Submitted by the legislature—Uniform tax classification amendment. Purpose—Amending Section 32 of Article I and Section 1 of Article IX of the Constitution by providing for uniform taxation of all property of the same class within the state, county or district levying the tax, and classification of property for such purpose; for the adoption by law of uniform rules for assessment and taxation, and that all taxes shall be levied and collected under general laws operating uniformly throughout the State, and omitting the present requirement of equality without classification.

Initiative Clears Path to Success

Matthew C. Brush was once a Chicago newsboy. Today, he is the president of the Boston Elevated railroad. In an article by Alfred Grunberg in the June American Magazine we read:

"The qualities that stand out the strongest in his own amazing career are the qualities which Matt Brush demands most emphatically in his men."

"What can an employee do to attract your attention the most quickly and surely," I asked him.

"Show initiative," he replied instantly. "Without initiative any man will have a rocky, uphill road, with poor pickings all along. One of the greatest of all handicaps is the fact that it is easier to let other men think for you than to think for yourself."

"One of our crane operators was going home around six o'clock in the evening when a five-ton girder dropped on the track from a big six-horse truck. The girder blocked the track completely and tied up traffic."

"Now, this man was off duty. He couldn't have been censured if he had said to himself, 'This is none of my business. I've done my day's work and I'm through. Let the night force attend to it.'"

"Instead, he called up to the road-master of the surface line, told him what had happened, and asked permission to get a crane from the yards and clean up the obstruction. In an hour this man had cleared the track, whereas, if he had gone on home it would have taken three or four hours to do it."

The White House, Washington: To the farmers of America: At the present moment it is our plain duty to take adequate steps that not only our own people be fed, but that we may, if possible, answer the call for food of other nations at war. In this greatest of human needs I feel that the American farmer will do his part to the uttermost.

Why Straight-Distilled Gasoline

Because, in a straight-distilled gasoline the boiling points gradually rise in a continuous unbroken chain, giving easy starting, quick and smooth acceleration, power and mileage. Boiling points alone reveal gasoline quality. As the U. S. Bureau of Standards states, gravity tells you nothing. No mixture, however cleverly concocted and no matter what its gravity, can contain the correct, unbroken series of boiling points.

Red Crown is guaranteed to be a straight-distilled refinery gasoline, the boiling points of which form a continuous chain. Red Crown is not a mixture.
