LIEUTENANT TOOZE TELLS OF STUDIES IN FRENCH ACADEMIES

Something of the effort of the American Army in France to permit soldiers who had given up their studies to enter the Army at the outbreak of the War, to continue their scholastic work while waiting to return home following the signing of the armistice, are told in the following interview with Lieutenant Larmar Tooze, who lectured at the Congregation church here Saturday evening. Lieutenant Tooze was a member of the 364th Infantry of the famous Ninety-First Division and is the twin-brother of Lieutenant Leslie O. Tooze, the Oregon boy who lost his life while leading a charge north of Bauley Woods during the battle of the Argonne Forest. The twins were in the same battalion until a sniper's bullet separated them.

"Before entering the army, I had always looked upon it as purely impersonal organization where the business of fighting always prevented the soldier from devoting a part of his time toward improving his mind. But when, during February last, General Headquarters sent out an order authorizing 10,000 soldiers of the Expeditionary Forces to continue their studies at British and French Universities, I quite changed my opinion.

"It was a most valuable opportunity for those who were lucky enough to be chosen. Along with four others from my regiment including Major Lester W. Humphreys, of Portland, I was detailed to follow a four months' course at the Sorbonne in Paris. I knew little about the French language, having studied Spanish while in college. All lectures at the Law School in which I was enrolled were given in French. In addition to my law studies I followed a course in the French language under a French instructor who spoke nothing but French in the classroom and allowed the students to speak no English. All the different rules of the French Grammar, even, were given in French. I fully believe that if the same methods of instructing foreign languages were employed in our own Universities a student after taking a two years' course would be able not only to read and write it but to speak it. Of course we had the advantage of living with the French people and because of our association with them, we naturally became accustomed to the pronunciation and at the same time enlarged our vocabulary and learned the grammatical constructions.

"The courses at the Law School corresponded more to our political science courses than they did to the work given in our Law Schools. The French are inclined more to theoretical teaching than we. They are intensely logical and are very abstract in their thinking; too much so for Americans, whose minds seem to always turn to something tangible.

"The lectures are conducted in much the same manner as in American institutions. However, there is a great deal more formality. The professors, most are doctors, always wear their long black robe to the classroom which, with the strip of brilliant red edging and the piece of ermine over the left shoulder look most picturesque. They wear little round, visorless, straw hats which are not unlike an inverted collection box. Then there is a quaint personage whom the Americans immediately nicknamed the "Major Domo". He is dressed in a conventional Prince Albert, wears a huge brass chain across his vest and carries an air which, the first time, impressed us more than the professor himself. His duties consist of opening and closing the door for the professor, handing him chalk when necessary, and to stiffen a penetrating look any incipient indecorum on the part of the student."

NEWLY INCORPORATED CITY OF REEDSPORT PLANS WATER SYSTEM

REEDSPORT, Sept. 3.—The new city of ReedSPORT recently incorporated, is planning to spend \$100,000 for a water system. The present water system is inadequate but W. P. Reed and others anticipating that the community would need a big water supply, have for several years past been developing the Clear lake water project. Clear lake will furnish an almost unlimited supply and enough not only to be sufficient for a good sized city of industries, but also enough to supply a paper pulp mill, which it is hoped to eventually secure on account of the large amount of spruce timber tributary. Much of the work on the Clear lake system has already been done by Mr. Reed and his associates but the plan now is for the city to take it over and complete the work. Plans have been made to float a bond for this purpose.

INTERRED GERMAN RELEASED

WASHINGTON, Aug. 29.—Felix A. Sommerfeld, former officer in the German army and a leader in a number of Mexican revolutions, has been released from the internment camp at Fort Oglethorpe. Sommerfeld, friends here said, plans to remain in the United States.

