

Will Verify Statement

Mr. Philip Gelber, 545 Bushwick Ave., Brooklyn, N. Y., will verify to anyone interested his endorsement of Fruitola and Traxo. In writing to the Pinus laboratories Mr. Gelber says:

"I suffered with gall-stones seven years—tried various remedies without satisfactory result—was induced to try Fruitola and Traxo. Glad to say I am now feeling better than at any time for years and heartily recommend Fruitola and Traxo."

Fruitola acts on the intestinal organs as a powerful lubricant—softening the congested masses, disintegrating the hardened particles that cause so much suffering and expelling the accumulation with almost instant relief. Traxo is a tonic-alterative acting on the liver and stomach, and is especially recommended in connection with Fruitola to build up and restore the weakened run-down system.

For the convenience of the public, arrangements have been made to supply Fruitola and Traxo through representative druggists. In Oregon City, Portland, Canby and Hubbard they can be obtained at Huntley Bros. Co's Drug stores.

WHY DYES ARE SCARCE

German Supply Was to Greatest Demand in America

The preliminary figures on the manufacture of dyestuffs in 1914, as summarized by the Bureau of Census, reveals the extent to which this country depended upon foreign sources for the element of color, as far as it is contributed by materials of an organic nature. These constitute almost entirely the dyes used in the textile branches, as well as in the manufacture of paper and varnish, the dyeing of feathers and straw, etc.

During the calendar year 1914 the production of synthetic dye-stuffs in the United States amounted to about 3,300 short tons, valued at about \$3,000,000. The importations of coal-tar dyestuffs from Europe for the fiscal year 1914 were 25,700 short tons valued at \$9,102,000. The domestic production was, however, confined largely to the assembling into finished dyestuffs of semi-manufactured materials. The only genuinely American contribution consisted in about 900 tons of aniline, made from benzol of domestic origin, the manufacture of which was started in 1910. Six factories were devoted to this branch, and 400 operatives were employed.

The advent of the war involved an almost complete cessation in the shipment of the coal-tar "intermediates" employed in our dye-stuff plants, as far as they were of German origin. Since March, 1915, no artificial dye-stuffs have been received from Germany, which formerly contributed 86 per cent of our foreign supply.

All American industries dependent upon the use of artificial colors—and they are scores in number—were threatened by paralysis or discoloration.

Under untoward conditions American chemists and American capital have grappled with a serious problem and sought to relieve temporary distress, while laying the foundations for a comprehensive, self-contained American coal-tar chemical industry which should free us from dependence upon trans-Atlantic sources.

During the past year and a half a large amount of constructive work has been done. It has meant the creation of the industry from the bottom up, the multiplication of sources of coal-tar "crudes," the organization of the manufacture of the many "intermediates," and the construction of new units for the production of finished colors.

The recovery of coal-tar "crudes" from the by-products of coke plants has now been so perfected that the output is more than sufficient to cover the needs of a national color industry. Two years ago the annual output of these crudes was estimated as follows: Benzol, 9,600 short tons; toluol, 3,200 tons; naphthalene, 1,500 tons; and phenol, 75 tons. Today the estimated annual output is: Benzol, 90,000 tons; toluol, 22,440 tons; naphthalene, 12,500 tons; phenol (chiefly synthetic), 10,000 tons.

American dye producers have not reached and can not be expected to reach for probably some years the efficiency of the German manufacturers. The American consumer can not at present expect to obtain from our manufacturers the variety of colors developed in the German industry, and perfection of quality will come only after time has served to develop the industry of this country. The German industry is the result of years of research, technical training and specialization.

Cut This Out—It Is Worth Money DON'T MISS THIS. Cut out this slip, enclose with 5c and mail it to Foley & Co., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for bronchial coughs, colds and croup; Foley Kidney Pills, for lame back, weak kidneys, rheumatism, bladder troubles and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic, for constipation, biliousness, headache and sluggish bowels.—Jones Drug Co.

OSWEGO PLANT READY

Management of Cement Company Expects to Ship This Month

Plans are being made by the management of the Oregon Portland Cement company of Oswego to have the first carload of its cement product ready for delivery May 21. Only failure of the railroad company to deliver the raw material from the quarry will prevent this being done, according to the superintendent in charge. It is understood that one train load of rock has left the quarry already, and regular deliveries to the crushing plant will be made from day to day thereafter.

