BUY A DOWDEN
Because it is
A Superior Potato Digger

THE DOWDEN DIGGER will make good your expectation of a Potato Digger. It will dig your potatoes clean, will get them all without damaging them. Study the construction of the Dowden and you will see why it is so and why it makes good over other makes of diggers.

Extra Separation is obtained by means of an extra long elevator. The regular Dowden has much more separation than others of the same size. The position to insure that the potatoes are delivered clean on top the row.

Extra Wide Shovel Adjustable and made of hardweld and polished steel.

Gear Drive The Dowden has no drive chains to break and cause trouble. The main drive is gear-driven from both wheels.

Strong Conveyor Chain Made of best crucible steel. It will not break. It is a heavy chain, therefore smaller in size than ordinary chains, which eliminates the trouble caused by dirt adhering to the links.

High Wheels—Light Draft The wheels on the regular Dowden are 42 inches in height. This is much higher wheel than used on ordinary potato diggers and the Dowden is made lighter draft because of it.

Buy a Dowden at Once We now have a digger on hand, but freight is coming through slowly, material is getting scarce and more higher prices. It may save you money in the cost of the machine and possibly save you a great deal of money in the harvest of your crop.

Prices and Sizes We have the regular Dowden in four-horse size, with and without picker attachment. We also have a two-horse Dowden that is a great success. Where conditions are very favorable the Dowden can be used with a picker attachment. State the size machine you need and we will make you prices upon the same. Write us today.
