

Newsy Briefs From All Over the County

LIBERAL.

Jack Relina and D. W. Badger, who went to make improvements on the latter's claim, in the southern part of Clackamas county returned last Friday. They report that they were snow bound for several days. The fourth day, they left the wagon, packed one of the horses and began breaking snow, stopping occasionally to cut the snow that had formed on the dog's chest and throat. The snow was only about two feet deep on the level, but the drifts caused some difficulty, as they were too high for a man on foot to see over in some places. The worst was the other side of Chilcote's mill.

25c PER MONTH IS THE AVERAGE COST TO OPERATING A MITCHELL WATER SYSTEM

BANISH THE BUCKET BRIGADE! The Water Bucket Must Go. It is a back breaker, a back number and a useless consumer of energy.

Think how many miles of steps your wife is obliged to take each day because she does not have the advantages of water under pressure. Is it any wonder that she is dog tired each night. The useless waste of energy in lifting a heavy water bucket each time a little water is needed, the endless trips to the well or spring, these are the things that make for physical breakdown. Think of the chance of your water becoming contaminated and the health of your family destroyed. Think of the danger of fire, a fire that a steady stream of water will quickly kill but when this is not at hand will greedily consume your home, your property and possibly a life. These things can't be thought of in the terms of dollars but the fact is that

YOU'LL GET YOUR MONEY'S WORTH OUT OF A MITCHELL WATER SYSTEM IN MORE WAYS THAN ONE

No Secret About the Mitchell System

The Mitchell System is a simple system, nothing difficult to understand or operate, about it.

The reason it gives better service is because it is made up of better units. In making our outfit we use the Mitchell Pressure Pump, Fountain Tank, it's tested under heavier pressure than you can put on it and is guaranteed for 125 pounds; we use only the MYERS glass valve seat pump. If there is a better pump than the Myers, the most critical pump buyers in America do not know of it. For power, if a gasoline engine is needed, we install a Shaver, the most dependable there is. Its simplicity will appeal to you at once. More than 2,000 units in the Northwest say it's a "good" engine, and so it is.

In fact, our outfit are made up to suit your requirements; we don't attempt to make your requirements suit our outfit. Write us and we will tell you how we do it.

It will make your property more valuable. It will make your family more happy and contented through the enjoyment of the bath, the laundry, the many other conveniences that are dependent upon a supply of running water in the home.

The Mitchell System makes things more convenient in the barnyard and it affords absolute protection against fire by supplying a dependable supply of water under any pressure up to 125 pounds.

It will help preserve the health of your folk, because nothing of foreign nature can get into the water after it has been pumped into the Mitchell Water System.

If your water source is pure, your water will remain pure until it flows from the tap.

The Mitchell Water System furnishes cool water in summer and is proof against freezing in winter. In short, it makes life worth living, and if you will look at the matter from every angle you will come to the conclusion that you simply cannot afford to do without water under pressure in the home.