BULL RUN PARK SPOT OF BEAUTY LITTLE KNOWN TO MOTORISTS

How many readers know the location of Dodge park? And of these readers how many have ever visited this beauty spot on the banks of the Bull Run river, near the source of Portland's wonderful water supply—the water which makes the Easterner smack his lips and for which the native longs for when he is compelled to be away from home for any length of time? Dodge park, or Bull Run park, as it is better known, is but a short hour and a half's ride from the center of the city, and is located at the junction of the Bull Run river and the Sandy—that turbulent stream which shelters in its many arms hundreds of nooks where the tired city folks can while away the week-end or Sunday holiday. A party, of which the writer was one, motored out to the park Sunday and found a clean, well kept grove of pine trees; covering enough space to park 500 automobiles. And the parking space was occupied by scores of picnic parties, some of which had been there for several days. A sandy beach, wide enough to permit several hundreds to take sun baths, held its quota of picnickers. Drinking fountains from which flowed Bull Run water, cool and refreshing, were among the conveniences found. The park is located but 24 miles from Portland and is reached over paved highways and a fine gravel road, with hardly a bump to discomfort. The wonder is that more people do not end their Sunday trips there.

The city of Portland owns the property, and Commissioner John Mann makes it his business to see that the park is run as it should be. There are bath houses for men and likewise for the ladies, and there are canvas affairs which do for individual use when set up on the beach. Mann has put in a couple of springboards for those who can dive or who wish to try, and a lifeline protects those not so accustomed to the water. The stream divides in several places and shoals off to the shore, where the small kiddies under the watchful eyes of their parents can paddle around and get as wet as they permit. Commissioner Mann has also had set up several outside stoves, made of brick and covered with sheet iron, where campers can cook their meals.

Electric lights would have been strung throughout the park before this if the electric circuit would have carried the amount of current necessary. This Commissioner Mann is taking care of and by next week the lights, it is expected, will be going. Mann also is going to install for the benefit of the Portlanders who like to swim at night several large flood lamps, which will light up the swimming pool until it is like day. This will be a novelty that will appeal to many.

When it is hot and sultry in Portland and the intervening territory it is cool at Bull Run park, due to its location among the hills, and if it were better known to the general public this best and most convenient of camping spots near Portland would be better patronized.

Here is how to go to Dodge park next Sunday or any other time you want to go: Go out the Powell valley road to Gresham and keep straight on through town. At the first forks of the road turn to the right and keep on the Powell valley road, making a last turn at the stores. A few hundred feet farther on the road forks again—take the left-hand turn, which is marked "To Bull Run." The next place to bother those who have not made the trip is where one road goes off to the left and down a hill. Here take the right-hand turn. After this there is nothing to do but to stay on the road till you get to the park. This leads down two pretty steep hills. The second and last one leads right down into Bull Run canyon, and on both it is safest, especially for the new drivers, to shift into second gear and descend on compression with the ignition shut off. The scenery along the way is varied and is everything from the flat rolling country near Gresham, dotted with prosperous farms, to the rugged wooded sections in which is laid Dodge park.

CORPORAL MAYS WIRES FROM SAN FRANCISCO WILL SOON BE HOME

Corporal Winifred Mays, who has been in the military service of the United States with the A. E. F. for the past two years, has arrived in San Francisco, according to advices recently received by Mrs. N. A. Bowers of Canemah, and it is expected that he will arrive in Oregon City within the next few days.

HEAD OF DRY SQUAD KILLED

DENVER, Ore. 29.—George Klein, a city detective, died today from wounds inflicted by an unknown assailant late last night. Klein was head of Denver's prohibition squad and had actively engaged in running down illicit liquor dealers since the state went dry.

NEW ROAD BOND ISSUE PROVIDES ROAD DISTRICTS

The question that will be brought before the people of Clackamas county for their consideration when they are called to vote on the proposed bond issue of \$1,700,000 for the construction of hard surfaced trunk roads in Clackamas county will be purely and simply this: "Shall the county court be authorized and given the money to build the trunk roads embraced in the road-building schedule within the next four years, making available for the use of the people in that period of time roads which will take twenty years to build if it is found necessary to do the work with funds made available from the 5 mill road tax? Or will the people of the county be content to put up with the present method of building trunk roads, embodying as they do constant inconveniences through poor stretches of highway and blocked sections, and will they be willing to wait twenty years for the completion of the present proposed road program, and then find that they will have nothing but worn-out roads when the 20-year period expires?"

