

## THE DIVORCE ...MILL...

P. E. Gottschalk alleges cruel and inhuman treatment in a suit against Marie Gottschalk, to whom he was married in Janesville, Minn., September 26, 1901.

Anne F. Chambers brings a charge of cruel and inhuman treatment against C. F. Chambers, whom she married in Yakima, Wash., December 16, 1916.

Effie E. Hanna charges her husband, Aaron A. Hanna, with having deserted her, in her complaint filed for divorce. The couple were married in Anacortes, Wash., June 30, 1907, and have two children, whose custody the mother seeks.

William Swarthout has brought suit against Susie Swarthout. Desertion is the charge. They were married at Falls River, Wis., March 20, 1890, and she alleges that she deserted him at Minneapolis, January, 1917.

Desertion is charged in the suit of Emma M. Bennett, who asks a decree from Claude A. Bennett. Four years after their marriage at South Bend, Wash., April 16, 1913, he left her she claims. Since that time he has not returned to her, and she asks a decree and the custody of the two minor children of the couple.

Although Edward Myers was granted a decree of divorce from Lucile Myers, the defendant was given the custody of the three minor children, and the plaintiff ordered to pay \$50 a month for their care and support, by an order issued from the circuit court by Judge J. U. Campbell.

Divorce decrees were granted Friday to Ida M. Stock from Fred Stock; Erle Linn from Reta Linn; Rose B. Richter from William F. Richter, with the right to resume her maiden name of Rose B. McFar-

## MAKE YOUR SHOES WEAR LONGER

Ten months ago, W. H. Kelley, a lumber salesman of Omaha, had a pair of shoes re-soled with Neolin Soles. Mr. Kelley does much walking and has worn these shoes constantly. He says "they are still good for another ten months of wear."

Good shoe stores carry Neolin-soled shoes in many styles for men, women and children. They cost you no more than shoes that give less wear. Neolin Soles are also available everywhere for re-soles. Remember—these soles are created by science to be what soles should be. They are comfortable and waterproof—as well as long-wearing. They are made by The Goodyear Tire & Rubber Company, Akron, Ohio, who also make Wingfoot Heels—guaranteed to outwear any other heels.

## CANNING A BEEF YEARLING IN 10 HOURS IS RECORD

From the hoof to the can in 10 hours. That is the transformation through which a beef yearling went in a demonstration conducted by the home demonstration agent in Montgomery county, Tex. The yearling was killed in the morning while the agent was getting the canners ready, sterilizing the jars, and preparing the pots for cooking. The meat was cut from the bones in neat, convenient sizes, and that which was to be served as roast beef was dredged in flour and cooked in wash pots of hot grease until brown. The steak was cut in small pieces, cooked in the

wash boiler, packed in the cans, and covered with gravy. While these were sterilizing in another pot, all the bones were boiled and after these were cooked the meat was removed from the bones and ground through a food chopper for hash, loaf, or croquette meat. To the beef stock was added what vegetables were on hand and all excess fat, and this was canned for soup. In the meantime the liver, heart, and tripe had been cooked and was speedily placed in tins. Three canners heated by coal furnaces were used, and by night the entire beef was in cans for future use.

addition, the farmer will have to pay the freight charges to unloading point and any incidental expenses that he may himself incur in connection with the delivery of the nitrate.

The plan used in the sale and distribution of the nitrate will follow in a general way last year's plan. State directors of extension, county agricultural agents, and nitrate committees, composed of local business men, will direct farmers in filing their applications. Application blanks to be used by farmers will be sent to county agents and the members of local committees at an early date. Under the law the nitrate will be sold only for cash, and the farmer

will be required to deposit the money covering the cost of the nitrate for which he applies with the local bank, association, or individual to be designated by the department.

In practically all counties, distribution of the nitrate will be made through county distributors. If the quantity of nitrate that can be secured will fill all orders, each farmer will be allotted the amount applied for; otherwise it will be necessary to allot the nitrate proportionately to those applying for it, so that all may participate on equal terms in its distribution. Arrangements have been made to secure a large quantity of

nitrate, and unless the demands should prove very much greater than anticipated there will be enough nitrate to supply all reasonable requirements. The distribution will be handled, as last year, through the Bureau of Markets.