The company is now employing a regular force of 80 men at the Oswego plant and 75 men at the quarry. The men at the plant have been installing the machinery and getting everything in readiness to receive the first consignment of rock. The officials prefer not to make any official announcement of the date on which their first lot of cement will be ready,

WHAT ONE FISH DID

The Salmon Creates Poetry Wherever It Goes

The sleek beauty of King Salmon of Oregon City, the richness of his meat and the dietetic value of the mellow flakes thereof, have inspired many a brave soul to oratory and some to debate. But it is seldom that one little fish will work upon the appetite and imagination to the extent of the appended poetic outburst. However, it is greatly interesting to note the varied values that the salmon has. It is not only the greatest brain food known to science, and the most appetizing meal that can be set upon the dinner table, but it is the inspiration of poetry in hearts that never before knew the source of poetry. Why should not Oregon City and her salmon become famous throughout the world? Justly they are fast assuming their rightful throne, and we herewith present concrete evidence in substantiation of the claim.

Last week a fish—just a common, ordinary, every-day salmon from Oregon City—was sent to one of those unfortunate communities up the valley, where a salmon is like a ray of light to a darkened heart; where the abundant table never knows the impenetrable savor of fresh salmon, and where these noble fish are at a premium in the village markets. The verse speaks for itself, yes, indeed, in praising the gummy monsters that are hauled from the river here in great gobs. The most recent tribute to the salmon and his caper, set to the sweet music of the lino-type, follows:

The Fish and Fisherman

A fish, a fish my soul doth crave,
Fresh from Willamette's foaming wave:

When lo! the courier doth bring
Swift as on soaring eagle's wing,
A lusty salmon from the falls
Of Oregon's fair city.

A feast, a feast my soul enjoyed,
Conjured with magic arts employed:
Behold! that salmon's mellow hues—
Fit for a king—our youth renews.
Fisherman, on thee our blessing falls
In Oregon's fair city.

G. H. B.

She Told Her Neighbor

"I told a neighbor whose very young child had croup, about Foley's Honey and Tar," writes Mrs. Reh-tamp, 2404 Herman St., Covington, Ky. "She thought that the child would surely die, it was so bad. When she gave it a couple of doses of Foley's Honey and Tar she was so pleased with the changes she did not know what to say." This old reliable cough syrup immediately helps coughs, colds, croup and whooping cough. Just as good for old as young folks.—Jones' Drug Co.

LEATHER GOES UP

Shoe Manufacturers Scare Up With Talk of Hide Shortage

Shoes and shoe leather will make a big advance this season! With this announcement shoe manufacturers put fear into the hearts of those humans sufficiently civilized to wear shoes. It is an echo from the great war that interests every man, woman and child in the United States.

A greatly increased demand for leather, incident upon the war, combined with the scarcity of leather and the increase in the cost of tanning since the war started, are given as reasons for the advance in the cost of shoes. Millions of pairs of shoes for the European soldiers are made by American manufacturers and the average pair of army shoes takes one and one-half times as much leather as the ordinary street shoe of the civilian.

Knapsacks, saddles, harnesses and other material for the warring armies and the increase of equipment in our own army account for an additional drain upon the leather market, and the supply of hides to fill these demands is not in sight. An ever-increasing amount of leather is used by the automobile manufacturers, and while the demand is increasing the supply is diminishing. The leather market is, of course, dependent upon the hide supply and the cattle which furnish the hides are not killed solely for their hide. The latest census reports show that the cattle population of this country has decreased twenty per cent within the past ten years, and there has been a like increase in human population, and a much larger increase in demand from several sources.

Manufacturers claim that the increase for the present season will be about twenty per cent, but they do not promise that there will not be further increases next fall.

KELLY IS MANAGER

Booster Day Committee Names Man to Have Charge of Affairs

The biggest and best community day that Oregon City has ever had will be in charge of H. Leighton Kelly, present manager of the Rose Festival Queen campaign and former master fish warden of Oregon.