According to the tentative proposals as embodied in the proposed \$1,700,000 bond issue, the following salient features command the attention of every person and property owner in Clackamas county:

The life of the bonds is 20 years, and they must be sold at par and will bear interest at 5 per cent.

The county will reserve the right to issue the bonds only so far as it will be necessary to raise money for road building, and also to pay off bonds at any interest-paying date after they are issued.

The county will be divided into ten road districts as follows:

A. Barlow to Monitor, 12 miles	\$132,000.00
B. Canby to Marquam, 13 miles	\$143,000.00
C. New Era to Molalla, Liberal to Mackburg, 20 miles	\$220,000.00
D. Oregon City to Kelland Hill, Oregon City to McCord Hill, Oregon City to Canby, Oregon City to Hog Hollow, 13 miles	\$143,000.00
E. Oregon City to Schubel, 8 miles	\$8,000.00
F. Oregon City to Viola, 9 miles	\$9,000.00
G. Park Place to Springwater, 20 miles	\$220,000.00
H. Logan-Barton to Estacada, 14 miles	\$154,000.00
I. Rock Creek to Sandy, Sandy to Orient, Damascus to Mult. County, 22 miles	\$242,000.00
J. Wilsonville to Oswego, Stafford to Willamette, 16 miles	\$176,000.00

147 miles at \$11,000.00 per mile, \$1,617,000.00

The money will be apportioned to each road district in the above amounts, and each district's allotment will be placed in a bank in that district, (or if more than one bank, to be divided equally among all) and will be subject to withdrawal by the county for road work in that district ONLY.

Each road district will elect or appoint advisory committee to work with county court in laying out and constructing roads and in the paying of bills.

The roads will be built either by the county paving plants or by contract as per judgement of advisory committee. To get county aid from the funds of the bond issue each district must raise funds through taxation of assessable property within the district to provide costs of rights of way, grading and preparing the base of roads for the hard surface.

The county court and building committee are authorized to attempt to secure government and state aid in the construction of the trunk roads, and where such aid is secured the moneys saved from the allotment of bond funds for any district so receiving aid shall be used to assist other districts for grading, bridges, etc., in the judgement of the court or building committee.

Not a dollar of the bond money will be spent for anything but hard surface, with the exception of where grades are so steep as to make gravel or macadam essential to the life of the pavement.

According to estimates made, there will be left from the moneys of a \$1,700,000 bond issue apportioned as the above ten road districts would, indicate, the sum of \$83,000. This sum, with the accumulated moneys of the Oregon City Bridge tax funds, will enable the county to assist in the construction of the new bridge across the Willamette in this city.

If after a road district has completed the construction of its trunk road there are any funds left from its share of the bond appropriation, the county court may, at its discretion, use such funds in the extension of the following roads, using hard surface paving:

A—Estacada to Mt. Hood loop.

B—Molalla to Willamette.

C—Schubel to Clarks.

D—Mullino to Carlton.

At present the county road tax is in the neighborhood of 9 mills. In the event the people of the county sanction the issuing of the proposed bonds, this tax may be reduced to 5 mills and will then be sufficient to retire the bonds as they become due and pay all maintenance costs of the roads of the county, which will be negligible, due to the fact that they will be all hard surfaced.

Thus may it be seen that by voting the bond issue the people will be reaping a two-fold benefit—they will be getting their roads, the best they can get, and quickly—and their yearly road tax will be lower. Even if it is as high as it is now they will have the satisfaction of being able to travel over every trunk road in the county, every day in the year, and in all kinds of weather—and they won't be stumbling over road gangs every mile or so and for the next twenty years be forced to be continually detouring to get around closed sections of the highways.

