday, May 20, at 3 p. m. Rev. John O'vall will preach. Good songs and music will be rendered. All are most cordially invited to attend.

There are thousands of children who are bright but frail—not sick but underdeveloped—they play with their food—they catch colds easily and do not thrive—they only need the pure, rich liquid-food in SCOTT'S EMULSION

to start them growing and keep them going. Children relish SCOTT'S and it carries rare nutritive qualities to their blood streams and gives them flesh, food, bone-food and strength-food. Nothing harmful in SCOTT'S.

Scott & Borne, Bloomfield, N. J.

In the mad rush of advancing prices, many people overlook the fact that at Huntley's they can still buy hundreds of staple articles at just as low prices as one year ago—or even two years ago. All prices quoted in this advertisement are as low as they were before the war. Though on some items the costs have been so unreasonably advanced to us that as our stocks become depleted, we are obliged to increase the price to our trade, yet we are continually offering you many opportunities to buy home and personal needs at peace prices.

A \$2 Hugher Ideal Hair Brush For \$1.49

This is a Very High Grade Brush of Pure Bristles

Set in a flexible rubber base, making it waterproof. It can be washed without injury and it is guaranteed to penetrate the thickest hair. It is truly an ideal hair brush for ladies. Our special price on this lot \$1.49.

We have not advanced the prices on any of our hair, cloth, bath or nail brushes as yet; but brush goods are scarce and difficult to get and we urge our customers to buy their brushes now.

Take the "Veil" from Your Vision
Some people put a heavy veil on, so to speak, when they look through their reading glasses at objects more than a few feet away. Things look blurry and indistinct.

This proves that they need KRYPTOK glasses. The glasses you now wear may be good for close work, but when you look up, you cannot see distant objects clearly.

KRYPTOK GLASSES
THE ONLY INVISIBLE BIFOCAL

They not only "lift the veil" from distant things but also enable you to see near-by objects (with one pair of glasses) clearly and distinctly. KRYPTOKS (pronounced Crip-tokks) are crystal clear, without seam, line or hump. That's why they are infinitely superior to all other double vision glasses.

Call and let us tell you other reasons why you should have KRYPTOK glasses.