The Booster day committee announced the appointment of Mr. Kelly late last week and that gentleman has already started working plans. In his hands will be the arrangement of the multitude of details which will go toward making Booster day a celebration for all Clackamas county. Mr. Kelly will work under the direction of the Booster day committee.

The committee and Manager Kelly have plans in mind that will be carried out in connection with the Booster day, which will make that event a huge carnival and a day for the gathering together in Oregon City of people from all ends of the county. The assistance of those who live outside the city will be one of the things which will bring about the success of the celebration and features will be planned with the special idea of pleasing the great majority of those who make Oregon City their headquarters on May 27.

THE WORD "LOVE."

In the Orient It Means to Like or is Used to Express Good Will.

The word "love" has been more highly specialized in the west than in the east. In its proper English use it means only that ardent, amorous feeling which cannot be created by will and design. In the west the word "love" has been relieved of the function of expressing the less ardent desires, such as the terms "to like," "to have good will toward" and "to be well disposed toward" simply.

Not so in the east. The word "like" meaning "to be favorably inclined toward," is not found either in the Bible or in the Arabic tongue. In the English version of the Bible it is used in two places, but the translation is incorrect. In the twenty-fifth chapter of Deuteronomy and the seventh verse, "If the man like not to take his brother's wife," should be rendered "If the man 'consent' not," and in the fourth chapter of Amos, the fifth verse, "For this I like you, O ye children of Israel," is in the original, "For this ye 'loved,' O ye children of Israel." In any standard concordance of the Bible the Hebrew verb abeh-to love—precedes these quotations.

So to us orientals the only word which can express any cordial inclination of approval is "love." One loves his wife and children and loves grapes and figs and meat, if he likes these things. An employer says to an employee, "If you 'love' to work for me according to this agreement you can."

It is nothing uncommon for one to say to a casual acquaintance whom he likes, "I must say, sahib (friend), that I love you!" I know of no equivalent in the Arabic for the phrase, "I am interested in you." "Love" and "hate" are the usual terms by which to express approval and disapproval, as well as real love and hatred.

From all this it may be seen that when the Great Oriental Teacher said to his countrymen, who considered all other clans than their own as their enemies, "Love your enemies," he did not mean that they should be enamored of them, but that they should have good will toward them. We cannot love by will and design, but we certainly can will to be well disposed even toward those who, we believe, have ill will toward us.—Abraham M. Rihbony in Atlantic Monthly.

SAINTS OF ILLS AND TRADES.

Holy Friendships Consolated Pious People in the Middle Ages.

The trustful and childlike piety of the middle ages believed that the citizens of heaven were interested in every phase of men's lives, and there was not a single trade, profession or occupation that did not boast a special patron, while certain diseases were thought to be cured and certain visitations ward off through the intercession and agency of particular saints.

Thus St. Andrew was the patron of fishermen, St. Isidore of husbandmen, St. Christopher of porters, St. Mark of lawyers, St. Cosmas and Damian of doctors, St. Joseph of carpenters, St. Crispin of shoemakers, St. Vitus of actors, St. Gregory of singers, St. Dismas (supposed name of the good thief) of criminals condemned to death, St. Apollonia was believed to cure toothache, St. Blasie sore throat, St. Clare and Lucy sore eyes, while St. Benedict preserved his clients from poison and St. Hubert from the bite of mad dogs.

"Men," says Montalembert, "lived in a tender and intimate familiarity with those forefathers whom God had evidently called to himself and whose sanctity the church has proclaimed. From the king and the knight to the poorest workman each had a special protector in heaven, and in the battles, dangers and sorrows of life these holy friendships exercised a most consoling and strengthening influence."—Irish World.

That Old, Old Table.

It is impossible to know who was the author of the multiplication table, but it is known to have been in existence in the days of the builders of the ruined cities of Mesopotamia, whose records are now being patiently deciphered by archaeologists. Tablets are found which tell us of their system of education, banking, accounting, business correspondence, etc., and among others are multiplication tables. So the multiplication table is probably not less than 6,000 years old.—Christian Herald.

Reform.

A small tailor shop on the Bowery burned out, and the tailor moved to the next block. The morning after the fire the following sign appeared in the window of the wrecked store:

"Will be open for business at 2—street next week and will be your honest friend when alterations are completed."—New York Post.

Quick Changes.