Steel Corporation Head Who Refused to Confer With Labor Leaders

Elbert H. Gary

Facing the possibility of a strike affecting the thousands of employees of the United States Steel Corporation, Judge Elbert H. Gary, chairman of that corporation's executive board, refused to confer with members of the Amalgamated Iron and Steel Workers' Union. He denied their contention that they represented a great majority of the employees and declared that the corporation stood solidly for the "open shop."

U. S. BIRD MAN IS PROBABLY WINNER OF N. Y.-TORONTO AIR RACE

ROOSEVELT FIELD, Mineola, L. I., Aug. 28.—Unless his time is beaten before the New York-Toronto aerial derby ends tomorrow night, Sergeant Frank Coombs, an American flyer, who started from the Canadian city, probably will be judged the winner of the 1042-mile race and the \$10,000 prize. Coombs gave his time in the air as 511 minutes for the round trip.

America for Americans

The government of the United States is primarily a government of the people, and for the people. Government reports show that there are in the United States over the age of 10 years a total of 8,500,000 persons who can neither read nor write the English language.

It is a beautiful theory to hold out the shores of the United States as the haven for the oppressed of other nations, but how can a system be devised to teach Americanism to those who do not understand our language? America for Americans should be the slogan and those from foreign shores should either be compelled to learn the common language of America, learn what our institutions stand for or return to the land from which they came. If American citizenship stands for anything it stands for an educated and a thinking people.

MT. HOOD IS RIOT OF COLOR WITH EARLY FALL BLOOMS PERFUSE

DEER, Sept. 3.—Mountain climbing parties to Mount Hood are numerous now. Several botanists have paid the mountain a visit within the past two weeks. One botanist counted 79 species of blooming plants and anemones pushing their heads through the lingering snow banks. There are acres of blooming plants on the eve and base and at the foot of Barrett's spur. For at least two weeks longer those particularly interested in the vari-colored blooming plants will find Mount Hood offering special inducements.

FARMER CRUSHED BY LOG

PRINEVILLE, Sept. 2.—R. H. Kincaid, a young farmer residing 12 miles north of Prineville, was crushed and instantly killed by a rolling log while sawing wood at his homestead Monday. Kincaid and a neighbor boy were sawing the top off a large fir log which was laying on a steep hillside, causing the main log to start rolling. The boy dodged, unharmed, while Kincaid was tripped by a limb and fell.

Kincaid is survived by his widow and child, his parents, two brothers and two sisters.

FORUM OF THE PEOPLE

SUGGESTS MEMORIAL BRIDGE

Oregon City, Aug. 29.

Editor of the Enterprise:—At the time we were expecting the return of the Clackamas county men from the service, there was a desire expressed that this county should honor them and itself by building some kind of memorial to help keep their memory in mind.

The press of other matters made it wise to postpone its consideration for a time.

It is proposed to build a new bridge over the Willamette at Oregon City. The idea has been suggested to me by a long-time resident of this city that this bridge be built as the memorial to our soldiers and especially for those who perished in the war.

This idea is being put in practice in various places. The international bridge over Niagara Falls, to cost ten million dollars, is to be dedicated to the heroes of the U. S. and Canada.

What more fitting background for the commemoration of heroic deeds than a bridge of dignified architecture?

Oregon City stands second to none in offering a beautiful natural site for such a structure.

Now while the building of the bridge is under consideration is the time to talk it up.

Respectfully,
J. A. R.

WALLACE VS. OREGON ENGINEERING CO. IS AGAIN UP FOR TRIAL

The trial of the case of Guy Wallace vs. the Oregon Engineering and Construction company, which was started in the Circuit court here Monday afternoon is receiving a considerable degree of attention and promises to occupy the court for some time.

Mr. Wallace, according to the evidence submitted, claims to have received a sub-contract from the defendant company for the laying of water pipe from the intake of the Oregon City water supply reservoir to this city and to have been awarded the contract at a bid of 10 cents per lineal foot. In his suit he claims that certain actions of the defendant company have been performed intentionally to delay him in the performance of his contract, and that as a result of these actions he has lost in the sum of \$5200, for which he asks the court to grant him a judgement.

Thomas Mannix is attorney for the plaintiff and Hedgus & Butler are acting for the defendants. The case is being heard before Judge Hagley of Hillsboro.

The case was tried about a year ago, resulting in a non-suit. Mr. Wallace then appealed to the supreme court, which body reversed the decision of the lower body and sent the case back to the circuit court for retrial.

METHODIST CHURCH TO CONSIDER LIFTING BAN ON PLAY GOING

NEW YORK, Sept. 2.—The ban upon dancing, theatregoing and card playing, contained in the book of discipline of the Methodist Episcopal church, is to be made the subject of debate at the church's conference in Des Moines next May, when the conference will be asked to lift the ban by removing the prohibition from the book of discipline.

In the prison at Lyons, France, there is a curious collection of pens. They are the pens with which the executioners signed the regulation receipts for the prisoners handed over to them to be guillotined. At each execution a fresh pen is used for the purpose, and the ink is left to dry upon it.

Ten Points To Settle Before You Buy Any Auto Truck

The motor truck is established. Its utility is no longer questioned. As a means of transportation it is definitely established that a motor truck is incomparably economical, convenient, etc. So it is not a question of whether or not you need a motor truck.

Your decision must be WHICH TRUCK to select. It is a big question not to be decided until you have every fact and every data of cost before you. On that basis ONLY can you make a selection that will justify the required expenditure.

GARY, "THE TEN TEST TRUCK," invites every investigation, every test or question that any owner may advance. The GARY MOTOR TRUCK has been selected by some of the largest truck users in America. They buy on a basis of FACT ONLY, and the Gary has satisfied these owners in every one of these following ten vitally important points.

Test "1" REASONABLE INVESTMENT. Don't buy a truck that will depreciate too rapidly to be economical. You really rent a motor truck when you buy it. At the end of its period of use it should have substantial "chassis or trade-in" value. Investigate the actual "after use" worth of any truck before you make your selection.

Test "2" ECONOMIC SELECTION. Trucks are means of economy. It is not an investment to buy a truck that will increase your transportation costs. Find out what it will actually cost you to transport your merchandise.

Test "3" SIMPLICITY. Skilled experienced labor costs money. You don't want to increase your labor hire because of your trucks investment. Before making your choice, take any worker in your delivery department, give him a few simple instructions, see whether or not the truck is simple enough for his unskilled abilities.

Test "4" EQUALIZED BALANCE. From front to rear lamp bracket maximum efficiency of operating requires even distribution of weight, work and wear. The motor must not be too light for its load the frame must not be heavier than is necessary. Consider whether or not there is proper correlation of size and parts.

Test "5" OVER CARRIAGE. Do not buy a one ton truck and expect it to do a 3 1/2 ton duty. But the trucks you do buy should be built to allow for reasonable margin of overload. Buy the size truck that your business needs but do not invest in a 5-ton truck for a 1-ton truck labor. Nor should you buy a 3 1/2-ton truck for a 5-ton labor.

Test "6" CONTINUED OPERATION. Accidents will happen, and some repairs are inevitable. Select the truck of a design so standardized that repairs will never keep your truck out of service.

Test "7" ESTABLISHED MANUFACTURE. A truck made by a maker having a limited resources is a questionable investment. Be sure that the maker of your truck will be able to continue in business as long as you do.

Test "8" DEALER DEPENDABILITY. The dealer is the agency that is directly responsible to you. Be sure that the dealer from whom you buy your truck is as reliable as your own banker. Do not buy a truck from a dealer that has a reputation of shifting responsibility.

Test "9" NON RADICAL DESIGN. Radical changes and principles are experimental. Do not buy an experimental truck. Keep within approved designs and principles.

Test "10" SPEED, POWER. An emergency will arise where you will have to run your fully loaded truck at its maximum speed. Power should provide for speed to allow for speed when it is necessary.

GARY, "THE TEN TEST TRUCK," has measured up to every test. Let us give you the facts to prove it.