Wife—Darling, I want a new gown. Husband—But you had a new one only a short time ago. Wife—Yes, but my friend Ellen is to be married, and I can't wear the same dress that I wore at her last wedding.—Fleegende Blaetter.

Forced Into It.

"I hope you are habitually truthful, Nora."

"I am on my own account, mum. I only tell lies to the callers for the family."—Boston Transcript.

His Job.

"What position has that amateur astronomer on your paper?"

"He? Oh, he's a star reporter."—Baltimore American.

West Linn Equipped

A hose cart and 400 feet of hose were installed in a new fire house at Sunset and Walnut streets, West Linn, late last week, and that community is prepared for the worst, in the way of fire. West Linn will soon have three houses ready for apparatus and these are to be located at different parts of the town in order to provide maximum protection. One house is located at Willamette, which was recently annexed by the thriving council of West Linn.

WOOL BUYERS SLOW

Low Prices Quoted on Willamette Valley Shearing

Wool buyers show no disposition yet to take hold of Willamette wools. They quote prices ranging anywhere from 30 to 33 cents, but it is evident that they prefer to handle the wool on consignment rather than buy it outright. It is not probable that much could be bought at these figures however, as the growers have an idea that their clips are worth at least 35 cents. The sensational course of the recent mohair market has had much to do with elevating the views of valley shepherds.

Wool prices have gone so high and the future course of the market is so uncertain that it is probable there will be very little speculative buying west of the Cascades. The same condition may prevail in Eastern Oregon, judging from the talk among woolmen. Shearing is now becoming general on both sides of the mountains.

There has been a rather larger buying movement in other parts of the west during the past week. In sections where there had been a deadlock between buyers and sellers, it was the latter who won out. This was particularly the case in Wyoming, where a considerable quantity of wool that had been shorn changed hands. Several of these clips were disposed of on a 35-cent basis for medium, or from 7 to 8 cents a grease pound above the prices paid last year.

Fine wools were reported to have been purchased at figures that represented 80 cents scored laid down in the east. On the Colorado-Utah border some exceedingly low-grade wools have brought anywhere from 32 to 35 cents. These purchases, however, do not indicate the market, except as one understands that the high grease price does not in any way mean a high clean cost; on the contrary, the wools are no dearer at the price paid than wools which have brought only 30 cents or less, but which are much heavier in shrinkage.

Medium wool has been taken in Montana at 30 to 31 cents, and one clip brought a fraction over 31 cents. Scattered clips continue to be taken in the Triangle, on the basis of 28 to 30 cents generally. Nevada fine clips are selling at 21 to 22 cents, the clean landed cost being estimated at 70 to 72 cents, and in Southern Utah buyers are paying 21 to 22 cents for fine and 26 to 27 cents for medium, the clean cost being estimated at 72 cents.

NOT AN OFFICE SEEKER

But Urged to Enter Race for Republican County Commissionership

By the hundreds of taxpayers who know me—the reason being my years of experience as a contractor, road and bridge builder, coupled with a reputation for being a hard, conscientious worker and one of the heaviest taxpayers in my home part of the county.

Having constructed roads and bridges, I am perfectly capable of overseeing the building, estimating the values and doing the work myself, if necessary, without having to put the taxpayers to the added expense of hiring technical experts.

Owing to my reputation as one of the original automobile advocates and selling agents in the county, I am conversant with the county's roads—I know the condition of these roads, the needs of the people who travel these roads.

I ask your support at the Primaries.

J. W. REED,
The Original Candidate.

MANY TEACHERS QUIT

City School Staff Depleted by Number of Resignations

A number of teaching positions are to be filled on the staff of the Oregon City high school before the opening of the fall term this year as a result of wholesale and unexpected resignations. Those who have handed in their resignations to the city school board are Prof. C. S. Hahn, head of the science department; Miss Agnes Winchell, Miss Elizabeth Busch, Mrs. H. B. Cartledge and Prof. C. G. Miner, principal of the high school.

The school board has on hand many applications for the several positions to be vacated and after the close of the present school term will consider the election of applicants.

Sale of Forest Timber

Announcement was made this week by the forest service that the district forester in Portland, has just approved the contract for the sale to Brown Brothers of Hubbard of 3,500,000 feet of timber on the Crater National Forest in southern Oregon.

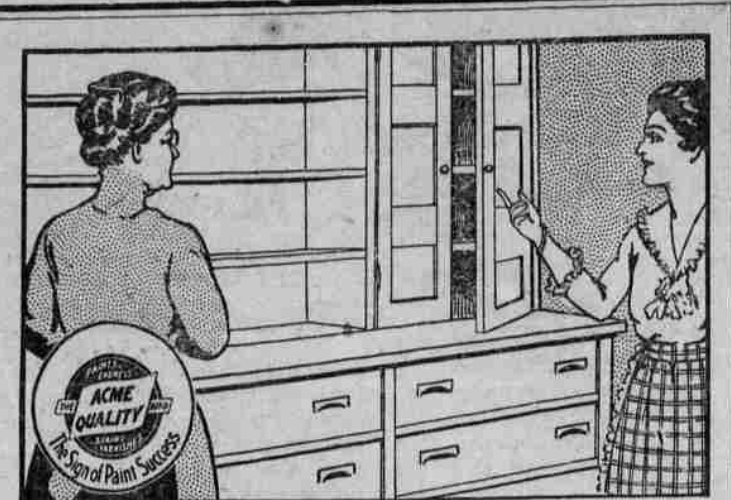

The timber is located on Crystal Creek on the west side of Klamath Lake and consists mostly of western yellow pine, although there is some sugar pine and other species. The prices paid for the timber are \$3.20 per thousand feet for the yellow pine and sugar pine, and 50 cents per 1000 feet for the other species.

Saws Nearly Kill Man

Archie McCord, an employee of Edward's mill at Mulino was terribly lacerated in an accident at the mill last week which nearly cost the young man his life. McCord was filing a large circular saw and in the operation stood straddle of the sharp teeth. Someone started the engine and before McCord could escape from the moving teeth his leg muscles were badly cut. Dr. E. R. Todd took fifteen stitches in the skin in treating the injury. To the quick action of Edward Ball, a fellow-workman, who pulled McCord away from the saws, is credited the saving of the young man's life.

The U. S. Public Health Service issues publications on hygiene and sanitation for free distribution.

The Courier is \$1 a year if paid in advance.

Enamels Stay Clean

Enameled cupboards and pantry shelves clean as easily as a porcelain plate. They are always sanitary. An occasional wiping with a damp cloth keeps them spotlessly white. The smooth, hard surface of enamel simply offers no foothold for dirt.

ACME QUALITY ENAMELS

produce genuine enameled finishes. They are easy to apply—simply brushed on like paint—and they are inexpensive. Call at our store and let us show you how you can secure a genuine enamel finish on your ice chest, refrigerator, kitchen cabinet, cupboard and pantry shelves, or even your entire kitchen.

For a genuine enamel finish on furniture, wood-work, metal window casings, walls, or any surface about the home, use Acme Quality Enamels.

A Delightful Party

A very pleasant party was held at the home of Mr. and Mrs. Charles A. Beck, near Molalla, on Saturday and many little friends of Martha and Nona Beck called to enjoy the event in honor of their birthdays. Miss Nona is six years old and Martha is four. Mr. and Mrs. Beck were assisted in entertaining the little ones by Mr. and Mrs. F. M. Countryman, Miss Hattie Countryman, Mary Fellows and Jack Countryman. Sandwiches, cake and lemonade were served to the little folks and they thoroughly enjoyed the afternoon.

Those present were Lillian Johnson, Helen Winslow, Jessie Wallace, Stella Pendleton, Minnie and Ruth Fellows, Dave Countryman, Carl Johnson, Perry and Percy Williams, Alfred and Everett Lamb, Charles Millard and Jamie Oren, Donald Winslow, George Fellows, Harry Beck, and Nona and Martha Beck.

FEEBLE, AGED WOMAN

Says Vinol Made Her Strong
Grand Saline, Texas.—"I am an aged woman and for a long time was weak and feeble but Vinol restored my health and strength so that I feel almost young again and am doing all my housework. Old people who are weak and feeble should try Vinol and know its merits as I do. It is the best medicine to create strength and for chronic colds I have ever taken."—Mrs. FANNIE RODGERS.
